Preface

Dear Colleagues

Welcome to the 7th edition of the Marine Stores Guide, the industry standard for maritime procurement. The International Marine Purchasing Association (IMPA) is proud to introduce this edition in its 40th Anniversary year.

This edition builds on the MSG legacy, which for more than four decades has seen the unique six-digit code offer a neutral platform for those in the maritime industry communicate easily and efficiently. Now this fully updated new edition cements its position as the world's leading reference guide.

More than 6,000 codes have been added since the 6th edition, reflecting new regulations, changed industry demands and environmentally friendly items. The MSG contains in excess of 50,000 products and in order to accommodate all content the composition in this edition has been changed.

MSG has previously listed each product title in 5 different languages, however, in this edition, we list the English product title only and have created a Multi Language Index in a booklet, which shows each product name in 6 different languages, English/Spanish/Portuguese/Russian/Chinese/Japanese, and their corresponding pages. We trust you will find this revision of great use.

The ever-growing MSG contents is linked to the Marine Stores Guide Data License, that allows users to specify products quickly and effectively using the unique data that can be imported into a procurement or planned maintenance system.

With illustrations, specifications, product information and comparison tables for major manufacturers the Marine Stores Guide 7th edition provides an invaluable reference for those involved in the maritime industry and we trust you will enjoy this new and improved edition. You will find a separate list with Sections where changes, amendments and new additions have been made.

Recently we found that MSG counterfeit copies are being circulated in the industry, this is naturally illegal and breaks international copyright law. As an attempt of eradicating the illegal copy books, this edition has been made with copy protection on some pages, we hope this will not affect your day to day use of the book.

We are confident you will find this 7th edition to be of great use and value to your business whether you are a ship operator or ship supplier. If you have any comments or recommendations for further improvement or if you find any misprint etc, please visit www.marinestoresguide.com where you will find a customer feedback form and contact details for the MSG team.

Finally, I would like to thank the MSG team at Fuji Trading Co., Ltd. who work relentless- and tirelessly on creating a common industry standard, thus making life easier for people involved in procurement both at sea and at shore.

Susan W. Koefoed

IMPA Chairman and Chief Executive Officer

Summary of New Updates

Section 15 **Cloth & Linen Products:** Flame Retardant Linen products (Bed sheets, Mattresses, Blankets, Pillows & Pillow Cases etc.) are newly included, 9 items, 31 codes.	**Section 17** **Tableware & Galley Utensils:** Ecologo Mark Paper Towels & Dispensers, Contamination Prevention Sponges and 3M (worldwide) products updated.	**Section 19** **Clothing:** Boots & Shoes: New Codes for each UK/European/US/CM standard sizes.
Section 23 **Rigging Equipment & General Deck Items:** Crosby products (from USA) updated.	**Section 27** **Painting Equipment:** Graco products (from Netherlands) updated.	**Section 31** **Safety Protective Gear:** MSA products (from Netherlands) updated. Protective Boilersuits (from Scandia, the Netherlands) - 16 items, 363 codes.
Section 33 **Safety Equipment:** Draeger products (from Singapore) updated. Safety Signs (listing both IMO/ISO symbol) updated. Fire Hoses with prefitted Couplings included - 226 codes. Disposable Gas/Chemical Protection Suits. Marine Fire Stop Systems - 8 items, 59 codes. Water Mist Lance & Mobile Water Monitor (New SOLAS Requirement).	**Section 37** **Nautical Equipment:** Intrinsically Safe Marine Transceivers for Fire Fighters (New SOLAS requirement). Intrinsically Safe Auto Telephones / Marine Battery Less Telephones - 28 codes.	**Section 45** **Petroleum Products:** Biodegradable Grease and Oil as Compliance of US EPA Vessel General Permit 2013.
Section 55 **Cleaning Material & Chemicals:** Biodegradable Products (Cleaning Liquid/Descaler etc.). HOCNF & CEFAS Offshore Cleaning Chemicals. Neutralizer for Ballast Water Chemical Treatment Systems.	**Section 59** **Pneumatic and Electrical Tools:** Various pneumatic and electrical tools updated suggested by worldwide manufacturers from Dalseide Shipping Services AS (Norway), Holger Clasen (Germany), Trelawny (U.K.), Nilfisk-Densin (Singapore), etc.	**Section 65** **Measuring Tools:** Various measuring tools updated suggested by worldwide manufacturers from SIKA (Germany), Coltraco Ultrasonics Limited (UK), Atlas Marine Services (Singapore) etc.
Section 67 **Metal Sheets, Bars, etc.:** Metal bars: New Codes for various standard lengths available in Europe, U.S., Singapore and Japan.	**Section 81** **Packing & Jointing:** Various general repair products updated suggested by worldwide manufacturers from Henkel (worldwide), Wencon (Denmark), Weicon GmbH (Germany), Indumar Products (U.S.A.).	**Section 85** **Welding Equipment:** New gas equipment added: Gas welding & cutting torches, TIG Welder, Plasma Cutting Machines etc.

Using the Guide

1. This is a reference guide for ordering items which are used on board ships. The guide is designed to be easily understood by people of different cultures and languages, as well as to promote the business between them. The items are coded and illustrated to ease identification between the shipowner or shipboard personnel and the ship supplier. In order to avoid costly misunderstandings when ordering products, please specify the appropriate code number, description, unit and quantity.

2. The guide is not listing to promote the products or particular manufacturers and for this reason brand names have been excluded wherever possible except where their inclusion is absolutely necessary for the identification of the item. In certain cases there are a number of manufacturers for one product and the availability for each manufacturers' products vary in different parts of the world. In such cases, several manufacturers' names and products types are listed to serve as a reference for the types of products available internationally, one of which may be chosen based upon the country where the product will be purchased.

3. **Names:**
The most common name possible is used for each product with any additional names listed in parenthesis under the product title. Spelling has not been unified: English and U.S. spellings are used in accordance with each particular case. Spanish, Russian, Chinese and Japanese products' titles are appended in a separate booklet for easy reference.

4. **Code Numbers:**
One code number has been allocated to each item, even when that item belongs to more than one product group. Each code number has the following structure:

Six digits	xx	xx	xx	a. Section Index (group)
	(a)	(b)	(c)	b. Category within the section index
				c. Specification (size)

5. **Indexes:**
   a. Sectional Index: At the beginning of the guide we have provided a sectional index which indicates each product section with an illustration and the number of that section. The section numbers are also located on page tabs so that you can open the guide to the section you require as quickly as possible.

   b. Alphabetical Index: The quickest way to locate products. The name of products consisting of two words can be found under the first letter of either of the two words.

   c. Category Index: At the beginning of all sections we have provided category indexes which list the products' category names with pictures of typical product in the order in which they appear in the section, each with the page number in which they are located.

   d. Code Index: At the following page to the category index which contain a wide variety of products and contain some code numbers located not in order, we have provided code index which lists all code numbers in the order in which they appear within the section, each with the page number in which they are located.

Sec 17: Tableware & Galley Utensils	Sec 21: Rope & Hawsers
Sec 23: Rigging Equipment & General Deck Items	Sec 33: Safety Equipment
Sec 37: Nautical Equipment	Sec 39: Medicine
Sec 47: Stationery	Sec 59: Pneumatic & Electrical Tools
Sec 65: Measuring Tools	Sec 75 Valves and Cocks
Sec 79: Electrical Equipment	Sec 81: Packing & Jointing

6. **Comparison Tables:**
Comparison tables have been provided to show the appropriate specifications and model types or similar goods which are produced by different manufacturers. The contents are to serve only as a reference when choosing the product of certain manufacturer. In some cases code numbers are not provided for each of the manufactures' products. A representative code is provided based upon the size or specifications necessary for ordering the appropriate item. When ordering an item from a specific manufacturer, the representative code, as well as the manufacturers' name and the model number of the product should be specified clearly on your order form.

7. **Measurements:**
The metric system has been used for lengths and weights with a few exceptions. For pressure, the weight metric system kgf/cm² has been used, sometimes in combination with SI (MPa). An SI conversion table can be found in the measurement conversion section at he back of the guide.

8. **Standards:**
Standards from all major industrial standard institutes have been included wherever possible. ANSI, DIN and JIS standards are most commonly listed for items like valves, flanges, etc.

9. **Liability:**
IMPA in co-operation with Fuji Trading, has striven to fashion The IMPA Marine Stores Guide into a highly professional tool. However, it does not guarantee the exhaustiveness of the listings nor the veracity of the information and advertising inserts contained in The IMPA Marine Stores Guide. Therefore IMPA and Fuji Trading declines all responsibility due to errors or omissions found in the Guide. Reproduction of the contents, translation of all or part of the publication, use of names, addresses, or details of the index of products and services for any purpose other than the normal and accepted use of a publication are prohibited and may subject the offender to prosecution.

ORDER BY CODED NUMBER - IT WILL SAVE YOU TRANSACTION TIME.

SEND A PHOTOCOPY OF AN ILLUSTRATION - IT WILL AVOID MISTAKES.

Non-ironing Bed Sheets

Non-iron blend of 50% polyester, 50% cotton, 32 denier, 165 threads per square inch. This fabric blend is smoother and softer than cotton, machine washable and tumbler dry.

Unit Per Sht.

CODE	15 01 81	15 01 82
Size mm	1,370 x 2,300	1,828 x 2,500

Mattresses

Foam Rubber

Spring

There are two types of mattress filling constructions available: foam rubber type and spring type. All materials, regardless of construction, are covered with a blue and white striped, rigid cotton cloth.

Standard sizes are listed below. If the size you require is not listed, please measure the inside length and width of the bedframe you are using.

Unit Per Pc.

CODE	Type	Size mm		
		Width	Length	Height
15 02 01	Foam Rubber	900	2,000	150
02		1,350	2,000	150
15 02 06	Spring	900	2,000	150
07		1,350	2,000	150

Mattresses and Foundations

Individual Spring Type

Mattresses :

Quality, longlife mattress made with individually wrapped coils providing even support and comfort to all parts of the body. A double sized mattress consists of more than 890 coils. The cover is a heavily padded, prebuilt, boarder taped box lining. The surface is button tuffed with ventilators and chord handles at each side.

Unit Per Pc.

CODE	Type	Size mm			Numbers of Pocket coils
		Width	Length	Height	
15 02 31	Single	970	1,980	170	594
32	Semi Double	1,200	1,980	170	759
33	Double	1,370	1,980	170	891
34	Queen	1,520	1,980	170	1,023

Foundations (Box Spring)

Box frame composed of specially shaped, heavy gauge tempered cone coils which are wire tied and mounted on a strong seasoned timber base. The frame is insulated with a firm 100% cotton pad and can be fitted with legs, castors, or special angle iron frames.

Unit Per Pc.

CODE	Type	Size mm			Height with Leg	Nos. of Coils
		Width	Length	Height		
15 02 41	Single	960	1,970	195	332 mm	55
42	Semi Double	1,190	1,970	195	332 mm	77
43	Double	1,360	1,970	195	332 mm	88
44	Queen	1,510	1,970	195	332 mm	99

Mattress Covers

White or blue covers tightly woven of 100% cotton fabric, 20 denier, 120 threads per square inch with seamed edges for more durable wear. The length and width of the covers are usually 50 mm larger than the mattress to be covered. When ordering, please specify the size of mattress to be covered.

When ordering, please specify the following:

How to order: 15 - 02 - 51

Name —— Mattress Cover
×
Material —— Cotton
×
Colour —— White or Blue
×
Size —— Size of Mattress to be covered

Beddings
Duvet = Continental quilt
Duvet Cover = Cover for Duvet or Quilt
Counterpane = Bed spread

Pillows

Filled with kapok, shredded polyurethane foam or chicken or duck feather and covered in linen like striped cotton tick. Standard sizes are listed below.

15 02 81	Pillow, polyurethan foam,	600 x 400 mm	Pc.
82	Pillow, kapok,	600 x 400 mm	"
83	Pillow, feather,	690 x 460 mm	"

Pillow Cases

Available in blue or white 100% cotton woven fabric. The stitch is 131 threads per square inch. The sizes below fit all standard pillows.

15 02 86	Pillow case white, 750 x 500 x 200 mm	Pc.
87	Pillow case blue, 750 x 500 x 200 mm	"

Blankets

Wool 100% Blankets

Loom woven blanket of 100% wool. Shedding, matting, and piling resistant.

Unit Per Sht.

CODE	Size mm	Colour
15 03 01 02 03	1,400 × 2,000	White Camel Blue

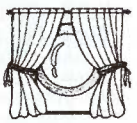
Porthole Curtains

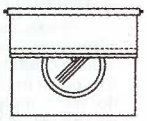


Made to order. Pairs available in rod-pocketed or pinch pleated styles with hooks or rings. When ordering, please ask for fabric samples and specify details.

How to order : 15 - 07 - 12

Curtain, porthole, size x type x material (Pr.)

Roller Blinders



For covering a porthole. Made to order. When ordering, please specify the width, length and material required.

How to order : 15 - 07 - 13

Roller blinder, width x length x material (Set)

How to measure shades for replacement.

Specify on your order "tip-to tip". If you measure the fabric width only, be sure to specify so on your order.

Shower Curtains

Shower bath curtain in coloured, durable, waterproof vinyl with metal grommets. Standard size is 1,000 x 1,900 mm or 1,800 x 2,000 mm with 8 - 12 grommets. When ordering, please specify the size and colour required

How to order : 15 - 07 - 14

Curtain, shower, vinyl, size x colour (Pc.)

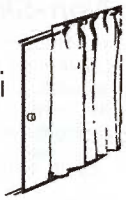
Adjustable Rails

Chromed Adjustable Rails is also available, Standard size is 22mm dia with range 1,100mm to 2,000mm length.

How to order : 15 - 07 - 17

Adjustable rails, chrome, dia and length (Pc.)

Door Curtains



For use on the cabin door. Made to order. When ordering, please specify the size, material and other necessary information.

How to order : 15 - 07 - 15

Door curtain, size x material x type (Pc. or Pr.)

Flame Retardant Curtains

Textile fibre which significantly reduces the risk of fire by being permanently fire retardant. These curtains also withstand industrial cleaning processes.

When ordering, please specify the width, length and materials required.

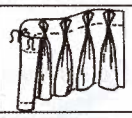
How to order : 15 - 07 - 16

Curtain, flame retardant, width x length x materials (Set)

Description of Drapery Types

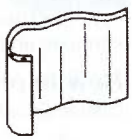
The followings are reference for ordering the formation of drapery.

·Pinch-Plated #D10010



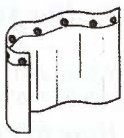
Two or three finger pleats sewn into the drape to create folds. Metal hooks included (zinc-plated). One width will cover up to 30" wide (pleated). Widths can be joined for wider areas.

·Snap-Top #D10020



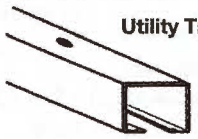
Snap tape sewn along the top of the back of the curtain. Snaps 4-1/4" O.C. (11mm). Easily snaps onto nylon track slides. No hooks to become lost, curtain always hangs straight. Easily removed and rehung for cleaning. Curtains are custom made to your exact measurements. Can be made unlined or blackout lined. Best suited for Bunk or Door Curtains.

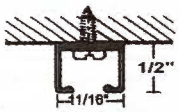
·Grommet Top Drape #D10030



Brass or zinc grommets in double folded top. Grommets spaced 6" on center. Attaches to track #9046 or #94004 with hook slides. One width will cover up to 50" wide (flat). Widths can be joined for wider areas. Can be made unlined or blackout lined. Best suited for Bunk or Door Curtains.

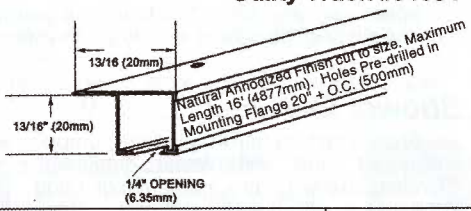
Utility Track #9046



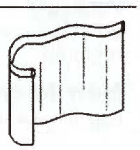


Holes Approx 20" on Center, Finish: White or Natural Aluminum. Custom Cut to Length, Max, Length 16 ft.

Utility Track #94004



·Rod Pocket Drape #D10040

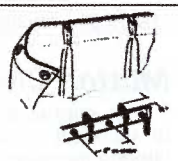


1-1/2" Pocket sewn into the top of drape. Used with 3/8" solid rods #9-002 or #9-004 (through pocket). One width will cover up to 50" wide (flat). Width can be joined for wider areas. Can be made unlined or blackout lined. Best suited for Porthole or Door Curtains.

3/8" SOLID RODDING

9 - 002 STEEL (PAINTED BRASS)
9- 004 ALUMINUM (BRASS PLATED)

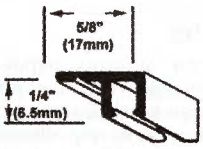
·Marine Fold Drape #D10050



Made with snap tape, 3/4" pleats sewn into top. Snaps are 6" on center. Used with track #M-110 (snap slides). One width will cover up to 36" wide (pleated). Widths can be joined for wider areas. Can be made unlined or blackout lined. Best suited for Porthole Curtains.

SMALL UTILITY TRACK #M-110

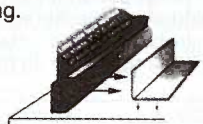
Remark: Information and illustrations are supplied from Metro Marine Design Associates.



Solar Shades (Spring Roller Type)

An universal locking bracket type solar shades for ship's bridge and wheelhouse windows. The screen has 100% optical clarity and industrial strength is 5 MILS. The surface of screen is scratch resistant by coating on inside surface, and there are two patterns of screen rolling method, "Spring roller" or "Clutch springless roller". Both 3" strips (Outside mount) and 3" flanges (Inside mount) are included with every order, so that the hem bar of the screen and flanges attached to window recess are secured with Velcro tape from swinging. Please specify the size of window, type of screen rolling method, etc. Please ask more information to your local distributors when ordering.

Spring Roller Clutch Springless Roller



Valveco Hold-down System

Spring Roller :

Pull hem-bar to raise and lower shade.

Clutch Springless Roller :

Loop of nylon bead-chain rotates roller to raise or lower shade.

Anti-shatter Films (Blast Mitigation)

Anti-shatter film provides protection from flying glass in the event of a natural disaster or demolition by pirates. It forms an almost invisible protective coating on the glass surface. This window film should only be applied to flat glass. It should never be applied to polycarbonate (plastic). Adhesive window films are constructed from a multi-lamination of micro-thin polyester. They also have a scratch resistant coating to protect the film surface and enhance durability (except films for external application). The film should be cut 10 mm over size in both dimensions, and trim around the oversized edges using a sharp trimming knife after squeezed the film.

15 08 21	Film, anti-shatter (Blast mitigation), 200 micron, Width 152 cm x Length 15 mtr	Roll

32. Electrical Cooking Appliances

Home Electrical Appliances

As a wide variety of models from different manufacturers are available, it is almost impossible to code all these models with their detailed specifications. For this reason coding has been done only for the model names and their respective voltages. In some cases the capacity has also been coded. When ordering, please write for more details or ask our representatives for product catalogues or other information.

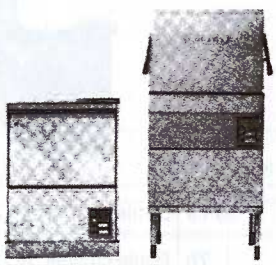
Dish Washers for Marine Use

Suitable for washing dishware, glassware, and cutlery. Available in various types such as the corner type, straight type, and front open type. However, the most popular type is the undercounter, or free standing front door type (shown in the illustration). When ordering, please specify the points listed below:



Undercounter Front Door

Free Standing Front Door

How to order: 17 - 51 - 81

1) Name of machine
2) Voltage
3) Type
4) Used with hot water or cold water
5) Washing capacity (Rack/hour)
6) Size (If space is limited)
7) Further details if any

For example

17 51 81	Electric dish washer. AC 220V, 3Φ phase undercounter for use with hot water, max height: 1,000 mm	Set

Standard rack size is 502 x 502 mm, but it depends on the model. For a standard space rack, please refer to code 17-29-85 and so on.

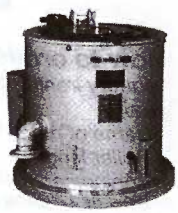
Laundry Extractors for Marine Use



This marine use extractor is a high performance machine offering fast, guaranteed stability in water extraction. The stainless steel construction eliminates the problem of stubborn corrosion at sea.

When ordering, please specify the points listed below:

How to order: CODE

Laundry extractor, 110V or 220V with further details:
1) Name of machine, 2)Dry cloth capacity, 3)Size (If space is limited)

Example of Order

Laundry extractor, AC 220V, 3 phase, 60 Hz, 0.75 kw, Dry cloth capacity: 15 kgs, Maximum height: 1,200 mm

Unit Per Set

CODE	Voltage	CODE	Voltage

Laundry Ironing Machines

for Marine Use

Designed for ocean-going vessels with large laundry capacity. The operation of the machine is very simple, and large installation space is not necessary.

How to order: CODE

Laundry ironing machine, 110V or 220V with further details:
1) Name of machine
2) Roller length
3) Ironing capacity
4) Size (If space is limited)

Example of Order

Laundry ironing machine,
AC 220V
3 phase
60 Hz
0.2 Kw
Roller length: 1,450 mm
Ironing capacity: 20-30 sht/hour
Width: Up to 1,950 mm

Unit Per Set

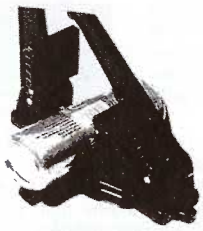
CODE	Voltage	CODE	Voltage
17 55 61	110 V	**17 55 62**	220 V

36. Garbage Disposers

Can Crushers (Can Compactors)

Units designed to crush cans before recycling or disposal. Electric or manually operated models are available.

Machines of various capacities are available. When ordering, please specify the model name, the capacity (number of cans crushed per hour), and the dimensions of the machine if space is limited.



Manual

Electrical

Unit Per Set

Manual Operation		Electrical Operation	
CODE	Material	CODE	Voltage

Bottle Crushers
(Glass Compactors)

Unit designed to crush bottles for storage before recycling or disposal. Machines of various capacities are available.

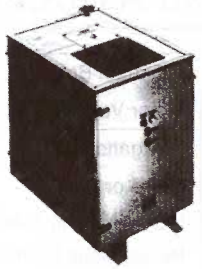
When ordering, please specify the capacity (number of bottles crushed per hour), the model name, and the dimensions of the machine if space is limited.

17 55 75	Bottle crusher, AC 110 V with further details	Set
76	Bottle crusher, AC 220 V with further details	"

Refuse Disposers

High powered disposer which pulverizes all types of marine refuse into small pieces for disposal. Use of this kind of equipment is necessary for compliance with the MARPOL 1973/78 ANNEX V regulation which states that the disposal of refuse will only be permitted in areas 3 nautical miles or more from shore and when the refuse has been broken down into particles capable of passing through an opening 25 mm or less in size.

Machines of various capacities are available. When ordering, please specify the model name, the capacity of refuse disposed required, and the dimensions of the unit if space is limited.



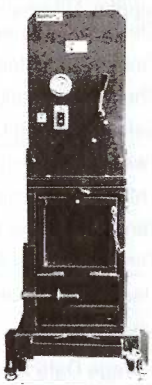
17 55 81	Refuse disposer, AC 110 V with further details	Set
82	Refuse disposer, AC 220 V with further details	"

Garbage Compactors

An efficient, mobile compactor essential for marine use. It compacts refuse into small, easy to accommodate packages, drastically reducing the need to dump refuse at sea. A hydraulic pump unit creates high compaction forces at low amperage.

The machine cubes general wastes, bales paper, cardboard, bags, and light weight mixed wastes, and boxes organic waste. The inner and outer cabinet linings are made of stainless steel to resist corrosion.

Machines of various capacities are available. When ordering, please specify the model name, the capacity (volume of refuse), and the dimensions of the machine if space is limited.



17 55 84	Garbage compactor, AC 110 V with further details	Set
85	Garbage compactor, AC 220 V with further details	"

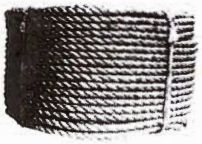
Marine Rope

Please pay special attention to the following matters when ordering ropes.

1. Breaking strength is a guide line only, based upon the rope size.
2. Specifications are based on tests of new, unused ropes of current manufacture.
3. Once a rope is put into service, it is continuously deteriorating.
4. Manila rope will deteriorate in storage even under ideal conditions.
5. All weights shown in this catalogue are approximate net rope weights.

3-Strand Manila Rope



A heavy duty all purpose rope. It provides the necessary tensile strength for safe operations. When ordering, please indicate the correct circumference or diameter of the rope to avoid misdeliveries.

8-Strand Polypropylene Mono-Filament Hawser

Often called a cross or square rope. Suited well for use as a mooring rope because it does not kink, slip, absorb water, and is easy to handle.

Supplied in standard cut lengths of 200 mtr/110 fathoms or 220 mtr/120 fathoms. Ropes of other lengths must be made to order.

When ordering, please specify whether eyes should be spliced on one or both ends of the rope, and if the eyes should be covered with canvas or leather.

Manufacturers certificate is attached to each rope. Lloyd's, ABS, and NK certificates are available upon request.

How to order: CODE

Hawser, polypropylene monofilament, 8-strand, DIAM x LENGTH

Mooring hawsers will be normally supplied with standard size of eye-splice at both ends.

8-Strand Polypropylene Split-Film Hawsers

Known as a cross braided or square hawser. This rope is unique as a mooring hawser because it does not kink, slip, or absorb water, is durable and easy to handle.

When ordering, please indicate if one or both ends of the rope should be eye spliced and covered with canvas or leather.

Also, please specify if a manufacturer's certificate will be required.

3-Strand Nylon Rope

Made of continuous filament while yarn woven into a three strand rope. The fibres are elastic, moisture proof, and highly abrasion resistant. Standard coil length is 200 or 220 mtr. Ropes of other lengths must be made to order.

How to order: CODE

Nylon rope, 3-strand, DIAM x LENGTH

8-Strand Nylon Hawsers

Designed for sea berth mooring, towing, and other heavy duty jobs. This rope will not kink and is highly durable.

When ordering, please Indicate the number of eye spilces and if a canvas or leather cover is required for the eyes. Also, please indicate if a certificate is required.

How to order: CODE

Hawser, nylon, 8-strand, DIAM x LENGTH

Mooring hawsers will be normally supplied with standard size of eye-spilce at both ends.

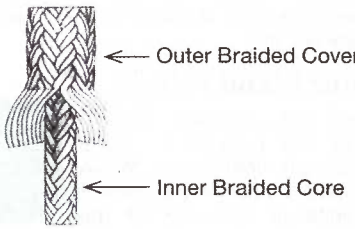
Double Braided Hawsers

Rope construction designed with a braided inner core which is covered with another braided outer sheath. Usually made of nylon, polypropylene multifilament, and polyester, or a combination of those materials.

The rope can be provided with either a nylon or polypropylene inner core and a polyester outer sheath. Standard length of the coil is 200 or 220 mtr. When ordering, please specify the coil length and the material brand required.

The Illustration of Double Braided Construction



Features of Double Braided Hawsers

* 30% higher breaking strength than the 3 or 8 strand rope.
* 30% less stretching/elongation than the 3 or 8 strand ropes.
* Superior abrasion resistance.
* High flexibility and easy handling.
* Splices easily.

High Performance Mooring Rope

8-Strand Dan Line Super Polypropylene Rope

The durability of this rope does not decrease as the strength of the load is increased. It is suitable to use for high tension work loads, for mooring, or as a towing line.

* 30 % higher breaking strength than polypropylene.
* Light weight: with a specific gravity of 0.91, it will float in water.
* Will become elongated when necessary to absorb shocks.
* Has superior abrasion resistance.

* 3-strand ropes available if required.

Tipto-Eight® 8-Strand Mooring Rope

Tipto®Eight is based on specially developed "Tipto®Eight"-high tenacity yarns which provide excellent resistance to UV rays and abrasion as well as having a higher breaking load than normal polypropylene 8-strand rope. Tipto®Eight floats with a specific gravity of 0.93. The standard length is 220 mtr per coil.

* Specific Gravity : 0.93
* Construction : 8-strand
* UV-Resistance : Very Good
* TCLL Value : 70.7%
* Abrasion Resistance : Very Good
* Colour : Yellow
* Chemical Resistance : Good
* Marker Yarn : Orange
* Melting Point : approx. 140°C
* Water Absorption : 0%

Karat® Maxi Plus Mooring Rope 8-strand

Karat® Maxi Plus is a new rope replacing Karat® Maxi, and has the same properties but offer the higher MBL and much better abrasion resistance. Karat® Maxi Plus has the following performance features, *Highest strength of the conventional permanently floating mooring ropes, *High abrasion resistance, *No loss of strength when wet,

*High energy absorption, *Very low snap-back effect, *Manufactured acc. to ISO and OCIMF, *EStalon™ is a polyester/polypropylene melt mixture, *Eurolefin™ in the outer yarn.

When ordering, please specify the diam and length of the rope and if one or both ends of the rope should be eye spliced.

Specifications

* Melting Point	: 185°C
* Spec, Gravity	: 0.99
* Water Absorption	: 0%
* Reduction of MBL when wet	: 0%
* Bending Ratio, Dynamic ISO 3730	: 9:1
* Elongation, new rope	: 18%
* Elongation broken-in ropes (15-20 operations)	: 11%
* On request: Larger diameter, different colour, 12-strand

Atlas Mooring Rope 6-Strand Cross-laid

Atlas rope is a synthetic fiber rope formed from 100 % nylon monofilament and continuous filament yarns. It has a greater tendency to elongate than steel ropes and therefore is less susceptible to breakage from shock tension strain. Also, compared to steel ropes, it requires much less maintenance and is considerably lighter and easier to handle, facilitating rapid mooring.

Atlas rope is generally easy to handle and can be spliced easily allowing for any type adjustment or moderation to be done on board. This rope has excellent resistance to abrasion and will become more flexible and easier to handle with extensive use. Standard length is 220 mtr. When ordering, please specify the diam and length of the rope and if one or both ends of the rope should be eye spliced. Relative density: 1.14.

Karat® WinchlineTM 6-Strand Mooring Rope

Combined the unique characteristics of the high strength Karat®-fibre with a 6-strand "wire rope" lay. The outer layer of each strand comprises a special combination of Nylon monofilaments and Nylon multifilaments. This rope is specially designed to be used on self-tensioning winches. Special characteristics are high resistance to deformation due to compact lay - no crushing or jamming on winch, high abrasion resistance and low elongation, excellent fatigue properties. When ordering, please specify the diam and length of the rope and if one or both ends of the rope should be eye spliced.

Specifications

* Melting Point	: 250°C

Buoyant Winchline™ 6-Strand Mooring Rope

A unique fibre rope with a 6-strand "wire rope lay". The outer layer of each strand comprises a special combination of Nylon monofilaments and PP multifilaments. Buoyant Winchline™ is designed to be permanently floating and to be used on selftensioning winches. Special characteristics are light weight (floats), high resistance to deformation, no crushing or jamming on winch, high abrasion resistance, excellent fatigue properties giving longer lifetime, high strength which gives better safety, and maintenance free.

When ordering, please specify the diam and length of the rope and if one or both ends of the rope should be eye spliced.

Specifications

* Melting Point	:	250/165°C
* Spec, Gravity	:	0.99
* Water Absorption	:	2%
* Reduction of MBL when wet	:	1%
* Bending Ratio, Dynamic ISO 3730	:	12:1
* Elongation, new rope	:	23%
* Elongation, broken-in ropes (15-20 operations)	:	15%

Tipto®Winchline 7-strand Fibre Mooring Rope

A dedicated floating winchline, developed especially to be used on single drum, self-tensioning winches. The load-bearing 7-strand core combines high strength and low elongation. The non-load-bearing braided jacket provides protection to the core (longer life-time) and increases crew-safety by minimizing the risk of snap-back. The smooth operation of the vessel is increased by the ease of handling of the rope due to its low weight and the floating characteristic of the rope. Standard length is 220 mtr per coil. When ordering please specify the diam and length of the rope and if one or both ends of the rope should be eye spliced.

Specifications

Specific Gravity	0.93:	Construction	7-strand +jacket
UV-resistance	Very good		
Abrasion Resistance	Very good	TCLL Value	70.7%
Chemical Resistance	Good	Colour	Yellow
Elongation	See graph	Marker Yarn	Orange
Melting Point	Approx. 140°C	Water-absorption	0%
		On Request	Larger Diameter

CE Compound Mooring Rope

Newly developed mooring rope, made from complex material, which offers excellent abrasion resistance and fatigue resistance. Due to the lighter specific gravity than water, will float and is easier to handle.

N.K. (Nippon Kaiji Kyokai) certificate will be attached.

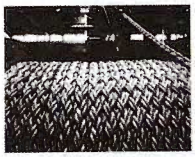
Marine Power 12-Strand Mooring Rope



Made by combination of polyester multi-filament and special polypropylene mono-filament which braided with 6 pairs of two strands together. The braided surface is smoother than conventional 8-strand rope makes more better durability in abrasion.

The 12 strands rope produced 20% higher tensile strength than conventional 8-strand of rope and longer pitch about 1.5 times than strander diameter makes excellent characteristics in handling.

Ordering can be made by indicate clearly the following items ; Size (Diameter), length (Standard length 200mtr – the length of rope will be requested by customer) and size of eye-splice (Whether eyes should be spliced on one or both ends of the rope).

Mooring Rope 8-Strand "Marine-Combi-Rope"

Made by mixing of polyester multi-filament (White color) and special polypropylene mono-filament (Orange color) which braided with 8 pairs of strands together. By the mixing of these two elements makes well balanced in floating, abrasion and cost saving.

The color of white polyester and orange of polypropylene mono-filament can be seen clearly in the water. One of the most stronger rope among water-floating product in 8-strand rope category.

Ordering can be made by indicate clearly the following items; Size (Diameter), length (Standard length 200mtr-the length of rope will be requested by customer) and size of eye-splice (Whether eyes should be spliced on one or both ends of the rope).

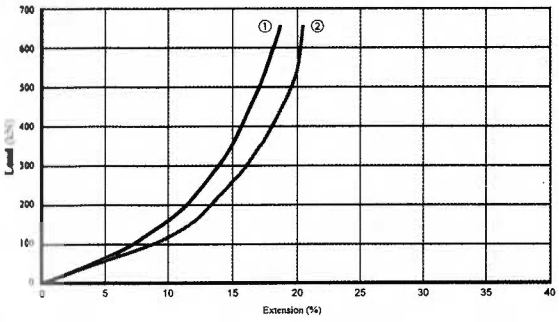
Mooring Rope

Polypropylene/Polyester Composite Rope "Bell Mix Rope"

A composite rope with Polypropylene and Polyester with the following remarkable characteristics ; Low elastic elongation, stronger resistance to cut and abrasion, easy to handle and process of eye-splice, etc. The rope keeps same strength whichever in air or in sea, and it floats. There are three types of braided construction as illustrated below. Standard length is 200 mtr. When ordering, please specify the diam and length of the rope, and one or both ends of the rope should be eye spliced.

	12-strand (2 × 6) Southern Cross
	12-strand (1 × 12) Southern Braid

Load Elongation Curve



① Bell Mix Southern Braid (1×12)

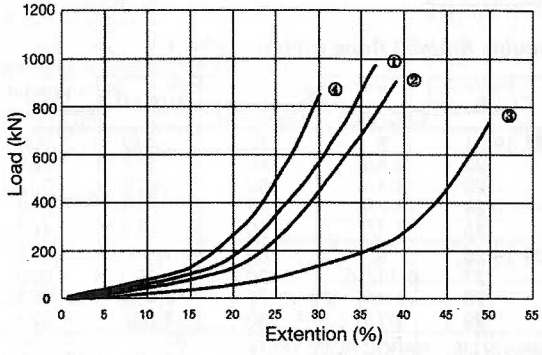
Mooring Ropes

High Strength Nylon "Unilon"

Compared to former nylon ropes, Unilon rope produces 30% higher strength, providing substantially better service life. It keeps softness even after long period of operation, and keeps endurance to direct ray, inclement climate, and cold climate. Available three types of construction as illustrated below. Standard length is 200 mtr. When ordering, please specify the diam and length of the rope, and one or both ends of the rope should be eye spliced.

	8-strand (2 x 4) Cross
	12-strand (2 x 6) Southern Cross
	Doubel Braided

Load Elongation Curve



① Unilon Double Braid — Rope diam. 60 mm. B/S 958 kN
② Unilon Southern Cross (2×6) — Rope diam. 60 mm. B/S 890 kN
③ Unilon Cross (2×4) — Rope diam. 60 mm. B/S 754 kN
④ UnimixG Doubel Braid — Rope diam. 60 mm, B/S 835 kN

Properties: Union (UnimixG), Gravity 1.14 (1.21),
Melting point 180°C

Mooring Line 8-strand Eurofloat® Premium

A floating high performance rope constructed from high strength polypropylene and polyester yarns. Produced under the latest EN, ISO standards and complies with the OCIMF recommendations. The floating characteristic makes it a safe rope to work with and the high TCLL value ensures an excellent fatigue resistance. Standard length is 220 mtr per coil.

Euroflex® 8-strand Plaited Fibre Mooring Rope

An excellent mooring- and towing rope with higher strength AND smaller diameter resulting in an easy, light weighted rope, with a very good abrasion resistance and no lost of strength in wet condition. Standard length is 220 mtr per coil. This in combination with a perfect TCLL value (79.6%) and a high energy absorption make this rope one of the best ropes available today. OCIMF recommended rope.

Nika-Cord® 8 Strand Rope

Constructed using double twisted yarns of NIKA-steel® fibers, a special melt mixture of high quality European raw materials (Polypropylene, High Density Polyethylene, UV stabilizer and other improving elements).

They exhibit much higher tenacity and abrasion resistance than most conventional monofilament and flat Polypropylene and Polyolefin fibers.

The double twisting process offers improved performance in dynamic and shock loading conditions while maximizing the resistance against internal and external abrasion.

Constructed according to ISO 10572 and they comply with the latest regulations and recommendations of OCIMF for the safe mooring of tankers.

Applications: Mooring, Anchoring, Messenger Lines, Tow Lines, Tails

* Specific gravity : 0.92 (Floating)
* Melting point : 165 °C
* Elongation at breaking : 18%
* Chemical resistance to alkali : Good
* Chemical resistance to organic solvent : Excellent
* Chemical resistance to acid : Excellent
* Strength loss in NaOH and H_2SO_4 in high concentration and temperature

Nikaforce® Polypropylene Mooring Rope

NIKAFORCE® ropes exhibit:

- Exceptional strength to weight ratio
- High breaking load exceeding Cordage Institute specification CI 1901 and EN ISO 10572*1 specs.
- High abrasion resistance
- U.V. stabilization to 160 KLY (Suitable for Florida, U.S.A. & Dubai, UAE sunshine).
- High shock & dynamic load absorption, with filaments of equal thickness and tensile strength.
- Electronically controlled even load distribution.
- Ease of handling.

*1 EN ISO 10572 has replaced EN 14687 standard

Only virgin bright white European raw materials used. Filament tensile strength exceeds EN and ISO specifications. Recommended working load limit: 20% of the minimum breaking load. Approved by ABS, B.V., L.R.S., G.L.

Ropes are also according to the latest regulations and recommendations of OCIMF for the safe mooring of tankers.

Ordering can be made by indicating clearly the following items; Preferable number of strands (8-strands, 12 strands or 24 strands), Size (Diameter), Length (Standard length 220 mtr – the length of rope will be specified by customer) and size of eye-splice (Whether eyes should be spliced on one or both ends of the rope).

Applications : Mooring, Anchoring, Towing, Tails.
Melting Point : 165°C
Elongation at Breaking : 15%
Specific Gravity : 0.92 (Floating)

Improved Mixed "NIKASTEEL®" 12/24 Strand Rope, Polyester/NIKA STEEL Combination

Constructed using specially twisted yarns of NIKA-Steel® fibers with High Tenacity Polyester fibers (in a 60% - 40% w/w combination respectively) in the outer layers of the strand. Each strand is composed of mixed NIKA-Steel®/ HT Polyester yarns in the outer layers and NIKA-Steel® yarns in the core layer.

Their mechanically balanced structure, accordant to EN ISO 10556, protects the strands' outer layers against abrasion while achieving high breaking strengths.

Produced according to international standards such as EN ISO 10556.

Comply with the latest regulations and recommendations of OCIMF for the safe mooring of tankers.

APPLICATIONS: MOORING – ANCHORING – TAILS

Specific gravity: 0.99 (Floating)
Average Polyester w/w percentage: 25%
Melting point: 165°C (NIKA-STEEL®) / 265°C (PES)
Elongation at breaking: 15%-18%
Chemical resistance to ALKALI: VERY GOOD
Chemical resistance to ORGANIC SOLVENT: VERY GOOD
Chemical resistance to ACID: EXCELLENT.
Strength loss in NaOH and H_2SO_4 in high concentration and temperature

Mooring Rope "Timm Master 8"

Timm Master 8 has moored over 6,000 vessels worldwide, has a class leading strength-to-weight ratio and excellent UV resistance. This 8-strand mixed composition floating rope combines mixed polyolefin Timm Signal B5 yarn and high tenacity polyester. A reliable, flexible, low torque and tough mooring rope suitable for all ship types.

The product holds DNV GL type approval and has a standard length of 220m, with 1.8m PES protected eye both ends.

Material	: Mixed polymer rope (Polyolefin/HT Polyester)
Eyes	: 1.8m protected eyes (PES)
Colour	: White with 3 black stripes
Melting Point	: 165°C
Specific Gravity	: 0.99 (floating)
Water Absorption	: <1%
Elongation	: 18% at break

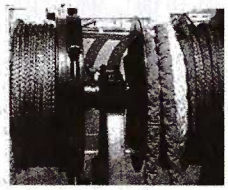
Ultra High Molecular Weight Polyethylene (UHMWPE) Fiber Mooring Rope 12-Strand "AmSteel®-Blue", Dyneema SK78



AmSteel®-Blue is a proven cost-saving replacement for wire rope in key applications where strength, weight and safety are important.

Recognized worldwide as the standard for single braid HMPE ropes, AmSteel®-Blue is easily spliced and inspected. These features, with the superior wear and tension fatigue of Dyneema SK-78 fiber and Samthane coating, are combined in a torque-free 12-strand single braid design. The result is an industry leading braided synthetic rope that outlasts wire rope and has proven operator cost saving benefits.

AmSteel®-Blue, at only 1/7th the weight of wire, requires less committed crew for most operations, significantly reduces mooring times and tug costs, and improves crew safety. The reduced weight, high strength and low stretch also make it ideal for tug assist/maneuvering lines, resulting in quick, efficient connections and controlled response. AmSteel®-Blue is proven to provide longer service life and reduced costs when compared to wire in a variety of applications.

Standardized working pendants are available for mooring and tug assist lines. It is recommended for split drum winch applications, not recommended for use on H-bitts, capstans or cleats if surging or rendering the rope is required.

Standard length is 200 mtr. When ordering, please specify the diam and length of the rope, and one or both ends of the rope should be eye spliced.

Features:

- Uses Dyneema SK-78
- A Size for size strength replacement for wire rope at only 1/7th the weight
- Torque-free, very flexible, easy to handle
- Similar elastic elongation to wire rope
- Easily inspected or field spliced
- Floats

Applications

- Primary vessel mooring lines
- Face and wing wires for push tugs
- Emergency and seismic tow lines

Technical Specifications

Specific Gravity: 0.98 (Floats)
Elastic Elongation %: At % of break strength

Tug and Mooring Line, 8-strand

Blend of Polyester & Dyneema SK-75, "Quantum-8™"

Quantum-8 was developed to meet customer requests for a light-weight, high-strength, torque-free rope that can float and grip a winch or capstan. Quantum-8 is a unique upgrade. This patented construction utilizes Samson's exclusive DPX™ fiber technology. Samson's proven DPX fiber technology has the best abrasion and cut resistance of all high performance fibers, so rope durability is excellent. Quantum-8 has multiple marine uses.

It can be used as a high performance tug working line, a floating tug stem line, a typhoon or vessel mooring line, an offshore messenger or pick-up line.

Quantum-8 has an orange urethane coating for high visibility as well as additional abrasion resistance.

Standard length is 200 mtr. When ordering, please specify the diam and length of the rope, and one or both ends of the rope should be eye spliced.

Features

* A blend of polyester and Dyneema SK-75
- Good grip on capstans and H-bitts
- Excellent single drum spooling capabilities

Applications

- Wire replacement
- Secondary mooring lines
- Berge and dredge working lines
- Tracer tug winch lines
- General working lines
- Heavy lift slings
- Rig tow lines
- Lowering/Lifting lines

Technical Specifications

- Specific Gravity: 1.0 (Floats in seawater)

Tug and Mooring Line, 12-strand

Blend of Polyester & Dyneema SK-75, "Quantum-12™"

Much like Quantun-8, Quantun-12 is a lightweight, high strength, floating rope that can grip a capstan or H-bitt. The DPX fiber provides superior abrasion and cut resistance, but with a higher coefficient of friction than similar high performance ropes such as AmSteel®-Blue. The 12-strand construction provides added flexibility, improved handling and easy spliceability. Green Samthane coating provides excellent visibility and additional abrasion resistance.

Standard length is 200 mtr. When ordering, please specify the diam and length of the rope, and one or both ends of the rope should be eye spliced.

Applications
- Wire replacement
- Offshore messenger or pick-up line
- For use on H-bitts, capstans and winches
- General working lines
- Rig row lines

Technical Specifications
- Specific Gravity: 0.99 (Floats)
- Elastic Elongation %: At % of break strength
  10%.....0.65%, 20%.....0.75%, 30%.....0.90%

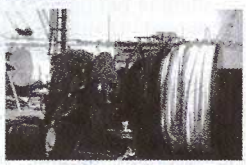
Winch Line with 100% Dyneema
"Turbo-RC™"



Turbo-RC has the firmness and low stretch of wire, yet only 1/6th the weight. The durable 'turbo' braided jacket is very cut and abrasion resistant, and protects the 12-strand single braid strength-member core.

Turbo-RC spools on winches easily, does not rust or "fish hook" like wire rope, and it floats. Turbo-RC is specially designed for improved service life in applications where creep results from long-term static loads. Both cover and core are coated with a Samthane coating.

A standard cover repair kit is available and easy to field apply. This product design requires a specialized splicing technique.

Standard length is 200 mtr. Please specify the diam and length of the rope, and one or both ends of the rope should be eye spliced.

Features
- Excellent single drum spooling capabilities
- Lightweight handling
- Superior drum compression resistance
- Retains hard round shape during use
- Protective cover with Dyneema provides superior wear characteristics

Applications
- Single or split drum winch primary mooring lines for various vessels
- Wire replacement in commercial fishing trawl systems
- "Tugger" winch lines for AHVs
- Deep water lifting projects

Technical Specifications
- Specific Gravity: 0.98
- Elastic Elongation %: At % of break strength
  10%.....0.33%, 20%.....0.49%, 30%.....0.76%
- Splicing Procedures Required: Eye splice - Product specific

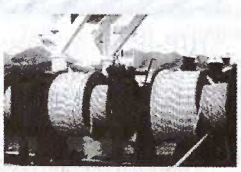
Mooring Line, 12-strand
Polyester Jacketed "Turbo-EPX™"



Lightweight, high strength, round and firm winch rope.

Turbo-EPX is a unique jacketed product made with a 12-strand Dyneema SK-75 core bonded to a polyester jacket. This durable jacket provides grip and protects the strength member core from degradation. The core and jacket of Turbo-EPX work in harmony, preventing excess cover slack during mooring operations, which translates into longer service life. This construction creates a firm, round, torque-free rope, much like wire rope, but at 1/6th the weight. Turbo-EPX delivers excellent performance on all types of winches and offers much better resistance to flex and tension fatigue than wire. Coating improves service life, reduces snagging, enhances abrasion resistance, and prevents contamination.

Standard length is 200 mtr.

7TH 21

Features
- Good grip on winch drums
- Heat resistant
- Lightweight for safer and easier handling
- Superior winch performance with firm, round construction

Applications
- Wire replacement - jacketed
- Deepwater lowering and lifting lines
- Primary mooring lines
- Winch based tug working lines
- Wire replacement - tug working pendant

Mooring Line, Tug Line & Pendant High-Tenacity Polyester Line ,

"HTP-12™"

HTP-12 is a 12-strand construction that provides optimum performance in static bending situations, making HTP-12 ideal for use where small D/d ratios are common. Made with high-tenacity polyester fiber, HTP-12 provides good flex-fatigue resistance and shock absorption.

Standard Length is 200mtr, and also suitable as a High Performance Mooring Pendant

Applications

- Vessel Mooring
  - General Working Line
  - Pendant
- Tug
  - Mainline
  - Pendant
  - Shock Line
- Offshore
  - Lifting Slings

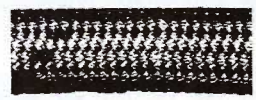
Tug and Mooring Line, StrongLine™



STRONGLINE rope has a construction consisting of a parallel core with a braided protective cover. The parallel core results in a very high strength compared to the diameter and material. The protective cover ensures a long life-time of the rope due to its excellent resistance against abrasion. The main application of this rope will be towing and mooring.

Primary Mooring Line for FSRU

EverSteel™-X, 100% Dyneema®

EverSteel-X is the first line to be designed specifically for FSRU (Floating Storage Regasification Unit) mooring applications, using Dyneema Max DM20 technology to achieve superior creep performance and flex-fatigue resistance. It is a torque-free 12-strand single braid that is optimized in strength-to-size and strength-to-weight ratios. Size-for-size, it has the same strength as steel, but it's so light, it floats.

With the addition of a Samson proprietary coating, EverSteel-X is designed for long-term, continuous load conditions, and will last for long-term FSRU mooring applications. These features point to EverSteel-X as the best choice for FSRU mooring.

Features

- Superior creep performance
- Size-for-size as strong as wire
- Durable and lightweight
- Made with Dyneema® DM20 fiber
- Flex-fatigue resistant
- Floats in water

Application

- Long-term primary mooring line

Mooring Tail (Forerunner)

(Forerunner, Pendants)

Reasons for Using Mooring Tails

When using mooring ropes, especially for Tanker vessels or Large vessels, there is a general desirability for the additional elasticity provided by mooring tails. The additional elasticity reduces the loads induced in mooring wires or HMPE lines under dynamic conditions by permitting the ship to respond more favorably to various combinations of wind, wave, and current forces, as well as to ships passing by in close proximity. Tails also tend to distribute the loadings more evenly in the mooring lines in the same service.

The additional elongation of the mooring line system permitted by the tail reduces the risk associated with poor line tending and the frequency and precision of line tending, particularly in berths where large tidal variations in high loading- unloading rates. Tails are also valuable at berths requiring short breast or spring leads as they provide the same effect as long all-wire line systems. And lastly, they facilitate the handling of wire lines by boatman and mooring gangs.

There are two configurations of tail ropes commonly used on board

Single-Leg

Standard length is 11 mtr overall length with a 2 mtr soft eye for the outboard end and a 1 mtr soft eye for the inboard end. 22mtr may also be requested depending on extreme berth conditions.

Grommet(Strop)

Standard length is 11 mtr overall length with 2 mtr and 1 mtr soft eyes formed by seizings. The body of the strop is also seized together 3 mtr from each eye lashing. 22mtr may also be requested depending on extreme berth conditions.

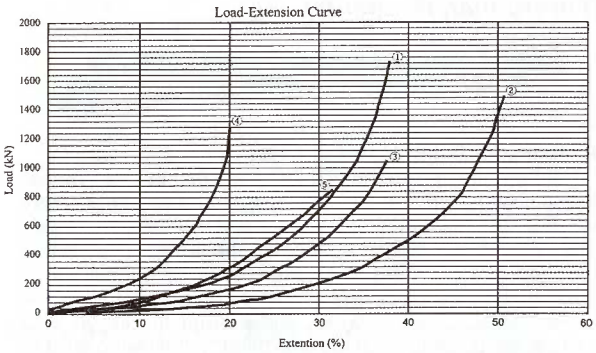
When ordering, please specify the following:

(A) Material of rope (PP/PE mixed Line, Nylon, Polyester, etc.)
(B) Construction of rope (8-strand/12-strand/double braided etc.)
(C) Diam or Circ of the ropes
(D) Length of the ropes and the desired eye sizes on each end.
(E) Required Breaking Strength based on below criteria according to OCIMF Guidelines.
- Synthetic Tails should have a breaking strength 25% higher than that of the mooring line
- Polyamide(Nylon) tails should have a breaking strength 37% higher than that of the mooring line

How to order: 21 - 11 - 37

Mooring tail, Material x Construction x Diam or Circ x Length x Eye Overall Size

Load Elongation Curve (60m/m)



① High strength Nylon [12-strand Dia, 85mm]
② High strength Nylon [8-strand Dia, 85mm]

Mooring Pendant

MP-1™

MP-1 is a non-rotational rope with excellent abrasion and wear resistance for use as a pendant in vessel mooring applications. It has been proven to provide superior abrasion resistance and strength retention with extensive use.

MP-1 utilizes a polyester/polyolefin blend that provides a 10% lower linear density (lbs./ft.) compared to traditional 100% polyester fiber pendant constructions. This decreased weight makes for easier handling by crew members in mooring situations.

Features:
- 10% lighter than 100% polyester ropes
- High strength, • Low elongation, • Hockle-resistant
- Non-rotational, • Durable, • Flexible

8-strand Mooring Tails

Euroflex®

The Euroflex® mooring tails surpass the nylon tails in quality, the energy absorption is better, the rope remains elastic for a longer time and the rope does not lose a large portion of its dry MBF(Minimum Breaking Force) when it is wet. As the strength is higher than that of nylon, a smaller diameter of rope can be used, providing better handling. Made of polyester and polypropylene composite yarns. Extreme high fatigue (T.C.L.L.) resistance. The standard effective working length is 11 mtr, with 2 protected eyes of 2.0 mtr and 1.0 mtr respectively. But please specify sizes when different size from the standard is required.

Synthetic Emergency Tow-Off Pendant Vulcan

Vulcan is Samson's patented synthetic emergency tow-off pendant (ETOP). A core dependant, jacketed rope made of 100% Technora®, enhanced with Samson's proprietary heat-resistant coating on the core. Samson's proprietary Samthane coating on the jacket provides protection against abrasion, ingress of foreign material, and damaged caused by exposure to ultra violet light. Vulcan is 60 to 70% lighter than the wire rope it replaces and prior to heat exposure its new rope breaking strength meets or exceeds the industry standards. ETOPs are traditionally an application for steel wire rope. These fire wires have historically been the leading cause of mooring related injuries due to the weight of wire and dangerous fish-hooks. The risk of injury is reduced significantly with the use of Vulcan and allows for faster, easier handling. Vulcan is only available in orange.

Diameter of Vulcan Rope will be determined by the DWT of the vessel. Please see the table below and select the rope size when ordering.

Features and Benefits

- Heat and flame resistant
- 60 to 70% (2/3rd) lighter than wire
- Abrasion resistant, • Jacketed load-bearing core
- Easy to adjust, • No lubrication necessary
- Easily stored when not in use, •Specific Gravity: 1.39
- Lightweight faster deployment and retrieval
- Reduced mooring –related injuries and claims

How to order: 21 - 18 - 99

Chafe Protections for Mooring Line

Chafe protection maximizes the service life of the ropes, protecting ropes from abrasion and cutting damage. All chafe options can be factory-installed on your ropes prior to shipment from the mfr's plants, or are available in bulk for field installation by certified personnel.

When replacing wire ropes with synthetics, it is important to prepare or repair the surfaces of deck equipment damaged by the wire rope. Chocks, fairleads, bollards, bitts or other hardware contacting the rope need to be smooth and free of rust to ensure the synthetic ropes achieve longest service life possible.

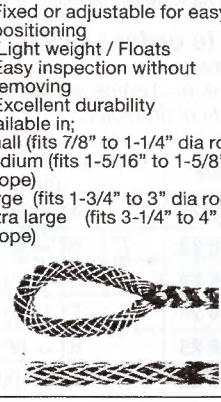
The followings are typical examples of Chafe protections:

Dynalene

Dynalene is a unique product that protects the strength member from abrasion, yet allows the rope to be easily inspected for both internal and external fiber wear. Braided from cut and abrasion resistant Dyneema fiber, Dynalene is permanently spliced over the rope, and acts as a sacrificial cover protecting the rope from abrasion and wear in mooring and offshore applications.
Dynalene is fully repairable in the field, does not absorb water, and floats. It is easy to install anywhere on the rope.

* Fixed or adjustable for easy positioning
* Light weight / Floats
* Easy inspection without removing
* Excellent durability

Available in;
Small (fits 7/8" to 1-1/4" dia rope)
Medium (fits 1-5/16" to 1-5/8" dia rope)
Large (fits 1-3/4" to 3" dia rope)
Extra large (fits 3-1/4" to 4" dia rope)



(to be continued)

DC Gard

DC Gard is a tightly braided cover construction of Dyneema fiber that is spliced onto the strength member to protect it from wear and abrasion in specific areas. Designed for use in applications where frequent handling and use put a premium on rope protection and resistance to snagging, DC Gard provides the maximum protection for synthetic fiber ropes.

* Fixed or adjustable for easy positioning
* Light and flexible / Floats
* Can be removed for rope inspection
* Cut resistant
* Superior durability

Available in ;
Size C: (fits 1" to 1-1/4" ropes)
Size D: (fits 1-5/16" to 1-3/4" ropes)
Size E: (fits 1-7/8" to 2-1/2" ropes)
Size F:(fits 2-5/8" to 3-1/8" ropes)

DC Moor-Gard

With a similar Dyneema fiber cover construction as DC Gard, DC Moor-Gard is a tubular sleeve solution that provides sliding protection from wear and abrasion. Standard length is 10' and the ends are coated with urethane.

* Fixed or adjustable for easy positioning
* Light an flexible / Floats
* Easily removed for rope inspection
* Cut resistant
* Superior durability

Size E (fits 1" to 1-3/4" ropes)
Size F (fits 1-7/8" to 2-14" ropes)
Size G (fits 2-3/8" to 3-1/4" ropes)

How to order: 21 - 18 - 91

Mooring Links and Shackles

Specially designed to connect the forerunner of a synthetic rope with a wire rope when mooring. These links are important in preventing any friction or coiling in the connection between the wire rope and the mooring tail and they make the mooring process a great deal easier.

These mooring links cost less because thimbles or conventional shackles are not required. They are lightweight, easy to handle, and safe because they are easier to connect and disconnect.

TIMM Boss Link - Mooring Shackles

A stainless steel mooring link (anti-corrosive), used as connection between steel wire ropes or HMPE fiber ropes and mooring tails. Can be delivered with or without roller. The shackles are proof-tested under the control of DNV GL and carry DNV GL type approval.

Recommended working load limit: 50% of the specified MBL
Normal working load: 20% of the specified MBL

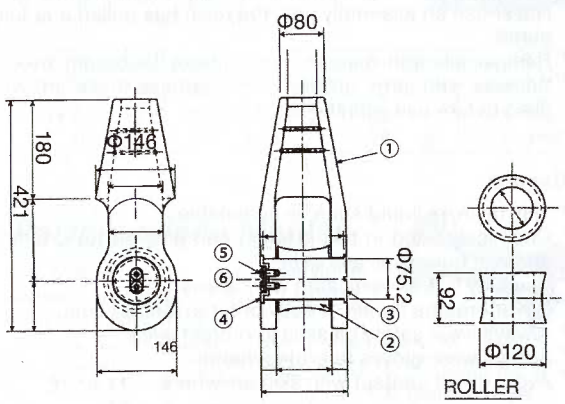
Mooring Wire Socket, Roller Pin Type

Quite new style of mooring shackle as substitute for traditional connection of a synthetic tail rope with a wire rope when mooring. Attaching this new type Roller Socket at the end of mooring wire rope you can connect directly to mooring tail rope (Forerunner) by its unique construction combined conventional mooring shackles and wire rope socket. You don't need to buy standard mooring shackle anymore if this new style roller shackle is attached to mooring wire.

Roller shackle is made from carbon and alloy steel with pin and roller which are detachable for connecting tail rope. Normally the roller shackle will be supplied pre-attached to mooring wire rope by factory, but it is possible to attach by ship's workers using a unique socketing media "Wirelock".



21 11 71	Mooring wire socket, roller pin type 0-42 carbon and alloy steel for 42 mm dia wire rope	Pc.

Socketing Resin "Wirelock"

The suitable resin for socketing wire rope terminations. This wire rope assemblies are 100% efficient when used with steel wire rope, galvanized wire ropes.

Pass the wire rope through the end hole of roller socket, and measure the rope ends to be socketed. The rope end should be seized at the sufficient length so that the ends of the unlaid wires (from the strands) will be at the top of the socket basket. The wire rope is secured in a vice directly below the seizing to allow the strands to be unlaid to the seizing. Plasticine or clay based putty, i.e., window or glazing putty, is required to seal the base of the socket prior to pouring, thus, preventing resin leakage which may cause voids. All of the liquid resin should be placed in the mixing container and then all of the power added to it (or vice versa) before mixing. Always mix all of the resin with all of the powder. Upon mixing, the resin will turn to a greenish turquoise color. If the mix remains a pale straw yellow color, do not use the kit. Once the resin is mixed, it should be poured immediately into the socket to ensure good penetration. The rope can be put in service or proof loaded one hour after the material in the socket has gelled. Whenever possible, the assembly should be proof loaded.

Warning

* Incorrect use of the socketing resin can result in an unsafe termination which may lead to serious injury, death, or property damage.
* Do not use the resin with stainless steel rope in salt water environment applications. Consult with the manufacturer.
* Use only soft annealed iron wire for seizing.
* Do not use any other wire (copper, brass, stainless, etc.) for seizing.
* Never use an assembly until the resin has gelled and fully cured.
* Remove any non-metallic coating from the broom area.
* Sockets with large grooves need to have those grooves filled before use with the resin.

Caution

* This resin, in liquid state, is flammable.
* Chemicals used in this product can give off toxic fumes and can burn eyes and skin.
* Use only in well-ventilated work areas.
* Never breathe fumes directly or for extended time.
* Always wear safety glasses to protect eyes.
* Always wear gloves to protect hands.
* Avoid direct contact with skin anywhere.

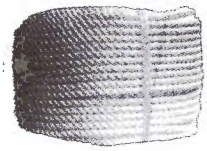
3-Strand Vinylon Rope (Kuremona Rope)



Made from a compound of vinyl chloride and vinylidene from lime stone. Spun into cotton-like soft thread and stranded into rope. Easy-to-tighten due to its flexibility and also easy to handle.

How to order: CODE

Vinylon rope, 3-strand, DIAM x LENGTH

Unit Per C/L

Elastic Trapeze Cord

Elastic cord similar to rubber band but more durable and stronger. Use for fastening the items very easily. Attached with hook and clamp.

21 14 61	Elastic Trapeze Cord, 10 mm dia with hook and clamp	MTR
21 14 62	Hooks for Elastic Trapeze Cord	Pc.
21 14 63	Rope Clamps for Elastic Trapeze Cord	Pc.

Marine Oakum

Available spun or unspun. The primary use of marine oakum is for caulking the seams of wooden vessels and the wooden decks of all types of marine structures. Both spun and unspun oakum are waterproof and essential for all marine work.

Unit Per Kgs

CODE	Description
21 14 71	Spun marine oakum
72	Unspum marine oakum

Cordage

Name	Descriptions of Cordage
Point Line	Small rope used for reef points. Usually about inch to 1-3/4 inch in size. Generally referred to by the number of threads, 15 to 21, used in making it.
Ratlines	Small ropes stretched horizontally between shrouds to form foot and hand holds when going aloft. Sized to forward and after shrouds, clove hitched around intermediate shrouds.
Houseline	Soft laid three yarn stuff used for general purpose. May be tarred or untarred.
Boat Lacing	Line by which a boat's canvas cover, or other canvas gear, is secured in place.
Marline	Superior kind of spunyarn laid up left-handed.
Spunyarn	Spunyarn is a small stuff and is the cheapest and most commonly used for seizing, service, etc., where neatness is not important. It is laid up loosely, is left-handed, 2, 3 or 4 stranded, and is tarred.

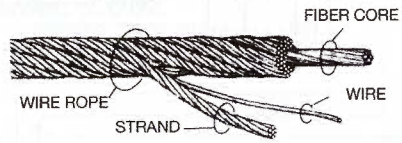
Specifications of Cordage

Name	Material	Number of Strand	Number of Thread & Diameter	
Point Line	Manila	3	12 thread 15 21	9 mm 10 12
Ratlines	Tarred Hemp of Manila	3	6 thread 9 12	6 mm 8 9
Houseline	Manila	3		5 mm 6
Sash Cord	Cotton	Senette Lay		6 mm 8 9
Wrapping Twine	Jute & Hemp	Spun	1.5 - 2.0 mm	
Boat Lacing	Manila	3	6 thread	6 mm
Manila	Hemp	-	3 lay 2	2 mm 3 4
Spunyarn	Jute	Spun	2 lay	4 mm

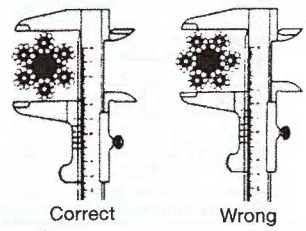
Steel Wire Rope

Wire rope construction is indicated primarily by the number of strands and the number of wires in each strand. For instance a 6 x 24 steel wire rope is composed of 6 main strands and each strand has 24 main wires. These numbers are modified as follows:

1) The arrangement of wires in the strand, i.e. Filler, Seale, Warrington, etc.
2) Lay of stranding, i.e. regular, lang, right, left, etc.
3) Outer covering, i.e. galvanized, ungalvanized, etc.
4) Type of center, i.e. hemp core, I.W.R.C. (Independent Wire Rope Core) and strand.



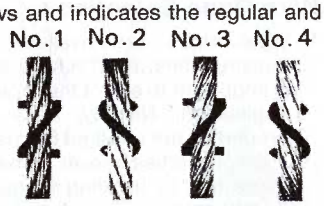
Gauging Wire Rope



The diameter of a wire rope is the diameter of the circle which will enclose all of its strands. When measuring a wire rope by caliper, care should be taken to measure the correct circumference of diameter of all the strands, not areas where there are two adjacent strands. See diagram above.

The Lays of Wire Rope

The picture right shows and indicates the regular and Lang's lay of wires.



1) Right hand regular lay
2) Left hand regular lay
3) Right hand Lang's lay
4) Left hand Lang's lay

Wire ropes can be either Lang's lay or Regular lay (Ordinary lay).

Lang's lay construction is one in which the wires in the strand are laid in the same direction as the strands are laid into the rope.

The advantage of using Lang's lay is that a rope so constructed offers a better wearing surface when in use, and, therefore, can be expected in many cases to survive for a longer period than a rope made with regular lay. Lang's lay ropes should never be used when one end of the rope is free to rotate.

Regular lay construction is one in which the strand wires are laid in one direction, and the completed strands laid into the rope in the opposite direction.

Nearly all ropes are supplied right-hand lay, but left-hand lay is occasionally required.

Nominal Tensile Strength

Referring to JIS G-3525

Galvanized Wire Rope		Un-galvanized Wire Rope	
Class	Tensile Strength N/mm² (kgf/mm²)	Class	Tensile Strength N/mm² (kgf/mm²)

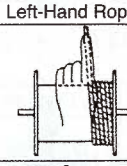
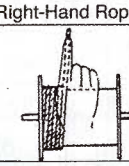
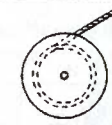
Winding Wire Rope

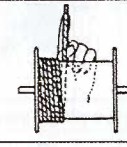
For left-handed drum = right-hand rope
For right-handed drum = left-hand rope

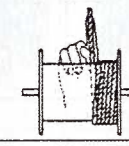
Left-Hand Rope	Right-Hand Rope	Drum
				



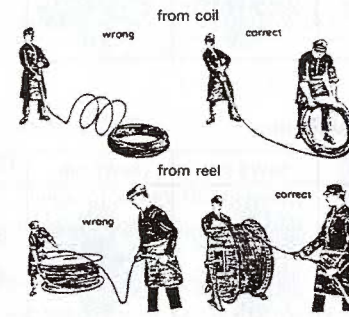






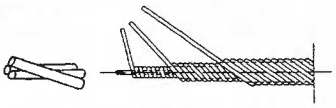


Unwinding Wire Rope



Cross Section of Wire rope

A) Cross Lay (Conventional Lay)



The strands of a so-called conventional wire rope have equal-sized wires in all layers. Each layer has different length of lay and the wires of one layer cross the wires of the underlying layer.

When the strands are spun in this manner the wires of the individual layers are in point contact with each other. In conventional ropes, all wires, except for the center wire, are of the same length.

Construction	6 x 7	6 x 12
Illustration		6 x 19	6 x 24	6 x 37
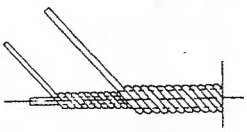
		

B) Parallel Lay (Equal Lay)



The strands of equal lay ropes have wires of varying sizes laid in such a way that the wires of one layer are parallel with and supported over their total length by wires in the underlying layers. All wires have the same length of lay, and are laid up in a single operation.

The use of equal lay strands avoids deformation, internal wear and secondary bending stress which result from the point contact between the wires in the conventional type. In most fields of application, therefore, equal lay ropes have proved to have a longer life than conventional ropes. The following types of construction are equal lay : Warrington, Seale, Filler and combinations of the same.

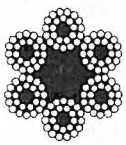
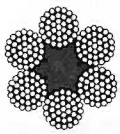
Wire Arrangement

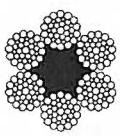
6 x 24
6 x (9+15) = 144 wires



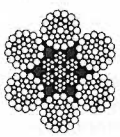
6 x 37
6 x (1+6+12+18) = 222 wires



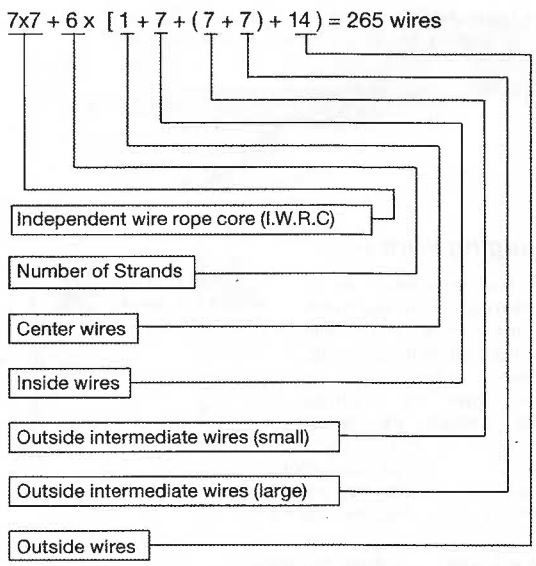
6 x WS (36)
6 x [1+7+(7+7)+14] = 216 wires



IWRC
6 x WS (36)



7x7 + 6 x [1 + 7 + (7 + 7) + 14) = 265 wires



Wire Rope Selection :

1. Wire ropes are available in various types and constructions, each having specific uses. Therefore, it is important to select the rope according to the intended application. Namely, it is necessary to see what properties are required for the rope to be used correctly. The properties cover breaking strength, flexibility, resistance to bending fatigue, anti-friction, resistance to deformation, non-rotation and anti-corrosion. In most cases, the key point of selecting the rope for a particular application is consideration of the above properties.

2. Selection by features

1) Where breaking strength is important, IWRC parallel lay ropes are recommended. For example : IWRC 6 x Fi(25), IWRC 6 x Fi(29), IWRC 6 x WS(36).

2) Where flexibility is important, FC (Fibre Core) cross lay ropes are recommended. For example : 6 x 24FC, 6 x 37FC.

3) Where resistance to bending fatigue is important, ropes made of strands with as many wires as possible are recommended. For example : FC 6 x WS(36), FC 6 x WS(41).

4) Where anti-friction is important, ropes consisting of outer strands made of thick wires are recommended. For example : 6 x S(19), 6 x Fi(21), 6 x Fi(25).

5) In case resistance to deformation is important, parallel lay ropes are recommended. For example : IWRC 6 x WS(31), U4 x SeS(39).

6) Where non-rotation is required, non-rotating wire ropes are recommended. For example : U4 x SeS(39), 18 x 7, 19 x 7, etc.

7) Where anti-corrosion is important, galvanized or stainless steel ropes are recommended.

End with Seizing	

Non Rotating 4 Strand Wire Rope

Best for use as a single lift crane rope. This rope has a unique four strand construction which serves to control and minimize the self spinning or rotating nature of the rope. The simple construction of the rope prevents sectional collapse and deformation. A smooth exterior finish, created through a special process, withstands abrasion and fits easily to the grooves of a drum or sheave. Because the outer shape of the rope is fitted well to drums and sheaves, there is less resulting friction during actual use, extending the length of service of the rope considerably.

The breaking strength of the non rotating ropes is higher than that of 6 strand ropes of an equivalent diameter and the margin of safety is higher. In spite of the 4 strand construction, these ropes have superior flexibility.

Recommended for use as the hoisting lines of tower and derrick cranes, as grab winch ropes, derrick fall ropes and lifeboat fall ropes.

UNI-Rope U4 x SeS(39)

* Principles of non-rotating properties of wire rope

(1) By making wire rope with multi strands and by laying the strands of the inner core of the rope in the opposite direction of the outer strands, the self rotating torque can be counteracted.

(2) By lengthening the lay (pitch) of the strands, reducing the number of strands, and laying strands of a more triangular shape, the tendency for the rope to be affected by spherical motion is decreased.

4 Strand Non Rotating Wire Rope
LANKO®FOUR (Non-Rotating Rope)

LANKO®FOUR is 4 strand, non-rotating, hoisting wire rope to be used on cranes. Galvanized and lubricated to provide long protection against inner abrasion and corrosion. The LANKO®FOUR Compacted wire rope has a higher MBF and to maintain the required safety factors. Both versions have a thick outer wire, to make the wire robust and impact resistant in the often harsh conditions of loading and discharging.

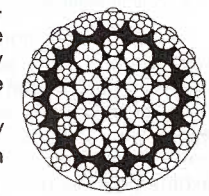
Multi Strand Non Rotating Wire Rope
37 x 7, 31 x 7
LANKO®PACK(Non-Rotating Rope)



Compacted Multi-Strand, Non-Rotating, Hoisting Wire Rope. The construction ensures great flexibility to make this wire rope suitable for use on "European" type of cranes.

The galvanization and internal/ external lubrication provide protection against environment.

The compacting gives this wire rope added breaking strength, for those circumstances where you need it.

Applications: Cranes, Hoists

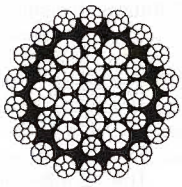
Multi Strand Non Rotating Wire Rope

37x7 LANKO®LIFT COMPACTED (Non-Rotating Rope)



Multi-Strand, non-rotating hoisting wire rope. The special feature of LANKO® LIFT is that in the production process the core is covered by an especially designed HDPE extruded cover. This gives the wire rope stability, avoids point to point contact between wires of the outer and inner strands and stops corrosion and wear of the core. When the high breaking strength is added, this hoisting wire rope really is top quality.

Applications	: Cranes, Hoists
Total Number of Wire	: 259

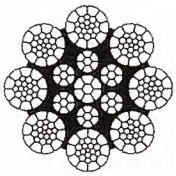
8-strand Wire Rope

Lanko®Top Compacted



8 Strand compacted wire rope mainly designed for Crane luffing wire. The special feature of LANKO® TOP compacted is that in the production process the core is covered by an especially designed HDPE extruded cover. This gives the wire rope stability, avoids point to point contact between wires of the outer and inner stands and stops corrosion and wear of the core. Compacting the wire rope provides more strength, due to higher steel content, and better abrasion resistance due to larger area of contact between wire rope and sheave.

* Quality	: galvanised
* Type of core	: plastic coverd IWRC
* Tensile Strength	: 2,160 N/mm²

Wire Rope for Offshore Drilling Units

The following recommendation table lists ropes which are designed and manufactured to meet the requirements for structural use on offshore drilling units. Many of the ropes are shown previously in the catalogue, but to simplify the selection process, the most popular wire constructions for offshore applications are provided below. These ropes are made to order, so ropes of constructions other than those listed below are also available upon request.

When ordering, specify the construction type, diameter, length of coil, and other related information helpful in identification of the rope.

Rope Recommendations Table

All ropes are right-hand, regular lay unless otherwise stated.

Applications	Recommended Construction
Drilling Lines	6 x 19, Seale with IWRC 6 x 26, Warrington Seale with IWRC
Anchor Lines	6 x 25, Filler Wire with IWRC 6 x 36, Warrington Seale with IWRC 6 x 41, Warrington seale with IWRC
Anchor Pennant Lines	6 x 25, Filler Wire with IWRC 6 x 41, Warrington Seale with IWRC

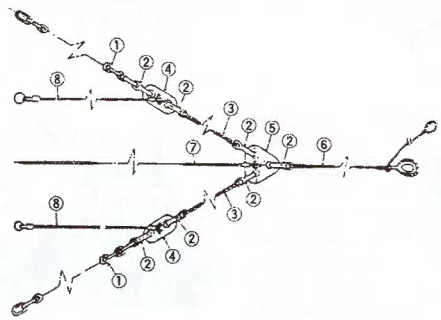
Offshore Drilling Units

Typical Assembling Plan for Towing Bridle



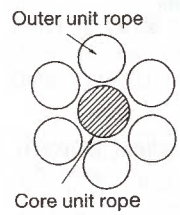
Quantity listed below shows for 2 sets of Towing Bridles

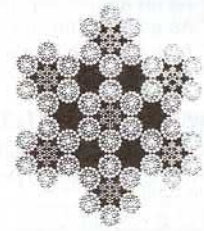
1	Towing Chain 78 mm Φ × 18 Mtrs	4 Sets
2	Anchor Shackle	14 Pcs.
3	towing ire 84 mm Φ × 41 Mtrs	4 Sets
4	Connection Plate	4 Pcs.
5	Tri Plate	2 Pcs.
6	Pendant Wire 80 mm Φ × 50 Mtrs	2 Sets
7	Recovering rope 28 mm Φ × 125 Mtrs	2 Sets
8	Recovering Rope	4 Sets

Cable Laid Sling

Steel slings which are designed for use in situations where extremely heavy load capacity is required. In the structural design and construction of modern offshore drilling rigs it is necessary to use ropes which can withstand very heavy loads for extended periods of time under extreme conditions.

For such jobs, ropes of more complex construction designs with high breaking strengths, good flexibility, easy handling, and product reliability are in greater demand.

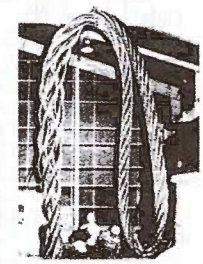




Cable Laid Design

The term "Cable Laid" indicates a rope that is constructed from a number of unit ropes laid up in a helical design. Because of the complexity of the rope design, there is a wide choice of sling constructions available. A more typical design is illustrated in this section.

When ordering, please indicate the size of the eye splice at each



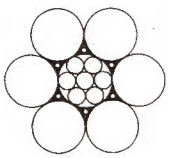
180 mm

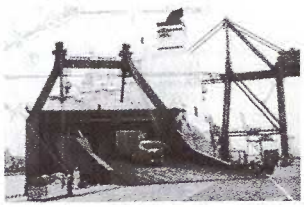
end of the rope as well as the diameter of the sling, the construction, breaking strength, and total length.

How to order: 21 - 38 - 01

Sling, cable laid, galvanized, DIAM of SLING, CONSTRUCTION, BREAKING STRENGTH, LENGTH

Delta Filler Wire Rope





A specially designed IWRC type rope with a patened plastic filler liner between the inner core and the outer strands of the rope. There are several unique advantages to this wire construction which make it more efficient and durable than normal wire ropes.

Delta Filler Rope eliminates one of the leading cause for unexpected wire rope failure, the invisible breakage of wire contact points inside of the wire core. When a rope is in use, the inner core of the rope is constantly in friction with the outside strands, causing abrasive wear on the connecting points in the wire core. With the Delta Filler Rope, a plastic lining fills the inner space of the rope stabilizing the strand lay construction and absorbing any friction between the inner core and the outer strands of the rope. The inner plastic lining also protects the inner core from corrosion. It keeps water and other elements from entering the inner core of the rope while keeping the anticorrosive lubricant oils inside of the rope from dripping out and polluting the environment.

Because of the ropes tendency not to twist it has a higher breaking strength than conventional ropes.

Delta Filler Rope is suitable for the following uses:

* As a mooring line for LNG carriers
* As a ramp support for RO-RO vessels.
* As an anchoring line for large vessels.
* As a luffing for deck cranes.
* As a guy line for large cranes.
* As a towing line for ocean tugboats.

How to order: 21-38-06

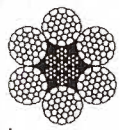
Green Rope



A unique full circle processed form provides approx. 10 to 20% higher breaking strength and endurance against abrasion compared with conventional wire rope.

Also this form will not get out easily under hard conditions by passing through the rollers or sheaves, or by winding into rope drum frequently.

Applications: Winches, Cranes

How to order: 21 - 38 - 11

Stainless Steel Wire Rope

There are many kinds of stainless steel ropes which are applicable for use in a wide variety of industries. The most commonly used stainless steel alloys are the AISI 304 and AISI 316 alloys which have superior resistance to corrosion in atmospheres with the presence of alkaline, acidic, or chemical elements. Stainless steel is also superior in its resistance to the adverse effects of extreme hot or cold temperatures.

Features of Stainless Steel Rope

* It will not rust easily in normal atmospheres and keeps a clean surface appearance.
* It will resist corrosion easily in high temperatures.

* It will resist corrosion from many industrial chemicals.
* Hard stainless steel has a high breaking strength and superior mechanical properties.
* Soft stainless steel wire rope is laid with bright annealing wire and is very flexible.
* Stainless steel AISI 304 complies with Japanese Industrial Standards SUS-304 for wire ropes.

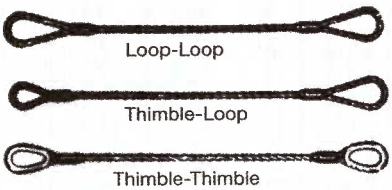
Wire Rope Slings

Generally made from galvanized wire rope of 6 x 24 construction. Made to order. When ordering, please specify the following points :

1. Type
2. Wire Rope Construction
3. Wire Rope Diameter
4. Overall Length



How to order: 21 - 45 - 01

Sling, wire rope, TYPE, CONSTRUCTION , DIAM (mm), OVERALL LENGTH (mtr)

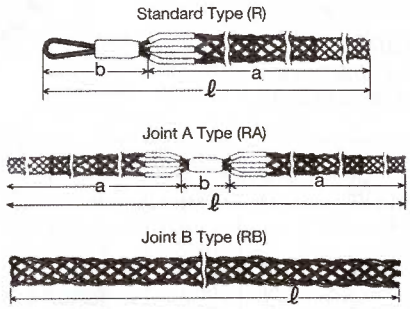
Cable Grips (Cable Stocking)

Cable grips are invariably made from woven mesh wire in the shape of an open ended stocking or sleeve. Cable grips of the same diameter as the rope to be restored are prepared with the strand ends fitted with pull collars. The sock is placed over the ends of the new and old wire ropes and when it is pulled taught, the woven mesh tightens snug around the rope.

The grip is easily fitted and removed. It holds the wire rope securely, operates safely, and saves labor costs compared to other means of rope repair.



Unit Per Pc.

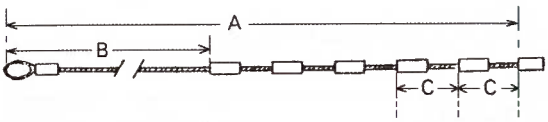
Guy Preventers & Stoppers

When ordering the preventers, please specify:

(1) Overall length of wire rope: (A)
(2) Intervals and the number of sleeves (Ferrules) to be attached: (B & C)
(3) Rope-end processing
(4) Quantity

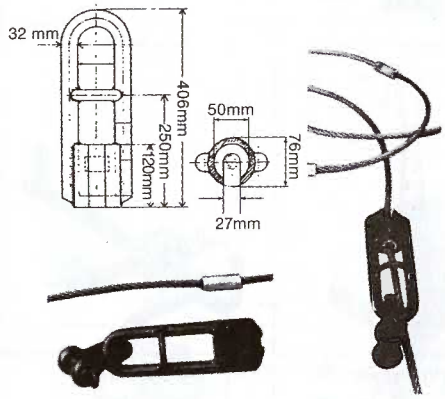


Galvanized Steel Wire Rope
Construction : 7 x 19
Diam : 20 mm
Breaking Strength : 32 tons

Sleeves (Ferrules)
Material : Aluminium Alloy
Size : Diam - 43 mm
Length - 100 mm

Stoppers (Shoes) or Preventer Grips
Material : Iron
Size : as per sketch

Stoppers (Shoes)



How to order: 21-46-11

Guy preventer, galvanized wire rope, 20 mm dia, 7 x 19 x length x sleeve interval x processing of rope and x with stopper (set)

MSG Data Licence

The Marine Stores Guide (MSG) Data Licence brings all that the MSG catalogue has to offer right to your computer screen.

The Marine Stores Guide is the world's leading reference code within the maritime industry. The MSG Data licence provides a universal coding system to facilitate communication between crew, owner and supplier, making the specification and supply of goods simple quick and effective.

With the latest and most complete version of the data now available, there's no better time than now to start using the unique six digit code in your IT system.

The digital directory lists approximately 50,000 products provided by suppliers and manufacturers from around the world. Regular updates are included as part of the licence.

Screw Pin Countersink Shackles
(Carver Shackles)

Made of drop forged steel with countersink and slotted pins. The shackle pins are also galvanized above the threading. When ordering, please specify whether galvanized or black shackles are required.

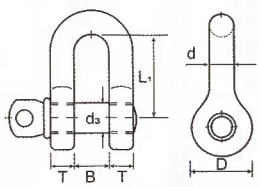
Green Pins Standard Shackles

High quality, high tensile "Green Pin" shackle can be identified by the green coloured pin and the marking on the shackle body and pin. Green pin shackles meet all relevant requirements of the Machinery Directive 2006/42/EC and all latest amendments.

Dee Shackles with Screw Collar Pin
G-4151



Material: Body and pin high tensile steel, Grade 6, quenched and tempered

Safety Factor: MBL equals 6 x WLL (Working Load Limit)

Standard: EN 13889 and meets performance requirements of US Fed. Spec. RR-C-271 Type IVB Class 2, Grade A

Finish: Hot dipped galvanized

Temperature Range: -20°C to + 200°C

Certification: At no extra charges this product can be supplied with a works certificate, material certificate, manufacturer test certificate, EC Declaration of Conformity and all shackles starting from 2t can be supplied with DNV 2.7-1 certificate.

Green Pin Sling Shackles

Bow Shackles with Safety Bolt

These shackles cover a range from WLL 7 tons up to 1,500 tons. Compared to the standard Green Pin shackles they have an increased bow radius for saving slings and improving wearability. These shackles are ideal for use with wire rope and synthetic sling applications.

Material: Body and pin alloy steel, Grade 8, quenched and tempered

Safety Factor: MBL equals 5 x WLL

Finish: Shackle bow painted silver, pin painted green

Temperature Range: -20°C to + 200°C

Certification: Can be supplied with a works certificate, material certificate, manufacturer test certificate, EC declaration of Conformity and all shackles from 75 ton are supplied with a Lloyd's Register of Shipping Certificate on proof load. An MPI and/or US inspection certificate can be supplied on request.

Note: ± 5% forging tolerance on inside width and length

Sling Chains

Available single leg type, 2-leg type, or 3-leg type sling chain suitable for overhead lifting. Slings are furnished preassembled to the alloy steel chain with link or hook at both ends. 2-leg and 3-leg type chain slings provide more stability and strength than single leg chain sling. All attachments are mechanically connected to chain. The drop forged identification tag is attached to the master end coupling link of each chain sling. Please specify chain size, type and reach when ordering.

How Lifting Angles Reduce Working Load Limits of Slings

How to order chain slings.
23 - 11 - 77: Chain sling with the following information;

1. Determine the maximum load to be lifted.
2. Refer to the table above and choose the proper type of chain sling (single, double, etc) dictated by the size, shape and weight of the load.
3. Estimate the approximate angle between a leg of the sling and the load during operation.
4. Select proper attachments (hooks and master links) for your chain sling.
5. Determine the overall reach from bearing point on master link to bearing point on attachment.
6. Refer to the Working Load Limit Chart and to your predetermined angle of the type sling you have selected.
7. Choose the chain size which meets your requirements.

Note: Angle to the load on multiple leg slings will be 60° or greater as long as the distance between lifting eyes of load is not greater than reach shown on identification tag.

4. Chains/Links

Stud Link Anchor Chain Cables
Flush Butt Welded
(Ref.JIS F 3303-1993)

The specifications of these flush butt welded Anchor Chain Cables and their accessories for ship and harbour use are as follows.

Nominal Size	Denoted by the diameter "d" shown in the sketch.
One Length	One length of the chain is 25 or 27.5 mtrs between the farther point end of the inner side of the end link and that of the opposite end link. May be also including the joining shackle and kenter shackle.
Nos. of Link	The total number of links for each length is odd except where it includes a swivel.
Shape & Size of Link, Shackle, etc.	The shape of each link, shackle and swivel must be determined in proportion to the size as shown in the sketches. They must be uniform in shape, and those next to each other must fit properly and move freely.

Anchor Cable ← Sizes must be determined in proportion to the "d" size and fit properly and move freely → Kenter Shackle, Joining Shackle, Anchor Shackle, Swivel

Guide of How to order

When ordering, please fill the following column.

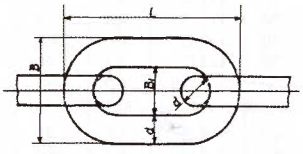
A	B	C	D	E	F	G

A. Name : Anchor Chain
B. Kind : Stud Link, Studless Link
C. Size : Nominal Dia. "d"
D. Length : 27.5 Mtrs. 25 Mtrs
E. Class & Proof Test Load : ST2, ST3
F. Accessory : Kenter Shackle, Joining Shackle, Anchor Shackle, Swivel
G. Certificate : NK, ABS, Lloyd, NV, etc.

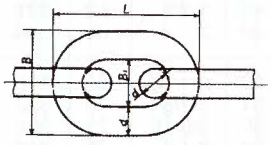
Chains for General Use

(Ref. JIS F 2106-1988)

Galvanized, rolled steel chains for general uses such as for guard or fence chains or for accommodation chain ladder slings. Two types of chains, short link and long link are available. Please specify the total length of the chain required in meters when ordering.



Long Chain



Short Chain

Unit Per Mtr.

Swivel Type Latch Lock Hooks

Drop forged and heat treated from a special bar steel. Safety hook with latch type closing mechanism which automatically closes when hook is loaded. Unlocking the trigger button on the hook will easily release the lock and open the hook. When ordering, please specify the safety working load required for the use of the cargo hooks.

Unit Per Pc.

Anchor Shackles
Alloy Bolt Type
G-2140, S-2140

G-2140,S-2140

Meets the performance requirements of Federal Specification RR-C-271F, Type IVA, Grade B, Class 3. Quenched and tempered alloy bows and alloy bolts.

Sizes from 1-1/2 to 4 are made from forged alloy, and sizes 4-3/4 to 7 are made from cast alloy steel.

Wide Body Shackles
G-2160

Greatly improves the durability of wire rope slings. The increase in shackle bow radius provides a 58 % gain in the sling bearing surface and eliminates the need for a thimble. Increases the usable sling strength 15 %. Forged alloy steel from 75 through 300 metric tons, and cast alloy steel from 400 through 1,000 metric tons.

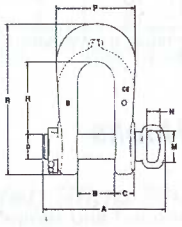
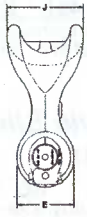
Grommet Shackles
G-2170

Designed for use with single or double large diameter grommets. Made of cast alloy steel, and quenched and Tempered for maximum strength. G-2170 bows are furnished Dimetcoted and pins are Dimetcoted, then painted red.

All sizes are RFID (Radio Frequency Identification) equipped in bow and pin, and bow and bolt are certified to meet Charpy impact testing of 42 joules (31 ft-lbs.) min. avg. at -20 degrees C (-4 degrees F).

Shackles requiring ABS, Lloyds, and other certifications are available upon special request and must be specified at time of order. All 2170 shackles can meet requirements of DNV Rules for Certification of Lifting Appliances upon special request and must be specified at time of order.





Unit Per Pc.

Eliminator Single/Double Hooks
A-1361/A-1362

The Crosby® ELIMINATOR® combines selected features and functionality of a master link, connecting link, grab hook and adjuster legs to provide you with one fitting that is suitable for applications that require an adjustable length

chain sling. Made of forged alloy steel - quenched and tempered. It can be used for personnel lifting applications and meets the intent of OSHA Rule 1926.1431(g)(1)(i) (A) and 926.1501(g)(4)(iv)(B). Suitable for use with Grade 100 and Grade 80 chain. Use the A-1361 and A-1362 in combination to make 3 leg chain slings. All sizes are RFID (Radio Frequency Identification) equipped.

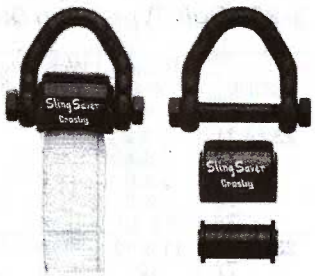
Sling Saver Web Connectors
S-280



Increasing Synthetic Sling efficiency as compared to standard anchor and chain shackle bows and conventional eye hooks. This allows 100% of the slings rated Working Load Limit to be achieved. Allowing better load distribution on internal fibers.

Durable vinyl cover that protects sling at eye, and keeps sling positioned correctly on spool.

Unit Per Pc.

CODE	Round Sling Size (No.)	Web Slings			Working Load Limit (Ton)	Weight Each (lbs)
		Webbing Width (in)	Eye Width (in)	Ply

63	4	4	2	2	6-1/4	2.9
64	5 & 6	6	3	2	8-1/2	5.1

Note : Maximum Proof Load is 2 times the Working Load Limit.
Name of Mfr. : Crosby®

Sling Saver Web Sling Shackles
S-281

Designed to connect Synthetic Web Slings and Synthetic Round Slings to eyebolts, pad eyes, and lifting lugs. All Alloy Construction.

Increased radius of bow gives wider sling bearing surface resulting in an increased area for load distribution, thus: Increasing Synthetic Sling efficiency as compared to standard anchor and chain shackle bows and conventional eye hooks.

Unit Per Pc.

Sling Saver Web Sling Shackles
S-252/S-253

Same shackle to model S-280, but available in size 3-1/4 to 50 metric tons and in both a Screw Pin and Bolt, Nut and Cotter Pin configuration. Bolt (Pin) has a larger diameter that provides better load distribution.

Slide-loc Lifting Points
SL-150

Available in capacities from 0.5 to 3.2 metric tons. Bail is Forged Alloy Steel – Quenched and Tempered, and swivels 360° degree. Meets the Machinery Directive 2006/42/EC guidelines and is marked with CE accordingly.

Unique locking mechanism makes the lifting point well suited for quick attachment to load surface. No need for tools.

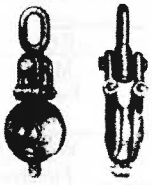
Lashing Snatch Blocks



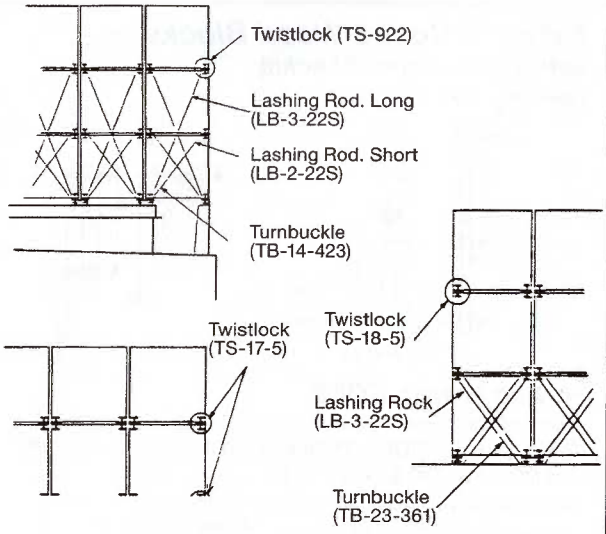
Has a safe and easily operated locking device with a 150 mm sheave diam. Applicable wire rope sizes are 18, 20 and 22 mm diameter. Weight 12 kgs. S.W.L. 5 tons. Test load 15 tons.

23 17 51	Lashing snatch block, 150 mm S.W.L. 5 tons	Pc.

10. Container Lashings

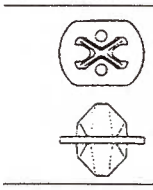
Container Lashing and Securing Gears

The lashing gear and lashing systems described below will ensure the safety of cargo during transport, secured efficiently with the minimum amount of lashing used. From among a wide range of products, the most popular models are illustrated below with the respective specifications.



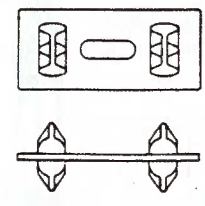
Stackers

Unit Per Pc.



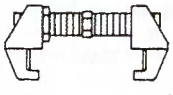
CODE	23 18 01
Model	SS-881
Type	Single Stacker
Flange Thickness	12 mm
Weight	2.3 kgs
Finish	Galvanized

Unit Per Pc.



CODE	23 18 02
Model	DS-2
Type	Double Stacker
Flange Thickness	12 mm
Pitch of Cone to Cone	203 mm
Weight	9.0 kgs
Finish	Painted with Primer

Bridge Fittings

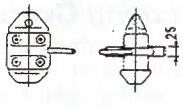


Unit Per Pc.

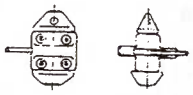
CODE	23 18 06
Model	BF - 1
Feature	Allowable container distance: 0-95mm trans. 30-130 mm long.
Weight	4.8 kgs
Finish	Galvanized

Twistlocks

Unit Per Pc.



CODE	23 18 11
Model	TS-17-5
Feature	Right Hand Lock
Flange Thickness	25 mm
Weight	5.7 kgs
Min. B.L.	50.0 Tons
Finish	Galvanized



CODE	23 18 12
Model	TS-18-5
Feature	Left Hand Lock
Flange Thickness	25 mm
Weight	5.7 kgs
Min. B.L.	50.0 Tons
Finish	Galvanized

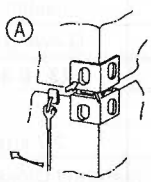
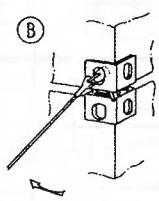
Handling Method of Lashing Rod

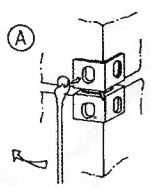


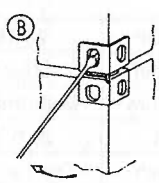


Upper Lashing

A Insert hinge rod into the lower end hole of third tier container.

B Swing the other end to cross lashing direction and tighten with the turnbuckle.





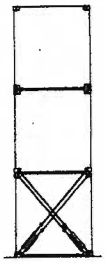
Lower Lashing

A Insert the hook of a short lashing rod into the lower end hole of the second tier container.

B Swing the other end to cross the lash and tighten it with the turnbuckle.

Handling method of the Hinged Lashing Rod. Same lashing rods and turnbuckles as mentioned above.

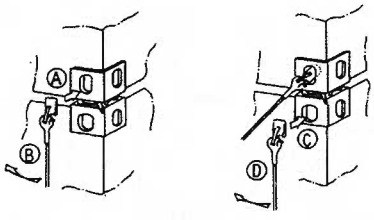
"Parallel Lashing System"



When the parallel lashing system is used, the lashing is made by applying the hinge rod to the lower end hole of the second tier container. The same hinge rod should also be applied to the upper end hole of the first tier container.

The lashing length is adjusted with the turnbuckle. A sagged, slacked, or overfastened lashing is not desirable.

The lashing should be adjusted to the proper level with the turnbuckle.



A. Insert the hinge rod into the bottom hole of the second tier container.

B. Turn the fitting to secure the internal cross lashing.

C. Insert the hinge rods into the upper end hole of the first tier container.

D. Turn the fitting to secure the internal cross lashing with the turnbuckle.

Corner Hooks

Unit Per Pc.

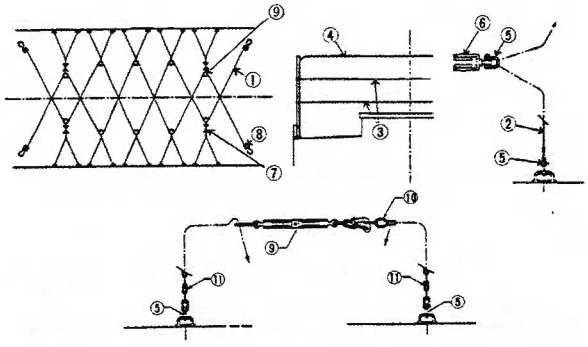
Lumber Lashing Gears

Following illustrations will be of guidance in how to order lumber lashing gears.



① ③④ Lashing Wire, Standard size is 22-26 mm ø, 6x24

② Pendant Wire
Loop at both ends, Standard size is 20 mm ø,6 x 24

⑤ Shackle B/L 20T or 30T

⑥ Snatch Block

⑦ Turnbuckle

⑧ Wire Rope Clip

⑨ Turnbuckle for Lumber Lashing, PTL: 8.0T, BL: 20.1T

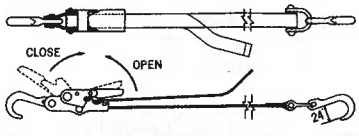
⑩ Grab Link with long link, PTL: 5.6T, BL: 14.1T

⑪ Lashing Chain End Link at both ends BL: 18.0T

11. Car Claspers

Belt Type Car Claspers

Made of polyester belt with hooks at both end and used for fixing cars on deck for car careers. Max. length between hook and hook will be 1,350 mm and firmly secured by tightening lever.



Safe Working Load	400 kgs
Max. Breaking Load	1,600 kgs
Length	Max. 1,400 mm
	Min. 400 mm
Weight	0.9 kgs

23 19 01	Car clasper, belt type, normal working load 400 kgs	Pc.

12. Ladders

Pilot Ladders

(Ref. JIS F 2615-2006)

Manufactured in compliance with JIS-F rules, the 1974 SOLAS conditions and the ISO recommended dimensions.

Excerpt of Pilot Ladder Rules (SOLAS)

1. Side Ropes
   Ropes should be mold-resistant manila or heat-treated polyester rope with polypropylene core and should not be covered. Ropes shall be of a diameter which is no less than 18 mm dia (57 mm in circumference), and have a breaking strength more than 24 kN.

2 Steps
The distance of inner edge of side ropes should be more than 400mm. The width of step is no less than 115 mm, and thickness no less than 25 mm. The steps should be non-slip, hard wood steps without knot and equally spaced at 330±20mm.

3. The bottom 4 steps may be made of resilient synthetic raw material or rubber if it is of sufficient strength and stiffness. Rubber steps should be of the same required dimensions as the wooden steps.

4. Preventer Steps
   Preventer steps shall have the same specifications as normal steps, but the length of preventer steps shall not be less than 1.8 meter.

   Position of Preventer Steps
   correspond to the total number of Pilot Ladder steps.

No. of Steps	The position of Preventer Steps	No. of Steps	The position of Preventer Steps
6	5	19	5, 14
7	5	20	5, 14
8	5	21	5, 14
9	5	22	5, 14
10	5	23	5, 14, 21
11	5	24	5, 14, 22
12	5	25	5, 14, 23
13	5	26	5, 14, 23
14	5, 12	27	5, 14, 23
15	5, 13	28	5, 14, 23
16	5, 14	29	5, 14, 23
17	5, 14	30	5, 14, 23
18	5, 14		

Remark: The position of preventer step is started from the lowest step.

5. Replacement Steps
   Repairs to pilot ladder shall be made to the steps and preventer steps only. The repaired steps and preventer steps shall have the form and dimensions specified in item (2) and (4), and not more than 2 such steps shall be used in any pilot ladder. Repaired steps and preventer steps shall be replaced by new ones as soon as possible.

6. Step Fixing Piece
   Step fixing piece must be made of wood or plastic.

7. Fastening Hardware
   Fastening hardware for rope and steps must be corrosion resistant, or made of similar material treated corrosion resistance.

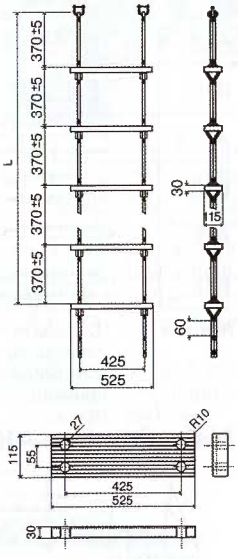
Embarkation Ladders (Ref. E.L.M. J 2000)

The embarkation ladder is used on a merchant vessels to embark survival crafts.

Each wooden part must be hardwood that is free from knots, and each metal fastener must be made of a corrosion metal. Each side rope must be continuous from the top of the ladder to the bottom and must not be painted or otherwise coated or covered.



Specifications

Side Rope	Manila (or synthetic) rope with 2-3/4" cir. (22 mm dia)
Clear space between side rope	370 mm ± 5 mm
Step Size	W:115 mm x TH:30 mm x L:525 mm
Distance of center hole for each side rope	425 mm

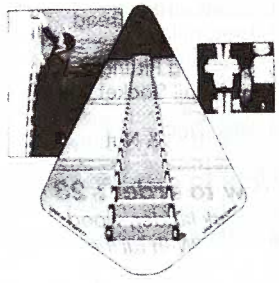
Synthetic Step/Spreader and Rope Pilot Ladders

Steps and spreaders have hand holes and are molded from high-impact elastomer. Assembled with white dacron ropes, which have double the strength of manila ropes.

Connected by stainless steel bolts and nuts. Will resist fracturing and parting under severe conditions. Also this rope ladder conforms to USCG and meets the international requirements of the convention for SOLAS 1974.

. HIGH STRENGTH ALLOY
. STAINLESS STEEL FASTENINGS
. ELIMINATES UNRELIABLE MARLIN MOUSINGS
. EXCEEDS 2000 LB. REQUIRED LOAD TEST BY 100%

MOLDED SYNTHETIC STEPS AND SPREADERS



Name of Mfr. : Coast Marine & Industrial Supply, Inc.

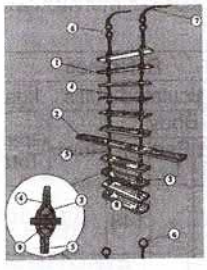
How to order : 23 - 20 - 56

Pilot ladder synthetic step/spreader and rope, finished length

Pilot Ladder with Step Brace Type SOLAS Approved

Fully comply with and exceed SOLAS Regulations and IMO Standards. These ladders are designed with new stainless steel clamping device tested to withstand loads up to 2,000 lbs (907.2 kilos). This new clamp will not slip or loosen with age. Manila rope and steps are fixed with hardwood step brace.

All steps are made from Ash hardwood, but the bottom 4 steps are furnished with in synthetic.



Pilot Ladder with all wood steps
Model No. PW

Pilot Ladder with bottom 4 - steps in synthetic
Model No. PWS

Specifications

1	Step	Ash hardwood 4.5" (115 mm) wide x 20.5" (520 mm) long x 1" (25 mm) thick.
2	Spreader	Ash hardwood 4.5" (115 mm) wide x 70" (1.8 m) long x 1" (25 mm) thick.
3	Step Brace	Ash hard wood
4	Clamp	Corrosion resistant stainless steel
5	Rope	Mildew-retardant manila 0.75" (19 mm) dia., 2.25" (65 mm) circ.
6	Lashing Ring & Thimble	Hot dipped galvanized lashing rings and thimble
7	Lanyard	10 ft. (3 mtr) lanyards with spliced in hot dipped galvanized ring and thimble for easy rope replacement
8	Lower 4 Steps	The 4 lower steps of pilot ladders are made with high impact Ultra-Poly synthetic 4.5" (115 mm) wide x 20.5" (520 mm) long x 1" (25 mm) thick with non-skid surface. Coloured safety orange.
9	Ties	High strength nylon-UV stabilized for longer life

Wharf ladder, aluminium alloy, TYPE x OVERALL LENGTH x WIDTH, (With further details if necessary)

Handrail Stanchions and Sockets

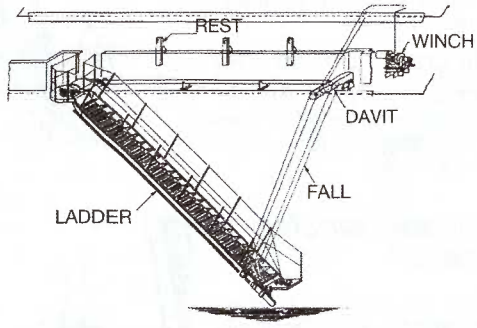
for Aluminium Alloy Wharf Ladder

Aluminium alloy made round bar for hanging hand rope at both sides of wharf ladder. Standard length between center of the eye for handrail rope and other end is 990mm for JIS type aluminium alloy wharf ladder, but in other case please specify the length according to the specification of the wharf ladder in use.

How to order : 23 - 20 - 77

Handrail stanchion and socket, aluminium alloy, for aluminium alloy wharf ladder, LENGTH

Aluminium Alloy Accommodation Ladders



How to order : 23 - 20 - 81

Accommodation ladder, aluminium alloy, NOMINAL SIZE (LENGTH) x WIDTH, (Further details are available upon request)

Securing Suction Pads
for Accomodation Ladder "Blue Box"

Used to secure the bottom of the accommodation ladder to the ship's side and insures the accommodation ladder rests firmly against the ships side. (Requested by the amendments 2000 to the SOLAS regulation, Chapter V, Regulation 23 'Pilot Transfer Arrangement') The arrangement shall be provided to enable the pilot to embark and disembark safely on either side of the ship by an accommodation ladder in conjunction with the pilot ladder, or other equally safe and convenient means, whenever the distance from the surface of the water to the point of access to the ship is more than 9 meters.

Can be operated from free supplied deck air at 6 to 7 kgf/cm^2, and the unit is made from non ferrous material therefore is resistant to corrosion. Class ABS certified.

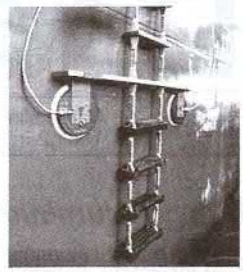
Specifications:

Pressure range: 25 to 102 p.s.i.
Consumption of compressed air: 26.4 Nl/min
Right angle holding force: About 3,200 N at 80& vacuum
Weight: 7 kgs

23 20 91	Securing suction pad for accommodation ladder,'Blue Box'	Pc.

Name of Mfr.: PTR Holland Group

Securing Device
for Pilot Ladder



Developed to make sure the pilot ladder is stabile for the pilot and can safely board and disembark from the ship. By using two vacuum generated spreaders can always secure the ladder firmly regardless the thickness of the paint on the ship, even if the surface is not smooth and has chipped paint. The required pressure range to this device is 1.4 – 4.0 bar, and has holding force at 715 kg.

The device complies with the new SOLAS regulations 1045 (27), and Class Lloyd's certified.

23 20 92	Securing suction pad for ladder, SPT-928	Set

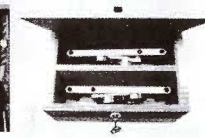
Name of Mfr.: PTR Holland Group

Holding Magnets
for Pilot Ladder

Specially developed to make life safer for sea harbor pilots by providing removable anchor points for the ladder on the ship's side. Designed to withstand aggressive marine environments, and powder-coating in safety yellow for high visibility. Resin encapsulation of magnetic elements makes the product seaworthy.

They are lightweight at around 3 kgs, providing more than 800 kgs of clamping force even through many layers of paint and salt scale and grime on a ship's hull. A derlin roller makes the hull magnet simple to attach and release. Class ABS certified.

The holding magnet is sold in piece, and tightening belt and storing wooden box are separate order.



Magnet Tightening Belt Storing Box

CODE	Descriptions	Unit
23 20 93	Holding magnet for pilot ladder	Pc.
94	Tightening belt for holding magnet	Lgth
95	Storing wooden box only for two holding magnets	Pc.

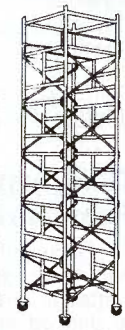
13. Scaffolds/Stages/Boatswain's Chairs

Prefabricated Steel Pipe Scaffolds



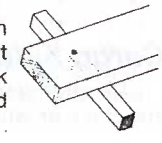
A safe, movable, prefabricated scaffold made of galvanized high tensile steel pipe frames; easy to assemble and disassemble.

Each step set comprises 4 wheels attached with jacks for moving and adjusting the height of the feet for use on a rough surface. Each section is fitted with 2 steel step plates and safety rails. The floor is made of checkered steel plate. Dimensions are 1,500 x 1,800 mm.

Unit Per Set

CODE	Number of Nominal Steps	Height mm	Numbers of Main Frames
23 21 01	2	3,200 ~ 3,660	4
02	3	4,700 ~ 5,160	6
03	4	6,200 ~ 6,660	8
04	5	7,700 ~ 8,160	10
05	6	9,200 ~ 9,660	12

Stages



A floor or a platform of planks fitted with transverse bearers, slung by ropes and put over ship's side or in holds, for men to work on when cleaning and painting. Standard dimension is W300 x T40 x L4,000 mm.

23 21 11	Stage, 300(W) x 40(T) x 4,000(L) mm with transverse bearer	Pc.

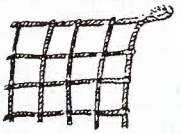
Boatswain's Chairs

Narrow wooden seat, suspended by rope and used by seamen when working aloft or over the side of the ship. Standard size is L 620 x W 160 x T 25 mm with ø20 mm rope.

23 21 21	Boatswain's chair	Set

14. Cargo Nets/Safety Nets

Polypropylene Rope Cargo Net Slings



Can be made to the desired specifications. Some common sizes are listed below.

Unit per Pc.

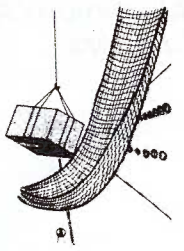
Mesh Rope Size	8 mm dia.	
Name of Synthetic Fibre Rope	Polypropylene (P.P.)	

Cargo Safety Nets

Usually made of synthetic rope. To hang between ship and dock or wharf to catch and prevent packages from dropping overboard into the water when loading or discharging freight. Made to order. When ordering, please specify the following points :



How to order : 23 - 21 - 65

Net, safety, cargo, Name of synthetic rope, Size of overall length and width, Size of mesh opening, Rope size of rim, Rope size of mesh.

Personnel Transfer Device

Personnel transfer device is used to quickly and effectively transport personnel on and off of platforms. Passengers are encompassed with tightened stainless steel ropes that protects from any side impact that may occur. It is equipped with quick release safety lanyards to provide safety and give the passengers confidence while in transit. Made of sturdy and very durable aluminum skeleton to protect them from falling objects, also shock absorbing feet is equipped to protect from hard landing. Available for 4, 6 & 8 persons capacity and also loaded a stretcher in the event of emergency situation. ABS Certification report is available.

Model	Capacity	Size(inch)	Weight
X-904-4	4 persons	90" x 90" x 34"	600 lbs
X-904-6	6 persons	102" x 102" x 36"	700 lbs
X-904-8	8 persons	102" x 102" x 36"	900 lbs

Name of Mfr. : Billy Pugh Co. Inc.

How to order: 23 - 21 - 66

Personnel Transfer Device, Model number., capacity etc.

15. Cargo Bags/Sling Belts

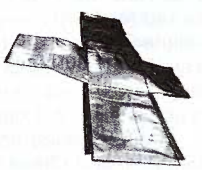
Cargo Sling Bags

Made of polyester, light weight, handy foldable cargo sling bag. Very useful for storage.

Size : 1 x 1.2 x 1.2 mtrs
Capacity : 1 ton

23 21 81	Cargo sling bag, polyester 1 x 1.2 x 1.2 Mtr	Pc.

Cargo Aluminium Bags



Made of aluminium sheet for heat insulation, keeping fresh/frozen provisions cool during transportation. Foldable, easy to set up with Velcro fastener.

Size: 1,080 x 970 x 1,350 mm

23 21 83	Cargo bag, aluminium 1,080 × 970 × 1,350 mm	Pc.

One Way Flexible Containers

A one way type flexible container makes the transport, delivery, and loading of blasting sand, copper bits, or other bulk materials fast and easy. It reduces the costs and extra effort for loading bulk materials because the slings are loaded and then stay on deck until the material is used. Several types are available, but the most common types are shown below.

Unit per Pc.

CODE	**23 21 86**	**23 21 87**
Type	Draw string with bottom release	Without bottom release
Material	Polypropylene/Polyester	
Cubic Volume Capacity	1,000 - 2,000 Ltr	
Weight Capacity	500 - 1,000 kgs.	

Belt Slings

Belt & endless types are available, and they weigh about one third the weight of a wire sling. The seamed part is so soft that it is easier to handle than other sling types.

Polyester Slings

Easy to handle by lighter and more flexible character of polyester.

Belt Type Sling

Specification

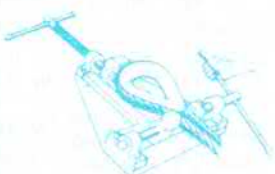
19. Riggers' Vises/Wire Rope Grips

Riggers' Vises



This portable riggers' forming vise is in wide-spread use wherever cable and wire ropes are used or handled. Ideal for forming cable or wire rope around thimbles or fixtures, making slings for either splicing or "U" shaped bolt clamps, or clip installations. Rigid construction, two sizes available.

Unit Per Pc.

02	" 360 mm "	"
03	" 450 mm "	"

Pneumatic Rubber Fenders

The characteristics of floating type pneumatic fenders are as follows.

1. Advantages

a. Adaptable to change in the tidal level.
b. Low and uniform surface pressure.
c. Simple and low cost installation.
d. Low maintenance cost

2. Types

a. Net Type

The net-type fender is covered by a chain net, wire net or fibre net for small size fenders.

Usually these nets have used tyres together with rubber sleeves for additional protection, except for the fibre net which has only rubber sleeves. Chain nets last longer against corrosion while wire nets are light and more easily repaired.

Chain Net Type (Heavy Duty Use)	Wire Net Type (Medium Duty Use)
	Fire Net Type (Light Duty Use)	

b. Sling Type

This type has eyelets built into the fender body for easy installation. Handling of the sling type is easy due to its light weight. Its maintenance is also easy.

Type		Appropriate Fender Size mm
	Sling Type	500Φ × 1,000L to 2,500Φ ×5,500L

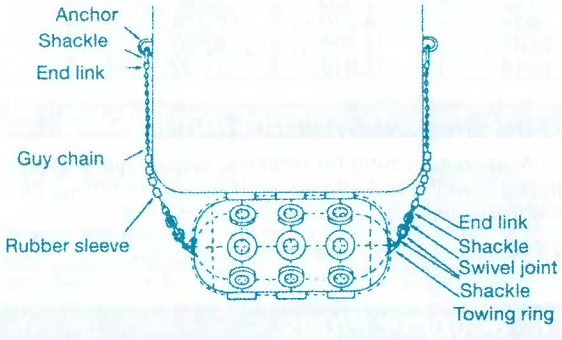
5. Installation Methods

a. Jetty Quay and Dolphin Use

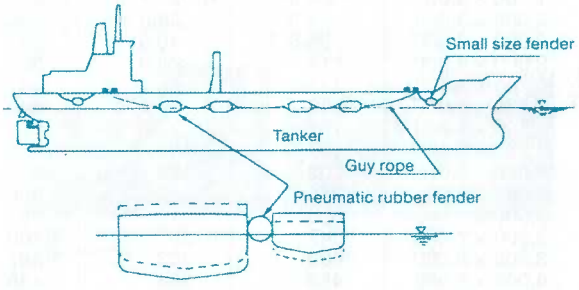
At both ends of the fender's chain or wire net, first fit the shackles, then the swivel joints and then further shackles should be installed. A guy chain or guy rope is secured to the outer shackle. The swivel joint prevents twisting of the guy.



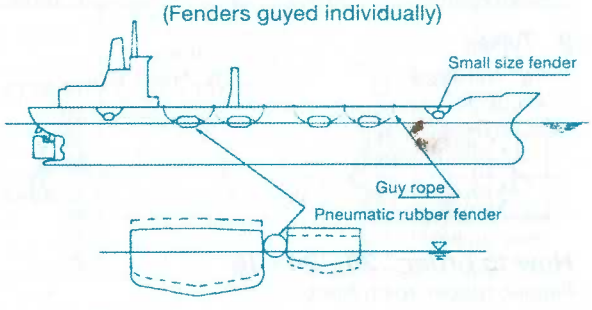
b. Ship to Ship

The following are examples of the installation method. Four pieces of large size fenders are usually floated as primary fenders to absorb impact energy at berthing. Two pieces of small-size fenders are hung high on the hull at both bow and quarter of the smaller ship to prevent contact during rolling due to swell. (Tied in a row)

(Tied in a row)



(Fenders guyed individually)



6. Installation Equipment

The typical installation equipment and necessary parts for installations are shown below.

There are the various sizes of shackles, swivels, ring rubber sleeves, thimbles, etc. according to the applicable fender capacity.

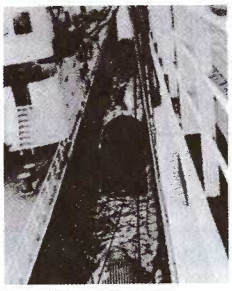
Foam Filled Rubber Fenders



1. The characteristics of the fenders are

a. Puncture-proof Construction

There fenders are filled with a special micro-bubble foam that creates a 100 percent independent closed-cell structure which will not absorb water. The fact that they are puncture proof and offer superior elasticity, assures users of the excellent durability of these fenders even under extremely severe conditions.

b. Long Life Performance

With these fenders, there is no need to adjust the air pressure to allow for changes in atmospheric temperature. This feature makes them ideal for applications in which minimum maintenance is a priority. In addition, fitting to the quay is simple; once the fenders are secured with a wire rope or chain, they comprise a permanent and extremely durable protection system for all ships.

Used Tyres

Worn rubber tyre, suitable to use as a fender for tug boats, fishing boats, etc.

23 24 21	Used tyre, ruber, SIZE	Pc.

Used Bicycle Interior Tubes

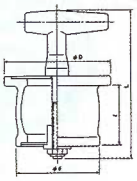
Worn interior tube for bicycles, and normally used for binding over the leaked hole on the pipes or fittings as an emergency measure.

23 24 22	Used bicycle interior tube	Pc.

21. Scupper Plugs

Scupper Plugs

For sealing the scupper holes for spilled oil or polluted liquids. Easy to use, insert plug in the drain hole and tighten the handle until a slight resistance is felt, the rubber plug will be expanded and held firmly



in place. Rubber parts are made of oil resistant rubber (CR). Seven types are available according to the pipe size. Specify the applicable drain pipe diameter when ordering, referring to the plug application list.

22. Deck Coverings

Deck Coverings

Used to seal deck openings of tankers, barges, and cargo vessels. Simple and reliable cover which does not require the drilling of holes and the insertion of studs to install.

Made of bronze or stainless steel to eliminate sparking. Fits to any standard 318 mm deck opening and will fit to a deck thickness of up to 76 mm.

Unlike other deck covers, the quick action cover is perfectly flat. There are no protruding parts to trip over. Removed with a special speed wrench which provides security against theft and gives rapid action for opening and closing. Frequently used as tank ventilators in place of ventilator gratings.

CODE	Description	Unit
23 24 91	Deck cover, bronze, for 318 mm deck opening	Pc.

Deck Safety Protection Cover

A safety protection cover designed to prevents crew from falls and other injuries associated with open manholes on-board vessels and platforms. Specifically designed to allow ventilation and utilities to remain accessible while still covering the hole and protecting the crew. Max payload is 205 kgs(450 lbs).

Unit Per Pc.

23. Oil Pollution Countermeasures

Overflow-Prevention Tanks

This portable and fordable, fuel oil, overflow-prevention tank is made of transparent urethane film, processed by an all-double stitch method of high frequency welding. It is oil resistant, coldproof (–45°C), heatproof (70°C), long wearing, and airtight. Easily attached over an air release vent, this portable overflow catch performs most effectively in keeping the deck free from oil. A and B type available. When ordering, please specify the type and capacity of the tank.

Warning!

Always exercise extreme care when cleaning up flammable liquid spills. Activities such as walking, rubbing, and pumping can generate static electricity in products with high electrical resistance such as rubber hoses, plastic containers, tanks, etc. The Static Resistant Oil Sorbent will help reduce static charge build-up but will not provide you with a static free environment. Also exercise extreme care when handling, storing, or disposing of any absorbent material containing flammable liquids.

Oil Absorbent Pellets

Igneous Rock

Made from glassy, igneous rock which is crushed into pellet sized fragments and heat treated. The pellets are extremely light weight and contain white sand like grains which have continuous pores which create strong oil absorbency through capillary action.

Types No. 1 and 2 absorb only oil whereas types 3 and 4 absorb oil and water. Pellets are not toxic or harmful to sealife.

Application	1. Treatment for spilled oil from a tanker accident, etc. 2. Treatment for floating oil from bilge, dirty ballast tank, tank cleaning, etc. 3. Treatment for oil from Petroleum Refinery, Petrochemical Plant, etc.		1. Treatment of oil pollution on the floor of the various plants and road surfaces. 2. Treatment of oil pollution on the road surface from tank lorry, train, cargo truck, etc. 3. Fire Extinguishing against Alkyl Alum Metallic Potassium, Metallic Sodium, etc.	

Natural Fiber Oil Sorbents

An all natural oil sorbent made from natural wood fiber of recycled paper products. Comes in pellet and loose particulate form and can be used effectively on water as well as land as a substance which is light, easy to clean, and allows for a high oil recovery rate.

On water the sorbent instantly neutralizes the harmful effects of oil spills and forms islands for clean recovery with minimal residue and no sheen. Will absorb only the oil, not the water.

Oil can be recovered from the sorbent by squeezing it, or the materials can be burned and used as fuel in approved facilities.

Clay Plugging Compound
for Oil Drain Protection

Specifically developed for the emergency sealing of leaks from holes, tears and ruptures. Stops most spills at source. Can be used on any non-flexible surface by the unique anti-freeze and anti-mould properties. Product is ready for immediate application, just push the ready mixed clay onto the source of the leek. Withstand pressure up to 0.25 bar and stays in place for up to 24 hours.

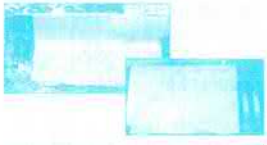
Emergency Drain Sealing Mats
for Oil Drain Protection



To stop oils and chemicals going down the drain. Resistant to oil, water and most chemicals. Also used by most fire services as first line pollution defence. Simple to use – peel off cover and tread onto drain. This product gives 100% seal even on rough surfaces. Place in areas of high risk in the wall mounted box. Unique anti-freeze and anti-mould properties and remains flexible to –20°C.

27. Hand Cuffs

Hand Cuffs

Made from stainless steel. Furnished with two sets of keys.

23 26 21	Hand cuffs, stainless steel	Pr.

28. Deck Chairs

Folding Deck Chairs
Pipe Frame

The frame is made of stainless steel pipe with woven plastic tubing forming the seat. Can be folded into a sitting position or reclined back. Available in blue or green colours.

23 26 31	Deck chair, folding pipe frame	Pr.

Folding Deck Chairs
Wooden Frame

A folding deck chair made with a wooden frame and a light canvas. It has an armrest that can be adjusted at three different settings. The inside width is 600 mm and the overall length is 1,250 mm.

23 26 32	Deck chair, folding wood frame	pc.

Pipe Frame Folding Chairs
with Arm Rest

Seat and back are made of alum. pipe and coloured vinyl mesh strip. Folds compactly for storage.

23 26 33	Chair, folding, alum. pipe frame with arm rest	pc.

29. Dunnage Bags/Plywood

Inflatable Dunnage Bags

Reusable dunnage bag made from strong plastic film combined with several layers of hard-wearing, water-resistant paper. It can withstand pressure loads up to 15 - 20 tons and temperatures from 20°C to 65°C.

This dunnage bag gives the best protection imaginable from transport damage, absorbing harmful shocks time after time without loosing its shape. Suitable for protecting drums, boxes, palletized goods, tins, bottles, large machinery or machinery parts, large pipes and special cargoes, etc.

Simply insert the dunnage bag in any space between items loaded in cargo and inflate it. This dunnage bag will prevent the cargo from moving during transport and will protect items from any shock occurring from contact with other packages.

Paper Wiping Rags

A disposable paper rag designed for use in place of cotton rags.

Unit Per C/S

CODE	Size mm	Contents
23 29 11	450 × 290	4,000 shts/case
12	380 × 380	100 shts × 15 box/case

Roll Paper Wiping Rags

A sanitary paper wiping rag supplied in rolls for a variety of uses. There are many types available but the most common types have been selected and described below with respective specifications. The roller stands and dispensers are sold separately.

A-Tork

Designed for a wide variety of heavy duty wiping applications. A-Tork is a simpler, more efficient and more hygienic material than rags or cotton waste.

E-Tork

Specially developed to replace rags and cloths. E-Tork is for more detailed work such as the polishing of enamel paint or the cleaning of precision engineering parts. E-Tork is chemically pure and features an absorption rate as much as 4 times greater than cotton materials.

M-Tork & Mini Tork

Intended principally as a towel wipe. This single ply material can be utilized for many other lightweight purposes such as cleaning kitchen counters, bathroom fixtures or first aid rooms. Has the same quality paper as the A-Tork type.

CODE	Type	Paper Size	Ply	Unit Per Box Rolls/Box
23 29 21	A-Tork	290 mm × 240 mtr	2	4 rolls

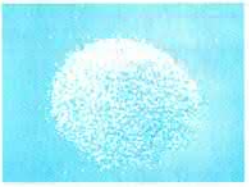
Garnet Blasting Grit



Garnet Abrasive is derived from mined Almandine and Andradite mineral deposits, and most commonly used as a high-performance blast media, for the cleaning of metal and fibreglass structures. As an inert, non-toxic, natural mineral, it is also used on sites where water contamination is a concern. Various grain sizes are available. Packed in quantity of 25 kgs in strong paper bags or metric ton.

37. Emergency Towing Arrangement

Emergency Towing Arrangement

According to the revised regulation of the 1974 SOLAS in 1994, new and existing oil tankers, chemical tankers and gas carriers of 20,000 dead weight ton and above shall be fitted with an emergency towing arrangement.

For new tankers constructed on or after 1st Jan. 1996 shall be fitted and for existing tankers constructed before 1st Jan. 1996 shall be fitted at the first scheduled dry-docking after 1st Jan. 1996, but not later than 1st Jan. 1999.

There are four types of equipment according to the ship's tonnage and installing location as following table.

Type	Dead Weight Tonnage	Location	Model for Reference
1	20,000 - 49,999	Forward	TK20F
2		Aft.	TK20A
3	50,000 <	Forward comply with OCIMF	TK40F-KS (Bar Type)
			TK40F-CS (Tongue Type)
4		Aft.	TK40A

The design and construction of the towing arrangements shall be approved by the adminstration, based on the guidelines developed by the organization and these components should not be rigged on a ship separately.

Major Components of the Towing Arrangements

Items	Forward	Aft.
Pick-up Gear	Option	Required
Towing Pennant	Option	Required
Chafing Gear	Required	Depending on design
Fairlead	Required	Required
Strongpoint	Required	Required
Roller Pedestal	Required	Depending on design

Substance of the IMO Guideline

1. Ready availability of Towing Arrangements

   The aft emergency towing arrangement should be prerigged and be capable of being deployed in a controlled manner in harbour conditions in not more than 15 minutes. The forward emergency towing arrangement should be capable of being deployed in harbour conditions in not more than one hour.

2. Strength of the Towing Components

   Towing components should have a working strength of at least 1,000 kN for tankers of 20,000 dwt and over but less than 50,000 dwt and at least 2,000 kN for tankers of 50,000 dwt and over (working strength half of ultimate strength).

3. Length of Towing Pennant

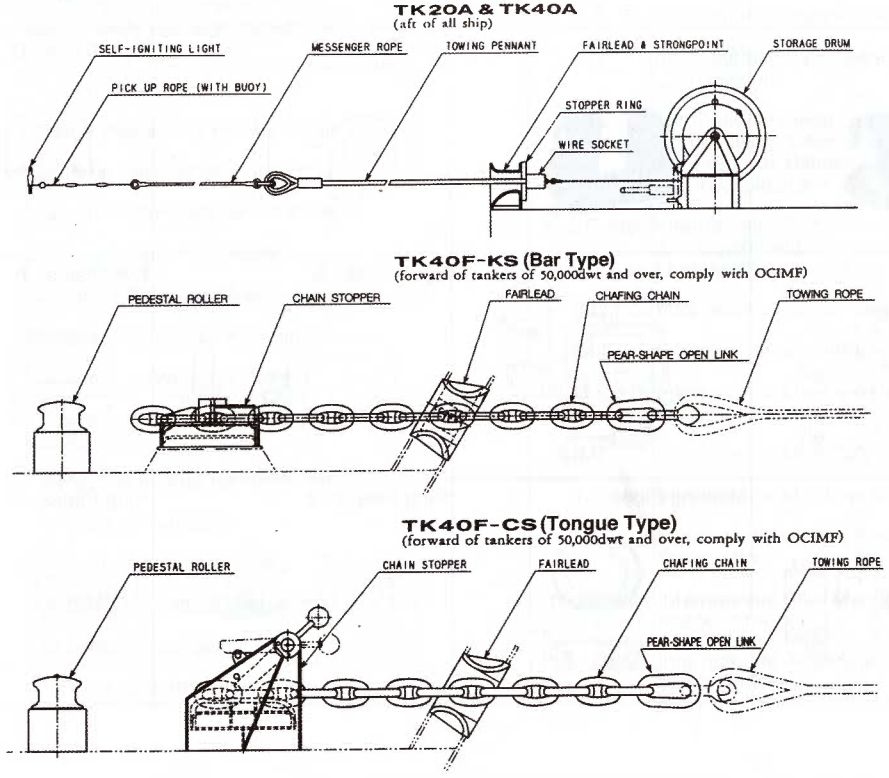
   The towing pennant should have a length of at least twice the lightest seagoing ballast freeboard at the fairlead plus 50 meters.

4. Length of Chafing Chain

   The chafing chain shall extend from the strongpoint to a point at least three meters beyond the fairlead.

5. Fairleads

   The fairlead should give adequate support for the towing pennant and chafing gear during towing operation which means bending 90 degrees to port and to starboard side and 30 degrees vertical downwards.
   The bending ratio (towing pennant bearing surface diameter to towing pennant diameter) should be not less than 7 : 1.



TK20F
(forward of tankers of 20,000dwt and over but less then 50,000dwt)

Marine Paint

A wide range of products from different manufacturers are available. Some points to pay attention to in the painting process are described as follows.

1) Method of surface preparation

If the pretreatment of steel is insufficient, it is not possible to expect satisfactory results in the paint application. The main surface preparation methods are listed below as a reference.

Blast Cleaning

Sand blast	Shot blast	Vacuum blast
Mill scales, rust and harmful substances can be completely removed.		
Surface with complicated configurations can also be treated.	Efficient treatment can be performed.	Scattering of dust is limited.

Power Tool Cleaning

Disc sander	Power brush	Tube cleaner
Rust removing and cleaning can be efficient performed with relatively little effort.		

Hand Tool Cleaning

Scraper	Hammer
Handling is very simple and easy.	

Chemical Cleaning

Picking
Mill scales and rust can be completely removed. Picking is suitable for treatment of complicated configurations.

2) Primary surface preparation

1. Mill scales, rust and other foreign matters are to be removed to the grade of near white by blast cleaning.
2. After the blast cleaning, all blast abrasives and dust on the steel surfaces must be completely removed.
3. The surfaces will return to rust within a short time. Therefore it is necessary to apply a shop primer immediately.

3) Shop primer

Rust will return to the surfaces within a short time so it is necessary to apply a shop primer immediately.

4) Secondary surface preparation

Secondary surface preparation should be performed before painting because the surface of steel plates that have been coated with shop primer will be damaged by fusion cutting, welding, distortion and exposure to corrosive atmospheres.

5) Storage stability

When paints are stored outdoors, they will deteriorate in a shorter period. It is therefore recommended to store paints indoors in a cool place.

6) Painting with an airless sprayer

When paint is being applied by an airless sprayer, it is necessary to select suitable painting equipment. The following table provides a guide in the selection of airless sprayers.

Guide Table for the selection of Airless Paint Sprayers

Pressure Ratio	23:1	30:1	45:1
Max. Pressure of Nozzle	160 kg/cm^2	210 kg/cm^2	300 kg/cm^2
Max. Pressure of Air Supply	7 kg/cm^2	7 kg/cm^2	6.6 kg/cm^2
Max. Discharge Quality	1.9 ltr/min	11.4 ltr/min	12.6 ltr/min
Application	General finish coating, anti-corrosive paint, etc.	Chlorinated rubber paint, epoxy resin paint, etc.	Epoxy resin paint, tar epoxy resin paint, high viscosity type paint, etc.

7) Atmospheres in which it is not suitable to paint

1. When the atmospheric pressure is less than 5°C.
2. When there is high humidity.
3. When there is a possibility of bubbling because the surface is scorched by the sun.
4. When there is a possibility that moisture, sand, dust, or other foreign matter will adhere to the paint while it is still wet.

8) Ventilation

It is required that the space being painted is properly ventilated to avoid the possible risk of ignition of paint or gasoline fumes and explosion.

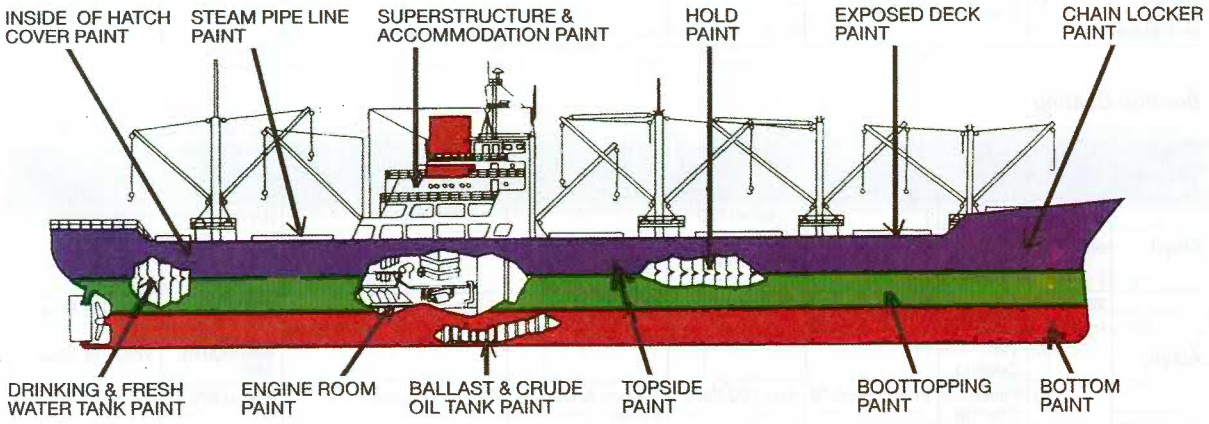
Marine Paint Coating Chart



INTERNATIONAL MARINE PURCHASING ASSOCIATION

Marine Paint Comparison Table

The following tables show a comparison of paints from major paint manufacturers of the world. Listed here are typical standard examples. Some may differ depending on the trading condition, expected life, etc. Please consult with the paint manufacturer before making your final decision. Please specify the following points when ordering.

For example

1. Representative code : 25 02 81
2. Where to be applied : Boottop coating
3. Type of system : Alkyd
4. Kind of paint : Anti-corrosive
5. Manufacturer's name : _____
6. Brand name : _____
7. Colour : _____
8. Quantity : _____ltr

Latest Fouling Control Coatings

Intersleek 1100SR

Specifically designed to tackle the problem of slime on vessel performance, this innovation in the Intersleek range delivers outstanding micro and macro fouling control with better static resistance.

The new patented fluoropolymer in Intersleek®1100SR has been developed by enhancing the slime resistant polymer groups used in earlier generations of Intersleek®.

The tailored surface chemistry of this new technology specifically influences and resists the adhesion and settlement of organisms that make up slime colonisation.

Intersleek® is biocide-free, which results in no leaching of biocides into the sea. This offers cost advantages at the next drydocking on waste treatment and disposal, plus enhanced environmental profile. Intersleek also has higher volume solids and lower required film thickness than SPC systems. Only a single full coat is required every five years through a vessels lifetime, therefore paint consumption is significantly reduced – further enhancing your environmental profile.

Intercept 8500LPP

A high performance, low friction, linear polishing polymer (LPP) antifouling incorporating unique patented Lubyon® and silyl methacrylate technology.

This combination of polymer technologies, based upon years of experience and development, provides the basis for this performance improvement over existing products and, as a result, Intercept 8500 LPP gives the highest performance of all our biocidal antifoulings. The Lubyon polymer brings its unique Linear Polishing Polymer properties which ensure that the faster polishing rate is controlled in a consistent manner throughout the in-service period of up to 90 months.

Unlike typical silyl and metal acrylate biocidal antifoulings, Intercept® products replicate the linear polishing behaviour of previous tributyltin based antifoulings. Typical silyl acrylate based products polish slowly initially, thereafter the rate of polishing steadily increases. Whereas typical metal acrylate systems polish fast initially before reaching a steady state.

Interfine 878

A patented high performance, high volume solids content acrylic polysiloxane cosmetic finish providing excellent long term durability. Interfine 878 significantly improves upon the gloss

and colour retention exhibited by typical polyurethane finishes.

Intershield 163 Inerta 160

Intershield 163 Inerta 160 is a proven, high performance abrasion resistant coating especially designed for ice going vessels.

Key system features include:

- Smooth surface assists ice slip
- Resists ice adhesion to the coatings surface
- Low frictional resistance controls fuel costs and improves operating efficiency
- Abrasion resistant - controls mechanical damage and hull roughness, saving on future maintenance and repair costs
- Up to 2.5 times the impact and erosion resistance of standard epoxies
- Designed for operation in temperatures down to -50°C (-58°F)

Interbond 808

Designed primarily for WBTs for use on-board by riding squads or ship's crews, Interbond 808 is a light coloured, two pack epoxy particularly suited to repair at sea as it is both surface and damp tolerant.

Intershield 300

A light coloured, abrasion resistant, aluminium pure epoxy coating giving excellent long term anticorrosive protection for cargo holds, WBT and all outside shell and low temperature application capability.

Intershield 803Plus

An ultra high performance two pack abrasion resistant epoxy coating. Provides excellent protection against cargo abrasion and impact shooting damage caused by high speed belt conveyors, minimising mechanical damage and subsequent corrosion.

Non-Slip Coatings
for Floors, Ramps & Stairs

Designed for application in slippery areas to make them safer for operation of personnel and rolling equipment. A heavy duty safety coating that has excellent adhesion to metal, concrete and wood surfaces.

25 16 11	Non-lip coating, 1 gal	Can
12	" , 5 gal	"

Monolar Mastics

A tough, flexible, fire resistant finish for protection of thermal insulation. It is also used as a vapor barrier coating for fittings. Its vapor barrier properties and unusual film strength permit its use as one coat protective coating. It is excellent for indoor or outdoor use where chemical resistance and durability are required.

Rust Converter & Prevention

Loctite® Extend SF7500 Rust Treatment

Converts existing rust (rust required) into a stable base. Cured product acts as a primer ready for painting with oil or solvent based paint. Protects surface from corrosion. Use on metal pipes, valves, fittings, outside surfaces of storage tanks, fences, guard rails, wrought iron furniture, conveyors, construction and agricultural equipment.

StopStand Slip Protection Coating

StopStand increases the safety in slippery areas. Especially on the deck or at stairs in engine rooms a good foothold is essential for the safety. StopStand guarantees highest safety standards. The highly non-slippery coating can be easily applied on the spot.

Product Benefits:

Increases the safety in slippery areas.
3-compound-coating including all components.
Easiest application through a notched trowel.

Unit Per Set

Anticorrosive ZAP Paste

An anticorrosive compound mixed weather-proof Butyl Rubber bonding material and a high purity zinc powder retained electrical conductivity. Suitable for steel surface protection of pipes, fittings, stairs, etc. It doesn't need to add any primer or solvent, and you can paint as soon as you finished surface preparation. It doesn't contain harmful toluene. Suitable temperature below 60 degree centigrade. The expecting durability is designed for 20 years after spreading.

Unit Per Pc.

Anti-corrosion Zinc-Aluminium Paint DRALL

Made from zinc and aluminium flakes which realized superior anti-corrosion performance with only 30 μm film thickness for once coating. Besides the sacrificial anti-corrosion effects of zinc, aluminium also suppresses the oxidation of zinc through chemical reaction and forms stable film. Because it is single liquid type and has little metallic precipitate, it is easy to stir the liquid at the beginning of operation. Moreover, its low viscosity ensures easy coating.

Usage

* The touchup of products (bolt, nut) [Repair flaw after the treatment of anti-corrosion thin film DISGO and LAFRE].
* The repair of the rusted parts.
* The anti-corrosion treatment of the section and welding parts.
* The repair of the galvanized steel sheet section.
* The repair of leakage and rusted parts after hot dip galvanizing.

Painting area: 4 – 5 m²/kg (including 20% loss)

Metal Pigment Coatings

Unit Per Can

CODE	Product	Content	Description
25 21 01 02	Brushable Zinc Coating	375 ml 750 ml	Excellent solution for touch up and corrosion protection of galvanized parts. Colour: approaching hot galvanizing. (Specific weight: 1.25g/cm^3)
25 21 03 04	Brushable Zinc Paint	375 ml 750 ml	Brushable liquid zinc paint assures durable and ideal corrosion protection for all metal surfaces. (Specific weight: 1.90 g/cm^3)
25 21 05 06	Stainless Steel Paint	375 ml 750 ml	Stainless steel paint is a corrosion- and weathering-resistant surface coating based on metal pigments.
25 21 07 08	Aluminium Paint	375 ml 750 ml	Aluminium Paint is made on the basis of metal pigments and offers a high-quality and abrasion-resistant corrosion protection for all metal surfaces.
25 21 09 10 11	Corro-Protection	5 ltr 10 ltr 30 ltr	Forms a dry wax-like protective film which provides lasting protection of metal tools and precision parts for indoor storing and overseas shipment. TÜV approved.

Name of Mfr.: Weicon GmbH & Co. KG

Ferryl Coatings

One-component coatings with superior elasticity when dry, providing long-term anticorrosive protection without cracking. Also known as "plastics" because of the plastic-like coating that is created.

Unit Per Drm/Tin

CODE	Product No./Unit	Application
45 04 11	Ferryl 400R Anticorrosive White Coating 12 kgs/drum	One-component product applied like paint. Flexible, non-cracking plastic-like coating. Used on non-rotating wires, standing rigging, rubber insulated electrical cables and (hydraulic) hoses.
45 04 12	Ferryl 401 Anticorrosive Transparent Coating 1 kgs/tin	One-component product applied like paint. Flexible, non-cracking, plastic-like coating. For preservation of metals' original colour (steel, brass, bronze, copper). Also used as a wood varnish.
45 04 13	Ferryl 404 Dilution & Cleaning Liquid 10 ltr/drum	Solvent for cleaning and dilution of the Ferryl coatings. Used as a general thinner.
45 04 17	Ferryl 502 Anticorrosive Fluorescent Coating 1 kgs/tin	One-component product applied like paint. Fluorescent orange-red colour. Flexible, non-cracking, plastic-like coating. Used for safety applications. (life-saving equipment, warnings, bridge, low beams / steps).
45 04 15	Ferryl 505 Anticorrosive Fluorescent Coating 1 kgs/tin	One-component product applied like paint. Fluorescent yellow colour. Flexible, non-cracking, plastic-like coating. Used for high visibility marking applications (stairs, walkways, zone markings).

Name of Mfr.: Ferryl Sales Limited.

Rust Converting Latex Primer

A water based chemical rust converter which converts the rust to magnetite, creating a non rusting metallic barrier layer on the steel.

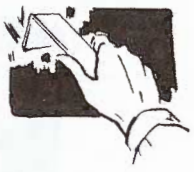
Requires less preparation time and cost as it is not necessary to remove the rust completely before application.

25 99 06	Rust converting latex primer Corroseal 5 gal/can	Can

Name of Mfr. : Corroseal Inc.

General Painting Instruction to Ship's Crew

Surface preparation



It is vitally important to prepare all surfaces sufficiently before painting, paying particular attention to ferrous metals. Rust and millscale must be removed by efficient scraping or vigorous wire brushing. When recoating over old paint, the surface must be free from soil, grease oil, and salt water deposits.

In the case there are salt water deposits on the surface, they are most easily removed by washing with water and common soda and then washing the surface clean again with fresh water and allowing the surface to dry completely.

Without these simple precautions the paint will not adhere well and will result in peeling and the need for subsequent recoatings.

Selecting the right paint specification or process

Care must be taken to ensure that the correct painting process is adopted. For example, it would be fatal to apply a slow drying oil base and heavily pigmented primer with the intention of finishing with a modern synthetic product, surface tension would quickly encourage film cracks and peeling. Therefore, always keep to the same system following carefully the manufacturer's recommendation.

Stir the paint well before use

Even today, with all the advantages of science and technology, a large number of paint failures are occasioned by not stirring the paint before use. Good pigment dispersion prevents heavy deposits sinking and lying on the bottom of the can or drum, but the medium and the pigment will, to some extent, settle out without severe sinkage: this encourages users to apply the paint without careful stirring. Technical failures experienced by not allowing adequate stirring are inconsistent gloss for enamels, poor coverage performance or early film failure.

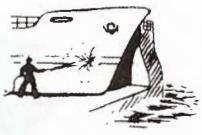
Give the surface the right pre-treatment to re-painting

Prior to re-painting, all old loose paint should be scraped off. Rust dots, if any, should be removed with a steel brush. Rust-scraping must be done to the point where the paint has good adhesion to the iron. Make sure that no rust has penetrated down under the old paint. Also make sure that there are no cracks in the old paint. Should there be any, they must be scraped and brushed down to the iron. Undamaged areas of the old paint need not be removed, but the old film should be washed with a common soda solution, and then rinsed according to the directions in surface preparation.

Adapt the priming to the finish required

Always bear in mind that the glossier the surface, the more important it is to ensure the proper preparation of that surface; for the least unevenness will be magnified on a high gloss surface.

Ships bottom (underwater area)



After the careful removal of marine life from the heel by scraping and rinsing, be sure to remove all millscale and rust pitted areas. It may be necessary to chip and scrape all corroded parts to get a clean painting surface. Be sure to let the surface dry thoroughly before any coating is applied.

In spots where rust is exposed during the preparation, it is important to "coat in" these areas with an anti corrosive composition, followed by the application of one or more coats of anti fouling to a grade suitable for the ships service life.

The belt

Special attention must be paid to this vital area of the vessel, which is normally contaminated with oil and grease from continuous harbour polution. It is most important to clean this area off, using a suitable cleaning agent or detergent. The preparation as suggested in the foregoing paragraph should be followed through.

Topside and superstructure

When dealing with the maintenance of the Topside and Superstructure, it is most essential to remove salt water deposits and to comply very carefully to the instructions as laid down in the points illustrated in our General Painting Instructions for the Guidance of Ships' Crew.

Decks

After carefully preparing steel decks and following the principles laid down in the General Painting Instructions, it is important to apply a good rust preventive primer prior to the application of the Deck Paint.

Main engines and machinery

Where re-painting is to be considered, special attention must be paid to adequately cleaning the surface and making it free from oil and grease deposits before re-coating is attempted.

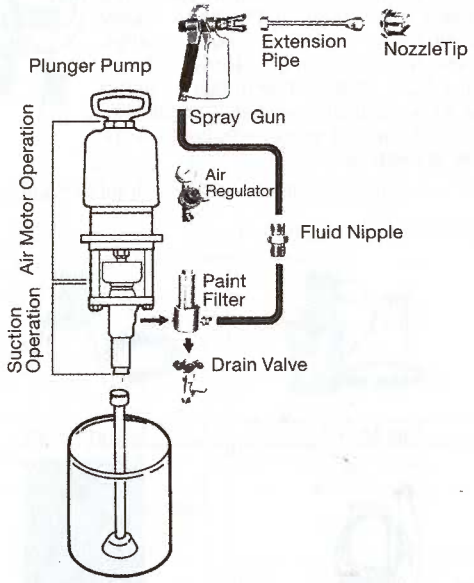
Airless Spray System

Airless spray systems operate using high pressure to apply paint by forcing it through a specially shaped nozzle into a confined spray which cleanly and fully covers the painting surface. The pressure is provided by a pump which draws the paint up through the hose to the airless spray gun.

Airless spray machines are 4 times faster and 35 - 55 % more efficient than air spray machines with less paint loss through overspray. Airless systems can also handle thicker based paints and applicators easier and with better results than air spray or conventional methods.



Safe Operation of Airless Equipment

Airless spray equipment generates very high fluid pressure. To reduce the risk of fluid injection injury, burns from fire or explosion, or splashing of fluid on the skin or in the eyes, the following precautions must be followed.

1. Always read and follow all safety warnings in the instruction manual.
2. Always follow all recommendations regarding the use of protective clothing, eyewear and equipment.
3. Never exceed the maximum working pressure of any component in your system.
4. High velocity fluid moving through sprayers and hoses generates static electricity. Ground all equipment and objects being sprayed.
5. Make certain that the fluids you are pumping are compatible with the wetted parts of all components in your system. Do not use 1, 1, 1 - trichloroethane, methylene chloride, or other halogenated hydrocarbons with the sprayers and accessories. Such use could result in a serious chemical reaction which could cause serious injury and property damage.
6. Spray solvent - based fluids only in well ventilated areas, to exhaust the solvent vapors.
7. To reduce the risk of serious bodily injury from high pressure fluid, keep your fingers and hands away from the gun nozzle. Do not alter the tip guard or remove the trigger guard. Always relieve pressure and engage the trigger safety lock when you stop spraying.

Airless Paint Sprayers

Air-powered Type

Many types of sprayers are available for various jobs. The most common products for marine use are described below with their respective specifications.

Sprayers with much tougher fittings including specially treated, chromed stainless steel rods and cylinders which withstand wear and operate over a longer span or time when pumping highly abrasive or corrosive materials.

Electric Airless Sprayer e-Xtreme

The world's first electric sprayer for protective coatings approved for hazardous locations. ATEX, IECEx, and Class 1, Div. 1 approvals and can be used in shipyards, on-board, dry-docks, refineries and off-shore, or in any location where generating a spark is of concern. By eliminating the need for an air motor, it is possible to avoid all icing problems and compared to an air motor. The e-Xtreme sprayer is up to five times more quiet.

Runs on 240V/16A power, and able to handle Graco's most popular tip sizes and with a smooth pattern thanks to the low rate of pulsation.

The sprayer saves up to 80% of energy costs when compared to an air operated sprayer. Study completed on pump pressure of 241 bar (3,500 psi) for 20 hours/week; spraying 1,226 L (324 gal) of 73% volume solids epoxy with XHD519 tip.

Airless Sprayers Heavy-duty Cart

KING®

The real pneumatic airless sprayer and gives you power, performance and dependability for the toughest protective coatings applications with the lowest operating cost. Less pulsation, no icing and simple maintenance. The King simply rules in all conditions.

- Outperforms and outlast traditional pneumatic airless sprayers.
- Designed to withstand the harshest environmental conditions.
- Easily handles the toughest protective coatings and corrosion control paint applications.
- Very simple maintenance. Low repair and spares costs. Comes with a removable valve cover and easy access to poppet valves.
- Reduced icing potential by up to 70% with thermally isolated poppets and external pilot lines.
- Improved sealing and strength with enhanced edge loading and seven throat packings instead of five.
- Multi-gun capabilities. With more powerful and efficient changeovers, the ability to spray with several guns is now a reality. *Depending on material, hose and tip size.
- Intrinsically safe for use in EX environments. Conforms to directives ATEX 2014/34/EU, Ex II 2 G c 230°C, Ex II 2 G h T6.

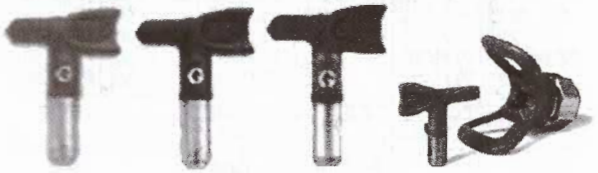
High-Pressure Airless Spray Tips RAC10, XHD



RAC10-FFLP RAC10-PAA RAC10-HDA XHD

Improve spraying productivity and reduce downtime with the new HD RAC switch tip. Saves time – no screwdriver required. Change tip sizes in seconds – without removing the tip guard housing. Locking tab ensures tip stays securely in guard.

RAC10 tips

Choose the RAC10 tips for Airless applications up to 350 bar.

* FFLP tip (green) for Fine Finish applications.
* PAA/WA tip (blue) for all Professional Airless Applications.
* HDA tip (brown) for Heavy Duty Airless applications.

XHD

For heavy-duty applications up to 500 bar (50.0 MPa, 7,250 psi). Recommended for Xtreme® sprayers and XTR™ airless spray guns.

Spray Guns

There are many types of spray guns available and the spray gun required for a certain job is usually selected based upon the following specifications.

1. Material size to be sprayed
2. Quantity to be sprayed
3. Quality of finish
4. Paint viscosity

A wide variety of models from different manufacturers are available but the most common models are listed below.

Air Spray Guns

AirPro

Advanced spraying technology for automotive, metal, wood, waterborne, high wear and adhesive applications. This air spray gun delivers exceptional spraying performance while addressing your environmental and operator concerns. Cutting edge air cap and nozzle design optimize spray performance. Wide range of gun models to meet the needs of your specific application. Light weight design, low trigger force and ergonomic handle provide maximum operator comfort. Fewer parts means less maintenance and downtime. Air flow and consumption are tested to meet environmental compliance.

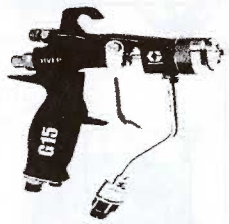
Manual Air-assist Spray Guns

AA Seires

Manual air-assist spray guns designed for exceptional spray quality and ease of use. Designed for: High quality air-assisted spraying in a variety of applications, maximizing operator comfort and productivity, reducing overall cost of ownership, improving transfer efficiency and material usage, and versatile spraying of all shape and sizes.



Model	Recommended	Max. Working Fluid Pressure
G15 Carbide	for low to medium viscosity materials	1,500 psi (10 MPa,105 bar)
G15 Acetal Seat	for acid-catalyzed materials	
G40	for high viscosity materials above 150 psi	4,000 psi (28 MPa, 280 bar)

Air Spray Tips

Applications

AAM Tips	Fine finish tips for a high quality finish at low and medium pressure
GG4 Tips	High wear tips for industrial finishes at high pressure

Slotted V-Gard Safety Helmets
with Staz-On Key Push Suspension

Made of polyethylene shell with suspension system working together as a protection system. MSA V-Gard caps meet or exceed all applicable requirements for a Type I (top impact) helmet as outlined in ANSI Z89.1-2014, Class E, and as outlined in CSA Z94.1-2005, Class E with 1-Touch® and Fas-Trac suspensions. For European versions, Push Key suspension fulfills EN 397:1995. MSA V-Gard caps are not specifically designed to protect against lateral blows from the front, side, or rear.

Available in three sizes for cap : small (6-7 1/8), standard (6 1/2-8), and large (7–8 1/2), Hat : medium (6 1/2–8") only and in a wide choice of colours in order to satisfy your requirements.

Slotted V-Gard GREEN Safety Caps and Helmets
with Fas-Trac III Suspension

Shell made of green high-density polyethylene (GHDPE), a plant-derived plastic that has the benefit of cutting carbon emissions and reducing atmospheric CO_2, with Fas-Trac III suspension system working together as a protection system. Certified USDA Biobased (>95% biobased shell). MSA V-Gard GREEN caps and helmets meet or exceed all applicable requirements for a Type I (top impact) helmet as outlined in ANSI/ISEA Z89.1-2014, Class E and CSA Z94.1-2005.

MSA V-Gard GREEN caps and helmets are not specifically designed to protect against lateral blows from the front, side, or rear.

Available in size: standard (6 1/2-8).

MSA Vanguard II Helmets
for Lateral Protection

Designed to provide limited impact and penetration protection in the event of a top or lateral blow to the head, as well as limited protection against contact with high-voltage conductors. This helmet is tested to the same energy level for top and lateral blows. Compliant with test requirement of ANSI Z89.1-2003 Class E (electrical/high voltage) and are certified to CAN/CSA Z94.1-2005 for Type I and II helmets.

Fas-Trac III suspension is included. Shell is made of Polyethylene.

Reduced Peak Safety Helmets Linesman

High safety with low weight. Reassuring strength with feel-good comfort. Manufactured from high quality, strong ABS (Acrylonitrile-Buradiene-Styrene) material, the Concept is 20% lighter than most other helmets. Unique design, provides an extended nape, ensuring increased neck protection. Dry-Tech sweatband for maximum comfort, for extended periods of use. It satisfies all the electric insulation requirements of EN397 and ANSI Z 89 class E. It comes complete with a high security head harness, quick release chinstrap, comfortable terylene cradle and sweatband. Standard size is 51-63cm. Compliant with EN397–30°C (Low temperature), 440V a.c. (Electric resistance). Available also with wheel ratchet option.

Safety Helmets

V-Gard 900 series

Integrated Over-spectacle/Visor

V-Gard® 900 helmet range features a dynamic design and a premium shell for maximized strength. Various customization options (shell colors, stickers, badge holder, full color printing, etc.), ease of use and best in class comfort with Fas-Trac III suspension will optimize wearer acceptance.

The shell is made of ABS (Acrylonitrile Butadiene Styrene) and meet or exceed all applicable Standard requirements in EN397, including optional requirements of very low temperature (-30°C), LD (Lateral Deformation), MM (Molten Metal), 440 VAC & EN 50365 1000 VAC (non-vented version only for V-Gard 930), EN 134631-1, use in Explosive Atmosphere ATEX (zone 1, 2, 20, 21 and 22).

Size : 52 ... 64 cm.
Weight : V-Gard 930 is 495 Grams, V-Gard 950 is 635 Grams.

V-Gard 930 – Integrated over-spectacle with red micro-prismatic retro-reflective stickers

- Vented and non-vented shell in 6 different colors.
- Balanced, low profile with premium eye protection for Construction, Utilities, Shipping & OGPC.
- Premium anti-fog over-spectacle fits over all corrective glasses.
- Intelligent adjustment and innovative rubber seal to ensure gap free eye protection on the face.
- Grip area with rail system for quick and easy lens stowing.

Ventilated Safety Helmets

Six-point, webbed suspension system conforms to wearer's head for maximum comfort, safety, and stability; chinstrap designed to reduce risk of helmet loss during fall (strength greater than 50 daN); includes foam inserts in two thicknesses for custom fit. Sliding vent covers allow for adjustments to air circulation inside helmet. Slots, clips, and inserts for mounting ear and face protection and headlamps. Weight: 455g. Circumference: minimum –53cm, maximum –63cm.

Certifications: CE EN 12492, UIAA, ANSI Z89.1-2009, Type I Class C.

Complies with EN 397 and EN 12492 for protection against impact and EN 397 for protection against lateral deformation and for wear in cold temperatures.

V-Gard Headgear and Accessories

V-Gard Headgear is a brow guard that in combination with the wide range of V-Gard Visors offers a lightweight, comprehensive face protection system. Featuring a durable and stylish HDPE frame and the choice of over 20 visors it is ideal for many applications. With the unique 3-point visor load system visors are fitted or removed easily and quickly. Adjustable to all head sizes and with two comfort sweatbands all day comfort is for sure.

Headgear Frames

- Can be used with earmuffs, half-mask respirators and more ...
- V-shaped alignment guides for easy installation.
- Non-metal construction for use in electrical applications.
- Optional ET frame is made of heat resistant Nylon in grey with extended crown for additional coverage.
- ANSI tested to temperatures of 400°F (204°C).
- Fits head sizes 52 – 64 cm.

Approvals

ANSI/ISEA Z87-1:2010 / CSA Z94 / EN166:2001 389 BT / EN1731-F / AS/NZS 1337

Faceshield Frames

This frame works with any MSA slotted or non-slotted helmet and features our unique sloped design to help material slide off the frame and out of site. Can be used with earmuffs, half-mask respirators and other personal protective equipment. Stays securely on the cap, thanks to the heavy-duty, flat, rubber strap. The elevated temperature model withstands temps up to 350°F (176°C).

- Sloped design helps material easily slide off the frame.
- Pivot location for use with earmuffs, half-mask respirators and more.
- V-shaped alignment guides for easy installation.
- Replaceable, optional debris control creates tight seal between frame and helmet.
- Heavy-duty, flat, rubber strap for easy and secure placement of frame on cap.
- Non-metal construction for use in electrical applications.
- ET frame is tested to temperatures of 350°F (176.7°C), reducing warping, cracking or crazing.
- Fits MSA slotted or non-slotted helmets.

V-Gard Flat Polycarbonate Visors

A durable flat polycarbonate visors offer superior protection from flying debris, splash, or spray. Engineered wider than other visors, these visors provide improved resistance when it matters most. All V-Gard visors for general purpose can be worn with Cap-mounted ear muffs.

- Fits MSA slotted or non-slotted helmets.
- 8" (20.32 cm) x 17" (43.2 cm) x .06" (1.52 mm).
- Anti-fog and anti-scratch coatings.
- Sides of visor are contoured towards face for a closer fit and improved resistance to impact and splash hazards.
- Maximum UV protection.
- Slightly thicker for industrial impact applications.
- Nitrometer can only be used with V-Gard Retractable or Standard Chin Protector.

Approvals
ANSI/ISEA Z87-1:2010 / CSA Z94-3 / EN 166:2001 (2C-1.2 1B, 2C-1.2 1B 389, 2C-1.2 1B 38 KN, 2-2 1B 38 KN) / AS/NZS 1337

V-Gard Molded Polycarbonate Visors

A durable molded poly-carbonate visors offer superior protection from flying debris, splash, or spray. Engineered wider than other visors, these visors provide improved resistance when it matters most. All V-Gard visors for general purpose can be worn with Cap-mounted ear muffs.

- Thickest visors on the market; helps prevent warping, cracking and crazing, especially when working in high heat.
- Available in both clear and green tint.
- Maximum UV protection.
- Wide, longer design for improved resistance to impact and splash hazards.
- Molded PC for superior optics.
- Anti-fog and anti-scratch coatings on select models.
- Select models accommodate cap-mounted earmuffs.
- Not for use in radiant heat hazards.

Approvals
ANSI/ISEA Z87-1:2010 / CSA Z94-3 / EN 166:2001 (2C-1.2 1BT 389 KN, 2-2 1BT 389 KN) / AS/NZS 1337

V-Gard Molded Welding, Cutting and Brazing Visors

MSA V-Gard Visors help protect against damage from impact and infrared (IR) radiation. They are thick to prevent warping from heat or weld spatter. Designed for metal pouring, gas soldering, welding, light cutting and brazing, these visors are engineered for heavy duty use.

- Suitable for most applications where welding, cutting and brazing hazards exist.
- Molded PC for superior optics.
- Wider design for improved resistance to impact and infrared (IR) radiation hazards, up to Shade 3 or Shade 5, depending on model.
- Thickness helps prevent warping, cracking and crazing. Shape accommodates cap-mounted earmuffs.
- Nitrometer version should be worn with V-Gard Chin Protector (sold separately).

Approvals
ANSI/ISEA Z87-1:2010 / CSA Z94-3 / EN 166:2001 [3 1BT 389 and 5 1BT 389] / AS/NZS 1337

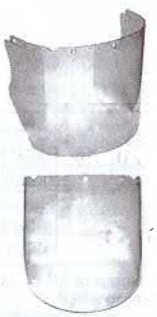
V-Gard Molded Propionate Visors



These visors are for chemical and splash applications, and are ideal for use in manufacturing plants, laboratories, and other industrial applications that demand face protection against abrasive particles, splash and spray. Molded V-Gard Visors are manufactured with hand-polished molds for unsurpassed, distortion-free optical clarity and impact resistance.

- Green tint helps alleviate eye strain and fatigue by reducing excessive glare and light transmittance. Great for outdoor use in bright-light conditions.
- These visors provide maximum UV protection.

Approvals
ANSI/ISEA Z87-1:2010 / CSA Z94-3 / EN 166:2001 [1B 38] / AS/NZS 1337

Fire Fighter Helmets

The perfect head protection solution for Fire & Rescue Services and Emergency Services demanding high performance as well as being cost effective without compromise.

Thanks to the helmet's easy maintenance and adjustment procedures due to extremely simple product design, this allows the end user to confidently maintain, adjust and secure the helmet safely prior to use. EN 443: 2008 and EN 14458 certified, using high quality materials for all of its elements, providing a very high level of protection against the main risks encountered in structural fire-fighting operations: heat, flame, shock and electrical hazards.

Sizes M (52-62 cm) and L (58 – 65 cm).

Unit Per Pc.

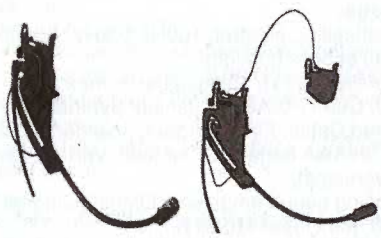
Communication System integrated in Fire Fighter Helmet



Single Ear Headset

Communication headset for integration in MSA Gallet F1XF fire helmet

- One or two loudspeakers, in plastic housing with mounting clips.
- Flexible microphone, adjustable in length (80 mm) to optimize position in front of the mouth or the speech diaphragm (BA face piece)
- Downlead Cable with anti-tearing, LEMO connecting plug (green cover).

Operates with an MSA Push-to-Talk (PTT) module enabling connection to the PMR radio. Connection through an anti-tearing LEMO plug with color codification.

- PTT module with Yellow connector: non ATEX system
- PTT module with Green connector: ATEX system (for use with approved ATEX radios only)

Microphone:

- Noise cancelling Electret, 100Hz-10kHz, distortion < 3%
- Loudspeaker: 32 Ω, 20 Hz – 3 kHz, max power 100 mW
- Amplifier: adjustable gain (0 to 26 dB), 300 Hz-3 kHz Nominal output 50 mV RMS, Harmonic distortion 5%
- Down lead Cable: Fire retardant, shielded cable
- Housing: Polyamide (PA6), Fire resistant (V0)
- Operation Temperature: -20°C to +65°C, humidity < 98%

Approvals:
- EMC performance: ESD/EMI: 10 V/m
- Ingress Protection testing: IP56 (tested inside the helmet)
- ATEX (when used with an ATEX certified PTT module)
- ATEX level: II 2G Ex ia IIC T4

Connection with a wide range of brand and types of radios is possible.

CODE	Description	Unit
31 05 69	Communication headset for F1XF helmet, single ear type (specify brand and type of radio in use)	Set

Name of Mfr. : MSA The Safety Company

Helmet Mounted Headset

Active Hearing Protection headset with built-in communication capabilities, including:
- Two ear muffs with padding and noise attenuation foam
- Ear cup height adjustment system for optimal wearing position
- Flexible microphone attached to the left muff
- Down Lead Cable with anti-tearing, LEMO connecting plug (green).

Operates with an MSA Push-to-Talk (PTT) module enabling connection to the PMR radio.

Connection through an anti-tearing LEMO plug with color codification.
- PTT module with Yellow connector: non ATEX system
- PTT module with Green connector: ATEX system (for use with approved ATEX radios only)

Microphone:
- Noise cancelling electret, 100Hz-10kHz, sensitivity -61 dB (nominal) at 50% humidity
- Loudspeaker: 32 Ω, 100Hz-20kHz, max power 100mW
- Material: Cup: PC/ABS, Cushion: Synthetic leather
- Down lead Cable: Fire retardant, shielded cable
- Battery: 2xAAA batteries, Duracell, Varta, Energizer (ATEX versions),
- Surrounding sound amplifiers: Omnidirectional, sensitivity -38±2dB, Max input 110dB S.P.L
- Operation Temperature: -20°C to +65°C, humidity < 98%

Approvals:
- EMC performance: ESD/EMI: 10 V/m
- Fully watertight – equivalent to IP67
- ATEX (when used with an ATEX certified PTT module)
- ATEX level: II 2G Ex ia IIC T4
- SNR value: 26 dB / H=26 / M=23 / L=18

Connection with a wide range of brand and types of radios is possible.

Winter Liners for MSA Helmet

Get superior under-the-helmet warmth and protection with these winter liners. Choose Supreme, Select or Value in any of 8 different styles, including flame-retardant and flame-resistant models, for protecting the head and neck from outside cold wind, or refrigerator work. To be fitted under the helmet.
- Delivers extra warmth and protection under safety helmets
- Supreme liners offer three layers of true flame resistance (FR) and superior resistance to arc exposure (ATPV of 8 cal/cm²) ATPV denotes Arc Thermal Protective Value.
- Select liners can be laundered up to 50 times without affecting flame retardancy
- Many models offer quilted earflaps so earmuffs can be used without compromising hearing protection levels
- Adjustable chinstrap or extended neck closure helps ensure comfortable fit

Supreme: Offers multiple layers of warm flame resistant fabric, tested to withstand arc exposure to an ATPV of 8 cal/cm².
Water repellant.

Softframe Single Lens Goggles

MSA SightGard® Safety Goggle

For maximum visibility and all-around wear ability, this popular line of economical safety goggles offers impact protection. Choose anti-fog or anti-scratch coatings for improved visibility and lens life.

- Splash and impact resistant.
- Great fitting body provides all day comfort.
- Anti-fog coating protects against mist.
- Indirect vent allows air to circulate and reduce fogging.
- Meets ANSI/ISEA Z87.1-2010 and complies with CSA Z94.3.

Unit Per Pr.

MSA Flexi-Chem™ iV Safety Goggle

These clear, flexible safety goggles protect against significant eye impact hazards such as flying debris and splashes. Acetate lenses resist splashes while the pliable frame enhances comfort and fit. Features a wide, comfort-fit adjustable band.

- Chemical resistant acetate lens for maximum protection.
- Anti-fog coating for improved visibility.
- Indirect venting for comfortable, lasting wear.
- Adjustable band for a close-fitting seal.
- Meets ANSI/ISEA Z87.1-2010, including droplet and splash requirements. Certified to CSA Z94.3 by CSA International.

MSA Vault Safety Goggle

These high quality chemical goggles protect against all types of chemical, liquid and metal splash as well as coarse dust. Ideal for laboratory work, chemical handling, and stone dressing. Can be worn comfortably with prescription glasses or alone. Indirect venting permits proper air circulation while protecting against chemical or dust entry.

- Grade A polycarbonate lens resists impact at extreme temperatures, including molten metal splash.
- Indirect ventilation provides air movement as well as splash and dust protection.
- Clear, anti-fog lens offers high visibility.
- Medium impact rated lens (according to EN 166 (B)).
- Soft touch frame and adjustable strap provide extreme comfort and a custom fit.

Protective Eyewear

Offers complete wrap around eye protection and the durability, compliance and comfort you'd expect from Sightgard® Protective Eyewear. It provides excellent side-and front-impact protection while still being comfortable to wear. All models comply with all applicable high-impact test requirements to ANSI Z87.1-2010 and certified by CSA International.

- Constructed of polycarbonate lens that stand up against impacts (Z87+).
- Temples flex for a custom fit.
- Easy-Fit nose bridge offers comfortable, non-slip support.
- Tuff Stuff™ Anti-scratch Coating provides excellent scratch resistance, extending lens life - a "must have" in abrasive work environments.
- Wraparound style offers maximum protection and unobstructed vision.
  - Clear lens
  - Grey tint lens offer glare reduction with least amount of color distortion
  - Amber lens increases contrast in low light
  - Rich-orange mirrored lens reflects light and reduces glare without color degradation

Guide to European Norms and Selection Guide of Protective Workwear

To assist you with the selection of chemical protective clothing the EU has developed six "types" of chemical protective clothing.

EN Types	Definition	Microgard Products
Current European "Types" of Chemical Protective Clothing		
Type 1 EN943-1 EN943-2	**Gas Tight Chemical Protective Clothing** Protective clothing against liquid and gaseous chemicals, aerosols and solid particulates.	-
Type 2 EN943-1	**Non Gas Tight Chemical Protective Clothing** Suits which retain positive pressure to prevent ingress of dusts, liquids and vapours.	-
Type 3 EN14605	**Liquid Tight Suits** Suits which can protect against strong and directional jets of liquid chemical.	2500 PLUS / 3000 / 4000
Type 4 EN14605	**Spray Tight Suits** Suits which offer protection against saturation of liquid chemicals.	2000 Ts PLUS / 2500 PLUS / 3000 / 4000/CFR
Type 5 EN ISO 13982-1	**Dry Particulate Protection** Suits which provide protection to the full body against airborne solid particulates.	1500 / 1500 PLUS / 2000 COMFORT / 2000 STANDARD / 2000Ts PLUS / 2500 PLUS / 3000 / 4000/FR
Type 6 EN13034	**Reduced Spray Suits** Suits which offer limited protection against a light spray of liquid chemicals.	1500 / 1500 PLUS / 2000 COMFORT / 2000 STANDARD / 2000 Ts PLUS / 2500 PLUS / FR
Additional Standards achieved by the Microgard Product Range		
EN1073-2	Protective clothing against radioactive particulate contamination.	1500 PLUS / 2000 COMFORT / 2000 STANDARD / 2000 Ts PLUS / 2500 PLUS / 3000 / 4000 / FR
EN14126	Protective clothing against infective agents. ["Type" prefixed with "-B" (i.e. Type 3-B) indicates approval to this European Norm].	2000 STANDARD / 2000 Ts PLUS / 2500 PLUS / 3000 / 4000
EN1149-1 EN1149-5	Protective clothing with electrostatic properties.	1500 PLUS / 2000 COMFORT / 2000 STANDARD / 2000 Ts PLUS / 2500 PLUS / 3000 / 4000 / FR / CFR
DIN32781	Protective clothing. Protective suits against pesticides.	2000 STANDARD / 2000 Ts PLUS
EN ISO 14116	Protective clothing. Limited flame spread materials, material assemblies and clothing.	FR / CFR

Remark: This guide is an indication of your suits protection against a particular hazard (gas, liquid or dust). Please be aware that conformance to these types standards does not mean that your suit is 100% impervious to your hazard.

Application Table for Microgard Protective Workwear

Type	For	From
MICROGARD® 1500	Dust protection	Asbestos, powder.
MICROGARD® 1500 PLUS	Splash and particle protection.	Asbestos, brick, dust, cement dust.
MICROGARD® 2000 COMFORT	Working in warm environment, and spray protection.	Low hazard liquid, particles.
MICROGARD® 2000 STANDARD	Chemical & pharmaceutical industries, paint spraying and crime scene investigation.	Infective agents, pesticides, particulates, fibres & low hazard liquid chemical spray.
MICROGARD® 2000 Ts PLUS	Paint spraying.	Low hazard liquid and fine particulates.
MICROGARD® 2500 PLUS	Biological protection.	Heavy low hazard liquid spray and particulates.
MICROCHEM® 3000	Chemicals, oil and petrochemicals.	Inorganic chemicals and biological hazards.
MICROCHEM® 4000	Hazardous area.	Concentrated chemicals and biological agent.
MICROCHEM® FR	Working in potential explosive/flammable environments. (Wear over a thermal protective garment.)	Low hazard liquid spray and particulates, such as oil and petrochemicals, petroleum distribution and processing and utilities.
MICROCHEM® CFR	Working in potential explosive/flammable environments. (Wear over a thermal protective garment.)	Oil and petrochemicals, tank, pressure cleaning delete, petroleum, processing and utilities.

Microgard Coverall Size Chart

Size	Chest cm	Height cm
S	84 – 92	164 – 170
M	92 – 100	170 – 176
L	100 – 108	176 – 182
XL	108 – 116	182 – 188
2XL (XXL)	116 – 124	188 – 194
3XL (XXXL)	124 – 132	194 – 200

Protective Workwear

Protective workwear under an ISO 9001 approved quality control system, and meets the European Norms specified in Category III of the PPE (Personal Protective Equipment) directive for chemical protective workwear.

Designed for operatives who require particle (dust) and low hazard liquid splash protection.

Made from highly breathable SMS (Spunbond + Meltblown + Spunbond Nonwovens) fabric, and designed for workers involved in the stripping, clear up or handling of asbestos, general maintenance, construction and contract cleaning.

MICROGARD® 1500

Applications:

Where the need for dust (particle) protection is greatest, such as; asbestos related work, handling powders, general maintenance and construction.

Meets the following European Norms:

Type 5: EN ISO 13982-1 Dry particle suit

Type 6: EN 13034 Reduced spray suit

Note: Respirator is sold separately.

Unit Per Pc.

Name of Mfr.: Ansell Microgard Limited

Designed for operatives who require particle (dust) and low hazard liquid splash protection.

MICROGARD® 1500 PLUS

High quality 3-layer anti-static SMS fabric for splash and particle protection. The SMS fabric is highly breathable, making it ideal for operatives working in warmer environments.

SMS fabrics are a particularly good barrier against particulates such as, asbestos, brick, dust and cement dust and will provide protection from light aerosol mists as found in some paint spray environments.

Applications:

Asbestos related work, handling powders, general maintenance, construction, pharmaceutical industries, wood & metal processing, Touch-up paint spraying, fibreglass/resin applications/ceramic fibres.

Meets the following European Norms:

Type 5 : EN ISO 13982-1 Dry particle suit
Type 6 : EN 13034 Reduced spray suit
EN1073-2 : Barrier to radioactive particulates - Class 1
EN1149-5 : Anti-static

Note: Mask and goggles are sold separately.

Unit Per Pc.

Name of Mfr.: Ansell Microgard Limited

Ideal for operatives working in warmer climates or environments.

MICROGARD® 2000 COMFORT

Specially designed for those working in warmer climates or warm working environments to help reduce heat stress. The critical areas to the front of the garment, including the hood, arms and legs, are MICROGARD® 2000 microporous PE laminate fabric which offers a high level of liquid and particle protection with a low level of water vapour resistance according to EN 31092 of Ret<15*.

* Ret is a measurement of a materials resistance to moisture vapour transfer.

Applications:

Critical production environments where dust and low level spray protection are required, such as: paint spraying, pharmaceutical industries, fibreglass product manufacturing, Windmill manufacturing, boat and ship building and mining.

Meets the following European Norms:

Type 5 : EN ISO 13982-1 Dry particle suit
Type 6 : EN 13034 Reduced spray suit
EN1073-2 : Barrier to radioactive particulates - Class 1
EN1149-5 : Anti-static

Unit Per Pc.

Name of Mfr.: Ansell Microgard Limited

Ideal for a wide range of industrial applications such as; Pharmaceutical industries and Agriculture.

MICROGARD® 2000 STANDARD

Designed to allow water vapour (perspiration) to escape from the suit yet will withstand saturation of liquid chemicals and filter 100% of particulates down to 0.01 micron in size, and provides protection from infective agents, pesticides, particulates, fibres & liquid chemical spray.

Garment feature:

- Microporous PE laminate fabric.
- Optimised body fit.
- Bound seams ensure spray tight protection.

Applications:

Chemical & pharmaceutical industries, Cleanrooms, Paint spraying, Crime scene investigation.

Meet the following European Norms:

Type 5 : EN ISO 13982-1 Dry particle suit
Type 6 : EN13034 Low level spray tight suit
EN 14126 : Barrier to infective agents
EN1073-2: Barrier to radioactive particulates – Class 2
EN1149-5: Anti-static
DIN 32781: - Protection against pesticides

Unit Per Pc.

31 20 51	S	31 20 54	XL
52	M	55	XXL
53	L	56	XXXL

Name of Mfr.: Ansell Microgard Limited

Ideal for a wide range of industrial applications such as; Pharmaceutical industries and Fibreglass product manufacturing.

MICROGARD® 2000 Ts PLUS

Designed to allow water vapour (perspiration) to escape from the suit yet will withstand saturation of liquid chemicals and filter 100% of particulates down to 0.01 microns in size. (EMSL test method) With stitched and taped seams, it provides an exceptional overall barrier to low hazard liquid spray and fine particulates.

Features and benefits:

Protection -
Proven barrier to low concentration liquid chemicals, diluted pesticides, liquid & particulate biological hazards.

Silicone Free –
Critical in spray painting applications.

Low Linting –
Reduced risk of contamination in critical areas.

Anti-static –
Tested according to EN 1149-5.

Applications:
Agriculture, paint spraying, pharmaceutical industries, fibreglass product manufacturing, boat and ship building and Mining.

Protection Levels & Additional Properties:

Type 4-B : Spray tight suits (Suits which offer protection against saturation of liquid chemicals)
Type 5-B : Dry particulate protection (Suits which provide protection to the full body against airborne solid particulates)
Type 6-B : Reduced spray suits (Suits which offer limited protection against a light spray of liquid chemicals)
EN 14126 : Protective clothing against infective agents ["Type" suffix with "-B" [i.e. Type 3-B] indicates approval to this European Norm].
EN 1073-2: Protective clothing against radioactive particulate contamination.
DIN 32781 : Protective clothing. Protective suits against pesticides.
EN 1149-5 : Protective clothing with electrostatic properties.

Ideal for operatives looking for protection from biological agents.

MICROGARD®
2500 STANDARD

Made from breathable microporous films, and designed to protect you from heavy liquid spray and particulates. The fabrics physical strength and flexibility ensures you are protected and comfortable in even the harshest environments.

Applications:
Where liquid tight protection and durability is required, such as Biological Protection (Risk Groups 1-2, as per definition in the European BioDirective: Directive 2000/54/EC), chemical and pharmaceutical industries, low pressure industrial cleaning, industrial paint spraying and nuclear industry.

Meets the following European Norms:
Type 4-B: EN 14605 Spray tight suit
Type 5-B: EN ISO 13982-1 Dry particle suit
Type 6-B: EN 13034 Reduced spray suit
EN14126: Barrier to infective agents
EN1073-2: Barrier to radioactive particulates - Class 1

Effective barrier against both inorganic chemicals and biological agents.

MICROCHEM®
3000

A soft and flexible 3 layer fabric with strong ultrasonically welded seams and an extremely effective barrier against both inorganic chemicals and biological hazards.

Applications:
Protection against many concentrated inorganic chemicals, biological hazards and particles smaller than 1µm, in industries such as; Chemicals, oil and petrochemicals, pharmaceutical, food industry, sewage purification installations, industrial & tank cleaning and mining.

Meets the following European Norms:
Type 3-B: EN 14605 Liquid tight suit
Type 4-B: EN 14605 Spray tight suit
Type 5-B: EN ISO 13982-1 Dry particle suit
EN14126: Barrier to infective agents
EN1073-2: Barrier to radioactive particulates - Class 1
EN1149-1: Anti-static

Note: Respirator is sold separately.

Effective barrier against both organic and inorganic chemicals and biological agents

MICROCHEM®
4000

A unique multi-layer barrier fabric which is renowned for its lightweight textile feel and exceptional barrier to organic and inorganic chemicals and biological agents.

Features and benefits:
- Double zip system, ultrasonically welded seams and new seam taping method ensure liquid tight protection.
- Double cuff design for improved protection.
- Knitted internal sleeve cuff for wearer comfort.

Applications:
For hazardous areas where protection against concentrated chemicals and biological agents is required, such as: chemicals, oil and petrochemicals, pharmaceutical, mining, agriculture, industrial & tank cleaning, sewage purification installations and emergency services (HAZMAT, CBRN).

Note:
HAZMAT – Hazardous Materials.
CBRN – Chemical, Biological, Radiological, Nuclear, and Explosive.

Meets the following European Norms:
Type 3-B : EN 14605 Liquid tight suit
Type 4-B : EN 14605 Spray tight suit
Type 5-B : EN ISO 13982-1 Dry particle suit
EN14126 : Barrier to infective agents
EN1073-2 : Barrier to radioactive particulates - Class 1
EN1149-5 : Anti-static

Note: Respirator is sold separately.

Designed for operatives in potentially explosive/flammable environments.

MICROGARD® FR

Made from flame retardant material, and offers wearers protection from liquid chemicals to EN Type 6 and particulates to EN Type 5, and peace of mind to workers in potential explosive/flammable environments. To decrease the risk of burn injury, wear over thermal protective workwear. The fabric is designed to allow water vapour to escape from the suit helping to reduce the risk of heat stress.

Applications:

Wear over a thermal protective garment [EN ISO 14116 Index 2 or above] in areas with a risk of flash fire and where protection from low level liquid spray and particulates is required, such as: oil and petrochemicals, petroleum distribution and processing and Utilities.

Meets the following European Norms:

Type 5	: EN ISO 13982-1 Dry particle suit
Type 6	: EN 13034 Reduced spray suit
EN1073-2	: Barrier to radioactive particulates - Class 1
EN ISO 14116	: Limited flame spread materials and assemblies
EN1149-5	: Anti-static

Note: Respirator is sold separately.

Designed for operatives in potentially explosive/flammable environments

MICROCHEM® CFR

Made from a flame retardant treated non-woven material with PVC barrier film it offers wearers protection from liquid chemicals to EN Type 3, 4 & 5, and peace of mind to workers in potential, explosive/ flammable environments. This protective suit has been proven to decrease the risk of burn injury when worn over thermal protective workwear.

Applications:

Wear over a thermal protective garment [EN ISO 14116 Index 2 or above] to provide chemical spray protection according to Type 3 & 4, in industries such as: Oil and petrochemicals, tank, pressure cleaning involving flammable liquids, petroleum distribution and processing and utilities.

Meets the following European Norms:

Type 3	: EN 14605 Liquid tight suit
Type 4	: EN 14605 Spray tight suit
Type 5	: EN ISO 13982-1 Dry particulate suit
EN ISO 14116	: Limited flame spread materials and assemblies

Anti-shatter Films
(Blast Mitigation)

Anti-shatter film provides protection from flying glass in the event of a natural disaster or demolition by pirates. It forms an almost invisible protective coating on the glass surface. This window film should only be applied to flat glass. It should never be applied to polycarbonate (plastic). Adhesive window films are constructed from a multi-lamination of micro-thin polyester. They also have a scratch resistant coating to protect the film surface and enhance durability (except films for external application). The film should be cut 10 mm over size in both dimensions, and trim around the oversized edges using a sharp trimming knife after squeezed the film.

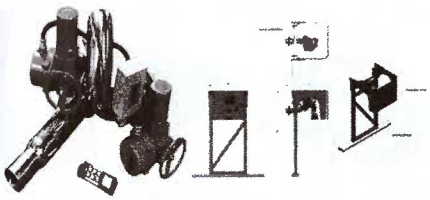
Anti-Piracy Dummies

A false security patrol man to assist deterring pirates from boarding ships. Any equipment dummy wearing are separate order.

31 41 16	Dummy, anti-piracy, bare	Pc.

Anti-Piracy Water Jet Cannons

A water jet cannon is based on the use of high quality oscillating water cannons, which are installed on several points on the ship and prevent any boarding attempt when activated. The system is sent to the ship as a modular package that is installed by the crew without any required external help. Training will be given to operate the system and a user manual will enable smooth operation of the system.



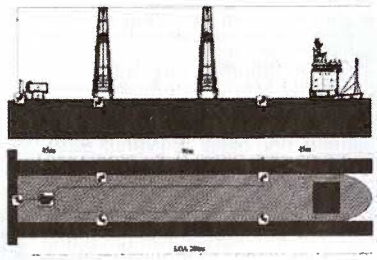
The installation of the system is divided into 2 main categories.

A – Engine room related installation

- Ensure existing pump has enough capacity.
- Else, in case the capacity is not available, connect engine room pumps to on deck diesel powered booster pump.
- Connection of hoses from pump (via engine room or deck).

B – Deck related installation

- Install water cannons on deck or railing, using supplied connection kit.
- Run 6" feeder hoses from main pump outlet / manifold.
- Run 4" hoses from feeder to water cannon.



System Components

- Storage container.
- High quality oscillating water cannons, (a modified type of the systems used by fire fighting departments).
- Special fittings to temporarily attach the cannons to deck or railing.
- Hoses, supplying water from pump to water cannons.
- Ballistic shields to protect water cannons from direct small caliber fire arms.

Typical Installation Pattern per Ship's Overall Length

Overall Length	No. of Cannon	Water Supply	
		ltr/min.	m3/hr
200 mtr	5 cannons	10,000	600
280 mtr	7 cannons	14,000	840
360 mtr	9 cannons	18,000	1,080

Performance of Water Jet Cannon

- Ultra compact
- Weight : just 11.4 kgs
- Totally adjustable
- Capacity 2,000 ltr/min at 5.5 bar
- Range 50 – 55 meters
- High quality aluminium
- Includes manometer
- Left right radius between -180 degrees to +180 degrees
- Up down radius between -45 degrees to +90 degrees
- 12/24V electro motor
- Remote control option with joystick
- 10 year warranty

Water Supplying Hose:

Made from thick woven synthetic thread with a bacl PVC/ Nitril protection coating. The internal and external tubes are seamlessly interwoven to long levity. Consequently the internal tube cannot disconnect from the external tube.

Totally oil and chemical resistant as well as extreme UV and Ozon protected.

Long levity, remains flexible, no maintenance, no rotting, temperature range -35°C to +100°C, sea water proof, high resistance to tearing and bending, and special textile cuff protect connector areas.

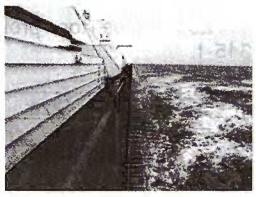
Couplings & Connectors:

High quality aluminium connectors with fast connect and release system, as used by fire fighting department worldwide.

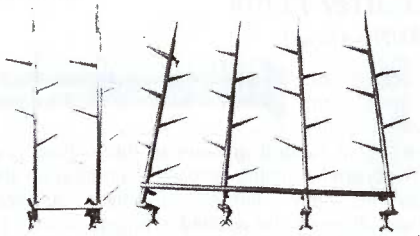
How to order : 31 - 41 - 21

Water jet cannon system,With further details

Anti Piracy Spike Fence (APSF)



Specially designed to safeguard ships sailing across high-risk sea area. The fence is steel welded with galvanized surface treatment, effective to prevent pirates or stealers to climb onboard. It can work for much longer time with effective anti-corrosive function, and easily installed firmly one by one along deck fishplate, gunnels with wing bolts. 2-spikes type fence and 4-spikes type fence are available, and can be designed other type as per requirement.



Unit Per Pc.

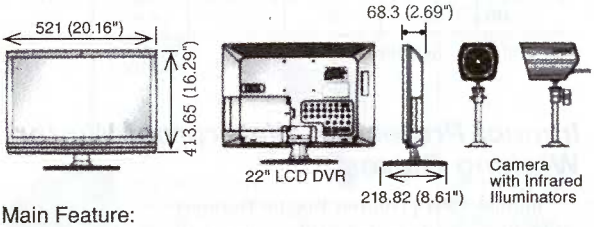
Camera Monitoring System with Infrared Illuminators

Camera monitoring system provides maximum protection for any spot 24 hours a day, 7 days a week. Simple to set up, you can monitor any time from anywhere around the world. All four cameras are waterproof to IP66, compact and highly durable to achieve clear stable video, even in harsh outdoor conditions. Single cable to each camera cover all wiring needs including power so you have the freedom to place them anywhere, even if there is no electrical outlet in the area. The four night vision cameras are equipped with 30 infrared LEDs which allow them to detect and show objects as far as 50 feet, even in the darkest conditions. The built in 500 GB hard drive allows for extended recording time and is expandable to 1 TB for maximum data capacity. Please contact your local supplier about more details.

Dimensions



Main Feature:

- Smartphone ready
- 4 x infra red night vision cameras – 600TV lines of high super resolution
- H.264 high performance compression
- 8 channel digital video recorder
- Vivid 22" LCD display
- 500GB of storage USB 2.0

Remark: Standard length is 15 mtr per coil

Flat Wrap Razor Wire

A flat wrap razor wire is suitable for installations where a neat appearance is required. Due to its flat construction, it does not overhanging into neighboring property and will therefore not harm innocent bystanders. The flat wrap razor wire can be used to upgrade any existing fence or wall, by adding directly to a wire mesh fence, or adding it on top of a brick or pre-cast wall to instantly upgrade your security.

Unit Per Lgh

Inflatable Liferafts

A wide variety of models from different manufacturers are available to meet the requirements of the International Convention for the Safety of Life at Sea (SOLAS), known as "96SOLAS".

They are furnished with standard equipment and additional features as the customer specifies, such as Deck Cradle, Hydrostatic Release, etc.

An exceptionally rugged construction supplied in glass-reinforced plastic (GRP) containers.

There are two types of inflatable liferaft mainly used on board, Throw-over type and Davit-Launching type. Throw-over type can be launched manually or by securing the tow line to a strong point on deck and throwing the container overboard. When the tow line is pulled taut, an integral CO_2 gas cylinder is activated which inflates the boarding step, buoyancy chambers and canopy support. Davit- Launching type is obliged to use for either Port or Starboard side on Bulk Carriers since 2007, lowering down by davit and inflate manually by pulling the tow line.

Every liferaft shall be serviced at intervals not exceeding 12 months.

Please specify the following points when ordering.
1) Capacity, 2) Throw-over or DL(Davit-launching) type,
3) Ship's registered flag, 4) Installation Height,
5) Classification society

Unit Per Set

Throw-over type		Davit-Launching type

Hydrostatic Release Units

Double Looped Rope Line Type

These units consist of a double looped rope line, a release mechanism, and a weak link. This release unit conforms with the requirements of the 1983 amendments to SOLAS 1974.

For Liferaft

For Epirb

These units will release the liferaft or EPIRB (Emergency Position Indicating Radio Beacon) at a depth of between 1.5 and 4 mtrs underwater. The units could be round or square shape. Below is a reference of brand & manufacturers, but there are specific types of HRU for certain EPIRB brand. Please specify the types and brand when ordering.

Unit Per Set

33 01 19	Hammar H20R	Liferaft	C M Hammer AB
26	Hammar H20-YSE	Epirb

93	SafeteTmate EP-1	Epirb	

Totally Enclosed Lifeboats

According to the 1983 amendments to the International Convention for the Safety of Life at sea 1974, all new building ships of which the keel is laid on or after July 1st 1986 require the installation of fully enclosed lifeboats.

Please specify the required number of persons on board and also specify the required classification society.

33 01 30	Lifeboat, totally enclosed with further detail	Set

7TH 33

Life Jackets

A life jacket, comply with new SOLAS regulations (Amendments to chapter II of LSA (Life-Saving Appliance) Code effective on July 01, 2010) should be provided for every person on board the ship. Each life jacket is fitted with a whistle, retro-reflective material, lifting loop and buddy line. Made of polyethylene foam material covered by polyester. Life Jacket for Infants should be supplied to all passenger ships.

Adult	Child	Infant
Weight : Over 43 kgs Chest : Under 175 cm	Weight: 15–43 kgs	Weight: Under 15 kgs

Unit Per Pc.

Life Jacket Lights

Each life jacket shall be fitted with a light complying with the requirements for a 0.75 cd light for 8 hours. The battery will be operated automatically upon entry into the water.

33 01 43	Life jacket light	Pc.
45	Bag for life jacket light	"

Lifebuoys

Normally made from polyethylene outer skin and polyurethane foam inner core.

Cargo ships shall carry no less than the number or lifebuoys complying with the requirements of SOLAS described in the table below. In compliance with requirements it is fitted with a buoyant lifeline.

When being in used for operating the quick-release arrangement provided for the self-activated smoke signals and self-igniting lights, the lifebuoy have a mass sufficient to operate the quick-release arrangement or 4 kgs, whichever is the greater.

Required quantity by Regulation 32

Universal Testing Device
for Immersion Suit/Anti-exposure Suit

Complies with IMO guidelines for periodic testing of seams and closures on immersion suits and anti-exposure suits. Universal compatibility, including universal maintenance and repair kit. Consists of Stainless steel pressure gauge, Pressing and stable board and Connecting hose, including Metal carrying case and "Super Repair", contains: Neoprene gasket, Waterproof marker, Two emergency lights.

Note: Two whistles, Sleeve cones for detachable gloves available separately.

Standards: MED/SOLAS-certified.

33 01 97	Universal testing device for immersion suit & anti-exposure suit, MED/SOLAS certified	Set

Name of Mfr: Scandia Gear

Sleeve Cones for use with Universal Testing Device for Immersion Suit

Designed to test immersion suits with detachable gloves. Cone shape creates a universal fit.

Standards: MED/SOLAS-certified.

33 01 98	Sleeve cones for use with universal testing device for immersion suit, MED/SOLAS certified	Set

Name of Mfr: Scandia Gear

Portable Air Compressors for use with Universal Testing Device

An Air compressor with storage compartment designed for use with the Universal Testing Device for Immersion Suits. Easy maintenance, does not require oil.

Unit Per Set

CODE	33 01 99
Model	8100.04
Power	1,100W/1.5 pk.
Maximum pressure	8 bar
Tank capacity	6 L
Motor	3,400 rpm. 230 Vac.
Dimensions	470 x 580 x 330mm
Weight	12 kgs

Name of Mfr: Scandia Gear

Thermal Protective Aids

A thermal protective aid is made of waterproof material with low thermal conductivity, and shall be provided for every person on the ship who has not been provided with one of the immersion suits in the open type lifeboat.

Unit Per Set

CODE	Approved	Material	Thermal Conductivity
33 01 75 **76** **77** **96**	H.K. U.S.C.G. U.K.DOT MED	Polyethylene	Not more than 7,800 W/(m²,K)

Retro-Reflective Tapes

Retro-reflective tape which reflects light. All life-saving equipment (Liferafts, Life Jackets, etc.) shall be fitted with retro-reflective tapes where it will assist in detection.

CODE	Colour	Width	Usage	Unit

Sea Anchor Oil Cans

Made of galvanized sheet iron for holding storm oil.

33 02 17	Lifeboat sea anchor oil can	Pc.

Signal Tables

Waterproof card or in a waterproof container.

33 02 18	Signal table plastic	Pc.

Rations

Approved by M.I.T.I. (Ministry of Industry and Transport, Japan). Each ration contains 9 meals.

33 02 23	Ration combination 9 meals	Pc.

Rations "Seven Ocean"

Compressed vitaminized biscuit bars. Takes up little space and will keep for 5 years.

33 02 25	Ration seven ocean, 500 grm	Pkt
26	" , 1,000 grm	"

Drinking Water

Completely sterile, vacuum-sealed water in a can. Required 1.5 ltr per person.

33 02 36	Drinking water 385 ml	Can
37	" 500 ml	Btl

Drinking Cups

Should be rustproof and graduated.

33 02 41	Drinking cup for lifeboat	Pc.
42	" liferaft	"

First Aid Kits

Stores medicines and medical instruments in a watertight container.

33 02 45	First aid kit for liferaft	Set
46	" lifeboat	"

Anti-Seasickness Medicine

Required 6 doses per person.

33 02 47	Anti-seasickness medicine	Pkt

Seasickness Bags

1 seasickness bag required for each person.

33 02 48	Sea-sickness bag	Pc.

Can Openers

3 pieces required for each liferaft or lifeboat.

33 02 49	Can openers, 3's	Set

Jack Knives

Furnished with lanyard for attaching the knife to the boat.

33 02 50	Jack knife for liferaft	Pc.
51	" lifeboat	"

Whistles

Made of seawater resistant tough plastic.

33 02 52	Whistle	Pc.

Signalling Typhoons

Made with waterproof tin plate. Will provide a loud sound.

33 02 53	Signalling typhoon	Pc.

Fishing Tackles

Contains hooks, lines and other equipment packed in a watertight container.

33 02 54	Fishing tackle	Set

Survival Manuals

A guide book for survival at sea to meet the requirement of the SOLAS convention.

33 02 56	Survival manual	Pc.

Instructions for Immediate Action

A guide book for immediate action aboard a liferaft.

33 02 58	Instruction for immediate action for liferaft	Vol

Waterproof Torches

For Morse signalling, sealed in a waterproof container.

33 02 61	Torch electric waterproof	Pc.

Seawater Torches

Electric torch automatically activated in seawater.

33 02 62	Seawater torch	Pc.

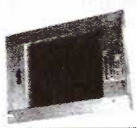
Searchlights

Provides illumination for a total period of 6 hours and will remain in operation for at least 3 hours.

33 02 64	Searchlight for lifeboat	Pc.

Daylight Signal Mirrors

For daylight signalling to ships and aircraft.



33 02 71	Daylight signal mirror	Pc.

Lifeboat Ditty Bags

Consist of a strong waterproof canvas bag containing a sail makers palm, sail needles, sail twine, a marline spike, and beewax.

33 02 76	Lifeboat ditty bag	Pc.

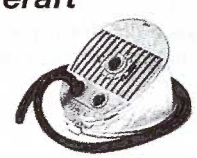
Repair Outfit for Liferaft

For repairing punctures in buoyancy compartments.

33 02 77	Repair outfit for liferaft	Set

Topping up Pump for Liferaft (Bellows)

For pumping air into a liferaft when reinflation is required.



33 02 79	Topping up pump (Bellows) for liferaft	Pc.

Pumps for Lifeboat

For bailing water out of the lifeboat.

33 02 80	Manual bilge pump for lifeboat	Pc.

Storm Oil

A vegetable oil which is spread on the sea to reduce the crest.

33 02 81	Storm oil, 4 ltr	Tin

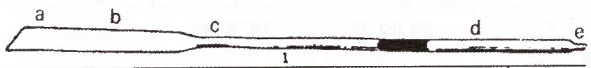
Paddles

Shall be buoyant and light for easy propulsion of the raft.

33 02 83	Paddles buoyant for liferaft	Pc.

Oars

Usually made of ash or similar wood. When ordering, please specify the overall length, if possible, also specify the sizes of (a) tip, (b) blade, (c) neck, (d) loom and (e) handle.



33 02 84	Oar buoyant for lifeboat	Pc.

Boat Hooks

When ordering, please specify the hook material and the overall length.

33 02 85	Boat hook for lifeboat	Pc.

Lifeboat Rowlocks (Crutches)

Made of galvanized malleable iron. When ordering, please specify the size of the opening and the overall length.

33 02 86	Rowlock, lifeboat, length × opening	Pc.

Manually Powered Reverse Osmosis Desalinator

LSA Code 4.1.5.1.19 requires the watertight receptacles containing a total of 1.5 liters of fresh water for each person the liferaft is permitted to accommodate. Of which either 0.5 liter per person may be replaced by a desalting apparatus capable of producing an equal amount of fresh water in 2 days, or 1 liters per person may be replaced by a manually powered reverse osmosis desalinator capable of producing an equal amount of fresh water in 2 days;

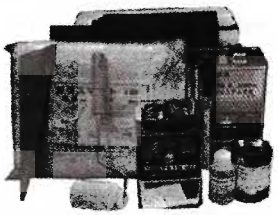
An emergency desalinator, which produces enough water up to 2.0 litres per hour.
* Desalination degree : more than 95%, eliminating bacteria or virus
* Optimum pump frequency: 40 pumps per minute.
* Weighs only 1.6 kgs

33 02 24	Desalinator, reverse osmosis, manually powered, conformed to LSA Code 4.1.5.1.19	Pc.

Name of Mfr. : Kyumei

Lifeboat Repair Kits

Used for lifeboat leakage repair in emergency. Consists of polyester resin, hardener, glass fibre mat, wool roller, etc. The ThistleBond kit is also used for the repair of liferaft containers.



Unit Per Set

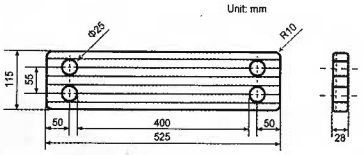
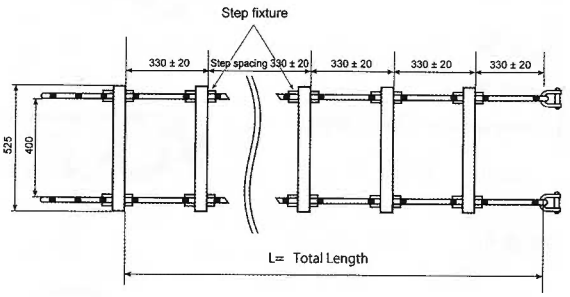
Lifeboat Embarkation Ladders

This lifeboat embarkation ladder conforms to ISO 5489 -2008, SOLAS 1974 & LSA Code. When ordering, please specify the length required.





Specifications

Length	According to users option but the overall length must be an integral multiple of 330 mm and be enough to ensure safe embarkation from the boat deck even when the ship is at its lightest sea-going draught and is listed 15 degrees to the opposite side.
Material	Steps are hard wood and step fixtures must be secured on both top and bottom of each step. The bottom 4 steps may be made of rubber of sufficient strength and stiffness. Side Rope 22 mm Manila Rope or 22 mm Synthetic fibre rope
Step Size	Length 525 mm, Width 115 mm, Thick 28 mm
Step Space	330 mm ±20
Side Rope Distance	400 mm

33 02 96	Lifeboat embarkation ladder overall length mtrs	Pc.

Liferaft Accessories

International Life-Saving Appliance (LSA) Code, Regulation Chapter 4.1.5.

CODE	Description	Quantity
33 01 75	Thermal protective aid	Minimum 2 pc. For 25 men capacity, minimum. 3 pc
90	Radar reflector	1 pc.
33 02 02	Buoyant bailer	1 pc.
04	Sponges	2 pcs.
13	Buoyant rescue quoit	1 pc.
33 02 15	Sea anchors	2 pcs.
18	Life-saviing signal	1 copy
26	Food rations. Not less than 10,000 kj/person	For each person
37	Watertight receptacle containing 1.5 ltr of fresh water/person	For each person
42	Rustproof graduated drinking cup	1 pc.
33 02 46	First-aid kit	1 set
47	6 tablets of anti-seasickness medicine(for 48 hours)	For each person
48	1 seasickness bag	For each person
49	Can openers	3 pcs.
50	Knife	1 pc.
33 02 52	Whistle, or equivalent	1 pc.
54	Fishing tackle	1 set
56	Survival manual	1 copy
58	Instructions for immediate action	1 copy
33 02 61	Waterproof electric torch (w/1 spare battery, 1 spare bulb)	1 pc.
71	Daylight signal mirror	1 pc.
77	Repair outfit	1 pc.
79	Topping-up pump (Bellows)	1 pc.
83	Buoyant paddles	2 pcs.
33 03 11	Rocket parachute flares	4 pcs.
14	Hand flares	6 pcs.
31	Buoyant smoke signals	2 pcs.

Note: 1. Thermal protective aids: Shall be equipped for 10 % of the number of persons or 2, whichever is greater.

2. Buoyant bailer: In the case where 13 persons or more are aboard the liferaft, it shall be equipped with an additional buoyant bailer.

3. Knife: In the case where 13 persons or more are aboard the liferaft, it shall be equipped with an additional knife.

Lifeboat Accessories

International Life-Saving Appliance (LSA) Code, Regulation Chapter 4.4.8.

CODE	Description	Quantity
33 01 75	Thermal protective aid	10% of the number of persons
90	Radar reflector	1 pc.
33 02 01	Buoyant bailer	1 pc.
03	Hatchets	2 pcs.
09	Buckets	2 pcs.
33 02 10	Rustproof dipper with lanyard	1 pc.
11	Binnacle containing an efficient compass	1 pc.
12	Buoyant rescue quoits	2 pcs.
16	Sea-anchor	1 pc.
18	Life-saving signal	1 copy
33 02 26	Food ration. Not less than 10,000 kj / person	For each person

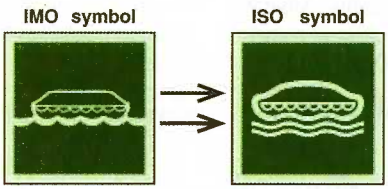
56	Survival manual	1 copy
61	Waterproof electric torch (w/1 spare battery, 1 spare bulb)	1 pc.
64	Searchlight	1 pc.
71	Daylight signal mirror	1 pc.
33 02 80	Manual pump	1 pc.
84	Buoyant oars with thole pins or crutches	Sufficient
85	Boat-hooks	2 pcs
90	Tools for minor adjustments to the engine	Sufficient
93	Painters	2 pcs
33 03 11	Rocket parachute flares	4 pcs
14	Hand flares	6 pcs
31	Buoyant smoke signals	2 pcs
33 10 01	Portable fire-extinguishing equipment	1 pc.

Note: 1. Thermal protective aids: Shall be equipped for 10 % of the number of persons or 2, whichever is greater.

IMO / ISO Symbols, on self adhesive photoluminescent vinyl

The signs below have been developed in relation to ISO 24409 series of standards. SSE 3/16 has proposed a draft MSC Circular to MSC 97 to revise Resolution 760(18) to incorporate these symbols for use as shipboard signage. Member Governments will be urged to bring the ISO 24409 series of standards to the attention of interested parties for use on a voluntary basis until such time as the revised resolution is adopted.

When ordering please make sure to specify which symbols you require, IMO or ISO.



IMO 33.4050 150x150mm ISO 33.X050 150x150mm	IMO 33.4051 150x150mm ISO 33.X051 150x150mm	IMO 33.4052 150x150mm ISO 33.X052 150x150mm	IMO 33.4053 150x150mm ISO 33.X053 150x150mm	IMO 33.4054 150x150mm ISO 33.X054 150x150mm

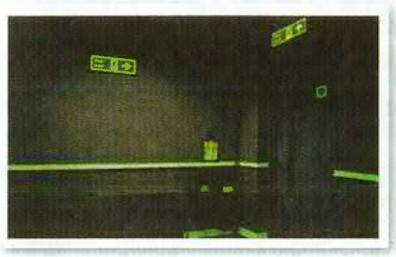
Direction Signs, on self adhesive photoluminescent vinyl

Photoluminescent Low Location Lighting System (LLL)

As identified in SOLAS consolidated edition 2004, Chapter II-2 Regulation 13.3.2.5.1 to 13.3.2.5.2 and Chapter II-1 1/42 or Chapter II-1 1/43 as appropriate ships carrying passengers shall be fitted with electric or photoluminescent Low Location Lighting and if carrying more than 36 passengers these regulations also apply to the crew accommodation.



Reference should also be made to IMO Resolution A.752(18) for the evaluation, testing and application of Low Location Lighting.

- Internal and external corners, and drops up and down stairways, are easily made by mitering the carrier and cutting the photoluminescent panels to suit.
- LLL signs, should be used to give direction indication. End caps are available to neatly terminate the extrusion where required.

PVC LLL Carrier

These products consists of a 5mm thick strong PVC carrier with rounded edges compatible with Part No's 33.2338 and 33.2329 end caps. There is a central channel to fit a strip of photoluminescent material. These products can be easily cut, screwed and/or adhered to bulkheads to provide low location way guidance.

33.2327 - Carrier 70x1200mm (with 40mm Class C insert)
33.2328 - 70mm end cap

33.2329 - Carrier 60x1200mm (with 40mm Class C insert)
33.2330 - 60mm end cap

The above range of PVC products and templates can be supplied in the standard colours, including black. They are not an exact match but the closest available to the RAL range right. A complete sign framing system in a matching or complimentary colour can be produced to accompany the LLL carriers.

Ral 3018 Ral 8025 Ral 6024
Ral 5002 Ral 5017 Ral 7046

Optional alternative colours are available at prices depending on volume required.

NB. Please note that B and C Class material (D Class is also available) require adequate light source to energise the material so that in the event of lighting failure way guidance is provided.

Aluminum LLL Carrier

Consisting of an aluminum carrier extrusion with a rigid photoluminescent PVC insert, which provides a quick and easy installation, combined with rugged and durable quality. We can supply in two sizes which offer a 50mm visible width of Class B photoluminescent or 35mm Class C photoluminescent. LLL signs should be used to give direction indication. End caps are available to neatly terminate the extrusion where required.

	mcd/mc² @ 10min	mcd/mc² @ 60min
ISO 15370 Requirement	15.0	2.0
Class B - Insert	47.59	7.97
Class C - Insert	85.40	14.98

33.2394 - 50mm angled carrier 60x3000mm
33.2395 - 50mm angled carrier end cap
33.2374 - 35mm angled carrier 42x3000mm
33.2375 - 35mm angled carrier end cap

ISPS Code Signs - Available in the following sizes (mm): 200x180 [1] | 300x200 [2] [3] | 200x300 [4] | 150x150 [5]

S 42 10 [1] | 33.2703

S 42 20 [2]

S 42 31 [3] | 33.8695

S 42 40 [4] | 33.2896

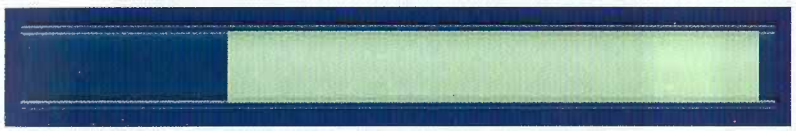
S 42 42 [5] | 33.2889

Specialists in high luminance photoluminescent safety signs and providers of complete maritime safety signage solutions.

Photoluminescent Low Location Lighting System

Opaque LLL Carrier

A simpler option of carrier is offered which allows a 50mm B class material to slide into the 1m length carrier after it has been secured to the wall. The advantage of this form of installation is that only the photoluminescent material is 100% visually seen while the material is protected by the carrier.



33.2396 Opaque LLL Carrier (50mm x 2m)

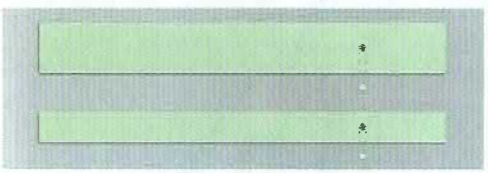
33.2389 Rigid photoluminescent insert (50mm x 1m)

LLL Strips

The simplest option is to screw and adhere 50 or 30mm width rigid material directly to the wall of the escape route walkways. Same are supplied in 1.2m lengths.

33.2331 Class B - 2.5mm thick x 50mm width - with screw caps

33.2332 Class D - 2.5mm thick x 30mm width - with screw caps



LLL Signage

33.2380 50x100mm

33.2381 50x100mm

33.2384 50x100mm

33.2382 50x100mm

33.2383 50x100mm

33.2385 50x100mm

33.2386 150x50mm

33.2387 150x50mm

A range of signs sized to fit the systems above. The signs are printed on transparent, heavy duty vinyl which allows the photoluminescent LLL strip to shine through, highlighting the printed symbol.

The signs are supplied in packs of ten.

7TH 33

Self Adhesive Photoluminescent Tape

Installation

When used as part of a low location lighting system, the installer must ensure that there is sufficient ambient light available to activate the tape to attain the required performance.

Photoluminescent Vinyl Tape

40mm wide x 10m	33.2014
80mm wide x 10m	33.2018

Photoluminescent Green Diagonal Tape

40mm wide x 10m	33.2034
80mm wide x 10m	33.2038

Photoluminescent Black Diagonal Tape

40mm wide x 10m	33.2044
80mm wide x 10m	33.2048

Photoluminescent Red Diagonal Tape

40mm wide x 10m	33.2054
80mm wide x 10m	33.2058

Photoluminescent Wayfinding Tape

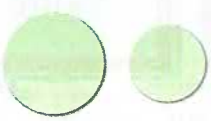
40mm wide x 10m	33.2024
80mm wide x 10m	33.2028

10 right & 10 left handed decals supplied with each roll.

Photoluminescent Wayfinding Dots

With Arrows

60mm diameter	33.2086
80mm diameter	33.2088

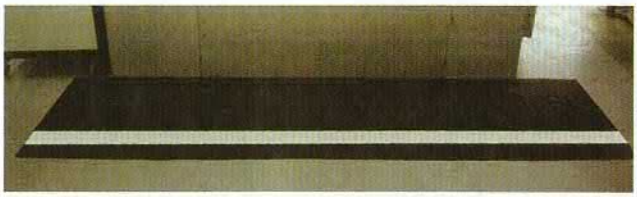


Without Arrows

60mm diameter	33.2096
80mm diameter	33.2098

Photoluminescent Path Way Matting

A system and collection of products to aid the evacuation of passengers and crew in the event of blackout conditions. One of these products is walkway matting which incorporates photoluminescent "roadway" marking. This matting can also illuminate the placement of machinery, high light the area restricted to the operator and for health and safety reasons will alleviate fatigue.



33.2352 Safety-way matting 2400x610mm

33.2353 Work-station matting 1200x1200mm

33.2354 Work-station matting 2400x1200mm

The flexible black PVC matting is resistant to a wide range of chemicals, it is resistant to attack by dilute acids at room temperature, although there may be some discolouration of the surface. Due to its "rubbery" material, this PVC product is non-slip.

Matting is used in a wide variety of applications and responds very well but the user should always consult the material data sheets. These highlight the qualities of electrical resistance, anti-slip, resistance to chemicals, oils, oil with additive, aqueous solutions (organic and alkalis). They also warn against contaminates such as chlorinated hydrocarbons, ketone's and others etc.,

Fire plan identification

Fire plan signs specified within MSC/Circ.451 to aid shoreside fire fighters in locating the vessels fire control plan.

Fire control symbols (A654), on self adhesive photoluminescent vinyl

Regulations:

Resolution A654(16) amending Chapter II - 2, Regulation 20 requires the use of these symbols on fire control plans and booklets as international standard. These symbols are often used to identify actual equipment where no standard sign is available.

Fire control symbols (ISO 17631), on self adhesive photoluminescent vinyl

Regulations:

ISO 17631 requires the use of these symbols on fire plans and booklets for new vessels or where existing fire plans have been significantly modified. These symbols are currently intended for use solely on fire plans, but in response to requests from the industry they are offered as signs to identify actual equipment where no standard sign is available. Purchasers should be aware that they are not currently recommended for use as signs by any official body. Although this situation may change if the future, there is no guarantee that the designs will be identical to those shown below.

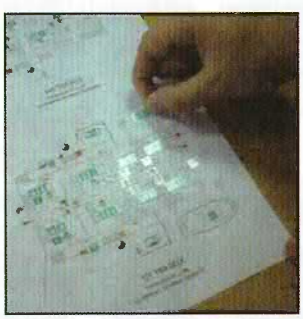
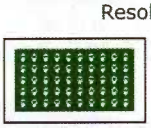
A5 Booklet

Life Saving Appliance Symbols totalling over 500 pictograms with a legend and Fire Plan title.

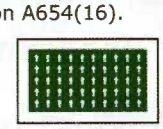
33.2604
A5 Booklet



With the change in regulations requiring vessels to carry EEBD's and additional Immersion Suits we are able to offer these sets of pictos for updating existing Safety Plans. Complies with ISO 17631:2002 but can be used in conjunction with Resolution A654(16).



50 x EEBD pictos per sheet
33.2605



50 x Immersion suit pictos per sheet
33.2606

Regulations:

SOLAS Consolidated Edition Chapter II - 2, Regulation 15.2.4.1 details the requirements for Fire Control Plans which can be combined with the Life - Saving Plan. IMO have issued a circular, MSC/1050, dated November 2003, urging member states to use ISO standard 17631:2002 for all new builds and where existing plans are being redrawn due to significant changes made to the vessel's fire fighting arrangements.

Regulations:

ISPS Code Part B Section 9 requires the identification of restricted areas, access notices and forms of declaration. Part B 16.23 also requires that port facilities show similar identification.

33.2419
150x150mm

ISPS Code 2003 edition SOLAS amendments came into force in July 2004 and require certain areas to have restricted access and be identified as such.

Temporary Tie Tags

Installation:

Tie tags are required wherever a need occurs to temporarily mark items and areas for safety reasons, usually during maintenance and in connection with the permit to work system. These tags are printed on a semi - rigid PVC with a matt finish to allow an authorisation signature and the date to be added in pen. The tags are supplied in packs of ten and come complete with cable ties for easy fixing.

Sign Fixing Components

Magnetic Sticky Strips
For fixing signs to metal doors and bulkheads. Useful where signs need only be temporarily displayed. 300mm long and can be cut to length.
Sold in packs of 10 33.2800

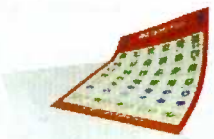
Double Sided Sticky Pads
For fixing signs to all surfaces. Acrylic adhesive pad offers a strong, permanent bond.
Sold in sheets of 50 33.2801

Sign Adhesive System
A solvent based gunning adhesive offering the strongest fixing to all types of surface.

Adhesive	**33.2802**
Applicator Gun	**33.2803**

Deckhead Fixing Kit
Two fixings are clipped to the top of the sign and the whole assembly stuck to the deckhead with the pre - fitted sticky pads. The fixing can grip either one or two signs allowing double sided signs to be displayed.
Sold in packs of 10 33.2804

Deckhead Suspension Kit
Employed where the deckhead fixing places the sign too high. The kit is assembled in a similar way to the deckhead fixing but the clear PVC strip can be cut to length to suit the application.
Sold in packs of 10 33.2805



Poster Display Unit
Enables a selection of posters to be displayed in a permanent position & changed on a regular basis.

W size (480x330mm)	**33.1098**
Y size (297x210mm)	**33.1099**

Passenger Vessel and Terminal Building Signs

Regulations:

The joint ICAO & IMO publication, Document 9636 details international signs to provide guidance to persons at airports and marine terminals. These signs should be used without text wherever possible.

475x330mm procedures for launching a fully enclosed lifeboat.

33.1505 Lifeboat Launching in a Dangerous Atmosphere
475x330mm procedures for launching an enclosed lifeboat in a dangerous atmosphere.

33.1506 Enclosed Space Entry
475x330mm safety procedures for entering enclosed spaces.

33.1507 Enclosed Space Entry Safety Signs
475x330mm safety signs used to identify hazardous spaces.

33.1508 Oil Spill Prevention
475x330mm procedures to reduce the likelihood of oil spills.

33.1509 Electric Shock, Drowning, Serious Inj W.H.O
475x330mm "vital actions" on discovery of an electric shock, drowning or serious injury casualty.

33.1510 Wheel House Poster (Two Sheets)
420x297mm as required by IMO Res. A. 601(15) (Pen included)

33.1511 Wheel House - Pilot Card
420x297mm as required by IMO Res. A. 601(15) (Pen included)

33.1512 Emergency Muster List
420x297mm as required by IMO Chap. III Reg. 8. (Pen included)

33.1513 Accommodation Ladders
475x330mm safe rigging and use of accommodation ladders.

33.1514 Gangways
475x330mm safe rigging and use of gangways.

33.1515 Man Overboard
475x330mm "vital actions" on discovery of a man overboard.

33.1516 Abandon Ship
475x330mm "vital actions" preparing to abandon ship

33.1517 Enclosed Space and Tank Rescue
475x330mm safety procedures for recovering a casualty from a hazardous atmosphere.

33.1520 Lifeboat Launching Free Fall
475x330mm procedures for launching a free fall lifeboat.

33.1521 Towing
475x330mm recommended procedures for safe towing operations.

33.1522 Bunkering
475x330mm safety procedures before, during and after bunkering.

33.1523 Oil Spill Actions
475x330mm recommended procedures to minimize the effect of an oil spill.

33.1524 Hot Work
475x330mm recommended safety preparation for hot work.

33.1525 Working Aloft or Outboard
475x330mm be aware of the risks when working outboard and aloft.

33.1526 Pilot - Boarding Arrangement
420x297mm in accordance with IMO requirements and IMPA recommendations.

33.1527 Fire Extinguisher Types
297x210mm popular types of fire extinguishers and types of fire which they are suited to.

33.1528 Personal Protective Equipment
475x330mm choosing the correct equipment for your safety.

33.1529 Garbage Disposal Plan
420x297mm MARPOL 73/78 Annex V

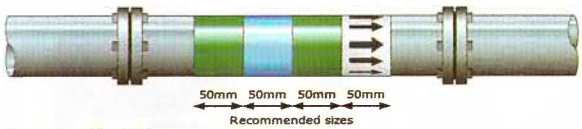
Pipe Identification Tape, in accordance with ISO 14726



Installation

Pipelines should be marked at least once in each room; at each penetration point in bulkheads and decks, close to each valve and within a distance of 3 - 5m along the length of the pipeline. Local conditions may require more marking due to pipe bends or the close proximity of pipes for different services.

Prior to application, pipes should be dust and oil free. The tape should overlap by at least 20mm on the 'blind side' of the pipe, however on pipes with an external circumference of over 200mm the tape only needs to cover half the circumference of the pipe.

Waste Media	Ref. Nos.
Black water	33.2140 - 33.2141 - 33.2140
Waste oil/Used oil	33.2140 - 33.2142 - 33.2140
Bilge water	33.2140 - 33.2143 - 33.2140
Exhaust gas	33.2140 - 33.2144 - 33.2140
Grey water	33.2140 - 33.2150 - 33.2140
Sewage - contaminated	33.2140 - 33.2151 - 33.2140

Fresh Water	Ref. Nos.
Fresh water, sanitary	33.2141 - 33.2142 - 33.2141

Training Manuals and Log Books

These manuals are written in an easily understood format which is ideal for seafarers whose first language may not be English. Offered in ring binders, the manuals can be easily updated by ship's staff in the event of regulation changes.

Product code	Title	Compliance
33.2615	Fire Training Manual	For compliance with SOLAS, Chapter II-2, Regulation 15.2.3.1/4. Covering the basic training requirements of SOLAS and has sections arranged for inclusion of ship specific information allowing the manual to be tailored to specific vessels.
33.2631	SOLAS Training Manual	For compliance with SOLAS, Chapter III, Part B, Regulation 35. Covering the basic training requirements of SOLAS and has sections arranged for inclusion of ship specific information allowing the manual to be tailored to specific vessels.
33.2638	SOPEP (Shipboard Oil Pollution Emergency Plan)	For compliance with MARPOL 73/78, Annex 1, Regulation 37 which requires every oil tanker of 150 tons gross and above, and every ship of 400 tons gross and above to carry a SOPEP, approved by the Administration. The plan contains useful check lists covering various oil spill and pollution scenarios. Requires basic ship specific information to be inserted by ships staff in order to satisfy the above MARPOL regulations.
33.2637	SMPEP (Shipboard Marine Pollution Emergency Plan)	For compliance with MARPOL 73/78, Annex II, Regulation 17 requiring any ship of 150 tons gross and above, certified for the carriage of noxious liquid substances to have a SMPEP approved by the administration. In the case where Annex 1, Regulation 37 also applies it may be combined with the SOPEP. The plan contains useful check lists covering various oil spill and pollution scenarios. Requires basic ship specific information to be inserted by ships staff in order to satisfy the above MARPOL regulations.
33.2636	Garbage Management Plan & Record book	For compliance with MARPOL 73/78, Annex V, Regulation 9 and Polar Code. The plan is generic in nature, but provision is made for inclusion of ship specific information thereby customising the plan to individual vessels as required by the above regulations.
33.2641	Garbage Record Book	Complies with MARPOL 73/78, Annex V, Regulation 9 and Polar Code.
33.2642	Water Ballast Record Book	Complies with IMO Resolution A868(20)
33.1205	ISPS Code Declaration of Security Record Book	Complies with International Ship and Port Facility Security Code
33.2639	Welcome-on-Board booklet	The booklet offers basic safety information to personnel joining a vessel and requires that they fill in ship specific information that can be retained for future reference. A detachable slip in each booklet provides Safety Officer's with a signed record that basic safety training has been received by each crew member.
33.2640	Survival booklet	Complies with SOLAS, Chapter III part B, Regulation 34 and the LSA Code, Chapter IV, Regulation 4.1.5.1.22 and 4.4.8.4. Suitable for both lifeboats and liferafts. Printed on water resistant card.

Vynalast Engraved Text Signs

A make-to-order Vynalast sign board with engraved free text according to customer's requirements. When ordering provide text content and sign dimensions (vertical x horizontal in mm). The amount of text and sign size will determine the font size.

Remark:
The suffix letter to JALITE products number denotes:

A = 100 x 100mm, C =150 x 150mm,
D = 150 x 200mm, G =150 x 300mm,
K = 150 x 400mm, M = 80 x 200mm,
P = 75 x 150mm, PT =100 x 300mm,
Q = 300 x 300mm

Fire Plan Holders

This UPVC holder with weatherproof screw end cap comes complete with fixings and has been specifically designed to comply with the requirements of the SOLAS regulations. It has a length of 1m and OD of 110mm enabling Fire Plans up to size A0 to be accommodated without the need to fold the plan.

33 26 13	Fire Plan Holder 110mm dia x 1 mtr length	Pc.

SOLAS Check List

As required by SOLAS Chapter III Regulation 20.7 and 36.1 (96/98 amendments), all vessels constructed before, on or after 1 July 1998, should carry SOLAS Check List to provide a record of monthly inspections of all lifesaving appliances.

Contents

I. Weekly Inspections
Lifeboats/Rescue Boats/Liferafts/General Alarm

II. Monthly Inspections
Lifejackets/Immersion Suits/Thermal Protective Aids / Illumination in Launching Area/Lifeboats/Rescue Boats/ Liferafts/EPIRBs, SARTs, & Radios/Pyrotechnics/ Lifebuoys & Attachments

Pyrotechnics

Required Quantities of Distress Flares for Vessels, Lifeboats and Liferafts by the 1983 amendment to SOLAS 1974

I) For Vessels

Regulation	Description	Required Quantity
17 & 49	Line throwing applicances 救命索引発射器	Includes no less than 4 projectiles, each capable of carrying the line at least 230 mtr.
6 - 3	Rocket parchute flares 落下傘付き信号	No less than 12 pcs must be stowed on or near the navigation bridge
7-1.3	Self-igniting lights 自己点火灯 Ship's length under 100 mtr 100 - 149 mtr 150 - 199 mtr 200 mtr and over	No less than one half of the total number of lifebuoys Quantity 4 pcs. 5 pcs. 6 pcs. 7 pcs.
	Self-activatiing smoke signals 自己発煙信号	No less than two of the total numbers of lifebuoys
	Manoverboards マノーバーボード	Substitute for above self-activating smoke signals, combined with self-igniting light
	Rocket star signals 火せん	6 pcs

II) For Lifeboats and Liferafts

Regulation	Description	Required Quantity
38 - 5.1 and 41 - 8	Rocket parachute flares 落下傘付き信号	4 pcs.
	Hand flares 手用信号炎	6 pcs.
	Buoyant smoke signals 発煙浮信号	2 pcs.

Major Pyrotechnics Comparison Table

A full range of distress signals are available from several manufacturers as listed below, under the SOLAS '83 regulations which conform to maritime approval authorities throughout the world.

When ordering, please specify the following points:

1. CODE number..... 33 03 01
2. Description..... Line throwing apparatus
3. Name of Mfr..... PainsWessex
4. Brand..... Linethrower 250
5. Classification..... M.E.D
6. Quantity..... Set

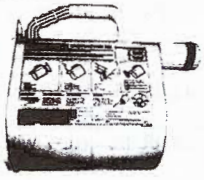
Line Throwing Apparatuses



Self-contained rocket-powered line-throwing unit designed for ship-to-ship and ship-to-shore operations as well as for the rescue of people in distress at sea.

One line throwing apparatus is required to be equipped, which includes not less than 4 projectiles each capable of carrying the line to a nominal range of 250 mtr in calm weather.

Line Throwing Apparatus Complete

Rocket Parachute Flares

For use in day and night long range distress signal situations.

1) Colour of light	Red
2) Duration of burn time	40 seconds minimum
3) Light intensity	30,000 candela minimum
4) Height	300 mtr
5) Ignition	Base pull-wire igniter
6) Temperature operating range	-30°C to 65°C
7) Temperature storage	-30°C to 75°C
8) Weight	270 grm

Manoverboards

Combined light and smoke lifebuoy marker. Day and night signal which is attached to a lifebuoy (not supplied) and used in an emergency to mark position of a manoverboard.

1) Colour of smoke	Dense orange smoke
2) Duration of burn time	15 minutes
3) Light intensity and duration	Minimum 2 candela for 2 hours

4) Ignition — Pull-wire igniter
5) Temperature operation range — -1°C to 30°C
6) Temperature storage range — -30°C to 75°C
7) Weight — 3.5kgs

CODE	Model	Brand	Bracket	Unit

Lifebuoy Self-activating Smoke Signals

A daylight smoke marker attached to the lifebuoy by means of a lanyard. Identical to manoverboard, but without the lighting system.

1) Colour of smoke — Dense orange smoke
2) Duration of burn time — 15 minutes
3) Light intensity and duration — Minimum 2 candela for 2 hours
4) Ignition — Pull-wire igniter
5) Temperature operation range — -1°C to 30°C
6) Temperature storage range — -30°C to 75°C
7) Weight — 3.5kgs

Pneumatic Line Thrower

Rescue 230

Air operated firing and propellant line thrower along with the wide range of projectiles. A stand-by tool for rescue purposes. The training projectile allows easy live training at no cost. Base unit with air cylinder holds sufficient air for 4 - 6 shots before refilling from a high pressure compressor (200 - 300 bars) or a diving cylinder. Meets the demands of SOLAS 74/83, and EU approval no. MED-B-187, NATO no.1095-25-142-3704.

Technical Data		Contents
Range	: Min. 230 mtr	4 Rescue projectiles
Line strength	: Min. 2,000N	1 Training projectile
Recoil	: Max. 5,400N	1 Loading device
Flight time	: 4 sec.	1 Users manual, video/CD

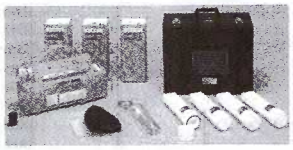
Line Throwing Appliance

Electric Ignition Type



Designed for portable, compact, safe and ease of operation, and projects a line to a normal range 230 mtr in calm weather condition, conforms to LSA code and IMO Resolution M.S.C. 81 (70).

It provides a new ignition system which can be fired by a self-contained electric ignition mechanism. The line-throwing device can be used from ship to ship or ship to sea shore and also is suitable for rescue operation at sea and on land. Effective period of rockets and igniter: 3 years and 6 months. The spares (Rockets, igniter and liners) are available on request.

Composition
1 Plastic casing with an igniter
4 Rockets
4 Lines
1 Container for rocket and lines

33 13 47	Line throwing appliance, electric ignition type, Koa Kako KM5E	Set
48	Spre 4 rockets & 1 ignitor for KM5E	Set

Portable Oxygen Apparatus

Installation required by the Medical First Aid Guide (MFAG) for use in accidents involving noxious gases. These units may be used as a resuscitator, aspirator and oxygen inhaler. Oxygen capacity for resuscitator: 50 % – 40 minutes (for adult) per 2 ltr cylinder. Cylinders are of a 2 ltr capacity. 1 or 2 cylinder units are available.

Oxygen Consumption for Inhaler

Flow/Hour	1 Cylinder	2 Cylinders
0.5 ltr	8 H 30'	17H 00'
1.0 "	4 H 20'	8H 40'
2.0 "	2 H 10'	4H 20'
3.0 "	1 H 25'	2H 50'
4.0 "	1 H 00'	2H 00'
5.0 "	50'	1H 40'

33 04 03	2 ltr x 2 cylinders, complete set	15.5 kgs

Self-contained Breathing Apparatus

Required by the Medical First Aid Guide (MFAG) for use in accidents involving dangerous gases where a portable oxygen apparatus is not available. A self-contained breathing apparatus is also required by 1983 SOLAS amendments Chapter III Regulation 17. Suitable for fire fighting, rescue work, inspection and maintenance of equipment and other related activities, especially on board a ship.

Communication Systems for SCBA

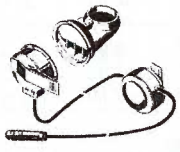
By simultaneous use of a SCBA and a radio, communication is getting difficult in a noisiness area.

Communication system exist of a combined microphone – speaker, wired to a radio connector with a PTT(Push to Talk) knob, connected to the full face mask by a radio-exhalation valve adapter. Or to be used without full face mask.

Loud and clear communication is possible, even in combination with a full face mask. Other option is to use it in a gastight suit.

Connection with a wide range of brand and types of radios is possible.

Positive Pressure Version



Normal Pressure Version

Note: Please specify brand and type of radio in use.

Emergency Escape Breathing Devices

Required by SOLAS 1974 in regulation 13 revised in 2000, all ships shall carry at least two Emergency Escape Breathing Devices (E.E.B.D.) within accommodation spaces for providing respiratory protection in toxic and oxygen deficient atmospheres. On all ships, within the machinery spaces, E.E.B.D. shall be situated ready for use at easily visible places, which can be reached quickly and easily at any time in the event of fire. The location of E.E.B.D. shall take into account the layout of the machinery space and the number of persons normally working in the spaces. The E.E.B.D. should have at least a duration of service of 10 minutes and should include a hood or full face piece to protect the eyes, nose and mouth during escape, complying with the Fire Safety Systems (F.S.S.) Code. Hoods and face pieces should be considered flame resistant and include a clear window for viewing. An unactivated E.E.B.D. should be capable of being carried hands-free.

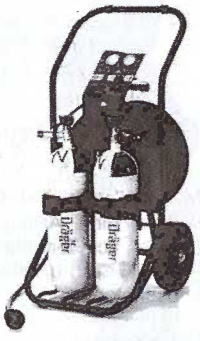
Airline Trolley



Uninterrupted air supply is provided by the trolley-mounted cylinder(s) to the wearer via a hose reel. As the air-trolley can be easily re-located and therefore positioned in a safe zone which is in close proximity to working area, the user need only wear a lightweight harness during operation. This allows the wearer a greater freedom of movement, and less stress and fatigue than they would be subjected to if wearing a conventional self contained breathing apparatus unit.

The air-trolley is able to accommodate up to four compressed air cylinders of up to 12 litres in capacity and is constructed from an anti-static powder coated steel material. The trolley hose reel connector is protected with a cover to minimize inadvertent damage being caused. The system incorporates a safety pressure relief valve and the pressure reducer is shrouded in a protective plate for additional safety.

Application: Chemical tank cleaning, toxic spillages or certain tasks when working on offshore installations

Breathing Air Quality Tester

Used to determine the quality of respiratory air in high-pressure compressor or a compressed air cylinder. The application of the test system ensures the reliable testing in accordance with the purification standard EN 12021. This quick check guarantees an exact measuring result and provides information regarding the level of contamination after only five minutes.

Multi-Toxic Gas Monitor

A four gas personal monitor with advanced features including large LCD which can display 4-gas concentrations, current time, and battery indicator simultaneously. Extra loud alarm buzzer, three bright LED lamps and IP67 water and dust proof construction with built in impact resistant protective cover. All controls and features are operated by 2 buttons.

* Simultaneously and read-time detection of 4 gases LEL, O_2 (Oxygen), H_2S (Hydrogen Sulfide) and CO (Carbon Monoxide).
* Rechargeable Ni-MH battery pack.
* Continuous operation for up to 20 hours.
* Data logging standard.
* STEL (Short Term Exposure Limit) and TWA (Time Weighted Average) readout.

Application:

Confined space / Refineries and Petrochemical / Utilities / Chemical plants / Hazardous material / Water and wastewater treatment / Fire services

Weight	Approx. 1.1 kgs
Standard Accessories	• AC powered charger (Input: AC100V-AC240V, 50/60Hz, Output: DC12V, 1.25A) • Gas sampling probe • Gas sampling hose (Spiral 1mtr) • Lithium-ion battery unit BUL-8000 • Neck/shoulder strap • Instruction manual
Name of Mfr	Riken Keiki Co., Ltd.

Pocketable Type

Built around high-quality micro-sensor technology, this is smallest personal 5 sensor gas monitor with a built in sample pump. Weighing only 360grm. This can be also measure 100% volume Methane and dynamically display either % LEL, or % volume with its auto-ranging ability.

GX-2012

Two operating modes : Normal (for confined spaces) and bar hole. GX-2012 can monitor the standard confined space gases (LEL combustibles, Oxygen content, Carbon

Monoxide and Hydrogen Sulfide). The GX-2012 can be used for gas line purge testing as well as standard safety testing.

GX-2012GT

It can monitor the standard gas safety hazards for gas/pipeline operations, (LEL combustibles, oxygen content and Carbon Monoxide), and it has a high-sensitivity ppm CH_4 leak tracker mode which reads down to 10ppm.

Multi Gas Detectors

GasAlertQuattro

A four-gas detector combines a comprehensive range of features with simple one-button operation, suited to a wide range of industrial applications including confined space entry. The graphic LCD displays easy to identify icons that indicate operational information, such as bump test and calibration status for simplified onsite auditing. Interchangeable power options with extended battery runtimes for longer shifts. Full function self-test of sensor(s), battery status, circuit integrity and audible / visual alarms on start up and continuous testing on sensor(s). Multi-language support in English, French, German, Spanish and Portuguese.

Sensor Specifications

Gas	Measuring Range	Resolution
Hydrogen sulfide (H_2S)	0-200 ppm	0.1 ppm
Carbon monoxide (CO)	0-1,000 ppm	1 ppm
Oxygen (O_2)	0-30.0%	0.1%
Combustible gases (%LEL)	0-100% LEL	1%
	0-5.0% v/v	0.1%

Combination Gas Detectors

Designed for detecting, combustible gas in the atmosphere. Providing full-function capability in a personal monitoring device.

MSA ALTAIR 5X/ALTAIR 5X-IR

The rugged, multi-featured MSA ALTAIR 5X Gas Detector provides maximum safety and make it easy to use in even the most demanding situations. It features large buttons for easy use, and its polycarbonate housing protects the detector for drops of up to 10 feet. The detector also boasts the exclusive MotionAlert™, which lets others know if the user has become immobile, and InstantAlert™, a manual alarm that alerts others if a dangerous situation has arisen, while the large buttons and bright display makes operation possible even when the user is wearing gloves.

Approvals:

USA/NRTL [Intrinsic Safety, Non-Mining] / Canada / CSA [Intrinsic Safety, Combustible Performance, Non-Mining]/ Australia [Intrinsic Safety, Industrial Mining–Test Safe]/ European Union ATEX–FTZU [Intrinsic Safety, Industrial and Mining]/IECEx [Intrinsic Safety, Industrial and Mining-Test Safe]/Wheelmark 213.050 Complying with SOLAS 74/78 Chapter II-2/4 and VI/3, as amended IMO Resolution MSC.98 (73) - (FSS-code) 15.

- Rugged detector tests levels of LEL.
- Rapid bump test gives results in under 15 seconds .
- Versatile MSA Link™ allows user to transmit data to a computer.
- Durable XCell sensor last longer than 3 years.
- Exclusive end-of-sensor warning cautions user when unit's sensor needs to be changed.
- Polycarbonate housing is both dust-tight and water-tight.

MSA ALTAIR 4X

The ALTAIR 4X Multigas Detector surpasses industry standards in several crucial areas. Its four-year sensor life is 60% longer than the industry average, while its 24-hour run time exceeds the industry average by 71%. This versatile portable detector is a perfect match for industries ranging from firefighting to welding, and its digital sensor output makes it less likely to suffer from RF interference. The unit features exclusive MotionAlert™, which lets others know if the user has become immobile, and InstantAlert™, a manual alarm that alerts others of potentially dangerous situations. This rugged unit is designed to withstand a drop of up to 20 feet and uses less than half as much calibration gas as the industry average.

Approvals:

USA: ETL Class I, Div. 1, Groups A,B,C&D , Tamb=-40°C to +54°C, ETL Class II, Div.1, Groups E,F&G, Class III, Div. 1, Tamb=-40°C to +54°C; T4 / CANADA : CSA Class I, Div. 1, Groups A,B,C&D, CAN/CSA C22.2 152; 12.13.01-2000, ETL Class II, Div.1, Groups E,F&G, Class III, Div. 1, Tamb=-40°C to +54°C; T4 / Australia/New Zealand TestSafe Australia/European Union ATEX – FTZU [Intrinsic Safety, Industrial and Mining]/Wheelmark 213.048: Complying with SOLAS 74/78 Chapter II-2/4 and VI/3, as amended IMO Resolution MSC.98(73)-(FSS-code) 15.

- Dependable multigas detector tests for LEL.

- Economical construction saves users more than 50% on calibration gas, replacement sensor and maintenance.
- Unit uses 50% less calibration gas per minute than the average detectors within the industry.
- Large buttons and high-contrast screen make operation easy in low-light conditions.
- Ribbed rubber housing provides secure grip and high durability.
- Unit features 95+ db alarm and ultra-bright LEDs.
- Exclusive end-of-sensor warning cautions user when unit's sensor needs to be changed.

Personal Multi Gas Detection Devices

Designed to be a compact, robust, easy to use instrument for either flammable gas detection, or flammable and oxygen detection.

With a large LCD display, loud acoustic and bright optical alarm with vibrating battery option, the X-am 2500 gives clear warning of a hazardous atmosphere and is, therefore, suitable for a wide range of personal monitoring and confined space entry tasks.

With EEx iad IIC T4 and IP67 approval, the X-am 2500 is suitable for the most demanding of environments.

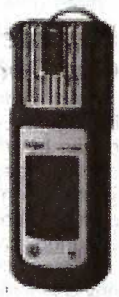
Multi-Gas Detector
Draeger X-am® 5000



This 1- to 5- gas detector reliably measures combustible gases and vapors as well as O_2 and harmful concentrations of toxic gases, organic vapors, Odorant and Amine. It is easy to exchange, upgrade or calibrate the sensors to other gases. The X-am 5000 provides dependable warnings in the event of explosive atmospheres thanks to the high level of sensitivity of the innovative catalytic Ex sensor. The optional external pump, which operates with a hose up to 30 (98 feet) meters long, makes it possible to use the detector for pre-entry measurements into confined spaces such as tanks, shafts, etc. Consisting of basic instrument with an integrated data logger and manufacturer's and calibration certificates

Name of Mfr. : Draeger

Multi-Gas Detection Device
Draeger X-am® 5600

The smallest gas detection instrument for the measurement of up to 6 gases. This detector reliably detects explosive, combustible and harmful concentrations of O_2, Cl_2, CO, CO_2, H_2, H_2S, HCN, NH_3, NO, NO_2, PH_3, SO_2, O_3, Amine, Odorant, $COCl_2$ and organic vapors. Draeger infrared sensors can generally be used for up to eight years. This advanced technology reduces the cost of ownership considerably because less replacement sensors are needed. In addition, a sensor calibration is only necessary every 12 months which reduces maintenance costs. An optional external pump which can be operated with hoses up to 30 m or 98 ft. in length is the perfect solution for pre-entry measurements in tanks or pipelines. The small and reliable gas detector is suitable for use in areas classified as zone 0, which are areas where explosive atmospheres are always to be expected.

Consisting of basic instrument with an integrated data logger, support CD, manufacturer's and calibration certificates.

Multi-Gas Detectors

X-am® 8000

Measures up to seven toxic as well as flammable gases, vapours and oxygen all at once—either in pump or diffusion mode. Innovative signaling design and handy assistant functions ensure complete safety throughout the process. It can be connected with hoses of up to 45 mtr in length. An optional Bluetooth® module in the X-am 8000 enables measured values to be transferred automatically to the CSE Connect app. You can also use the app to create measurement reports.

In case of an alarm, the X-am 8000 alerts you with colourful alarm LEDs, a loud horn (100 dB (A) at a distance of 30 cm), and clearly palpable vibration.

Specification:

* Dimensions (H x W x D): 179 x 77 x 42 mm.
* Weight: Approx. 495 grm depending on sensor configuration, without strap and pump.
* Ingress protection class: IP67.
* Energy supply: Lithium-ion battery, rechargeable, inductive charging.

Single-Gas Detectors

Pac® 8500

A reliable and precise instrument even under the toughest conditions. The device can be equipped with a hydrogen-compensated CO sensor or a dual sensor. This gives you the option of measuring two gases at once: either H_2S with CO or O_2 with CO, and detect of even low concentrations – and all in one and the same handy device. You can take vol.% measurements of oxygen and ppm measurements of carbon monoxide simultaneously using just one sensor. The Pac 8500 also provides a data and event logger for logging concentrations. Data can be loaded on a PC via an interface and processed further there.

The shock-proof, chemical-resistant housing meets the requirements specified in the IP68 standard rating. In case of an alarm, it sets off an audible, visual and perceptible vibrating alarm. All of the versions of the Pac 8500 are equipped with extremely durable DraegerSensors® and a powerful battery.

Please contact your local supplier more about sensors and accessories of your necessary jobs.

Bumptest and Calibration Station for Gas Detectors

An automated test system provides simple and intelligent testing and calibration of multigas detectors, driven by the most advanced technology available in any portable gas detector. The gas provided by the Bump Test Station flows through the dust and water filter to the sensor(s) confirming correct functionality of the gas detector ensuring compliance with country-specific requirements and regulations, standards, recommendations, etc. Once any gas detector is placed in this system, it can be tested, calibrated automatically.

Calibration and Bump Testing

Draeger X-dock® 5300/6300/6600

The X-dock 5300 includes a master station including a module for a gas detection instrument from the X-am 1/2/5x00 or Pac family. It is immediately ready to use.

The X-dock 6300 and 6600 versions can be configured freely. They consist of a master station and can be expanded with up to 10 modules for X-am 1/2/5x00 and/or Pac gas detection instruments.

Insert the device, close the lid and remove it when the indicator goes "green" – a test with the X-dock is just that simple. It immediately detects all sensor combinations. Furthermore, the X-dock automatically tests and adjusts when all required test gases are connected.

The X-dock stores all of the relevant data and reads the collected information from the gas detection instruments for subsequent evaluations. All Draeger test gas cylinders are already stored in the database – entering the part number will automatically fill in the fields required for the gas configuration.

External Pump for Multi-gas Detectors

Draeger X-am® Pump

An external pump for the portable gas detectors Draeger X-am® 2500, 5000, and 5600 – designed for clearance measurement, for example in tanks and shafts. The X-am pump can reach the ambient atmosphere in inaccessible places – up to a distance of 45 m, e.g. in channels, shafts, or tank systems. The pump has an explosion protection approval for Ex zone 0.

The battery capacity lasts for three workweeks at 8 measurements per day (i.e. up to 20 hours of continuous operation).

Fumigation Test Set

An easy method for testing containers and other spaces for the presence of fumigation agents. A specially developed measuring strategy allows for the detection of fumigants even when the chemical is unknown. To prevent goods from being damaged by animals such as insects and other disease carriers, containers are flooded with toxic or suffocating gases.

Fumigants are highly toxic and harmful to the health in many ways and the concentration of the fumigants must be measured. Thereby, it is important to check the Oxygen concentration in the container or other spaces. In only a few minutes, the concentration of the fumigants within the container can be determined, and depending on the concentration measured, the decision can be made whether the container or space can be entered or ventilated.

All that is needed are the corresponding tubes, the Drager accuroR hand pump, and the Drager bar probe. By comparing the color change within the detector tube to the printed scale, an estimation of the concentration can be made.

If the fumigant is known, the corresponding Drager-Tube is chosen and the measurement carried out as instructed.

Fumigation test set is composed of the following equipments:

* Fumigation case #83 17 147.
* Gas detector pump #64 00 000.
* Bar probe 400 for the measurement of fumigants in the container #83 17 188.
* Extension hose for Draeger Accuro, I mtr #64 00 561.
* Adapter Draeger Simultest, consisting of cutting holder and adapter #64 00 090.
* Spare parts set for Draeger Accuro #64 00 220.

Ability Approval	Explosion proof approved by NK *HK examination available on request	
Accessories	Sampling rod with W.S.filter, Leather case, Sampling tube (5m~max 20m)	
Name of Mfr.	Toka Seiki Co., Ltd.	

Halogen Gas Leak Detectors

A hand held detector able to detect all halogen refrigerants, CFC's(R-12),HCFC's(R-22), HFC's(R134a) enabling you to find leaks in your refrigeration system. Six-segment visual leak size indicator, audible alarm, cordless, and supplied in carrying case and spare sensing tip

Specifications

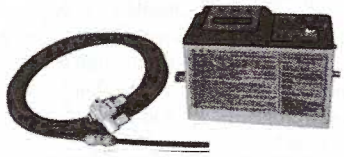
Model	Unirx-1A
Detection mode	Microprocessor controlled circuit with advanced digital signal processing.
Sensitivity	Better than 5ppm
Display	LED
Power Supply	3 V DC
Batteries	2 x C cell alkaline (LR-14/AM-2)
Battery Life	30 hrs normal operation
Size	229 x 57 x57 mm
Weight	560 grm
Approval	UL classified and CE approved
Name of Mfr.	Wilhelmsen Ships Service Co., Ltd.

33 05 35	Halogen gas leak detector Unirx-1A	Set

Portable Toxic Gas Meters

A portable toxic gas meter with the following features.

- Peak hold function enable to memorize maximum density.
- Alarm is two-staged type (AL1 and AL2).
- Auto-zero function can calibrate automatically at the time of power-on.
- Long-life sensor (2 years, 1 year warranty).



Measurable Gas

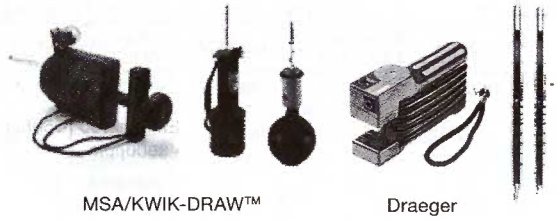
Model	TIP-HS	TIP-HY
Measurable Gas	H_2S (Hydrogen sulfide)	H_2 (Hydrogen gas)
Measuring range (ppm) Low/High range	0-20/0-100	0-400/0-2000
Resolution (ppm)	0.1	2
Alarm Level (ppm) AL1/AL2	5/25	100/500

Unit Per Set

CODE	33 05 55	33 05 56
Model	TIP-HS	TIP-HY
Measuring Gas	Hydrogen sulfide	Hydrogen gas
Sensing Principle	Potentiostatic electrolysis method	
Gas Collection Method	Suction type by built in pump	
Accuracy	Within ± 10% in full scale	
Response	90% response within 60 sec.	
Display	Digital display by LCD panel, Power lamp, Alarm lamp, Peak hold mode lamp	
Alarm Level	Two staged type (AL1/AL2: adjustable)	
Alarm Display	Alarm lamp and buzzer	
Power Source	Manganese dry cell (R20P) x 2 pcs	
Dimensions	W:163 x H:137 x D:67 mm	
Weight	1.3 kgs (without sampling tube)	
Safety Approval	Intrinsically safe: i3aG4	
Ability Approval	Explosion proof approved by NK	
Accessories	Air Filter, Leather case, Sampling tube (5m~max 20m)	
Name of Mfr.	Tokai Seiki Co., Ltd.	

Tube Type Gas Detectors

Measured value can be read-off directly and immediately via colour indication. It consists of sampler pump and tubes. A wide variety of tubes are available, applicable to the gas being tested. The most common tubes are discussed below.



MSA/KWIK-DRAW™ Draeger

Kitagawa Uniphos

33 05 40	Tube type gas detector, MSA/Kwik-Draw™ Model Kwik-Draw Deluxe	Pc.
33 05 53	Tube type gas detector, MSA/Kwik-Draw™ Model Gas Tester II H	Pc.
33 05 54	Tube type gas detector, MSA/Kwik-Draw™ Model Gas Tester I	Pc.
33 05 60	Tube type gas detector, Draeger Model Accuro	Pc.
33 16 51	Tube type gas detector, Kitagawa Model AP-20	Pc.
33 16 72	Tube type gas detector, Uniphos Model ASP-40	Pc.

Tubes for Gas Detectors

All tubes are sold 10 tubes each per pkt.

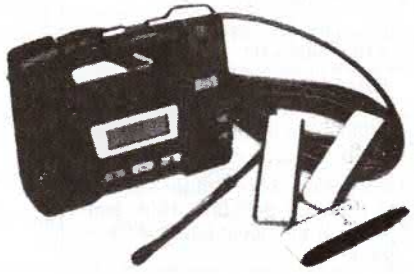
Tube Type Gas Detectors

All-in-one Automatic Tube Pump

The automatic tube pump is the first all-in-one solution designed for measurements with all Dräger short-term tubes and for sampling tubes and systems. Ease of operation and a high degree of reliability compliment the measurement and sampling of gases, vapours and aerosols.



Specification

Short-term Measurements	Using Dräger short-term tubes Number of strokes: adjustable, 1 to 199 strokes Stroke volume: 100 mL
Sample Taking	Flow rate range: 0.1 to 2.0 L/min Resolution: 0.1 to 1.0 L/min: 0.1 L/min ±5% Resolution: 1.0 to 2.0 L/min: 0.2 L/min ±5% Sampling time: adjustable, up to 12 hours, depending on flow rate Resolution in steps of 15 minutes (default) or 1 minute
Display	Two Parts: Segment and matrix
Use of Extension Hose	Up to 30 mtr (98 ft.)
Power Supply	Rechargeable Battery NiMH, T4: 7.2 V, 1,500 mAh (charging time < 4 hours) Alkaline Battery Pack, T4: 6 AA cells, (see battery pack label for approved battery types)
Battery Capacity at 25°C (77°F)	Dräger short-term tubes: >1,000 strokes Sample taking: up to 12 hours, depending on adjusted flow rate
Approvals	ATEX: Ex ia IIC T4 Ga Ex ia I Ma I M 1 / II 1G MED UL: Class I, Div. 1, Group A, B, C, D Class II, Div. 1, Group F, G 5°C ≤ Ta ≤ + 40°C Temp. Code T4 Exia cUL: Class I, Div. 1, Group A, B, C, D Class II, Div. 1, Group F, G 5°C ≤ Ta ≤ + 40°C Temp. Code T4 Exia IECEx: Ex ia IIC T4 Ga CE-mark: according to 2004/108 EC and 94/9/EC
Dimensions (H x W x D)	Approx. 175 x 230 x 108 mm (7" x 9" x 4.25")
Weight (w/o battery pack)	Approx. 1.6 kgs (3.5 lbs)

Combination Gas Detectors

GMI Gasurveyor 487R

Designed for **LNG carriers**.

The Gasurveyor 487 is an advanced portable gas detector with an integral pump, and has selectable dual mode operation for Confined Space Monitor (CSM) or Combustible Gas Indicator (CGI).

It provides the ranges 0-100% LEL methane, 0-5% CO_2, 0 to 25 O_2 and 0-1,000 ppm CO. The instrument provides audible and visual alarms, datalogging and automatic data transfer as standard.

Unit Per Set

CODE	33 05 86
Model	Gasurveyor 487R
Measuring Range	Flammable gas : 0 - 100% LEL 0 - 100% Vol in inert or air Carbon Dioxide (CO_2) : 0 - 5% Vol Oxygen (O_2) : 0 - 25% Vol Carbon Monoxide (CO): 0-1,000 ppm
Display	LCD with automatic backlighting
Sampling System	Integral pump with flow-fail sensor; sample path protected by dust and water filters and auto pump switch off.
Battery Life	10 hours minimum
Protection	Rugged carbon/polypropylene case for marine use
Certification	Ex ias IIB T4, UL Class 1 Group A, B, C, D EC MED type approved, CE
Dimensions	180 x 95 x 105 mm
Weight	Approx. 1.3 kgs
Accessories	Standard probes, Sample line, Dust and Water Filters. Conductive sampling line available. On-board calibration software available.
Name of Mfr.	Gas Measurement Instruments Ltd.

GMI Gasurveyor 11-500

The GMI Gasurveyor 11-500 is designed for monitoring in ships with IG Systems. It is suitable for combustible gas monitoring in inert and air atmospheres.

Unit Per Set

CODE	33 05 87
Model	Gasurveyor 11-500
Measuring Range	Flammable gas : 0 - 100% LEL 0 - 100% Vol in inert or air Oxygen (O_2) : 0 - 25% Vol
Display	LCD with automatic backlighting
Default Alarm Point	LEL - 20%
Sampling System	Integral pump with flow-fail sensor; sample path protected by hydrophobic filter and auto pump switch off.
Battery Life	Rechargeable : 8 hours minimum Alkaline Cells : In excess of 15 hours
Protection	Rugged carbon/polypropylene case for marine use
Approvals	EEx ias IIC T4, UL Class 1 Group A, B, C and D EC MED type approved, CE
Dimensions	180 x 90 x 105 mm
Weight	Approx. 1.3 kgs
Accessories	Standard probes, Sample line, Dust and Water Filters. Conductive sampling line available. On-board calibration software available.
Name of Mfr.	Gas Measurement Instruments Ltd.

Portable Gas Detector "V!SA"

A compact personal monitor with the facility to detect up to five gases: 0-100% LEL, 0-25% O_2 and three toxic gases. Ultra loud audible and bright visual alarms warn the user of rising gas levels. Single button operation makes this the easiest to use personal gas monitor on the market.

The unique combination of pump and diffusion sampling allows for pre-entry checks and continuous monitoring within enclosed spaces.

The rugged design and powerful alarms make it an ideal partner in arduous conditions.

Unit Per Set

CODE	33 05 88	33 05 89
Model	V!SA	
Power Supply	Alkaline Battery	Rechargeable Battery
Measuring Range	0-100% LEL (Methane, Butane, Pentane, Propane and others) 0-25% Oxygen (O_2), 0-100 ppm Hydrogen Sulphide (H_2S), 0-1,000 ppm Carbon Monoxide (CO), 0-30 ppm Sulphur Dioxide (SO_2), 0-10 ppm Chlorine (CL_2) 0-300 ppm Nitric Oxide (NO), 0-20 ppm Nitrogen Dioxide (NO_2)	

(to be continued)

Unit Per Set

CODE	33 05 88	33 05 89
Alarm Setting	Instant alarms and Time Weighted Averaging available on all ranges. >100 dB(A) audible alarm	
Expected Sensor Life	Flammable : 5 years, Oxygen : 2 years, Toxic : 2 years	
Battery Life	Rechargeable: 20 hours	Alkaline Cells: 12 hours
Approvals	EEx iad IIC T4, UL Class 1 Group A, B, C, D, EC MED type approved, CE	
Dimensions	130 x 75 x 35 mm	
Weight	0.4 kgs	
Accessories	VISA Calibration Software available for on-board calibration, record keeping and certificate printing.	
Name of Mfr.	Gas Measurement Instruments Ltd.	

Combustible Gas Detectors

GMI Gasurveyor 3-500

The GMI Gasurveyor 3-500 is designed for monitoring in ships with IG Systems. It is suitable for combustible gas monitoring in inert and air atmospheres.

Unit Per Set

CODE	33 05 90
Model	Gasurveyor 3-500
Measuring Range	Flammable gas: 0 - 100% LEL 0 - 100% Vol in inert or air
Display	LCD with automatic backlighting
Default Alarm Point	LEL - 20%
Sampling System	Integral pump with flow-fail sensor; sample path protected by hydrophobic filter and auto pump switch off.
Power Supply	4 'D' size alkaline cells or rechargeable battery pack
Battery Life	Rechargeable: 8 hours minimum Alkaline Cells: In excess of 15 hours
Protection	Rugged carbon/polypropylene case for marine use
Approvals	EEx ias IIC T4, UL Class 1 Group A, B, C and D EC MED type approved, CE
Dimensions	180 x 90 x 105 mm
Weight	Approx. 1.3 kgs
Accessories	Standard probes, Sample line, Dust and Water Filters. Conductive sampling line available. On-board calibration software available.
Name of Mfr.	Gas Measurement Instruments Ltd.

Personal PID Benzene Detectors

A smallest, lightest, most sensitive personal PID (photoionisation detection) monitor for hazardous and toxic compounds including Benzene. When worker exposure exceeds pre-set limits in environment, it's audible, vibrating and flashing LED alarms alert you to the gases present. Readings are displayed on its bright, back-lit LCD display with selectable data logging time.

Unit Per Set

CODE	33 05 95
Model	Cub Personal PID Benzene Detector
Sensitivity	0.001ppm (isobutylene equivalent) *Model dependent 0.002 mg/m³ (isobutylene equivalent) *Model dependent
Accuracy	±5% display reading +one digit
Approvals	Europe: ATEX:CE, ExII 1G, ExiaIICT4; -20°C ≤ Ta ≤ 55°C IECEx: ExiaIICT4-20°C ≤ Ta ≤ 55°C China: ExiaIICT4-20°C ≤ Ta ≤ 55°C US and Canadian approvals: Class I, II and III, Division I, Hazardous (Classified) Locations
Battery life	Battery life up to 16 hours
Calibration	2 point calibration via docking station
Alarm	LEDs,audio and vibrate Sounder 86dB @ 300mm Pre-programmed TWA & STEL. Work exposure alarm levels on all models.
Protection	Designed to IP65 (heavy rain)
Weight & Dimensions	111 grm (3.91 oz) 61 x 66 x 59 mm (2.4 x 2.6 x 2.3")

Name of Mfr.: Atlas Marine Services Pte Ltd.

Volatile Organic Compounds Detectors

Designed to replace all range of gas tubes, it is a revolutionary handheld PID instrument for rapid, accurate detection of volatile organic compounds (VOCs) with exceptional resistance to humidity and contamination. Fastest response time of just 2 seconds and is as quick to clear down. It is simple and, enables one handed operation. Its rugged design and protective, removable rubber boot withstand the harshest environments. Inexpensive consumables and parts, and 5 years warranty when instrument is registered online.

Unit Per Set

CODE	33 05 99
Model	PhoCheck Tiger
Range	Detect up to 480 VOC
Maximum Reading	20,000 ppm or 20,000 mg/m³ (gas dependent)
Accuracy	±5% display reading ± one digit
Intrinsically Safe Approvals	Tamb = - 15°C ≤Ta ≤+45°C (w/lithium ion battery pack) Tamb = - 15°C ≤Ta ≤+45°C (w/alkaline battery pack) ITS09ATEX26890X IECEx ITS 10.0036X 3193491 conforms to UL Std. 913, 61010-1 & Certified to CAN/CSA Std. C22.2 No. 61010-1

Carbon Monoxide Gas Alarm

A device for detecting the "Silent Killer", Carbon Monoxide, which is released when fuels are burnt inefficiently. Raising loud 85db alarm and flashing RED LED light to alert when detecting the CO in the room. This alarm can be mounted on the ceiling or on a wall near the ceiling. Battery operated, five year lifetime, and chirp sounds and indicator light notify you the end of battery lifetime. This alarm comes with calibrated test gas kit to enable the unit to be inclusively tested on installation and annually over the expected life. Certified to BS EN 50291. Battery included. Hard wire version is also available.

Unit Per Set

CODE	33 10 12
Alarm Sound	85 dB
Alarm Light	LED × 3
Size	112 mm diam × 40 mm thick
Weight	130 grm

Name of Mfr.: Gas Safe Europe Ltd.

CO Alarm Test Gas Kit

A calibrated test gas kit for sensor inclusively testing Carbon Monoxide (CO) alarms manufacturered to BS EN 50291(Europe) and UL 2034(USA). Low cost, safe and easy to use, this test kit ensures CO alarm sensors are still sensing CO. Sensors have a limited and underminable life and can be effected by airborne pollutants such a cigarette smoke, cooking fumes etc. Each kit contains a patented enclosure shroud which holds the test gas at the required level for a fixed time to facilitate a field sensor test. It contains sufficient test gas to carry out 11 tests per can.

33 10 13	CO alarm test kit, 11 tests/can, 400ml	Can

Name of Mfr.: Gas Safe Europe Ltd.

Test Gas for Gas Detector

For testing the accuracy of gas detectors. There are various type of test gases according to the type of gas, manufacturer of the gas detectors.

When ordering, please specify the following points.

How to order : 33 - 05 -

Test gas for gas detector, TYPE of GAS DETECTOR, MFR'S NAME, MODEL NAME, COMPOSITION of GAS, GAS DENSITY

Example of Combustible Gases and Toxic Gases

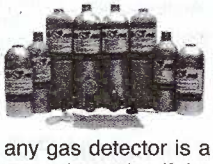
Combustible Gases

Gases		Molecular Formula (Chemical Formula)	Explosion Range (Vol%)
Acetone	アセトン	C_3H_6O	2.1～13.0
Acetylene	アセチレン	C_2H_2	1.5～100
Butyl Acetate	酢酸ブチル	$C_6H_{12}O_2$	1.2～7.5
Butylene	ブチレン	C_4H_8	1.7～9.0
City Gas	都市ガス	-	5～
Ethanol	エタノール	C_2H_5OH	3.3～19
Ethyl Acetate	酢酸エチル	$C_4H_8O_2$	2.0～11.5
Ethylene	エチレン	C_2H_4	2.7～34
Gasoline	ガソリン	-	1.4～7.6
Hydrogen	水素	H_2	4.0～75.6
i-Butane	ｉ－ブタン	C_4H_{10}	1.8～8.0
Kerosene	灯油	-	0.8～
Liquefied Propane Gas	ＬＰＧ	-	2～12
Methane	メタン	CH_4	5.0～15.0
Methanol	メタノール	CH_3OH	5.5～44
Methyl Ethyl Ketone	メチルエチルケトン	$CH_3COC_2H_5$	1.8～11.5
n-Butane	ｎ－ブタン	C_4H_{10}	1.5～7.8
n-Pentane	ｎ－パンタン	C_5H_{12}	1.4～7.8
O-Xylene	Ｏ－キシレン	$C_6H_4(CH_3)_2$	1.0～6.0
Propane	プロパン	C_3H_8	2.1～9.5
Propylene	プロピレン	C_3H_6	2.0～11.7
Toluene	トルエン	$C_6H_5CH_3$	1.2～7.0

Toxic Gases

Gases		Molecular Formula (Chemical Formula)	Explosion Range (Vol%)
Acetaldehyde	アセトアルデヒド	CH_3CHO	4.0～57
Acrylonitrile	アクリロニトリル	CH_2CHCN	2.8～28
Ammonia	アンモニア	NH_3	15～28
Arsine	アルシン	AsH_3	0.8～98
Benzene	ベンゼン	C_6H_6	1.2～8.0
Butadiene	ブタジエン	C_4H_6	2.0～11.5
Carbon Monoxide	一酸化炭素	CO	12.5～74
Chlorine	塩素	Cl_2	-
Diborane	ジボラン	B_2H_6	0.8～88
Ethylene Oxide	酸化エチレン	CH_2CH_2O	3.0～100
Germane	ゲルマン	GeH_4	0.5～50
Hydrogen Chloride	塩化水素	HCl	-
Hydrogen Cyanide	シアン化水素	HCN	5.4～46.6
Hydrogen Sulfide	硫化水素	H_2S	4.8～45.5
Methyl Bromide	臭化メチル	CH_3Br	10.0～15.0
n-Hexane	ｎ－ヘキサン	C_6H_{14}	1.2～7.5
Phosgene	ホスゲン	$COCl_2$	-
Phosphine	ホスフィン	PH_3	1.3～9.8
Silane	シラン	SiH_4	0.8～98
Sulfar Dioxide	二酸化硫黄	SO_2	-
Vinylchloride	塩化ビニル	CH_2CHCl	3.8～29.3

Span Gases



Span Gas for all types of gas detectors and analyzer. To help comply with standards, various types of calibration gas cylinders are available for your usage.

The most important accessory to any gas detector is a calibration kit, which provides the means to determine if the instrument is working properly. When using gas detection equipment, it is necessary to calibrate the equipment on a regular basis to guarantee accurate results. According to some regulations and standards, one must test the gas detector prior to each use with a suitable test gas.

Can Specifications

Regulators and Accessories

Fixed Flow Regulators for 34 ltr, 58 ltr, and 110 ltr

Available for portable detectors with no pump or hand pump, also ideal for fixed head detectors. Flow rate 0.3 litres/minute, 0.5 litres/minute or 1.0 litres/minute.

Unit Per Pc.

CODE	Flow Rate	CODE	Flow Rate
85 15 93	0.3 ltr/min	85 15 95	1.0 ltr/min
94	0.5 ltr/min		

Demand Flow Regulators for 34 ltr, 58 ltr and 110 ltr

Special Designed for gas detectors with built-in electric sample pump. Important gas is supplied at "Sample pump" normal working flow rate, hence ensures testing and calibration are similar to true operation conditions.

85 15 96	Regulator, demand flow, for 34 ltr, 58 ltr and 110 ltr	Pc.

20 ltr Cylinder Regulators

Design for 20 litre can's of gases to provide varying from 0.25 to 1.5 litre/min.

85 15 97	Regulator for 20 ltr cylinder	Pc.

Spray Nozzles for quick testing, bump testing or filling sample bags

For use with 20 ltr cans only.

85 15 98	Spray nozzle for quick testing, bump testing or filling sample bags	Pc.

Gas Sample Bags with Clip Valve

Sample Bags are available too for use with fixed equipment or pumped instrument.

85 15 99	Gas sample bag with clip valve	Pc.

Safety Handlamps, Primary Cell Powered

For use in a wide range of potentially explosive gases, vapours, mists and dusts. The lamp is constructed from an exceptionally robust and highly durable thermoplastic material, well able to withstand the effects of heavy industrial use.

The material itself is anti-static, preventing the build up of potentially dangerous electrostatic charges. The lamp is protected from ingress of dusts and liquids and can therefore be used in the dustiest and wettest conditions possible.

The Wolflite Primary Cell Safety Handlamp H-4DCA meets all relevant provisions of the 2014/34/EU Explosive Atmospheres (ATEX Equipment) Directive.

Rechargeable Safety Handlamps

For use as a general-purpose safety lamp for inspection and work tasks, the rechargeable battery offers a convenient and cost-effective solution for Ex applications where a handlamp is frequently required for long periods.

The hand lamp body and lens ring is moulded in a highly resilient thermoplastic material able to withstand the drop and impact expected from heavy industrial use, even at sub-zero temperatures. Additionally, the material is anti-static, ensuring there is no risk of a dangerous build up of static charges.

The lamp enclosure is sealed to IP66, preventing the ingress of dust and sealing against water in all conditions except submersion.

Battery Chargers
for Safety Handlamp

For use with the H251A LED safety handlamp. The battery is charged internally in this product via charging studs on the base of the handlamp. The hand lamp is simply slotted into the charger and secured in place with the latch plate.

The chargers are designed to hold the handlamps while charging enabling the handlamps to always be ready for use. The charger is for use at mains voltage of 230 volts or 110 volts, selectable by voltage chargeover switch.

State of charge of the battery is indicated on the charger by two coloured light emitting diodes, sequenced to show main and full charge. All chargers may be used free standing or can be bench or wall mounted.

Electric Safety Lamps

An electric safety lamp (Hand Lantern) of an approved type with a minimum burning period of 3 hours. Included for use with an emergency fire fighting outfit. Available in a dry battery type or rechargeable alkaline type as follows. Both models shall be for use in explosive gas atmospheres.

Dry Battery Type

Alkaline Rechargeable Type

Unit Per Pc.

CODE	33 06 11	33 06 16	33 06 17
Type	Dry battery R20P (UM-1) × 6 pc.	Alkaline Rechargeable 15 amp/hr	Charger for rechargeble safety lamp AC 100V or 220V (Please specify voltage when ordering)
Bulb	7.2V 0.55A	2.5V 1.3A	
Weight	1.76 kgs	2.4 kgs	3.6 kgs

Safety Cap Lamps

Hands-free safety light, providing brilliant illumination of the work site, to be used in confined space and where explosive gas is a potential danger, such as on oil tankers, chemical tankers, LNG tankers, etc.

The headlight can be easily attached to the helmet by means of bracket and headpiece clip. Lead acid power rechargeable battery is provided with belt loops.

Specifications

Headpiece & Cable	
Nom. Voltage of Bulb	4 volt
Burning Time	13 hours
Initial Light Output	36 lumens
Main Bulb Rating	1.0 amp 48 lumens
Auxiliary Bulb Rating	0.46 amp
Weight of Headpiece	160 grm
Length of Exposed Cable	1.25 mtr
Weight of Cable	165 grm
Battery	
Nom. Voltage	4 volt
Capacity of Battery	13 Ah (52 Wh) at 1 amp to 3.7 volt
Number of Cells	2
Size L × W × H	152 × 57 × 215 mm
Weight	1.95 kgs

Safety LED Headtorches

The ATEX LED headtorch is an ultra small, lightweight headtorch weighing only 90 grm including batteries. Fitted with an adjustable removable fabric head band allowing the headtorch to be comfortably worn directly on the head for extended periods. It is ATEX approved to safe use in Zones 1 & 2 hazardous areas and is ideal for applications where hands free lighting is essential.

Rechargeable Safety Handlamps

The tough, durable casing protects the advanced electronics given a product that will perform in the most demanding environments. A dual power switch allows you to obtain the ideal combination of beam power and usage time (from 8 up to 24 hours). On the emergency lamp model an emergency lighting function switches the lamp on when a power failure occurs. For this the lamp should be inserted into charging holder.

High Powered LED Rechargeable Safety Handlamps

A first handlamp that uses high power LED (Light Emitting Diode) technology for explosive environments. Instead of an ordinary bulb, the lamp uses a high power LED with a service life of capacity 50,000 hours. The lamp is equipped with an environmentally friendly NiMH battery whose continuous operating time is more than seven hours. The shock resistant cover is manufactured completely of antistatic plastic and aluminium and its enclosure class is IP 65. On the emergency lamp model an emergency lighting function switches the lamp on when a power failure occurs. The lamp must be stored and charged in an exclusive charging holder. Fully compliant with the Cenelec requirements for standards EN60079-0, EN60079-11 and EN60079-28 as well as with ATEX classification II 2G Ex op is IIC T4 Gb & II 2D Ex op is IIIC T135°C Db.

Tank Lighting Kits

Tank Lighting kit provides a low voltage temporary lighting solution for Zone 1 Hazardous Areas where potentially explosive gases, vapours and dusts may be present in a confined space. The kits allow for a flexible set up of high quality task and ambient lighting to suit all working conditions in tanks and vessels and offers operators a high level of safety using various configurations of the LED Floodlites (WF-300®XL), LinkEx™ LED Temporary Luminaires (LX-400 series) and ATEX Transformers.

LED Floodlites WF-300®XL

The Linkex™ WF-300®XL LED Floodlite is a high performance, robust, lightweight and portable Floodlite for use in potentially explosive atmospheres. It delivers an outstanding level of white light and is fully compliant with the latest ATEX and IECEx standards, including OPIS - Optical Intrinsic Safety. Fitted with Wolf's unique SOVI system to ensure safe operation, the Floodlite is certified for safe use in Zone 1, T4, IIc, -40°C to +55°C ambient, hazardous gas, vapour, mist or dust environments.

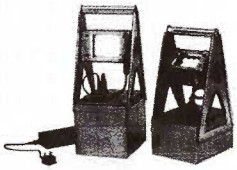
Rechargeable LED Floodlights



A rechargeable high output LED floodlight, designed for use in harsh and potentially explosive atmosphere applications, it offers unique levels of light output, operational duration and robustness in a self contained battery powered lamp. The Worklite is ideal for use in remote applications for extended periods. All models deliver a piercing 30° beam, combined with a flood of lower level fringe light. The light has a 12 LED lamp head, giving over 1,000 lumens output.

LED Portable Daylight Signaling Lamps

Installation required by SOLAS regulations Chapter V which reads as follows: "All ships of over 150 tons gross tonnage, when engaged on international voyages, shall have on board an efficient daylight signaling lamp which shall not be solely dependent upon the ship's main source of electrical power."

< Features >

* Long life and needless lamp exchange.
* 2 hours or more continuous operations with incorporated rechargeable battery in main body.
* All weather condition due to strict waterproof body.
* Durable corrosion-proof Synthetic body.
* Shutterless, Realized 86% lighter than existence model.

Name of Mfr.: Alligator

Uncoated Single Jacket Fire Hose SF-121
Outer Colour : White

Features:
Very lightweight and highly flexible (even at low temperature)
Small coil diameter
Excellent resistance to weathering and ozone
Very good resistance to sea water and a wide range of chemicals
Mildew and rotproof

Applications:
Industrial and municipal fire brigades
Marine fire fighting

Service Temperature: -10°C up to + 60°C based on water.
Working Pressure: 15 bar

Unit Per C/L

Coated Single Jacket Fire Hose SF-123
Outer Colour : Red

Features:
Very lightweight and highly flexible (even at low temperature)
Excellent resistance to heat, weathering and ozone
Very good resistance to sea water and a wide range of chemicals
Hardwearing for long service life
Mildew and rotproof

Applications:
Industrial and municipal fire brigades
Marine fire fighting

Service Temperature: -10°C up to + 60°C based on water.
Working Pressure: 15 bar

Unit Per C/L

Fire Hose

Inner/outer Synthetic Rubber Lined

High durable fire hose with synthetic rubber reinforcement on inner and outer surface of the hose. It has excellent resistance to weather, abrasion, oil, chemical and especially to ozone attack.
Easy to clean hose surface, and easy to handle because of difficulty to kink. Nominal working pressure is 16 kgf/cm². Supplied standard length in 20 mtr. Please specify type of hose coupling if necessary to be attached.

Unit Per C/L

CODE	Nominal Size	Weight grm/mtr	Length Per Coil
33 07 31	40	335	20 mtr
32	50	430	
33	65	570	

Fire Hoses with Prefitted Coupling

Internationally approved fire hoses with prefitted fire hose coupling, covering a vast range of patterns and sizes to suit customer's requirements from around the world. Please specify necessary class certification of fire hose when ordering.

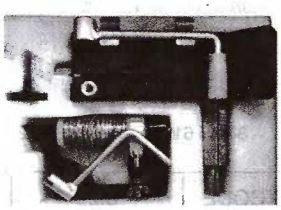
Fire Hose Boxes

Versatile box to store fire hoses of up to 20 mtrs in length with nozzles and spanner.

The box and cover are made of polycarbonate for weather and sea water resistance.

33 07 51	Fire hose box, polycarbonate, capacity 20 mtrs	Pc.

Portable Fire Hose Binding Machines



Suitable for binding firefighting hose on hose coupling shanks using copper wire, G.I. wire or stainless steel wire. Applicable fire hoses between 25mm to 110mm to new hose couplings. Generally, 1.6mm (16 SWG) galvanised wire is accepted as the binding wire.

33 07 52	Binding machine, fire hose, portable, For hose size 25 mm to 110 mm	Set

Spanners for Hydrant

Designed for tightening or loosening of fire hose couplings. Please select suitable spanner to your hose coupling type and size.

for Nakajima

for ANSI - Pin Lug

for ANSI - Slotter

Fog Nozzles 3-position for Fire Hose Nozzle

3-position nozzles produces shut-off/spray/jet flow spray modes.

Nozzle comes with couplings suitable to connect with the hose couplings of the ship. Made of brass.

Made of Brass

International Shore Connections

Required by SOLAS regulations Chapter II Regulation 19. "Ships of 500 tons or more shall be provided with at least one international shore connection."

The connection is fitted with a coupling to match the hose couplings on the ship.

Please specify the required type of ship's coupling: Nakajima, ANSI Pin, etc. when ordering. Connections come with bolts, nuts, washers and gaskets.

Basic Dimensions

Outside Diam.	: 178 mm	Inside diam.	: 64 mm
P. C. D.	: 132 mm	Flange Thick	: 14.5 mm
Slots in Flange	: 19 mm diam x 4 holes		
Bolts and Nuts	: 16 mm diam x 50 mm length x 4 pcs.		

33 08 41	International shore connection fitted with couplings to match hose coupling on ship	Pc.

Keeping Box for International Shore Connection

Made of polyester reinforced with glass fibre. The outside is smooth finished.

33 08 40	Keeping box for international shore connection, polyester, red coloured, 290 x 290 x 170 mm	Pc.

Name of Mfr.: Alligator

Fire Hose Couplings

A wide variety of types are available as per the illustration below. Made of Brass or Aluminium are available, and used for shipboard fire fighting.

Water Mist Lance and Mobile Water Monitor

The SOLAS (SOLAS II-2/10 7.3) amendments requires the following additional firefighting systems for ships designed to carry container on or above the weather deck, and keel laid on or after 1 January 2016.

(i) Water mist lance (at least one should be installed on board), which is a device to penetrate a container wall and produce water mist inside containers.

(ii) Mobile water monitor (only for a ship designed to carry five or more tiers of containers on or above the weather deck), which is a portable device to spray water to the top tier of containers on deck. Ships with breadth less than 30m: at least two mobile water monitors to be installed, ships with breadth of 30m or more: at least four mobile water monitors to be installed.

Water Mist Lance

It complies fully with the IMO's Maritime Safety Committee's 93rd session and SOLAS regulation II-2/10.7.3. Mist Lance consists of a tube with a piercing nozzle which is capable of penetrating a container wall and producing a water mist inside the container when connected to the fire main.

Unit Per Set.

CODE	33 08 12
Max. Working Pressure	20 bar
Water Consumption	72 ltr/min at 4 bar (K-Facter : 34.6)
Throwing Distance	Approx. 10 mtr
Inlet Connection	1" BSP female thread
Dimension L x W x D	530 x 150 x 28 mm
Weight	Approx. 2 kgs (w/o Hydraulic coupling)

Special Hammer for Water Mist Lance

A heavy hammer for making an opening for extinguishing lances in doors, steel tanks, roller shutters, roofing tiles etc. Made from galvanized steel, solid welded-on impact tip and non-slip handle. Dimension: 480mm x W165mm. Weight: 2.8 kgs.

33 08 13	Hammer galvanized for making an opening for water mist lance	Pc.

Mobile Water Monitor

In addition to SOLAS amendment, MSC.1/Circ.1472 was also approved to set design and performance standards of a mobile water monitor. It is water discharge device of portable type, consisting of inlet fitting, monitor water way, swivel fitting, discharge nozzle and a shut-off device.

Highly maneuverable, operating like hand line nozzles while delivering much more wear. Simple to set up for quick attack operations, and can be left unmanned at the fire scene to conserve manpower. Horizontal range of 0 degree from 250 degree, and vertical swivel range of 0 degree from 90 degree. Ground spikes at the base is resistant to long-term wear and provide excellent ground stability.

Flow Rate and Discharge Length ± 5% tolerance

Monitor Inlet Pressure	Flow Setting	Flow Rate	Straight Stream Reach	
			Effective	Overall
Bar	Nozzle Tip	LPM	Meters	Meters

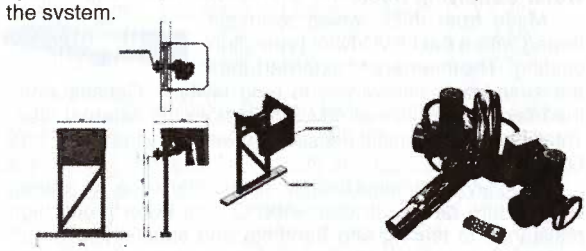
Unit Per Set

CODE	33 08 14
Model	WM-80M
Material	Body : Stainless steel 316 Jet spray nozzle: Bronze
Working Pressure	Max. 16 bar
Flow Rate	Over 1,300 ltr/min @4 bar
Discharge Length	Over 40 mtr @4 bar
Connection	2" PT female threads
Overall Dimension	Approx. 760 x 420 mm
Weight	Approx. 22 kgs w/o coupling
Note :	Hydrant coupling for option
Certificate	KR & MED approval

Anti-Piracy Water Jet Cannons

A water jet cannon is based on the use of high quality oscillating water cannons, which are installed on several points on the ship and prevent any boarding attempt when activated. The system is sent to the ship as a modular package that is installed by the crew without any required external help. Training will be given to operate the system and a user manual will enable smooth operation of the system.



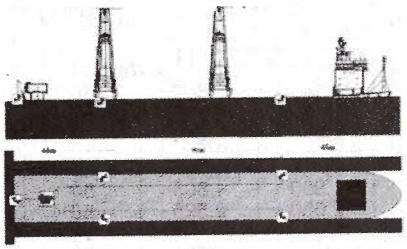
The installation of the system is divided into 2 main categories.

A – Engine room related installation

- Ensure existing pump has enough capacity.
- Else, in case the capacity is not available, connect engine room pumps to on deck diesel powered booster pump.
- Connection of hoses from pump (via engine room or deck).

B – Deck related installation

- Install water cannons on deck or railing, using supplied connection kit.
- Run 6" feeder hoses from main pump outlet / manifold.
- Run 4" hoses from feeder to water cannon.



System Components

- Storage container
- High quality oscillating water cannons, (a modified type of the systems used by fire fighting departments).
- Special fittings to temporarily attach the cannons to deck or railing.
- Hoses, supplying water from pump to water cannons.
- Ballistic shields to protect water cannons from direct small caliber fire arms.

Typical Installation Pattern per Ship's Overall Length

Overall Length	No. of Cannon	Water Supply	
		ltr/min.	m3/hr
200 mtr	5 cannons	10,000	600
280 mtr	7 cannons	14,000	840
360 mtr	9 cannons	18,000	1,080

Performance of Water Jet Cannon

- Ultra compact
- Weight : just 11.4 kgs
- Totally adjustable
- Capacity 2,000 ltr/min at 5.5 bar
- Range 50 – 55 meters
- High quality aluminum
- Includes manometer
- Left right radius between -180 degrees to +180 degrees
- Up down radius between -45 degrees to +90 degrees
- 12/24V electro motor
- Remote control option with joystick
- 10 year warranty

Water Supplying Hose

Made from thick woven synthetic thread with a bacl PVC/Nitril protection coating. The internal and external tubes are seamlessly interwoven to long levity. Consequently the internal tube cannot disconnect from the external tube. Totally oil and chemical resistant as well as extreme UV and Ozon protected.

Long levity, remains flexible, no maintenance, no rotting, temperature range -35°C to +100°C, sea water proof, high resistance to tearing and bending, and special textile cuff protect connector areas,

Couplings & Connectors

High quality aluminum connectors with fast connect and release system, as used by fire fighting department worldwide.

How to order: 31 - 41 - 21

Water jet cannon system,With further details

Fireman's Outfits

Required according to SOLAS regulations Chapter II Regulation 17. "All ships shall carry at least two fireman's outfits complying with the requirements."

In addition, two fireman's outfits shall be provided for tankers. One set contains Protective clothing, Boots, Gloves, Helmets, Electric safety lamp and Axe. However, Electrical safety lamp and Axe are not included in the unit.

Fire Blankets

Flameproof blanket can envelop a worker from head to foot to extinguish burning clothes.

Should be located in any fire-hazard area to provide instant protection when clothing catches fire.

Unit Per Set

CODE	Material	Size	Case
33 09 50	Fibreglass with silicone rubber coating	1.8 x 1.2 mtr	PVC

Water-Jel Fire Blankets and Sterile Burn Dressings

When placed on a victim, this unique fire blanket helps stop burn progression, relieve the pain, cool the skin, and protect against airborne contamination all in one easy step.

The gel-soaked blankets can also be used to extinguish flames on a victim, protect a rescuer from heat and flames, and extinguish small fires.

Fire Blankets

Unit Per Pc.

Asbestos Safety Kit

The asbestos safety kit is used by vessel's crew to remove asbestos materials during operation/at sea. The kit is accompanied by an instruction how to use the PPE, the equipment including vacuum cleaner. The kit is usually part of an Asbestos Management Plan. In this Plan the locations of asbestos are indicated and preventive measures to avoid exposure to the asbestos fibres. The kit is not to be used for large scale asbestos removal works e.g. during docking.

Each item in the kit is according to EU quality standard for asbestos removal, and approved by a certified company (such as Kiwa Oesterbaai) for Inventory of Hazardous Materials (DNV GL, Rina, Bureau Veritas, Lloyd's Register).

Asbestos Safety Kit contains:

- HEPA vacuum cleaner with vacuum cleaner bags
- PPE
- Asbestos waste bags
- Asbestos warning stickers
- Duct tape
- Glue spray
- Spray bottle with impregnating fluid
- Full instruction
- Certified

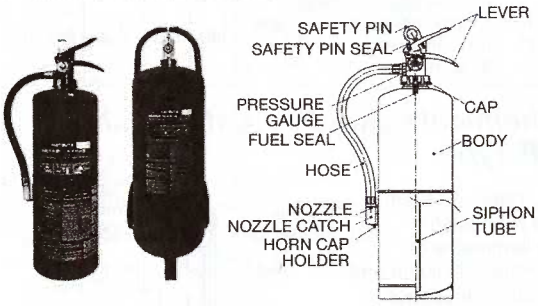
Dry Chemical Fire Extinguishers
Pressurized, ABC Type



The universal designed Fire Extinguisher, with only 1/3 of power to squeeze the lever compared to a regular extinguisher. Since this cylinder is already pressurized, there are no worries about bursting at the time of operation (burstless). Maintenance check is quite simple to check the pressure gauge pointer is in green zone. Also it is in compliance with PRTRs(Pollutant release and transfer register).

Unit Per Pc.

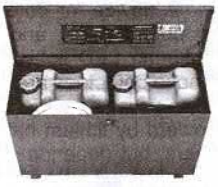
Portable Foam Applicators

Installation required by SOLAS 1983 Chapter II, Regulation 6. It shall consist of an air-foam nozzle of an inductor type capable of being connected to the fire main by a fire hose. It is a portable tank containing at least 20 ltr of foam-making liquid and 1 spare tank.



Specifictions

Foam Ejecting Capacity	:	Not less than 1.5 m^3/min.
Foam Expansion Ration	:	Not less than 6 times
Water Solved Foam Electing Capacity	:	Not less than 250 ltr/min.
Foam Liquid Applied	:	3% regular
Foam Liquid quantity	:	20 ltr x 2 containers

33 10 76	Portable foam applicator unit complete (Please specify type of hose coupling, using on board)	Set

ABC Fire Extinguishers
of Self-activating Chemical

The fire extinguisher works similarly to a sprinkler and is suitable for installation on the wall, near the ceiling, in the engine room, store room or empty cabin where people cannot identify the outbreak of fire. The fire extinguisher is fitted with a sensor capable of identifying atmospheric temperature over 95°C. ABC chemical powder is automatically radiated to extinguish a fire at the early stages.

Specifications

Applicable Class of Fire	ABC
Applicable Room Volume	8 m^3
Powder Contents	1.5 kgs
Sensor Reaction	Over 95°C
Time of Radiation	Approx. 6 sec.
Size W x D x H	102 x 107 x 475 mm
Weight	4.1 kgs

33 10 79	ABC fire extinguisher, self-activating type with bracket	Set

Foam Concentrates

For inflammable liquid fires it is essential to choose the foam concentrates suitable for the specific fire. The following foam concentrates are available for various fires.

No.	Name of Foam Concentrates
1	Fluoroprotein Foam
2	A.F.F.F. (Aqueous Film Forming Foam)
3	Protein Foam
4	Alcohol Resistant Fluoroprotein Foam
5	Alcohol Resistant A.F.F.F.
6	Synthetic Foam

Suggested Foam Application Methods for Various Hydrocarbon Fires

Precautions in Storage

(1) Exposure to direct sun light should be avoided.
(2) The frequency of contact with air must be reduced as much as possible.
(3) Blending with different types of concentrates or liquids or contamination of a new product by an old one should be avoided to ensure the safety and effectiveness of the foam concentrates.

Synthetic Foam Concentrate for High Expansion Foam System

High expansion foam system is specially used for engine room and pump room. The types of foam concentrate are designated by each F.F.S manufacturer's specification in related to Class approval and cannot use the general synthetic foam concentrate. Please specify the manufacturer, type of F.F.S. model and type of Class approval when ordering.

Heat Detector Testers

Designed to provide quick and reliable testing of heat detector with a maximum of safety regardless of the number of units to be tested.

33 10 71	Heat detector tester	Set

Heat Detector Testers for explosion-proof area

Used for carrying out the operation test of the heat detector by utilizing chemical reaction of quicklime and water to generate the high temperature vapor. The tester can also be used at explosion-proof area, because it does not use fire during the operation test. After the vapor generation is finished, wait about 10 minutes before removing the heat generating material from the container because the heat generating material is hot.

In case of using the tester in the explosion-proof area, the applicable gases are limited to Grade IIB, T4 or less according to Gas Classification (Ministry of Labour, Research institute of Industrial Safety Japan) and those having the ignition temperature of 425°C or over. The tester is the approved product of Fire Protection Equipment & Safety Center of Japan, and it is required to be calibrated every 10 years. (The calibration label should be checked.) Support rods are sold separately.

Unit Per Pc.

Smoke Detectors

A device for detecting smoke emerged by potential fire, and raising an alarm and flickering LED light to alert. Normally the smoke detectoes are mounted on the ceiling or on a wall near the ceiling. The detector is powerd by lithium battery and which life lasts for about 10 years, but depends on environmental condition where it is mounted. A little blip and indicator light notify you the end of battery lifetime.

Unit Per Pc.

CODE	**33 10 72**
Alarm Sound	More than 70 dB
Alarm Light	LED Red
Size	100 mm diam. x 44 mm thick
Weight	160 grm

Name of Mfr. : Nippon Dry-Chemical Co.,Ltd.

Intrinsically Safe Smoke Detectors

Intrinsically safe optoelectric smoke detectors for detecting smoke emerged by potential fire, especially in hazardous area. This will be mounted on the ceiling and once it detects the smoke, it will flicker the warning indicator light.

Unit Per Pc.

CODE	**33 11 00**
Rated Voltage/Current	DC16V / 100mA
Alarm Light	LED Red
Approved Class	Ex ib B T5
Weight	240 grm

Smoke Detector Testers

For testing ionization and photoelectric detector at sight for smoke detection fire alarm system on the ceiling. Test gas is separate order.

33 10 73	Smoke detector tester	Set
74	Spare test gas for smoke detector tester, 350 grm/tin	Tin

Smoke Detector Test Spray

For secure testing of optical or photoelectrical smoke detectors without the need of additional testing instruments. Safe and easy to use, gentle on electronic instruments, evaporation without residues, can content lasts for up to 150 applications, and free of silicone.

Shake can before use and spray test spray for about 5 seconds and with a distance of approx. 30 cm towards the smoke detector. The functioning of the smoke detector has to be tested on a regular basis, and recommended testing period is two inspections per year.

Unit Per Can

Name of Mfr.: Weicon GmbH & Co. KG

Smoke & Heat Detector Tester (combined / dual unit)

A combined smoke & heat detector tester in one tool, suitable for testing;

(a) Optical and ionization smoke detectors, and (b) Heat detectors (fixed temperature or rate-of-rise).

The detector can be either conventional or analogue addressable. Also, this enables testing of multi-detectors or multi-criteria detectors from a single test unit.

Test Mode

Normal Heat	To test rate-of-rise and fixed temperature heat detectors up to 90°C.
Hi Heat	To test rate-of-rise and fixed temperature heat detectors up to 100°C.
Smoke	A simulated smoke generated internally using a miniature heat exchanger and a harmless liquid from the smoke capsule.
Clearing	Clean air is blown to remove previously applied smoke.

Also, execute programmed testing, such as simultaneously, sequentially, combined simultaneous and sequentially.

Safety Features:
- Battery over-current cut-out.
- Default 2 minutes maximum test duration timeout.
- Auto power off after 5 minutes of non-use.

Operating Features:
- Colour coded LED user feedback.
- Automatic infrared sensing of the detector.
- Adjustable multi-position head.

Unit Per Pc.

CODE	33 10 80
Model	NITTAN-Testifire 1001
Heat Detector Testing	4 – 6A rms
Smoke Detector Testing	< 0.5A rms
IP (Ingress Protection) Rating	IP20 (Rated according to IEC 60529)
Battery Baton	Nominal 7.2V 2.2Ah NiMH rechargeable battery pack
Battery Charger	Using 100 – 230VAC or 12 VDC input
Weight	.099 kgs
Accessories	2 Batteries, 1 charger, 1 capsule for smoke detector testing

Name of Supplier(Contact): Consilium Nittan Marine Ltd, Tokyo

Cartridge Type Capsules for Smoke & Heat Detector Tester (combined / dual unit)

33 10 97	Capsule, cartridge type for smoke & heat detector	Pc.

Accessories for Smoke & Heat Detector (combined / dual unit)

Flame Detectors Infrared type

A sensor designed to detect the presence of a flame or fire. Flame will be detected by Infrared type sensor, and unit will be mounted on the ceiling in the room. Once it detects a flame, it will flicker the warning indicator light.

Unit Per Pc.

CODE	33 11 03
Rated Voltage/Current	DC30V / 100mA
Alarm Light	LED Red
Detecting Class	Class 1 (EN54)
Weight	210 grm

Spot Fire Detectors
Fixed Temperature Type

Spot Heat Detectors are mounted on exposed ceiling surfaces or on a sidewall near the ceiling. When two metals with different coefficients of thermal expansion are bonded together and then heated, differential expansion causes bending or flexing toward the metal having the lower expansion rate. This action closes a normally open circuit. The mechanism of this fixed temperature type fire detector triggers the fire alarm, when the temperature rises at a rate exceeding a predetermined value.

Unit Per Pc.

CODE	33 10 00
Nominal Operating Temperature	65°C
Rated Voltage/Current	DC 30 V/100 mA
Ex Class	ExibIIB (When barrier relay is connected)
Weight	65 grm

Testing Device
for Infrared Spot Type Flame Detector

An operation-testing device for infrared spot type flame detector. The testing device is capable of providing 2 ranges of emission of spectrums that are required to operate infrared flame detector: the spectrum similar to CO2 spikes immersion region by using an infrared filters over a source and the flickering similar to a flame by using a flashing lamp.

Available two type of testing methods depends upon the testing site environments. (a) Using the Test Initiation Switch (Normally use in this method), or (b) Using the Manual Test Switch (use this method if the (a) is not possible).

This testing device is mandated to calibrate at every 10 years.

The testing rod (Total length: 3,990 mm) is sold separately.

Unit Per Pc.

Light Source	Bulb 4.8V 0.5A
Battery	AA x 4 (Matsushita LR6 (G) or equivalent)
Dimension/ Weight	110 (W) x 148 (H) x 153 (D), Weight: Approx. 600 grm
Accessories	Carry bag, Battery (4 pcs), Spare lamp (1 pc Placed inside), Cotton swab (4 pcs), Manual

Marine Fire Stop Systems

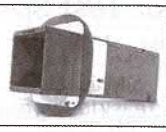
Marine firestop products are always designed specifically fast, safe, and simple to install. Additionally, the products are easy to retrofit for existing penetrations. Sealants are resilient, tough and vibration resistant while fire-rated cable pathways facilitate cable changes without compromising the integrity of the sealed opening, providing continuous savings over the lifetime of the structure or vessel.

The marine firestopping products are fully tested to applicable standards to maintain the integrity of the decks and bulkheads they are rated to such as A0, A15, A30, A60, B0, B15, and B30, as well as hydrocarbon testing for H-Class divisions.

MDM: Marine Fire Rated Cable Pathways

For conditions where cable changes will be frequent and water pressure tightness is not a requirement, the EZ-Path® Marine Cable Pathway is the fastest and most reliable solution. The steel raceway contains a self-sealing system comprised of compressible foam pads installed to form an arch. As the cables pass through the device, the pads retract and allow them to pass while gently squeezing the bundle to provide a functional smoke and air seal. Device modules can be installed individually, or ganged to increase cable capacity. Accessory plates allow for easy mounting to bulkheads or decks.

MDM300A



MDM400A

MDM400B

MDM400C

MDM400D

MDM400G

Features & Benefits:
- Provides sealing function to restrict the passage of fire, smoke, hot gases and conditioned air.
- Easily installable and retrofittable around existing cables with split plate kits.
- No specialty tools required to install.
- Smooth edges protect cable jacketing during install.
- Easily installed into a roughly cut openings, no welded or specialized sleeves required.
- Vibration resistant.

Applications:
- Accessories adapt the pathways to ganged configurations, thicker walls, retrofit with previously installed cables.
- No putty or sealant required.

Unit Per Pc.

MFS: Marine Firestop Sealant

An advanced hybrid polymer sealant designed for use in H60, A0-A60 and B0-B30 Class divisions in marine and offshore construction around both cable and pipe

penetrations. Marine firestop sealant cures in the presence of atmospheric moisture to form a durable elastomeric seal. This excels in applications where a high-degree of water resistance is required, and complies with International Maritime Organization (IMO) standards.

Features & Benefits:
- Non-corrosive, non-conductive.
- Fast curing, ozone and UV resistant.
- Excellent chemical resistance protects in polluted or corrosive environments.
- Provides superior sealing function to prevent the passage of fire, smoke, hot gases, sound, conditioned air, and water.
- No specialty conduit frames, bolts, nuts, tools, or precision fitting required to install.
- No need to plan or engineer out multiple cable or pipe penetrations.
- No need to layout cables and install individual parts around each cable.

Applications:
- Can be used to form flexible, vibration-resistant seals around pipes and cables in bulkheads and decks.
- Can be used for interior or exterior applications and bonds well to a variety of materials commonly used in marine and offshore construction.
- Can be used in watertight decks and bulkheads.

Unit Per Pc.

CODE	Model No.	Description	Weight
33 14 32	MFS100	Marine firestop sealant, 9.5 oz. tube (281 ml, 17.1 cu.in.)	0.5 kgs (1.18 lbs)

Name of Mfr.: Specified Technologies Inc.

MPU: Marine Firestop Putty

Designed to seal small to medium size openings in H60, A0-A60 and B0-B30 Class divisions in marine and offshore construction for pipes and cables. Marine Firestop Putty is a non-hardening, moldable compound that can be hand-packed into openings for permanent or temporary sealing. Complies with International Maritime Organization (IMO) standards.

Features & Benefits:
- Non curing properties to allow for removal and re-installation, for cable removal or addition.
- Provides superior sealing function to prevent the passage of fire, smoke, hot gases, sound, conditioned air, and water.
- Easily repairable, retrofittable, and installable.
- No specialty tools required to install.

Applications:
- Can be used to form flexible, vibration-resistant seals around pipes and cables in bulkheads and decks.

Unit Per Pc.

Name of Mfr.: Specified Technologies Inc.

MRF: Marine Firestop Foam

A two-component RTV silicone foam that features excellent crack-and-void filling capabilities. Marine Firestop Foam exhibits uniform cell structure, assuring reproducible, smoke-tight, fire resistant installations. The elastic properties of the foam readily accommodate minor vibration of the pipe, conduit, etc. without loss of system integrity. Used in a 1:1 mix ratio, Marine Firestop Foam, when properly mixed, expands 2 to 4 times its original volume, filling available spaces and forming an effective barrier against fire, smoke and water penetration.

Features & Benefits:
- High resilience allows movement due to expansion, contraction, or vibration.
- Excellent water resistance for water-tight sealing.
- Uniform cell structure ensures reproducible results every time. No charts to check.
- Excellent adhesion to most building substrates.
- Excellent smoke seal.

Applications:
- Designed as a seal for both deck and bulkhead penetrations against the passage of fire, smoke or other hot gases.
- Applied in liquid form (with proper damming) and then foams in place, readily sealing around penetrating items such as conduits, cables, duct work or mechanical piping.
- Useful in sealing areas such as control rooms against infiltration of airborne contaminants such as coal dust, dirt, etc.
- Ideal product for use as a thermal or acoustical insulation, or for vibration dampening.

Unit Per Pc.

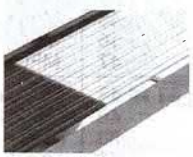
Name of Mfr.: Specified Technologies Inc.

MCC: Marine Cable Coating



A latex-based coating designed to protect grouped electrical cables against the propagation of fire. This material will limit flame spread along cables and cable trays. Marine Cable Coating will adhere well to virtually all cable jacketing materials. Application of material is achieved using airless spray equipment or by brush.

Features & Benefits:
- Water-based - easy installation, cleanup and disposal.
- Endothermic fillers - absorb heat and release water.
- High solids formula - no shrinkage!
- Sandable and paintable (when dry).
- Safe - low VOCs (Volatile Organic Compound), no solvents, non-halogenated.
- Excellent smoke seal.

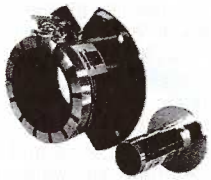
Applications:
- Offers protection of grouped electrical, data, or communications cables in cable tray or racked cable applications.

Unit Per Pc.

CODE	Model No.	Descriptions	Weight
33 14 37	MCC105	Marine cable coating, 19 ltr (1,155 cu.in.)	24.9 kgs (55 lbs)

Name of Mfr.: Specified Technologies Inc.

MFC: Marine Firestop Collars



Designed for use in A0-A60, B0-B30, and H0-H120 Class divisions to protect plastic pipes in marine and offshore construction. The heavy gauge stainless steel shell is lined with a molded, intumescent insert and provided with a marine grade, mild steel flange for attachment to the bulkhead or deck.

Features & Benefits:

- Heavy gauge, chromium rich 316 stainless steel construction.
- Resistant to aging and weathering, no soluble or hygroscopic ingredients.
- High volume of char.
- Provides sealing function to restrict the passage of fire, smoke, and hot gases.
- Easily installable and retrofittable around existing non-metallic pipes.
- Maintenance free.
- Tested and approved for use with USCG Approved SeaCor® and SeaDrain Plus® piping as well as other non-metallic and metallic pipes. (SeaCor® and SeaDrain Plus® are registered trademarks of Georg Fischer)
- Will not damage outside of pipe.

Applications:

- Sized to fit common pipe sizes.
- Applications were tested for common pipes including PVC, PVDF, CPVC, Pb, PE, PE-AL-PE, ABS, GRE, uPVC, Cu and Steel.

Unit Per Pc.

MFC-W: Watertight Marine Firestop Collars

Water-tight, factory-manufactured, intumescent device for use as a penetration seal in fire-rated bulkheads and decks.

Features & Benefits:

- Tested to IMO A.754 FTP (Class A0-A60, B0-B30, and H0-H120 Bulkheads and Decks).
- Provides water-tightness up to 4 bar and gas-tightness up to 1 bar.
- Rapid intumescent expansion under fire conditions quickly seals off the path for fire, gases, and smoke.
- Stainless steel body with mild steel flange for weld-attachment.
- Solid design requires pipe to be inserted through the water-tight bushing.
- Flexible intumescent liner accommodates vibration and will not damage pipe.

Applications:

- Applications were tested for common plastic pipes, including PVC, PVDF, CPVC, Pb, PE, PE-AL-PE, ABS and GRE, through pressure rated bulkheads and decks.

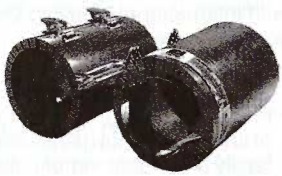
MFC-T: Transitional Marine Firestop Collars



Designed for use in A0-A60 and B0-B30 Class divisions to protect transitions between steel and plastic pipes in marine and offshore construction. The heavy gauge stainless steel shell is lined with a molded, intumescent insert and provided with a marine grade, mild steel flange for attachment to steel pipes.

Features & Benefits:

- Heavy gauge, chromium rich 316 stainless steel construction.
- Resistant to aging and weathering, no soluble or hygroscopic ingredients.
- High volume of char.
- Provides sealing function to restrict the passage of fire, smoke, and hot gases at transitions from plastic pipes to steel pipes or scuppers.
- Easily installable and retrofittable around existing pipes.
- Will not damage outside of pipe.
- No sealant or welding required.

Applications:

- Offers protection of connections between steel pipes or scuppers to plastic pipes in non-pressurized systems.
- Applications were tested for common plastic and steel pipes or scuppers.
- Easily retrofittable around existing, mated pipes.

- No pre-planning or staging necessary with split closure design.

Unit Per Pc.

Dust Protecting Masks

Designed to prevent the inhalation of dust. Two types of filtering systems are available: a Mechanical Type which filters fumes and dust through a filter cartridge, and an Electrostatic Type which collects fumes and dust over the filter by static electricity.

It must be noted that these masks are not effective for poisonous gases or vapours. Also to avoid risk, it must never be used in circumstances where the Oxygen (O_2) concentration is lower than 18 %.

Respirators Advantage 200 LS

The Advantage 200 LS Respirator provides a better looking, lighter, and softer face piece, which is made from a translucent "Ocean Blue" formulation of thermoplastic rubber:

The MSA patented MultiFlex® System – a soft, pliable combination of rubber and plastic that provides a virtually customized fit. In addition, the highly effective AnthroCurve™ Sealing Surface instantly conforms to each wearer, equalizing pressure on the face seal area and eliminating annoying pressure points. The unmatched fit exceeds all previous levels of comfort.

This half mask type respirator features a twin filter cartridge with large area and capacity to provide for low breathing resistance and long life.

Not for use in atmospheres containing less than 19.5% oxygen.

Fullface Respirators Advantage 3200

New generation of lightweight air-purifying full face respirator offers a comfortable fit. The face piece lens has

been engineered to be optically correct, giving you superior visibility and peripheral vision. The wraparound scratch-resistant polycarbonate face piece lens provides a wide distortion-free field of vision.

The lens meets all requirements of ANSI Z87.1 including the high-impact performance requirements.

Requires only routine filter replacement and approved according EN136 class 2. As well approved by NIOSH (The National Institute for Occupational Safety and Health) according 42 CFR, part 84.

Full Facemask Respirators

A fullface respirator which is light and comfortable to wear, even for long periods of time without becoming tired or stressed. A wide sealing edge provides a snug fit to the face and adjusts easily for wearer comfort. Can be worn with a helmet and hearing protectors.

The facemask has a wide field of vision with inhalation air directed across the inside of the visor to prevent misting. One can talk clearly with the respirator on because of a protected speech diaphragm. The exhalation valve is of a secure construction and keeps the carbon dioxide level inside the mask at a minimum.

The facemask materials are resistant to a wide range of chemicals. Applicable filters are a separate order.

Power Assisted Respirators

Full face respirators which are comfortable to wear, light in weight, easy to decontaminate and maintain and compact with no impending hoses. 1.5 kgs total weight including the fitted battery power pack and the only connection is an extending coil cord from the battery to the integral fan/motor unit in the mask.

Low profile facemask gives the wearer a panoramic field of vision through an optically corrected high-impact and chemically resistant visor. Air flow is directed over the inside of the visor to prevent misting and provide a cooling effect to the face making the respirator more comfortable to wear for long periods.

The assistance of the fan provides low resistance gives benefits to protection. The negative pressure induced inside of the facemask is much lower than in other respirators.

Specifictions

Facemask	Silicone elastomer with panoramic visor complete with optical and impact requirement of BS 2092 Grade 1
Blower	Airflow : 120 ltr/min. (Minimum rate) Motor Life : 1,000 hours
Battery	Life : 500 recharge cycle Duration : 10 hours minimum. Charging : approx. 14 hours required.
Component	Complete with facemask, fan/motor unit, battery, filter, airflow tester & manual

46	Respirator, power assisted with AC 220 volt battery charger	"

Hose Adaptors for Power Assisted Respirator

By connecting a lightweight belt-mounted adaptor with flexible hose, two screw-in filters can be used in place of the normal single filter. This means that filters can be oriented away from the source of contamination, and two filters used in parallel to provide extended filtration capacity.

33 11 47	Hose adaptor for power assisted respirator	Set

Power Assisted Respirators

If your job demands long-term breathing protection, the OptimAir 3000 PAPR [Powered Air Purifying Respirator] is the way to go. Your breathing remains easy and free from resistance even after hours of work.

A maximum in safety, flexibility and ease-of-handling lets you concentrate on your work, knowing that your health is not being compromised.

The OptimAir 3000 PAPR system allows you to breathe normally while you work. Your comfort, well-being and ability to perform effectively are greatly enhanced. Filters also last longer. The microprocessor controlled, variable-speed motor guarantees an optimum amount of air in your head top [mask or hood] – even as your breathing rate changes during more strenuous tasks. In many situations it is not even necessary to maintain an airtight seal.

The pressure differential causes airflow to travel continuously from your face to the outside environment, preventing unfiltered air from entering your head top.

ScanSilence ML3

Protection against very high noise level and loud sounds. Light weight, and limited contact pressure for all-day comfort. Cup is anti-scratch and its height is adjustable. Attenuation: H=37dB, M=32dB, L=24dB. Signal-to-noise ratio: 35dB.

Standards: CE Approved / EN 352-1

33 12 70	Ear Cup Kits, ScanSilence ML3	Pr.

Name of Mfr.: Scandia Gear

Ear Plugs

Three types of ear plugs are available. Made of silicon-rubber for general noise from high-pitched to low-pitched noises or only for high-pitched noises. Made of flexfit, self-expandable and self-adjusting foam.

Silicon Rubber

Self-fit Foam

33 11 56	Ear plug silicon rubber for hi-low pitch noise	Pr.
57	Ditto for hi pitch noise	"
33 11 58	Ear plug self-fit foam	Pr.

Safety Helmets

A lightweight safety helmet made of glass fibre reinforced polyester resin. Adjustable in size. Easy replacement of the suspension. Weight: approx. 380 grm.

33 11 59	Safety helmet, polyester resin, white	Pc.
60	Safety helmet, polyester resin, yellow	"

Slotted V-Gard Safety Helmets

Economical, lightweight, comfortable headwear. Made of high-density polyethylene in a variety of molded-in colours ideal for general industry and construction. Suspension, sweat band and nape strap form the complete protective system. Cap with slots to hold accessories. When ordering, specify colour.

CODE	Description Helmet Shell	Part No. US/EU

Remark: Other sizes of width with 18 mtrs length are also available on request.

Anti-Slip Safety Products

An anti-slip safety products incorporate the unique Scotgrip® high-traction anti-slip safety surface which gives a sound foot-holding in the most extreme conditions. By installing anti-slip walkway & deck products not only is this slip hazard eliminated but the lifespan of the underlying material is greatly increased. These tough & durable products are manufactured under BS EN ISO 9001:2008 quality controlled conditions comprising of a reinforced composite base and a graded aggregate surface. As a Scotgrip® quality standard, these products are fire rated, spark and friction tested.

Safegrip Anti-slip Stair Nosings (GSN)

By installing Scotgrip® anti-slip stair nosings not only is this slip hazard eliminated but the lifespan of the step is greatly increased. These products are easily fitted onto open grating/grille, chequered plate, concrete or wood. Colour coded in a wide range of colour schemes to suit individual locations, but Safety Yellow colour one will be supplied if any colour code is not specified.

Designed for quick and secure fitting, either by mechanical fixings or bonding to existing surfaces. These products are pre-drilled where required for quick installation.

Surface Grades:
Available three types of surface grades;
High profile – 6 mm aggregate (1/4" approx.)
Low profile – 3 mm aggregate (1/8" approx.)
Fine profile – 1 mm aggregate (1/16" approx.)

Low profile surface grade will be supplied if any surface grade is not specified

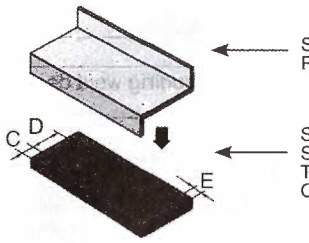
Anti-slip Kicker Tread (KTS)

Designed to fit onto existing steps

Anti-slip Kicker Tread® has all the same safety advantages of anti-slip stair nosings but has the added feature of a safety 'Kicker' incorporated at the rear of the tread to prevent objects being dropped or kicked over the back of it & falling below. These heavy duty products are easily fitted onto open grating/grille, chequered plate, concrete or wood.



Standard Size of Kicker Tread

Breadth (or Depth) of Step	Length
Up to 200mm (8" approx.) Up to 250mm (10" approx.) Up to 300mm (12" approx.)	Supplied to the exact length of your steps. (Please deduct 10mm (3/8" approx.) from length of steps to allow for proper seating.)

Surface Grades

High profile	6 mm aggregate (1/4" approx.)
Low profile	3 mm aggregate (1/8" approx.)
Fine profile	1 mm aggregate (1/16" approx.)

Low profile surface grade will be supplied if any surface grade is not specified.

Colour Code:
Colour coded in a wide range of colour schems to suit individual locations. Available colours are: Safety yellow, Black safety yellow, Black, Green, Grey, Blue, Red, White. Fluorescent and photoluminescent finishes.

Manufactured to customer specification:
Supplied to your requirements as the tread needs to be fairly snug with the stairway stringers.

Fitting Data

Fitting onto:	Method
Open grating	Type 'S' fixings (Saddle assemblies)

Gangway Treads

Marine gangways are renowned for being extremely dangerous, especially when the angle of the gangway is steep and the surface is wet or oily or both. Some gangways have metal or wooden spars across the surface which can be a trip hazard in itself. By installing this gangway treads not only is this slip hazard eliminated but the lifespan of the underlying material is greatly increased.

The gangway treads have been designed in 3 different styles (stepped, bar and elliptical) to suit your individual location. These heavy duty products are easily fitted onto open grating/grille, chequered plate or wood. These treads

are non load-bearing and must have a suitable underlying structure to be secured to.

The anti-slip gangway are custom made products to suit individual locations, and it is available a wide range of colours to suit your individual location which will make your gangways safer. Available colour codes are: Safety yellow, Black/safety yellow, Black, Green, Grey, Blue, Red, White. Fluorescent and photoluminescent finishes. Other colours are available upon your request.

These treads are designed for quick & secure fitting on your location. These secured by either mechanical fixings or adhesives. Available in a wide range of sizes for custom order to suit individual locations.

Surface Grade:
Available three types of surface grades;
High profile – 6 mm aggregate (1/4" approx.)
Low profile – 3 mm aggregate (1/8" approx.)
Fine profile – 1 mm aggregate (1/16" approx.)

33 - 47 - 63 Elliptical gangway tread (Roll)

Please specify the following information;
Size (Width x Length), Type of Tread (GW1, GW2 or GW3), Type of Surface Grade (High, Low or Fine profile), Colour Code (Safety Yellow or any other colour)
Name of Mfr. : Scotgrip (UK) Limited.

Anti-slip Pipewalkers

Pipewalkers will provide a sound foot-holding even in the most extreme conditions and will help eliminate "Slips and Trips" in your working environment. Tough, durable, and easy to handle, and can be placed into position quickly and easily due to their flexibility and light weight construction. There are different types ; short tread and long tread. Standard colours black and yellow, and manufactured under BS EN ISO 9001: 2008 quality controlled condition using highly compatible raw materials.

Surface Grade:
Available in the following surface grade;
Fine profile – 1 mm aggregate (1/16" approx.)

Short Tread

Long Tread

Unit Per Pc.

CODE	Type	Size width x length	Weight	Scotgrip No.
33 47 65	Short tread	700 x 3,300	24.5 kgs	STP
66	Long tread	700 x 3,300		LTP

Name of Mfr.: Scotgrip (UK) Limited

Photoluminescent Wayfinding Walkway Matting

For engine room safety in the event of darkness caused by a sudden power loss or low visibility caused by smoke. A durable hardwearing extruded PVC matting, which incorporates a central 100 mm wide photoluminescent wayfinding strip to show an escape path in sudden darkness. The material is non slip, shock absorbing, self draining and comfortable underfoot. It is resistant to most oils, acids, etc. which are used in the marine industry.

Unit Per Rol.

CODE	Width	Length
33 11 87	600 mm	10 mtr
88	910 mm	"

Hazard Warning Reflective Tapes (Reflective Tiger Tapes)

Self adhesive black and yellow striped tape used to warn against hazards.

It can adhere to any reasonably clean surface and can be easily removed. Highly reflective for visibility at night or in a dark area.

Unit Per Rol.

CODE	Width	Thick	Length
33 11 91	45 mm	0.24 mm	10 mtr
92	90 "		
93	150 "		
94	970 "		
33 11 95	50 mm		33 mtr

Barrier Tapes

Strong, non-adhesive polyethylene barrier tape ideal for warning of danger areas or simply diverting the public etc. Normally striped in Black and Yellow.

Unit Per Rol.

CODE	Width mm x L mtr	CODE	Width mm x L mtr
33 11 98	80 x 50	**33 11 99**	75 x 500

Arm Bands

Made of felt covered by vinyl. For identification of person on duty, or appealing each other for caution to the hazards. Available various colours and notices upon request. Please specify colours, letters, symbols or signs when ordering.

How to order: 33 - 11 - 96
Arm band, COLOR, LETTER, SYMBOLS or SIGNS

Alcohol Screening Devices

An instrument to perform a breath alcohol test with speed and precision. It is also possible to measure alcohol in the ambient air (passive), in which case a mouthpiece isn't required.

All measurement functions can be operated with just one button to make it

easier for you to perform the test. The large back-lit display is easy to understand due to its full-text messages which guide you securely through the alcohol test. An LED and audible signal complement the display and indicate the end of a measurement process.

Unit Per Set

CODE	33 12 21	33 12 24
Model	Alcotest 5820	Alcotest 6820
Sensor	Electrochemical Dräger sensor for 1/4" technology; alcohol-specific	
Measuring Range	0 to 2.5 mg/L	
Temperature Range	-5 to +50°C/23 to 122°F	
Display	Graphic backlit LCD display; 32 x 22 mm	Graphic LCD display; 41 mm x 24 mm
Datalogger	Storage of last 100 tests with test numbers	Space for saving the last 5,000 tests with test number, date and time
Power Supply	1 x CR123A-Battery	2 x AA batteries or NiMH batteries
Dimensions (W x H x D),	50/60 x 141 v31 mm	147 x 65 x 39 mm
Weight	150grm incl. battery	approx. 260grm

Portable Breath Analyzer

A portable breath analyzer which offers latest in cutting-edge breath alcohol sensing technology. This can be operated with a mouthpiece (included in package) for single use, or you can blow directly into the unit. If the "Flo" message was displayed while in use, this warns "insufficient airflow", and you are not blowing enough. The sensor can be changed easily. Has a range of 0.00 to 0.40% BAC (Blood Alcohol Content) or Hi/Lo range. Requires recalibration on every 6 to 12 months by professional service.

Unit Per Set

CODE	33 12 23
Model	Alcoscan AL-6000
Alcohol Sensor	Semiconductive Oxide Sensor
Detection Range	0.00% - 0.40% BAC or Hi/Lo range
Device Lifetime	- 3,000 tests
Breath Sampling Time	3 sec. (fast mode) / 5 sec. (normal mode)
Certification	US DOT/NTHSA/CE Mark/ISO
Size mm	137 x 73 x 44
Weight grm	105

Remark: NTHSA denotes National Traffic & Highway Safety Administration

Name of Mfr. : AK Solutions

Personal Microcomputer Breath Alcohol Tester

Hand-held, personal breath alcohol tester, which is designed to measure an individual's blood alcohol concentration at one point in time. The subject should exhale firmly into the mouthpiece to being testing for approximately six seconds or until the audio tone stops, then the electronic signal produced by an individual's breath alcohol is converted into a blood alcohol concentration (BAC) level. BAC reading is indicated on the LED bar graph, and the LEDs are divided into the following three-colour ranges:

Green - Generally legal in most jurisdictions
Yellow - Warning level, approaching legal impairment
Red - Danger level above legal impairment

BAC reading in the red range may present a danger to safe driving.

Unit Per Set

CODE	33 12 25
Model	Ensure
Sensor	Semi-conductor sensor
Specificity	Specific for alcohol
Purge Cycle (Initial Test)	30 seconds
Breath Sample	6 second continuous breath sample
Analysis Time	Immediate
BAC Readout Format	mg%, %BAC, Promille or mg/L of breath
Rage of Measurement	0 to 100 mg% (0.000 to 0.100% BAC)
Accuracy	±10@100 mg% (±0.010@0.100% BAC)
Display	10 segment (Colour coded) LED bar graph 15 second continuous display of test results
Battery Pack	9 volt alkaline battery (included)
Complete Package	5 mouthpieces, manual & colour box
Size	12.5 x 6.5 x 2.5 cm
Weight	150 grm
Name of Mfr.	Alcohol Countermeasure Systems

33 12 25	Tester, breath alcohol Ensure	Set

Drug Testing Cups

A fully self contained drug screening cup for detecting drugs and drug metabolites in urine. Fully integrated design eliminates handling of the urine. Only the collector can activate the test, thus eliminating donor manipulation. Label hides test result from those who do not need to view results. The test is a fast visual, competitive panel immunoassay that can be used for the simultaneous, qualitative detection of a specific drug metabolite in human urine. Flat surface makes documenting result easy. The cup has easy Xerox feature where cup can be laid down on its side.

Features & Benefits

- FDA (U.S. Food and Drug Administration) 510(K) cleared.
- CLIA (Clinical Laboratory Improvement Amendments) waved.
- Up to 99% accurate.
- Adheres to the SAMHSA (Substance Abuse and Mental Health Services Administration) cutofffs.
- Shelf-life of 18 – 24 months.
- No more turning, simply put the key in and push.
- Easy to open top for the confirmation lab.
- The collector retains control of the chemistry & can time the results to insure proper interpretation.
- Tests for 5 drugs
  Marijuana (THC) 50 ng/ml
  Cocaine (COC) 300 ng/ml
  Amphetamine (AMP) 1,000 ng/ml
  Phencyclidine (PCP) 25 ng/ml
  Morphine / Opiates (MOR) 2,000 ng/ml

Rubber Twin Welding Hose
Molded & Braided Construction

One piece, two-line welding hose, securely joined together to prevent tangling and increase flexibility. One line is red and the other is black to facilitate the welding operation. Usually supplied in 100 mtr coils. This hose is lightweight and easy to move about reducing operator fatigue to a minimun.

Water Rubber Hose
Wrapped & Fabric Construction

A high quality hose designed to withstand being dragged over any surface. It is also resistant to deterioration from weather and sunlight. Provided with an extra heavy tube cover and cotton duck carcass. Recommended for high pressure service. Furnished in standard lengths of 20 mtr.

Unit Per Mtr.

P. V. C. Water Suction/Delivery Hose
Plastic Coil Reinforced

Made of P. V. C. smooth inner and outer surface. The extreme clarity makes it most suitable for application where visibility of flow is an important requirement. Easy to handle and carry. Designed for both suction and delivery uses, but more suitable for delivery. The plastic coil reinforcement gives it durable strength.

Unit Per Mtr.

Water Discharge Hose
P. V. C. Synthetic Fiber Braided

P. V. C. and synthetic fibers do not rust, corrode or require cathodic protection. Soft pliable, rolls up easily, requires minimum storage space. Tough, puncture proof, long service life.

Caution:

1. Transferring of paint, thinner, ethylene, gasoline, alcohol and similar chemical substaces is not advisable.
2. Do not use near nails, glass or other pointed objects.

Test Results

Flexibility:	Scott Type Flexibility Tests Operating load x 1,000cycles No change
Resistance to Hight Temperature:	80°C ×168 hrs. No sticking
Resistance to Low Temperature:	-40°C ×168 hrs. No cracking
Resistance to Weathering:	800 hrs. by Sunshine-Weather-O-Meter exposure: No change
Water Absorbency:	Less than 0.9%

7TH 35

Large Bore Hose

for General Chemical and Petroleum Cargo Use

Heavy duty, composite hoses for ship to shore, dockside and general shipboard use. Works in compliance with international standards including IMO standards, BS 5842 and US Coast Guard regulations. Made of polypropylene fabric and films with a weatherproof and abrasion resistant outer cover reinforced with internal and external wire spirals which are electrically bonded to the end connections giving full end-to-end electrical continuity for safety from static discharge.

Suitable for carrying a wide range of aggressive chemicals which require inert materials and can handle cargoes which involve factors of pressure and temperature with cryogenics such as LPG and LNG.

- Liquid and vapor hoses should be compatible with the cargo and suitable to the cargo temperature.
- Hoses subject to tank pressure or discharge pressure of pumps should be designed for a bursting pressure not less than 5 times the maximum pressure the hose will be subjected to during cargo transfer.

For Petroleum Use (In compliance with IMO standard)

How to order : CODE

Hose for petroleum use, DIAM x LENGTH

Unit Per C/L

CODE	35 04 71	35 04 72	35 04 73
Nominal Size	4"	6"	8"
Working Pressure	10.5 kgs/cm²

Standard Length mtr	18	18	15
Weight kg/mtr	6.5	11.0	15.0

For Hazardous and Corrosive Chemical Use (In compliance with IMO standard)

How to order : CODE

Hose for hazardous and chemical use, KIND OF CHEMICAL, DIAM X LENGTH

Unit Per C/L

CODE	35 04 76	35 04 77	35 04 78
Nominal Size	4"	6"	8"
Working Pressure	10.5 kgs/cm²		
Working Temperature	−26°C ~ +60°C		
Minimum Bend Radius mm	400	500	740
Standard Length mtr	18	18	15
Weight kg/mtr	6.5	11.0	15.0

Note: When ordering, please specify what kind of chemical or material the hose will be used with.

Suction and Discharge Hose

(Built in Fitting)

Designed for suction and discharge of air, water, oil, abrasion, chemical, heavy acid, etc. at working pressure of 100 psi, 150 psi, 200 psi, and 300 psi. These hoses are factory coupled, and there is no hose band used. Neither leakage nor flange separation will occur.

The hose details as to construction, flange, and usage are described as follows.

Hose Application & Size Table

W.P. / S&D HOSE	100 psi	150 psi	200 psi	300 psi	FLUCIDS CARRIED
AIR	1"~ 20" (25A~ 500A)			1"~ 12" (25A~ 300A)	Compression Air, etc.
WATER	1"~ 20"			1"~ 12""	Cooling Water, Sea Water, etc.
OIL	1"~ 20"			1"~ 12"	Crude Oil, Heavy Oil, Kerosene, etc.
ABRASION	1"~ 20"			1"~ 12"	Cement, Sand, etc.
CHEMICAL	1"~ 20"			1"~ 12"	Caustic Soda, etc.
HEAVY ACID	1"~ 8" (25A~ 500A)				Hydrochloric Acid, Sulfuric Acid, etc.

Details of Built-in Fittings for Hose End

Type A 	Built-in Nipple Type (Example...Air,Water,Oil,etc.)
Type B 	Rubber Lining Type (Example...Water,Abrasion, Chemical,Heavy Acid,etc.)
Type C 	Lap Joint Flange Type (Example...Air,Water,Oil, etc.)
Type D 	Split Ring Flange Type (Example...Abrasion, Chemical, Heavy Acid,etc.)

Fittings: According to customer's requirements.

Hose Specification

Reinforcement	Synthetic cord fabric plies and helical hard steel wire reinforced
Colour	Black
Maximum Length	Over 1' thru 14'65" (20 mtrs) Over 16' thru 20'20" (6 mtrs)
Remark	The Hose for Rubber Lining Type (B) has Flat Face Flange

Hose Composition Material

Material / S&D HOSE	Tube	Cover
AIR	Natural rubber	Synthetic rubber, resistance to weathering
WATER	Natural rubber	
OIL	Synthetic rubber, resistance to oil	
ABRASION	Synthetic rubber, resistance to abrasion	
CHEMICAL	Synthetic rubber, resistance to acid	
HEAVY ACID	Special compounded synthetic rubber, resistance to heavy acid	

The following tables are provided to assist you in determining the proper flanges and hoses for safe use at high temperatures and pressures, or when conveying chemicals or toxic material.

Details of Hose Flange Applied

Details of the Flange used for these hoses are as follows: ANSI B 16.5 Forged Flange Slip on Type.

Guide of How to Order

Above hoses are described only just for your reference and not coded, but when ordering, please specify exactly the following matters.

CODE	**35 - 05 - 01**
Fluid Carried	Air, Water, Oil Abrasion Chemical, Heavy Acid
×	
Nominal Size	1" ~ 20"
×	
Working Pressure	100 psi, 150 psi
×	
Hose End Fitting & Flange Type	Built-in Nipple Rubber Lining Type & Lap Joint Flange
×	
Working Temperature	-20°C ~ +60°C
×	
Length of Unit	20 Mtrs (1" ~ 14") 6 Mtrs (16" ~ 20")

Reels with Hose

for Petroleum/Grease/Air/Water

Increased frame strength in a single pedestal, composite spool option. Improved spring makes it easy to pull out the last 10 feet. Full-flow swivel maximizes material flow with minimal pressure drop. Larger hose capacity (30-60 foot, 10-20 meters) with smaller profile to fit into tight spaces. Improved latch design prevents lockout and simplifies repositioning the arm.

SD Series

Compact design easily fits in small spaces. Steel spool stands up to demanding use and applications. Can be used either as an open or enclosed reel. Flexible positioning of the guide arm for mounting on bench or ceiling, wall or utility truck. Structurally reinforced frame made from high strength steel won't bend or flex. Baked-on enamel finish protects reel from corrosion for longer life. Now available in six colours (Metallic Blue, White, Red, Black, Dark Blue, or Yellow), but Metallic Blue is supplied unless any colour is not indicated in your order.

Steel Spool Hose Reels

Designed for daily use applications. Long-lasting spring provides constant spring torque through the entire range of motion. Open swivel ports ensure high fluid flowwith minimal pressure loss. Enclosure kits available-ideal when appearance and protection is important.

Plastic Garden Hose Nozzles

Combination nozzle designed for spray or straight delivery by simply adjusting a round screw. Hose end is available in 15 mm size only.

35 10 01	Nozzle, garden hose, plastic hose end 15 mm	Pc.

Cast Aluminium Garden Hose Nozzles with Spray

Made of cast aluminium. Spray flow can be adjusted by turning the nozzle. Two types of nozzles are available : a 9 - 15 mm adjustable hose end and a 25 mm fixed end.

35 10 04	Hose nozzle, adjustable, 9 mm and 15 mm hose end
05	" " fixed, 25 mm hose end

Pistol Grip Hose Nozzles

Brass made and finished with chrome. Furnished with variable spray flow squeeze lever. Nozzle available in 15 mm dia. only.

35 10 08	Nozzle hose, pistol grip, 15 mm hose end	Pc.

Lock Type Air Hose Couplings

The quick lock coupling feature makes it especially efficient and economical for every kind of air and pneumatic service. Press the two fittings together, give a quarter turn to one, and the connection is made. Made of cast brass, with hose ends on both sides. Furnished in sets only.

Unit Per Set

CODE	Hose Size		CODE	Hose Size

Universal Air Hose Couplings with Hose End or Thread End

Brass made couplings forming a positively locked connection that will not break or come apart in service. The locking jaws are heavy with large bulk surfaces which cannot bend or break loose. Couplings are interchangeable between various sizes and combinations according to DIN 3489. 42 mm distance between lugs.

Quick-Connect Couplers
for All Purposes

A general purpose coupling which can close at either end of the connection. It is a convenient, compact coupling set which connects and disconnects easily, providing dependable service for fluid transfer of hydraulic, pneumatic, and vacuum systems.

The flow side coupling has a floating ball valve which will automatically stop the flow of liquid or gas when the coupling is disconnected.

1. Single End Shut Off Coupler

Connect

Disconnect

One way ball locking most ordinary type of sockets & plugs. When these sockets and plugs are disconnected, liquid or gas inside will stop flowing automatically on the socket side.

Pressure Rating & Application

Withstanding capacity of main body materials against pressure is as follows.

Material / Fluid Pressure	Steel	Brass	Stainless Steel
Working pressure	1.5 MPa {15 kgf/cm²}	1.0 MPa {10 kgf/cm²}	1.5 MPa {15 kgf/cm²}
Pressure resistance	2.0 MPa {20 kgf/cm²}	1.5 MPa {15 kgf/cm²}	2.0 MPa {20 kgf/cm²}
Major Applicable Fluid	Air	Air, Water	Air, Water

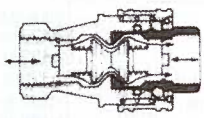
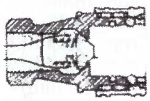
Note: 1) Part Nos. 20, 30, and 40 can be connected to each other.
2) Part Nos. 400, 600 and 800 can be connected to each other.
3) Above 1) and 2) can not be connected across each group due to the difference of the coupling body size.

2. Double End Shut Off Coupler
Standard Pressure



Connect



Disconnect

This is a double path switching type coupler having an automatic valve mechanism at both the socket and the plug. Both are sealed instantly on disconnection. A variety of packing materials are permitted in accordance with the type of fluid.

Pressure Rating & Application

Withstanding capacity varies according to the sizes of the main body materials against pressure.

(to be continued)

Line Couplers

Branch Piping Couplers for Air

A branch piping coupler is useful for simultaneous connection of multiple hose to a single air supply source. Three types are available, Branch type (Type T), Star type (Type S), and Line type (Type L). Centralized piping can be set-up in any desired location.

T Type

S Type

L Type

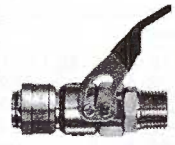
Purge System Hi Couplers and Line Couplers

Push-to-connect operation with valve opening and closing by the purge system lever action, which eliminates unpleasant shock and noise on disconnection.

The lever will never turn to open until plug is connected by means of safety measure.

Purge System Hi Cuplas

Made of chrome plated brass. Can be connected with PH, PM and PF series plugs sized from 1/4" to 3/4".



Unit Per Pc.

CODE	Model	Size Male Thread	Working Pressure	Max. Pressure	Applicable Plug Type

65	PV-600SM	R3/4"			

Name of Mfr.: Nitto Kohki Co., Ltd.

Applicable Plug Type: 20 series: 20PH, 20PM, 20PF
30 series: 30PH, 30PM, 30PF
40 series: 40PH, 40PM, 40PF
400 series: 400PH, 400PM, 400PF
600 series: 600PH, 600PM, 600PF
800 series: 800PH, 800PM, 800PF

* Method of operation

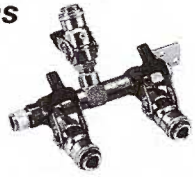
1. Push-to-connect operation.
(In this stage, the valve in the socket is not open.)

2. Turning down the lever opens the valve and allows the fluid to flow.
(The turned-down lever works as a sleeve stopper and prevents disconnection.)

3. When the lever is pulled up, residual air pressure in the plug is purged without an unpleasant popping noise and a hose whip back motion on disconnection. (In this stage, the socket valve is still closed.)

Purge System Line Cuplas

Made of chrome plated brass. Can be connected with PH, PM and PF series plugs sized from 1/4" to 3/4".



Unit Per Set

Cam and Groove Couplings

They are quick, tight, leakproof connections to pipe, tubing, hose or tanks and provide quick liquid and material hose connections that seal tight and stay tight. Sizes from 1/2" to 8" are available. They are made of aluminium alloy, brass, stainless steel and other metals for use with liquids, vapors, gases and air-blown dry products. Suitable for use with single connections and where changes in connection to a number of tanks or outlets may be required.

Any of these Adaptors will quick connect to.....

Part A Male coupler / female thread. 1/2" to 8".

Part F Male coupler / male thread.1/2" to 8".

Part E Male coupler / hose end. 3/4" to 8".

Part E reducer or increaser (illustrated). Sizes 3" to 4".

Part AW male adaptor/socket or butt weld.1/2" to 10".

Part AS male adaptor/ straight female pipe thread for dry products 3" to 10".

....any of these couplers of the same size

Part B female coupler/ male thread. 1/2" to 6".	**Part D** female coupler /female thread. 1/2" to 8".	**Part C** female coupler/ hose end. 1/2" to 8".
Part B reducer female coupler/male thread. Sizes 2" to 4". Aluminium, brass.	**Part DW** female coupler/socket or butt weld. 1/2" to 10". All metals.	**Part DS** female coupler/ female straight pipe thread for dry products 3" to 10". All metals.

Coupling Assemblies

Spool Adaptor	Part SA spool adaptor connects two lengths of hose with coupler ends. 1/2" to 6". In all metals except in larger sizes. (Spool couplers are also available.)
Gaskets	Gaskets are of buna composition unless another material is specified. Other available gasket materials include Neoprene, pure gum, butyl, teflon, viton, E.P.T., Thiokol or any other material to meet specifications.
Handles	Handles are stainless steel or forged bronze with stainless steel pins. Cadmium plated rings are supplied on all sizes except 1/2", 3/4", 1", 6", 8", or 10".
Brass Chain	Brass chain, with two "S" hooks for attaching dust caps or dust plugs to adaptors or couplers, is available in any length desired.

Quick Disconnect Couplings
for Oil pressure and Liquid

A quick connect and disconnect couplings suitable for flowing large spills of general hydraulic oil, water and chemicals by the possible large flow amount. There are three types of material; carbon steel, Brass or Stainless steel (SUS-304).

Maximum Usable Pressure of the Seal Material

Material		Working Temp. Range	Max. working pressure MPa (Stillness Pressure)				
Body	Seal		04	06	08	12	16
Carbon Steel	NBR	-30 to +93°C	45.0 (21.0)	32.0 (21.0)	28.0 (21.0)	25.0 (21.0)	14.0 (14.0)
Brass	NBR	-30 to +93°C	7.0	7.0	7.0	7.0	7.0
Stainless Steel	NBR	-30 to +93°C	7.0	7.0	7.0	7.0	7.0

Coupler Side Main Seal Form

Material		Form	Features
Body	Seal		
Carbon Steel	NBR	 Single O ring	It exhibits stable performance specially when under dynamic pressure.
Brass	NBR	U Packer	It exhibits superior sealing performance than that of a single o-ring at less than the maximum usable pressure of 7.0 MPa.
Stainless Steel	NBR	U Packer	

Carbon Steel

	Coupler	Nipple
With Valve	 VHC Type	 VHN Type
Without Valve	 OHC Type	 OHN Type
With PH Valve	 PHC Type	 PHN Type

Remark: PH valve enables connection even with residual pressure. Connection is possible at 17.7N even under the residual pressure of 7.0 MPa. It can be connected when residual pressure is present, but cannot be disconnected under the circumstances.

Carbon Steel Coupler and Nipple Combination List

Type	VHN	OHN	PHN
VHC	o	o	o
OHC	×	o	×
PHC	o	×	×

Remark: o = Applicable, × = Not applicable

Signal Bells

Made of cast brass with a highly polished finish. The size is determined by measuring the bell mouth opening. The required size is over 300 mm diameter for the vessels of length greater than 20 mtr.

37 01 01	Bell, signal, cast brass	200 mm	Pc.
02	"	300 mm	"
03	"	400 mm	"

Air Horns

Required installation under the international regulations for prevening collisions at sea. The frequency of the horns shall be between 130 – 350 Hz for a vessel greater than 75 mtrs but less than 200 mtrs in length, and 70 – 200 Hz for a vessel 200 mtrs or more in length.

How to order : CODE

Air horn, 135 Hz for vessels of 75 – 200 mtr in length, LENGTH of VESSEL, TYPE of OPERATION

Unit Per Set

Two-way VHF Radiotelephone Apparatus

According to the 1983 amendment to the SOLAS regulations 1974 in Chapter III Regulation 6, at least 3 two-way radiotelephones shall be provided on every cargo ship of 500 gross tons or more. The two-way radiotelephone enables communication between the survival craft, the ship, and the rescue boat.

Precautions shall be taken to prevent the inadvertent selection of VHF channel 16 on equipment capable of being operated on that frequency. A watertight model is required for satisfying GMDSS requirements (1988 amendment).

Specifications for Reference

Frequency Range	VHF 156.300 - 156.875 MHz
Size & Weight	165 x 64 x 45.5 mm, 600 grm

37 01 33	Two-way VHF radiotelephone conforms to GMDSS	Pc.

Battery Chargers for GMDSS VHF Two-way Radiotelephone

37 01 35	Battery charger for two-way radiotelephone GMDSS AC 110V	Pc.
36	" AC 220V	"

Guidance of Frequency Range

Frequency	Range
HF (High Frequency)	3 - 30 MHz
VHF (Very High Frequency)	30 - 300 MHz
UHF (Ultra High Frequency)	300 - 3,000 MHz

Handheld Marine Radios Intrinsically Safe – USTC Certified

Intrinsically safe radio conforms to all aspect of USTC (U.S. Testing Company) certification for portable used in

hazardous locations. If further exceeds this by being fully submersible to 5 meters depth for up to one hour. Meeting MIL STD 810C/D/E rating for tough, enduring performance, the radio conforms to stringent standards, enabling it to withstand the every day rigorous of shock, vibration and the corrosive action of dust and moisture, ensuring of many years of trouble free use even in a salt water environment. Very simple to use, with the majority of its features accessed by a single key depression. Latest compander noise reduction technology delivers loud and crisp audio no matter what environment you are in.

Intrinsically Safe Marine UHF Transceivers

400MHz 2W Waterproof

The Maritime Safety Committee (MSC) adopted the following amendment to SOLAS regulation II-2/10 regarding fire fighters' communication: "For ships constructed on or after 1 July 2014, a minimum of two two-way portable radiotelephone apparatus for each fire party for fire-fighter's communication shall be carried on board. Those two-way portable radiotelephone apparatus shall be of an explosion-proof type or intrinsically safe. Ships constructed before 1 July 2014 shall comply with the requirements of this paragraph not later than the first survey after 1 July 2018."

The JHS-431 is a 2 Watt UHF intrinsically safe transceiver designed for on-board communications in ship operations, loading/unloading, and mooring. The JHS-431's intrinsically safe structure meets ATEX Directive 94/9/EC for use when transporting flammable, dangerous materials by Tanker, LPG carrier, LNG carrier and/or LO carrier, and meets above SOLAS amendment by MSC.

3 more communication channels can be installed as a pre-set option.

Communication Systems

L'COM Communication

Communication is getting difficult in a noisiness area

The MSA L'COM Communication system is a complete module with headband system for wearing without helmet.

- 2 x 32 Ω speakers in parallel, max power 100 mW.
- 100Hz-10 kHz electro-dynamic microphone.
- Omnidirectionnal microphone.
- Position of speaker and microphone close to ear, ear remain free.
- Loud and clear communication is possible.

Connection with a wide range of brand and types of radios is possible.

37 01 45	Communication system, headband type, L'com communication (specify brand and type of radio in use)	Set

Name of Mfr.: MSA The Safety Company

Micro Communication

The MSA Micro Communication system is a complete module with clip in system for wearing with helmet in combination with or without full face mask.

<Basic Specifications>
- 32 Ω speaker [one speaker], max power 100 mW.
- Connection in the helmet close to ear [Left or right].
- Possibility to adapt a pouch for use without helmet.

MICRO Built-in Microphone

- Module integrating both Loudspeaker and electret Microphone.
- 50 Hz-12 kHz electro-dynamic microphone.
- Omnidirectional microphone.

MICRO External Microphone

- Module integrating Loudspeaker and external microphone [with flexible arm].
- 50 Hz-12 kHz canceling noise boom microphone.

Connection with a wide range of brand and types of radios is possible.

37 01 49	Communication System, helmet mounted type, Micro built-in microphone (specify brand and type of radio in use)	Set
50	Communication System, helmet mounted type, Micro external microphone (specify brand and type of radio in use)	"

Name of Mfr.: MSA The Safety Company

Osteo Communication

By simultaneous use of a SCBA and a radio, communication is getting difficult in a noisiness area.

The MSA Osteo Communication system is a complete module with headband system for wearing with helmet in combination with or without full face mask.
- Module integrating loudspeaker.
- 32 Ω speaker (one speaker), max power 100 mW.
- Bone conductive microphone, accelerometer 1 mV/mG.
- Bandwidth 20 Hz to 20 kHz.
- Voice transmission by skull vibration.
- Connection in the helmet close to ear (Left or right) for the speaker module and attachment to the cradle net for the Bone microphone.
- Possibility to adapt a pouch for use without helmet.
- Loud and clear communication is possible.

Connection with a wide range of brand and types of radios is possible.

37 01 46	Communication System: helmet mounted type, Osteo communication (specify brand and type of radio in use)	Set

Name of Mfr.: MSA The Safety Company

Ear Muffs with Communication

Highly efficient ear muffs for protection of loud noises of all pitches in factories and areas where air compressors and turbines are used. The challenge is to balance personal attenuation devices with comfort and the ability of communication, so that workers will wear their hearing protectors all the time.

MSA Sordin's Connected by Cable is a comfortable hearing protection line equipped with a noise cancelling microphone and a down lead for connection to a two-way radio.

Product features:
- Can be connected to mobile phones in combination with a separate adapter. Supplied with a 2.5 mm stereo plug.
- Also available for direct connection to communication radios such as Motorola, Kenwood, Icom, etc. and DECT phones.
- Noise cancelling boom microphone permits two-way communication with minimal interference from background noise.
- All electronic features are controlled using three distinct push buttons.
- Certified to EN 352-1 (headband version).
- Certified to EN 352-3 (helm mounted version).
- SNR 28dBA (headband version), 27dBA (helm mounted version).

Ship Borne Telephones

As a wide range of multi-purpose telephone sets for the marine communication fields are available from different manufacturers, the most common types are listed below.

A. Marine Auto Telephones

These sets are built sturdy based on the design to achieve high reliability while also meeting all the requirements for the marine telephone sets to be connected with the marine electronic telephone exchange.

These telephone sets are designed to be compatible with the DP (Dial Pulse) /PB (Push Button) dials to meet the requirements of the various telephone lines. The received indication (Tone-ring & Lamp) is furnished on all models.

These telephone sets have been granted the approval of the JATE (Japan Approvals Institute for Telecommunication Equipment) standards to allow access, via the marine electronics telephone exchange, to the land line including the via-INMARSAT, cellular marine telephone and shore telephone sets.

B. Marine Common Battery Telephones

This equipment utilizes the ship's power supply of 24 volts DC to activate the voice communication circuits. With a press of the quick access button, you can communicate with the opposite party.

1. Marine Common Battery Telephones (Direct)

1) 1:1 Communication system

This system is used for the limited communicating purposes between two units. Automatic connection is made when one handset is picked up, and causing the second unit to ring. The received indication (Tone-ring & Lamp) is furnished on all models.

Intrinsically Safe Auto Telephones

This telephone system is composed of telephones and safety maintaining unit. This telephone set located in explosive hazardous area can be connected to the telephone lines of marine telephone exchange, PABX (Private Automatic Branch Exchange) or analog telecom network via Buffer Unit.

With its safe security system, the equipment can be operated for a long period of time in a dangerous environment such as oil carrier ships, LNG/LPG carrier ships, chemical carrier ships. Specified to the intrinsically safe explosion proof construction grade that satisfies the ia standard, assuming two accidents, in compliance with the IEC specification, meets the requirement of the Ex ia IIBT4 class of equipment in terms of explosion proof and inflammable nature. The authentication of the IECEx has acquired.

Ex. Protection:

Marine Battery-less Telephones

These telephones do not require a source of electric power for calling and communication. Rotating handle will generate electric power to ring the other station, and accumulated power is used to amplify acoustic sounds to make conversation loud and clear.

They are roughly classified into two systems; Direct Telephone and Selective Telephone. The latter allows maximum 12/24 telephones to configure (one conversation link). And they are possible to connect to Intrinsically Safe Types, shown in the layout drawing below. Each telephone has relay inside terminal so that optional devices such as bells can be equipped.

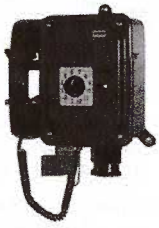
Marine Intrinsically Safe Construction Battery-less Telephones



These telephones are of Intrinsically Safe construction. They can be used in hazardous areas and allow to connect to the telephones in the safety areas, shown in the layout drawing shown on the previous "Marine Battery-less Telephone". IS Barrier shall be equipped intermediate for safety connection between two areas (Marine battery less telephones and Marine intrinsically safe construction battery less telephones). This system is roughly classified into two systems; Direct Telephone and Selective (12/24 stations) Telephone.

As they do not have devices to tell the reception, other devices such as Air horn, Whistle, and/or Beacon should be equipped.

The authentication of the IECEx has acquired.

IECEx Certificate No.: IECEx TIIS 16.0003X
Ex Protection: Exia II BT4 Ga Ta=55°C

Safety Protection Unit for Intrinsically Safe Battery-less Telephones

This unit intervenes between I.S. Battery-less Telephones in hazardous areas and telephones in safety areas to establish safety connection.

For calling device Relay contact Ratings:
AC/DC 6A
Power supply for barrier:
DC 24V, max. 0.5A
Ex. Protection:
[Exia] II B Ta=60°C

Please specify the model number as below
Model ODZ9492-[① ②]

① Maximum number of telephones possible to equip at hazardous area:
1: equip 1 unit, 2: equip 2 units, 3: equip 3 units,
4: equip 4 units

② Maximum number of telephones possible to equip at safe area in total
A: 8 stations, B: 16 stations, C: 24 stations

Example) 1 × telephone in hazardous area, 8 telephone system in safe area should be "ODZ9492-1A"

Unit Per Pc.

Radio Room Clocks

For use in radio rooms. The diameter of the dial is 200 mm with the numerals 1 - 12 on the outer edge and the numerals 13 - 00 on the inner side showing international time. Seconds are marked clearly in red between the hour numerals. There are two 3 minute silent periods at 15 and 45 minutes past the hour marked in red for emergency signals, and two 3 minute silent periods at 0 and 30 minutes in green for distress signals. The clock has 2 hour hands, one to be set in Greenwich Mean Time and the other to indicate local time.

A Vapour-Proof type(IP54) with Stainless Steel Casing is also available.

37 02 01	Clock, radio room, quartz 200 mm dia.	Pc.
02	Clock, radio room, stainless steel casing, vapour-proof	Pc.

Marine Clocks

A quartz, battery operated clock. The case is backed with rubber to provide resistance to shock and dust.

A Vapour-Proof type(IP54) with Stainless Steel Casing is also available.

37 02 04	Clock, marine, quartz 200 mm	Pc.
05	Clock, marine, stainless steel casing, vapour-proof	Pc.

Quartz Chronometers

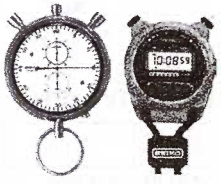
Highly accurate quartz crystal timekeeper. Water-resistant and unaffected by humidity, shock, and magnetic force. The clock will still operate when replacing the battery on a 40 hour back-up battery.

Specification

Power Source	R20P (UM-1) × 3 pcs for 1 year battery life
Accuracy	Average daily error within ±0.1 sec.
Action of Hand	0.5 second leap
Dimensions	184 (W) × 215 (D) × 76 (H) mm
Weight	2.2 kgs

37 02 07	Chronometer quartz	Pc.

Stopwatches



Precision stopwatches which can time to the accuracy of 1/5 and 1/10 of a second on an analogue watch and 1/100 of a second on a digital watch.

Analogue Digital

Unit Per Pc.

Analogue		Digital	
CODE	Second	CODE	Second
37 02 11 12	1/5 1/10	37 02 13	1/100

Stopwatches and Time Printers

A 1/100 second digital stopwatch which can be connected to a time recording printer. The printer runs on 4 R6P (UM-3) dry batteries. Furnished with two 38 mm wide rolls of printing paper.

Stopwatch Printer

37 02 16	System stopwatch digital 1/100 second	Pc.
37 02 17	Time printer for system digital stopwatch	Pc.

Astro-Navigation Calculators

Digital navigation calculators for assessing the ship's position by simple operation with built-in programs. Easy-to-understand dialogue system telling what input data is required, and what output data is displayed.

Major navigation functions are;
- Simple operation with built-in programs
- Course and Distance computation
- Dead Reckoning computation
- Great Circle computation
- ETA computation
- Current computation

- LOP computation.
- Meridian Passage computation.
- Convenient conversions for to HMS and to HHHH.
- Long term Nautical Almanac for the Sun, Moon, Venus, Mars, Jupiter, Saturn and 63 stars. The built-in Almanac is usable until 2100, and it is good with accuracy better than 0'.2.
- Twilight time mode computes times of rise or set, civil twilight and azimuth for the Sun and rise or set, age and azimuth for the Moon.
- Prediction/identification mode computes azimuth and altitude for all celestial bodies and displays any usable bodies above the horizon.
- Can input Latitude and Longitude from optional GPS receiver.

Specifications

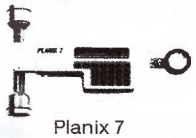
Operation	Touch panel with stylus pen
Power Source	Lithium-ion battery and AC adaptor (AC100-240V)
Operating Time	Approx. 5 hours for continuous operation
Charging Time	Approx. 4 hours for full charging
Display	Liquid crystal display (65,536 colours) 240 x 320 dots
OS	Microsoft Windows Mobile 6 Classic
Size	W72 x D125x H14 mm
Weight	Ap.165 grm (without battery)
Accessories	AC adaptor and stylus pen

37 02 27	Astro - navigation calculator	Pc.

Digital Planimeters

A very precise instrument for quick and accurate determination of area on blueprints, maps, photographs, drawings, etc.

Simply follow the outline of the area. The revolution of the measuring wheel in either direction is sensed by the electro shaft-encoder which generates pulses which are processed by the custom-made LSI.



Planix 7

Planix 10S marble

Unit Per Pc.

CODE	**37 02 31**	**37 02 32**
Model	Planix 7	Planix 10S marble
Measurement Range	300 mm x 3 mtr	300 mm x 10 mtr
Measurement Functions	8 digitds output/ input HOLD, MEMO, BATTE, READY, cm^2, in^2, SCALE, m^2, km^2, ft^2, acre	Area, Line length, Side length with the following measuring units : mm, cm, m km, in, ft, acre/yd, user-defined units
Display	LCD with zero suppression	LCD 16 digits x 2 lines
Resolution	One digit corresponds to 0.1 cm^2 or 0.01 in^2	Linear: 0.05 mm
Accuracy	Better than ±0.2% (±2/1,000 pulses)	±0.1% (100 x 100 mm area measurement)
Power	Internal NiCd or AC adaptor	Internal nickel metal hydride battery or AC charger/adaptor
Operating Hours	30 hours (after 15 hours recharge)	20 hours (after 15 hours recharge)
Dimensions (Body)	150 x 240 x 39 mm	250 x 110 x 40 mm
Weight	650 grm	630 grm
Accessories	-	Storage case, AC charger/adaptor, Gauge template

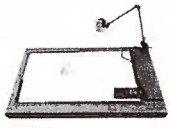
(to be continued)

Automatic Chart Plotters



Automatic chart plotter continuously lights up ship's precise position on ordinary charts according to longitude and latitude signals from the GPS (Global Positioning System) or other position reference systems, contributing to ship operation labor-savings as well as safe navigation.

A convenient operation panel lets you register any chart for use in the system. The panel includes display functions for longitude, latitude, heading and speed. Additional interfaces receive data from an onboard gyrocompass and speed log for a high-accuracy position indication.

Also the automatic plotter has route planning and memory card storage functions.

When ordering, please ask for brochures or consult with a sales engineer from the local distributor for further information.

Specifications

Accuracy	±0.3 mm
Diameter of Light Mark	10 mm
Liquid Crystal Display	Alphanumeric, 16 characters x 2 lines
Display Information	Longitude, Latitude, Heading and Speed
Power Consumption	300 VA

37 02 36	Automatic chart plotter AC 110 volt	Set
37	" AC 220 volt	"

Clinometers

A clinometer is required for positioning a vessel on a proper trim. It also indicates the correct heel angle and is helpful in determining the appropriate locations for cargo and equipment. A pair of clinometers, one installed on the keel axis and the other on the beam axis, will give the necessary and accurate indications for adjustment of the trim angle.

Dial Type

Tube Type

Unit Per Pc.

CODE	Type	Specification
37 02 41	Dial Type	Heavy glass front, 200 mm dial, graduated 0 - 50 on each side of the vertical plane in 5 integrals, 80 mm pointer and two maximum indicators with reset device and stop to hold movable pointer when not in use. Weight 1.5 kgs.
37 02 42	Tube Type	Single tube clinometer with a bubble type spirit filled glass tube on a 160 × 35 × 25 mm plastic graduated panel. The tube is graduated 0 - 40 on each side of vertical in 1 integrals. Weight 1.5 kgs.

Azimuth Circles

The Azimuth Circle is mounted on the repeater compass. By means of a prism and reflection mirror, sunlight is projected in the form of a line on to the compass card through a slit, thus making it possible to observe the sun. The most common types are listed below. When ordering, please specify the name of the manufacturer.

How to order : CODE

Azimuth circle, MANUFACTURER'S NAME & MODEL of repeater compass

Unit Per Pc.

CODE	Manufacturer	Model	Size mm			Graduation
			I.D	O.D	H	
37 03 21	Tokimec	-	246	260	120	Nil
22	Yokogawa-Navitek	KX-603				Graduated
23	Others	-	-			-

Marine Aneroid Barometers

Specially designed for marine use. It will withstand the vessels vibration without losing accuracy. Available in 150 mm and 200 mm dial size.

37 02 46	Barometer, aneroid, marine use 150 mm dia.	Pc.
47	" 200 mm dia.	Pc.

Hygrometers

Wet & Dry Bulb Hygrometer

Consisting of dry and wet alcohol filled glass thermometers fixed on a panel. By differential indication between these thermometers, humidity can be read from the table mounted on a panel. Range –10 to 50°C in 1° integrals. Panel size 280 × 80 mm.

37 02 51	Hygrometer, wet & dry	Pc.

Dial Thermo-Hygrometers

Wall mounted bimetallic dial thermometer with hair hygrometer. Standard dial diameter is 100 mm. Best for cabin use.

37 02 56	Dial thermo-hygrometer wall-mount 100 mm	Pc.

Sling Psychrometers (Hygrometers)

Two similar balanced thermometers mounted on brass panel with chain. A metal handle enables the instrument to be whirled. Furnished with psychrometeric table and leather case. Range –20 to 50°C in 1/2° div. Case size is 200 × 40 × 40 mm.

37 02 61	Psychrometer, sling type, complete	Set

Hair Hygrometers (Lambreht's Polymeters)

This instrument, known as a polymeter, measures temperature, humidity, vapour tension and dew point. A mercury filled glass thermometer is attached. The humidity element is a bundle of human hair. The dial which indicates selective humidity is 80 mmø. Temperature range –20 to 50°C in 1° div. and Humidity scale 0 to 100 % 0.18 kgs in weight. 263 mm in length.

37 02 66	Hair hygrometer (polymeter) with mercury thermometer	Pc.

Digital Thermo-Hygrometers

A compact, portable thermo-hygrometer that monitors atmospheric temperature and humidity by single unit.

Pen Type

Weight		49 grm	100 grm

Hand Anemometers

This portable wind speed indicator can be held easily in one hand. The pointer returns to 0 after 30 seconds after which a lever at the bottom of the dial is pulled. The pointer will stop on the value indicating the mean wind velocity in a period of 30 seconds. No power supply is required for use. Velocity range is from 0 to 22 m/s. The dial is 100 mm in diameter and the instrument is 300 mm in length.

37 02 71	Anemometer, hand, with dial gauge up to 22 m/s	Pc.

Digital Anemometers

A portable digital anemometer with integrated vane or with remote vane extended by curled cord.

With Integrated Vane

With Remote Vane extended by Curled Cord

Unit Per Pc.

CODE	37 02 73	37 02 74
Type	With integrated vane	With remote vane extended by curled cord
Measuring Range	1.1 - 20.0 m/s -15 - 50.0°C	0.70 - 25.00 m/s -10.0 - 50.0°C
Power Requirement	1 × Lithium battery CR2032	1 × 9V (6F22) battery
Size	W144×H47×D26 mm	W71×H181×D38 mm
Curled Cord	-	L: 500 mm
Weight	95 grm	360 grm

Barographs

A newly designed self recording barometer. Very compact with a wide recording range. Can be installed in an indoor or outdoor instrument shelter. Provides an inked record of the station pressure for 24 hours or 7 days. Furnished with 7 days revolution recording paper for one year (55 sheets) and gear for one day drum rotation. One day recording paper is available upon request.

37 02 86	Barograph, 940-1,045 mb, with recording paper for one year	Set
87	Recording paper 7 days for barograph 55 sheets	Pad
88	Recording paper 1 day for barograph 400 sheets	"

Specifications

Sensor	14 cell, 2 in. dia. aneroid
Sensitivity	±0.2 millibar
Accuracy	±0.2% of range
Lag Time	0.1 sec.
Temperature Compensation	Bimetallic Strip
Chart Scales	940 to 1,045 millibars 705 to 785 mm/Hg
Chart Drive	8-day spring wound
Drum Rotation	1 day & 7 day by gear change
Weight	3.5 kgs
Size	325L x 155W x 240H mm

Sounding Leads

Designed for measuring sea depth. Has a hole at one end for connecting rope. Furnished without attached line.

Unit Per Pc.

CODE	Lead Weight kgs	Description
37 03 01	3.2	Hand Lead
02	12.7	Deep Sea Lead

Sounding Rods

A graduated square or round straight or jointed folding brass rod with attached ring; used for measuring the depth of liquid contained in a space. When ordering, specify the shape of the rod, the length, and the number of folds.

How to order: CODE

Sounding rod, NUMBER of FOLDING, SHAPE of ROD, LENGTH, GRADUATION

Unit Per Pc.

10	6	Round	3 ft	"

Nautical Sextants

A sextant is an instrument for measuring the angle between two objects by bringing into coincidence to the eye of the observer, rays of light received directly from one object and reflected from the other. Its principal use is to measure the altitudes of celestial bodies above the visible sea horizon. Available in various types. When ordering, specify telescope (magnifying & lens diameter) and whether the sextant should be with or without illumination. Furnished with a wooden or plastic case.

Unit Per Pc.

45	7× 50	IF, WP, with Scale

Remark: CF=Center Focus, IF=Individual Focus, WP=Water Proof

All-Weather Stand Type Binoculars

An airtight, waterproof, large binocular suitable for bridge use. Can be fixed with bolts onto a deck plate or bridge counter top. Specify the required magnification and lens diameter when ordering. The most common model is: Magnification 15, Lens Diameter 80 mm.

37 03 48	Binocular, stand type, 15 x 80 IF water-proof	Pr.

Internal Gyro-stabilized Binoculars

This waterproof binocular makes the target easier to acquire and track even if it is moving at a high rate of speed, because of the prism, installed on a freely rotating gimbaled frame equipped with a high speed gyro motor. The observer will have little problem keeping the target centered in the field of view.

Simply switch the power on and wait a moment until the gyro motor reaches operating speed. Focusing is achieved by adjusting each eyepiece. Foldback rubber eye cups permit eyeglass wearers to use this gyro-stabilized binoculars and still see a full field of view. To allow for individual differences in the distance between the eyes, an interpupilary control is provided. Finally simply lift the locking lever to free the gimbaled erecting prism assembly.

It can be operated with either 4AA batteries or 1 lithium battery, and also operated on 12-32 volt DC power sources when used with the supplied DC regulator, where auxiliary power is available.

Night Vision Binoculars for Anti-piracy

An optical instrument that you can see a night view even in a moonless, cloudy night.

Bushell Night Vision

- Night vision: Generation 1
- Infrared illuminator: Built-in
- Water resistant
- Great for close-range viewing (Security). Long-range viewing (Wildlife observation)
- Magnification x objective lens: 2.5 x 42

Yukon Night Vision

- Day and night operation
- Higher resolution than Gen. 1
- Effective over 300 yards
- Brightness adjustment control
- Stealth IRTM operation with invisible, powerful dual IR illuminators
- Direct video output capability
- Magnification x objective lens: 5 x 42

Nikon Ocean Pro

- Multiple layers of anti-reflective compounds offer excellent brightness and resolution
- Fast range of focus for quick viewing
- 22.7 mm of eye relief provides comfortable viewing for eyeglass wearers.
- Maximum exit pupil ensures you catch the image, even with motion at sea
- Magnification x objective lens: 7 x 50

Unit Per Pr.

Green Flashing Lights

Signal lights for large ships not less than 200 mtrs in length. All these lights conform to the Maritime Traffic Safety Law.

One all-round green flashing light, with 2 mile range visibility, flashes at regular intervals at a frequency of between 180 and 200 flashes per minute. Available with a glass or polycarbonate lens.

Polycarbonate Lens & Case

Glass Lens & Metal Case

How to order: CODE

Green flashing light, MATERIAL of LENS and CASE, VOLTAGE, TYPE of SOCKET

Xenon Searchlights

A compact searchlight "U-beam" mounted with a 150 W high performance xenon short-arc lamp of high luminous intensity and low energy consumption. The searchlight radiates a powerful white beam with a luminous intensity of 1,500,000 candela and colour temperature of 6,000°K, similar to sunlight.

Two beam angle types are available. Use of the remote control allows for easy, simultaneous control of the horizontal and elevational angle of the lamp head.

How to order: CODE

Xenon Searchlight, BEAM ANGLE, LUMINOUS INTENSITY cd., POWER SOURCE VOLTAGE

Unit Per Set

CODE	37 04 91	37 04 92

Depression/elevation Angle	Upward : 5 Downward : 35	
Material	Anti - corrosion aluminium	
Power Source	DC 24V, 7.8A	
Weight	9 kgs	

Suez Canal Searchlights

Complying with the "Rules of Navigation" established by The Suez Canal Authority, which states that ships which go through the canal during the night must be equipped with The Suez Canal Searchlight. The lamp must have a luminous intensity of a single light beam not less than 3×10^6 (3 million) candela, which is equivalent to a high efficiency lamp of 2,000 watts for vessels up to 30,000 S.C. tons gross and 3,000 watts for vessels over 30,000 S.C. tons gross. The searchlights must have a certificate issued by one of the Classification Societies such as N.K., Lloyd, etc. and must be equipped with a 2 lamp carrier that can be turned into position to let the lamp focus directly on the reflector. Available in a floor mounting type or ceiling mounting type. The most popular model is the floor mounting, manual operated type as listed below. This type is also available for use with incandescent lamps or halogen lamps.

Specifications

Kind of Lamp		Incandescent lamp	Halogen lamp
Lamp	Voltage	100V, 110V, 115V, 220V, 230V	
	Watt	2,000W, 3,000W	2,000W
Reflector		550 mm	640 mm
Form of Control		Manual Operation	
Elevation Angle		Up above 30 deg. down below 30 deg.	Up above 20 deg. down below 20 deg.
Horizontal Turning Angle		360 deg.	
Height from the floor to the center of lamp		650 mm	
Temperature range		–25°C to 45°C	
Material		Stainless Steel 1.4301 (V2A)	
Weight		40 kgs

Camera Monitoring System
Compliant with ISPS Code

Carrying Case

The conference of SOLAS '74 signatory governments adopted the International Ship and Port Facility Security Code (ISPS Code) in December 2002 which entered into force on July 1, 2004. An ISPS Code – compliant camera monitoring system, as a device for monitoring access to the whole it is at berth, is intended to meet a recommendation found in part B of the ISPS Code with the following major features; (a) For temporary, rather than permanent, installation at the time of berthing. (b) Tough structured to be waterproof (IP65). (c) Less expensive because the compact camera is integrated with their housings. (d) The system requires no elaborate installation work due to a coaxial multiplex arrangement, requiring only coaxial cable to start operation. (e) Equipped with an automatic black-and-white photographic mode, which is particularly effective for night-time shooting, the system can perform continuous monitoring night and day. (f) The cameras use varifocal lenses with a wide range of horizontal shooting angles, from 24° to 93°. Standard power source is AC 100 volt, and AC 220 volt type increased by transformer is also available if required.

Unit Per Set

CODE	37 05 41
Model	ISPS-850K-S
Minimum Object Luminance	1.3 luxes
Waterproof	IP65
Power Source	AC 100 Volt
Size	760 × 410 × 510 mm (Case)
Weight	Total about 20 kgs (Camera only : 2.2 kgs)
Consists of;	2 units : Housing-integrated cameras TK-S850K-S 1 unit : Sequential switcher (4CCU) TK-U1403 1 unit : Liquid crystal monitor LC-13S4-S 1 unit : Carrying case (wooden box) 1 set : Connecting plugs

Name of Mfr.: Kyokuyo Electric Co., Ltd.

Note:
The ISPS Code consists of;
Part A (compulsory provisions) and Part B (recommendatory provisions).
The code is applicable to ;

1. Vessels of the following categories engaged or seeking to engage in international navigation:
   (1) Passenger ships including high-speed passenger craft;
   (2) Cargoships of 500 GT and upward including high-speed craft, and
   (3) Movable subsea resources drilling units
2. Port facilities to serve applicable vessels which engage in international navigation.

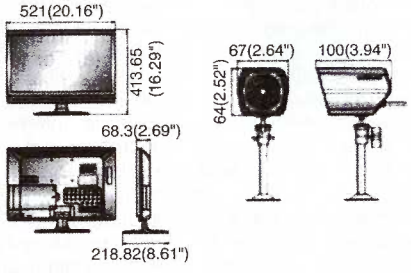
Exceptions : The code does not apply to warships, auxiliary naval vessels or vessels owned and operated by any signatory government solely for use in non-commercial activities of the government.

Camera Monitoring System

with Infrared Illuminators

Camera monitoring system provides maximum protection for any spot 24 hours a day, 7 days a week. Simple to set up, you can monitor any time from anywhere around the world. All four cameras are waterproof to IP66, compact and highly durable to achieve clear stable video, even in harsh outdoor conditions. Single cable to each camera cover all wiring needs including power so you have the freedom to place them anywhere, even if there is no electrical outlet in the area. The four night vision cameras are equipped with 30 infrared LEDs which allow them to detect and show objects as far as 50 feet, even in the darkest conditions. The built in 500 GB hard drive allows for extended recording time and is expandable to 1 TB for maximum data capacity. Please contact your local supplier about more details.

Dimensions



Main Feature:

- Smart phone ready
- 4 × infra red night vision cameras – 600TV lines of high super resolution
- H.264 high performance compression
- 8 channel digital video recorder
- Vivid 22" LCD display
- 500GB of storage USB 2.0

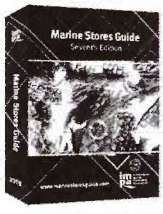
Marine Stores Guide



A reference book for international marine ships stores. This catalogue is published for ship owners, ship's officers and ship suppliers.

37 08 03	Marine stores guide	Vol.

Chart Catalogues

Many chart catalogues are available as per list below. American chart catalogues have 10 volumes. Specify volume number when ordering.

37 08 06	British admiralty chart catalogue NP-131	Vol.
07	NIMA chart catalogue No. CATP2V01U	"
08	Australian chart catalogue	"
09	Japanese chart catalogue No. 900	"
10	Canadian chart catalogue	"
11	New Zealand chart catalogue	"

Nautical Charts

Most popular charts are listed below without chart numbers.

When ordering, specify the type and number of the chart required.

	British

02	600	**04**	600

Nautical Triangles
(Set Squares)

"Inoue" and "Kent" types are available.

1. Inoue Type

A

B

Nautical Triangles, a position finder for the navigator, consisting of a danger-angle triangle (A) and a protractor triangle (B) made of transparent plastic, 36 cm.

2. Kent Type

Two 45° triangles provide an easy method for plotting position and course and doing other chart work. Using protractor scales, the triangle is easily aligned in any direction with a chart meridian. Direction is maintained as one triangle is slid along the other to the desired position. Durable, clear, vinylite. Long side length 30 cm.

CODE	Type	Function	Size mm	Unit
37 10 07	Inoue	Danger angle and protractor	360 mm	Pr.
08	Kent	Protractor	300 mm	Pc.

Chart Dividers

An instrument for chart work and other marine and engineering requirements. Made of brass with sharp steel points.

Unit Per Pc.

CODE	**37 10 11**	**37 10 12**	**37 10 13**
Length	150 mm	170 mm	200 mm

Chart Room Compasses

Extendible arm with a pencil lead point. The maximum circle diameter is 380 mm. 170 mm in overall length.

37 10 16	Compass, chart room, 170 mm	Pr.

Chart Weights

Designed to keep charts firmly in place on the chart table. Backed with soft cloth in order not to scratch or harm charts and other papers.

Unit Per Pc.

CODE	**37 10 21**	**37 10 22**	**37 10 23**
Weight	550 grm	930 grm	1,300 grm

Magnifying Glasses
(Round Readers)

Ordered by lens diameter. Available in lens sizes from 50 mm to 150 mm, but the most popular sizes are listed below.

Unit Per Pc.

CODE	37 10 26	37 10 27	37 10 28
Lens Diam.	75 mm	90 mm	100 mm

Chart Brushes

A feather brush with grip. Overall length 270 mm.

37 10 31	Chart brush, feather 270 mm	Pc.

Illuminated Magnifiers

The illuminated magnifier equipped with a wide apertured (130 mm) lens and 20 W circle lamp (option) to facilitate the examination of a document, inspection and assembling of precision instruments, etc. A wide range of models are available, but the most common types are listed below.

Flexible Arm Type Fixed Type

Main Usage		Intricate work and drafting.			Instrument works		

Flags

National Flag

Ensign

A ship hoists her National flag (Sometimes "Civil Ensign") at ship's stern to denote nationality and hoists a national flag of a country where ship called as a matter of courtesy at ship's foremasthead. Few countries, such as the United Kingdom, have national flags for land purpose and ensign for maritime purpose with different pattern and they hoist ensign as ship's own national flag at ship's stern. When ordering please do not confuse this matter.

Flags are made of warp-knitting polyester, if not any other material are specially required. The flag hook is normally separate order.

Table Flags & Stands

Flag is generally made of silk with two strings for tightening it to the stand pole. Owner's flags, etc. are available by special order. Standard size is 12 x 18 cm. When ordering, specify the flag's nationality or design. The stand for the table flag is sold separately.

37 15 65	Flag, table 12 x 18 cm	Pc.
66	Stand for table flag 400 mm	"

Repairing Bunting

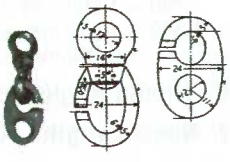
Synthetic fibre textile used for repairing flags. Available in 6 colours of black, red, yellow, white, green and blue. The standard width is 1,260 mm (4') in random lengths.

Unit Per Mtr

CODE	Colour	CODE	Colour
37 15 71	White	37 15 74	Green
72	Red	75	Yellow
73	Blue	76	Black

Flag Hooks

Made of cast brass or brass plated zinc die cast. The upper hook has a swivel and eye. The lower has an eye only with no swivel, sold individually or in sets.



37 15 81	Flag hook, complete upper/lower	Set
82	Flag hook, upper side	Pc.
83	Flag hook, lower side	"

Flag Blocks

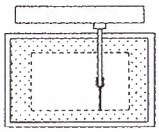
Cast brass flag line blocks covered by a semi-circle guard with an eye on top.

37 15 86	Flag block, brass, 32 mm	Pc.
87	Flag block, brass, 38 mm	"
88	Flag block, brass, 50 mm	"

Marine Electric Window Wipers

A wide variety of wipers are available in parallel and fan types. The models below are provided merely as a reference for ordering the correct wipers. For further details, ask your supplier for a product catalogue or provide a sample of the wipers you are currently using.

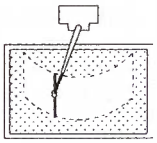
1. Parallel Type



1. Motor mounted : Inside, or outside
2. Wiping speed : Fixed, or variable
3. Heater : With heater, or without heater

1) Stroke speed is adjustable according to conditions.
2) Arm blade stops at a certain position.

2. Fan Type



1. Motor mounted : Inside, or outside
2. Wiping speed : Fixed, or variable
3. Heater : With heater, or without heater

1) Constant : Blade speed is constant
2) Variable : Blade speed is variable (Speed adjustable depending on the conditions of use)

Remarks:
Inside cabin type ... Motor is mounted inside the cabin.
Outside cabin type ... Motor is mounted outside the cabin.
With heater ... A heater is incorporated to prevent freezing.

7TH
37

3. Power Source

AC 100, 110, 115 V – Single Phase
AC 200, 220, 240 V – Single Phase

4. Motors

Parallel Type
Output 40W (Stroke Length 650 mm max.)
60W (" 1,200 mm max.)
100W (" 1,800 mm max.)
120W (" 2,600 mm max.)

Fan Type
Output 40W

5. Stroke Length - Parallel Type

400 - 650 mm (Single Blade)
700 - 1,200 mm (")
1,300 - 1,800 mm (")
2,600 mm (Twin Blade)

6. Wiping Angle - Fan Type: 30° – 110°

7. Blade Length: 600 mm

How to order: 37 - 20 - 01

Marine window wiper, electric (with the following information)

1. *Type of wiping mode (Parallel or Fan)*
2. *Power source*
3. *Wiping stroke speed (Fixed or Variable)*
4. *Wiper stroke length*
5. *Heater (With or Without)*
6. *Installing position of the motor (Inside or Outside)*
7. *Mounting position of the main frame (Upper and Lower positions of the window)*
8. *Height and width of the clear parts of the window*
9. *Length of the arm and blade*

Clear View Windshield Screens

A range of well proven and superior clear view screens of the highest quality. Unlike other similar screens it is not necessary to cut a large center hole for the fixing. These are fitted directly into the window glass by a series of fixing bolts for which a drilling template is provided.

Made of high quality, corrosion free materials. Gas tight and non-gas tight models available. Unless specified when ordering, the non-gas tight type will be supplied as standard. Suitable for glass thickness from 6 mm – 19 mm. Also specify power source voltage when ordering.

How to order: CODE

About GMDSS

All cargo ships of 300 gross registered tonnes and upwards and all passenger ships engaged on international voyages must be equipped with radio equipment that conforms to international standards as set out in the system.

The GMDSS was adopted by means of amendments to the International Convention for the Safety of Life at Sea (SOLAS), 1974. The amendments, contained in Chapter IV of SOLAS on Radiocommunications, were adopted in 1988 and entered into force on 1 February 1992 but provided for a phase-in period until 1 February 1999.

The final, global implementation of GMDSS became fully effective on 1 February 1999. On that date, all applicable ships had to comply with the GMDSS requirements in SOLAS.

Specific equipment requirements for ships vary according to the sea area (or areas) in which the ship operators. The GMDSS combines various subsystems - all of which have different limitation with respect to coverage - into one overall system, and the oceans are divided into four sea areas :

About Inmarsat

It operates a constellation of geostationary satellites designed to extend phone, fax and data communications all over the world. Inmarsat provides the space segment necessary for instant and reliable distress and safety satellite communications for the maritime community.

Inmarsat-A

The Inmarsat-A analogue mobile satcoms system provides two-way direct-dial phone, fax, telex, electronic

mail and data communications at rates up to 9.6 kbit/sec to and from anywhere in the world with the exception of the polar regions.

The service that most users access the Inmarsat system is Inmarsat-A. The first analog system of the Inmarsat system. Inmarsat-A can support high-quality direct-dial phone, telex, fax and data.

The System

An Inmarsat-A terminal is a small self-contained satellite earth station comprising, in the maritime environment, of an above deck equipment containing a parabolic antenna and electronics and a below deck equipment containing electronic units, power supplies and interface connections. Connections to telex, telephone, modem and facsimile equipment are contained in the below deck equipment.

Inmarsat ship borne terminals are referred to as a Mobile Earth Stations (MESs). In the same way Land based Earth Stations through which communications are routed are known as Land Earth Stations (LESs).

A call from an MES is routed via the Inmarsat network to an LES and thence into the national and international phone, telex and data networks. There are four Ocean Regions covering the world each with its own operational satellite

Area A1 : Within range of VHF coast stations with continuous DSC alerting available (about 20-30 miles)

Area A2 : Beyond area A1, but within range of MF coastal stations with continuous DSC alerting available (about 150 miles)

Area A3 : Beyond the first two areas, but within coverage of geostationary maritime communication satellites (in practice this means Inmarsat). This covers the area between roughly 76° North and 76° South.

Area A4 : The remaining sea areas. The most important of these is the sea around the North Pole (the area around the South Pole is mostly land). Geostationary satellites, which are positioned above the equator, cannot reach this far.

Transmission and reception of signals are co-ordinated by four network co-ordination stations (NCS), one for each ocean region;

Atlantic Ocean Region East (AOR-E)
Atlantic Ocean Region West (AOR-W)
Indian Ocean Region (IOR)
Pacific Ocean Region (POR)

Inmarsat-B

The Inmarsat-B digital mobile satcoms system provides two-way direct-dial phone, telex, facsimile and data communications at rates up to 9.6 kbit/sec to and from anywhere in the world with the exception of the polar regions.

The System

An Inmarsat-B terminal is a small self-contained satellite earth station comprising, in the maritime environment, of an above deck equipment containing a parabolic antenna and electronics and a below deck equipment containing electronic units, power supplies and interface connections. Connections to telex, telephone, modem and facsimile equipment are contained in the below deck equipment.

Inmarsat ship borne terminals are referred to as a Mobile Earth Stations (MESs). In the same way Land based Earth Stations through which communications are routed are known as Land Earth Stations (LESs).

A call from an MES is routed via the Inmarsat network to an LES and thence into the national and international phone, telex and data networks. There are four Ocean Regions covering the world each with its own operational satellite.

Transmission and reception of signals are co-ordinated by four network co-ordination stations (NCS), one for each ocean region;

Atlantic Ocean Region East (AOR-E)
Atlantic Ocean Region West (AOR-W)
Indian Ocean Region (IOR)
Pacific Ocean Region (POR)

Inmarsat-B is the digital successor to Inmarsat-A. It supports high-quality direct-dial phone, telex, fax, data, and high-speed data. Inmarsat-B is a lower cost alternative to Inmarsat-A because the system is based on modern digital satellite telecommunications technologies. The use of digital technology enables Inmarsat-B to improve on Inmarsat-A, through less power usage and improved use of satellite power and bandwidth. Inmarsat-B offers Data services in two forms: 9.6 k standard service and 64 k High Speed Data (HSD)

Inmarsat-B is a good choice for high-volume users of voice and data. In the maritime environment these include the offshore exploration industry, cruiseship operators and deep-sea shipping companies.

Inmarsat-C

The Inmarsat-C satellite system provides two-way data communications to and from virtually anywhere in the world. Inmarsat-C terminals are simple, low-cost units small enough to be hand-carried or fitted to any vessel, vehicle or aircraft.

The System

Communications via the Inmarsat-C system are data or message-based. Anything that can be coded into data bits can be transmitted via Inmarsat-C. Messages are transferred to and from an Inmarsat-C terminal at an information rate of 600 bits/sec. Frequencies are 1626.5-1645.5MHz (transmit), 1530.0-1545.0Mhz (receive). Inmarsat-C is available in all four Inmarsat satellite coverage ocean regions - Atlantic Ocean East and West, Indian Ocean and Pacific Ocean - through about 40 land earth stations (LESs). A network co-ordination station (NCS) in each region controls communications traffic.

These units come in fixed, mobile, transportable, maritime and aeronautical configurations. All configurations employ omni-directional antennas.

Inmarsat-C supports tow-way text and data messaging, data-reporting and fleet broadcast communications at a data rate of 600 bits/sec. Inmarsat-C Internet gateway allows vessels to exchange Internet e-mail without the need for special software.

Inmarsat-M

It provides digital phone, fax and data capabilities through compact terminals. Inmarsat-M is still available in all ocean regions, this service has been largely replaced by the more cost-effective Inmarsat mini-M.

Inmarsat-mini-M

The Inmarsat mini M is a digital phone, fax and data system which is packaged in very compact terminals, utilizing spot beam satellite technology. The mini M terminal form is similar in size to a small laptop computer. The terminal provides direct-dial phone, fax and 2.4 kbps data connections.

The Inmarsat mini M comes in portable, maritime and vehicle terminal configurations. There is now a multi-terminal capable of multiple installation configurations.

Inmarsat M4

Inmarsat M4 is a combination of mini-M's low-speed voice, fax, and data capabilities with Inmarsat B's high speed data feature. An additional feature of M4 is the mobile packet data service. M4 utilizes the same spot beam satellite technology as mini-M, making it very small, lightweight, and power efficient.

About Cospas-Sarsat

Cospas-Sarsat is a satellite system designed to provide distress alert and location data to assist search and rescue (SAR) operations, using spacecraft and ground facilities to detect and locate the signals of distress beacons operating on 406 Megahertz (MHz) or 121.5 MHz. The position of the distress and other related information is forwarded by the responsible Cospas-Sarsat Mission Control Center (MCC) to the appropriate SAR authorities.

The Cospas-Sarsat System provides distress alert and location data to Rescue Coordination Centers (RCCs), for 121.5 MHz beacons within the coverage area of Cospas-Sarsat ground stations (Local User Terminals - LUTs), and for 406 MHz beacons activated anywhere in the world.

GMDSS Radio Equipment
(Global Maritime Distress and Safety System)

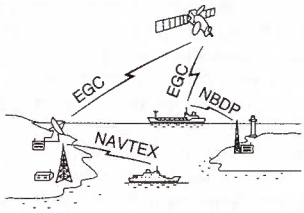
GMDSS will provide an effective search and rescue system on a global basis using the advanced technology of satellite and terrestrial communications.

The basic concept of the GMDSS is that search and rescue authorities ashore, as well as vessels in the immediate vicinity of a ship in distress, will be rapidly alerted to the distress incident so that they can assist in a co-ordinated search and rescue operation without delay.

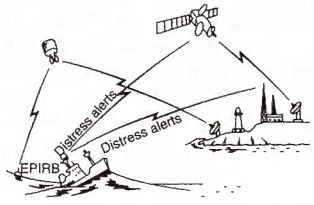
In the GMDSS, the radio equipment to be carried on a ship is determined by the ship's area of operation, as designated below.

Conventional ships will be obliged to comply with the requirements for the installment of GMDSS systems in stages during the period between February 1, 1992 and February 1, 1999 for all ships.

During normal time:
Receives navigational and meteorological warnings via EGC, NAVTEX, and MSI.



In emergency:
Transmits distress alerts through INMARSAT, DSC, and EPIRB.



Amendment 1988 to the International Convention for the Safety of Life at Sea 1974 Chapter IV "Radiocommunications" Part C – Ship Requirements

Regulation 7 Radio Equipment - General

No.	Item	Descriptions
1.1	A VHF radio installation	For transmitting and receiving (1) DSC on the frequency 156.525 MHz (CH 70) (2) Radiotelephony on the frequencies 156.300 MHz (CH 6), 156.650 MHz (CH 13) and 156.800 MHz (CH 16)
1.2	A radio installation	For maintaining a continuous DSC watch on VHF channel 70
1.3	A radar transponder	For operating in the 9 GHz band
1.4	A receiver	For receiving International Navtex service broadcast
1.5	A radio facility	For the reception of maritime safety information by the INMARSAT enhanced group calling system
1.6	A satellite emergency position-indicating radio beacon (EPIRB)	For transmitting a distress alert either through the polar orbiting satellite service operating in the 406 MHz band or, through the INMARSAT geostationary satellite service operating in the 1.6 GHz band.

Regulation 10 Radio Equipment – Sea areas A1, A2 and A3:

No.	Item	Descriptions
1.1	An INMARSAT ship earth station	For: (1) transmitting and receiving distress and safety communications using direct printing telegraphy (2) initiating and receiving distress priority calls (3) maintaining watch for shore-to-ship distress alerts (4) transmitting and receiving general radiocommunications, using either radiotelephony or direct-printing telegraphy
1.2	An MF radio installation	For transmitting and receiving on the following frequencies (1) 2,187.5 kHz using DSC, and (2) 2,182 KHz using radiotelephony
1.3	A radio installation	For maintaining a continuous DSC watch on the frequency 2,187.5 kHz
1.4	Means of initiating the transmission	For ship-to-shore distress alerts by a radio service operating either : (1) through the polar orbiting satellite service on 406 MHz (2) on HF using DSC, or (3) through the INMARSAT geostationary satellite service

(to be continued)

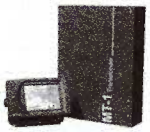
No.	Item	Descriptions
2.1	DSC, Radiotelegraphy and MF/HF radio installation	For transmitting and receiving between 1,605 KHz and 4,000 kHz and between 4,000 kHz and 27,500 kHz using, (1) DSC (2) Radiotelegraphy and (3) Direct-printing telegraphy
2.2	A radio installation	For maintaining DSC watch on 2,187.5 kHz, 8,414.5 kHz and one of the distress and safety DSC 4,207.5 kHz, 6,312 kHz, 12,577 kHz or 16,804.5 kHz
2.3	Means of initiating the transmission	For the transmission of ship-to-shore distress alerts (1) through the Polar Orbiting Satellite Service on 406 MHz, or (2) through the INMARSAT Geostationary Satellite Service
2.4	Radiocommunication, or direct-print telegraph	For transmitting and receiving general radiocommunications using radiotelephony or direct-printing telegraphy by an MF/HF radio installation operating between 1,605 kHz and 4,000 KHz and between 4,000 kHz and 27,500 kHz.

Note: Every ship shall be provided with the requirements of Regulation 7. In addition to the requirements of Regulation 7, every ship engaged on voyages beyond sea areas A1 and A2, but remaining within sea area A3, shall be provided with the requirements of Regulation 10, Paragraphs 1 or 2.

The Definition of Sea Areas

Area A1	Within range of shore-based VHF coast stations	Distance from shore: App. 20 - 30 miles
A2	Within range of shore-based MF coast stations (Excluding A1 area)	Distance from shore: App. 100 - 150 miles
A3	Within the coverage area of INMARSAT geostationary satellites (Excluding A1 and A2 areas)	Between north latitude 70° and south latitude 70°
A4	The remaining sea areas outside areas A1, A2 and A3.	Around the North Pole and the South Pole

Automatic Identification Systems



Designed to meet the SOLAS requirements Chapter 5 Safety of Navigation - in Regulation 19-2.4 to all of ships of 300 gross tonnage and upwards engaged on international voyages, and for simple installation onto a ships bridge, and with quick and easy access for repair or replacement. As well as being intrinsically tough and rugged, the system also features a sophisticated touch screen minimum display for intuitive operation. With its touch-screen LCD (Liquid Crystal Display) minimum display, this AIS transponder transmits the ship's data to other vessels as well as shore-based VTS (Vessel Tracking Systems). Utilizing various VHF channels, this is ship-borne station consists of an integral GPS engine for timing, one VHF transmitter, three VHF receivers and a computer. Interface this with an external GPS for navigation, an antenna, a gyrocompass, and an optional ECDIS (Electronic Chart Display and Information System) or ARPA (Automatic Radar Plotting Aid) display system and you have everything required to comply with the mandatory carriage requirements that comes into effect July 1, 2002.

Static and voyage related data is transmitted every six minutes, while the dynamic information is transmitted between 2 seconds to 3 minutes, depending on the ships navigational status and speed. Short messages from ships or shore stations can be inserted into the AIS message structure that contain such information as; notices to mariners, navigational warnings, weather forecast and SAR (Search and Rescue) communications etc.

Features and Functions:

- Provision of tactical and strategic VTS information. Transmitting port data, berth assignments, pilotage, tides, currents as well as shipping agency information.
- Automatic data exchange, ship-to-ship and ship-to-shore.
- Short message service (121 characters).
- Collision avoidance.
- Detection of vessels that may be hidden in radar shadows.
- Overcomes target swapping of radar contacts.
- 4 mode operation: Autonomous, Continuous, Assigned and Polled.
- Telemetry applications for navigation aids such as lighthouse or buoys.
- Reduction of global VHF voice traffic.

The AIS message is divided into a number of categories that contain specific information which include:

- Static Data: IMO number / Call sign and name length and beam / Type of ship / Location of position fixed antenna onboard the ship.
- Dynamic Data: Ships position / Time in UTC (Universal Time Coordinated) / COG (Course Over Ground)/ SOG (Speed Over Ground)/ Heading / Navigational status / ROT (Rate of Turn).
- Voyage Related Data: Ships draft / Cargo / Destination and ETA (at masters direction).
- Safety Related Messages: As needed.

Unit Per Set

CODE		37 24 01
Item		Automatic Identification System
Dimensions & Weight	Display Unit	L230 x H140 x D50 mm, 1.5 kgs
	Transceiver Unit	L270 x W350 x D75mm, 6.5 kgs
Power Supply		24V DC
Power Drain		75 watts
GPS Receiver		12 Channel
Interfaces		3 x RS232, 5 x RS422
Name of Mfr.		McMurdo Limited

Radar Transponders
(SART - Search and Rescue Radar Transponder)

At least 1 radar transponder shall be carried on each side of every cargo ship of 500 gross tons or more.

Upon receiving radio waves from 9 GHz shipboard radar, this unit sends signals to indicate its position and bearing on the screen.

37 25 01	Radar transponder (SART) 9 GHZ (with ship's registered flag)	Pc.

NAVTEX Receivers

NAVTEX is an international maritime radio telex system. For receiving navigational warnings and safety information via printing telegraphy broadcast on 518 KHz along coastal areas.

37 25 06	NAVTEX receiver 518 kHz AC 110V	Pc.
07	" AC 220V	"

Note: Please specify the ship's registered flag when ordering

Satellite Emergency Position-indicating Radio Beacons
(Satellite EPIRB)

Transmitting a distress alert either through the polar orbiting satellite service, operating in the 406 MHz band, or through the INMARSAT geostationary satellite service operating in the 1.6 GHz band.

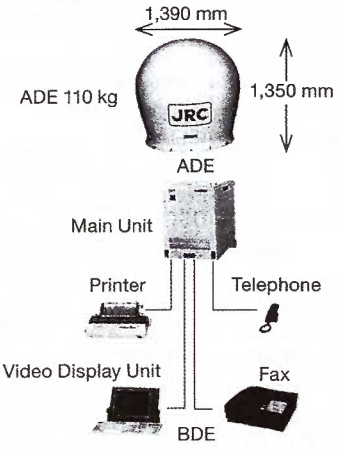
The unit will also float free if the ship sinks and will be automatically activated when afloat or activated manually in emergency. The EPIRB mentioned here is operated on 406 MHz and 121.5 MHz by the COSPAS/SARSAT satellite system which is adopted widely to the ships in the early stage of the introduction of the GMDSS. This type of EPIRB will broadcast on 406 MHz to be received by the COSPAS/SARSAT satellite and on 121.5 MHz to be used for homing by search-and-rescue vessels along with a strobe to pinpoint exact location.

It is required, when ordering, to specify the ship's registered flag, call sign, etc. to be programmed into the EPIRB as a rescue signal by the manufacturer before delivery.

37 25 11	Satellite EPIRB 406 MHz & 121.5 MHz (with ship's registered flag, etc.)	Pc.

Satellite Communication Equipment
INMARSAT B Ship Earth Station

INMARSAT stands for the organization established by The Convention on the International Maritime Satellite Organization adopted on September 3rd, 1976. The INMARSAT maritime satellite communications service permits direct ship to land and ship to ship communication via INMARSAT satellite and coastal earth stations. The INMARSAT B Ship Earth Station provides a full range of instant, quality communication services from anywhere at sea into the world public telephone, facsimile, telex and data networks. It consists of an Above Deck Equipment (ADE) and a Below Deck Equipment (BDE) which are interconnected by a single cable.



ADE: Antenna and Radome
BDE: Communication unit, Video display unit and RO printer

Specification for reference

Frequency	Transmit: 1625.5 of 1646.5 MHz
Range	Receive: 1525.0 of 1545.0 MHz
Antenna	89 cm diameter parabolic antenna
Enclosure	FRP radome (1.39 mtr diameter)
Primary Power	100/110/220 VAC ± 10% Single-phase 60 Hz ± 6%
Size & Weight	ADE: H1,350 × ϕ1,390 mm, 110 kgs BDE: Main unit H500 × W400 × D350 mm, 38 kgs Video display unit H280 × W366 × D180 mm, 4.5 kgs Printer H193 × W380 × D376 mm, 3.7 kgs

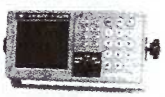
GPS (Global Positioning System) Navigators



Satellite-based radio navigation system to provide a global, all-weather, continuous 24 hour service for position fixing with high accuracy. The satellite system is available to an unlimited number of users when it is fully operational.

It is composed of 24 GPS satellites, each transmitting their own orbital data. The GPS navigator receives the orbital data from three or more GPS satellites to calculate a two or three dimension position, speed, and time.

Specifications for Reference

Accuracy Position & Speed	15 m RMS (C/A code, HDOP ≤ 2.5) 0.2 knot RMS (C/A code, HDOP ≤ 2.5)
Receiving Signal	1,575.42 MHz ± 1 MHz, C/A code
Data Display	A8 digit, 4-line LCD
Display Items	Position (Latitude, Longitude and Altitude), Course and speed, Data and time, Satellite data, Satellite signal receiving status and GPS positioning period, Range, Bearing and time to go, and Course deviation
Power Supply	100-1, 15/220-240V, AC 50/60 Hz, 10-45V DC, 12W
Size & Weight	Receiver: H120W243 x D116 mm, 2.7 kgs Antenna : H229 x 50 mm dia, 0.4 kgs

DSC (Digital Selective Call) Watch Receivers

DSC is a technique using digital codes which enables a radio station to establish contact with, and transfer information to another station or group of stations complying with the relevant recommendations of the International Radio Consultive Committee.

Required by the 1974 SOLAS regulation. The 1988 amendment to Regulation 7 requires the installation of one VHF receiver and Regulation 10 requires the installation of an MF receiver for maintaining a continuous DSC watch.

Specifications for Reference

Frequency	156.525 MHz VHF (CH-70)	2,187.5 kHz MF
Power Supply	AC 110/220 Volt	
Size & Weight	H145xW140xD145 mm 1.5 kgs	H49xW480xD290 mm 3 kgs

VHF Radio Telephones

Designed to provide ship-to-shore, ship-to-ship and on board communications, allowing the ship's crew to easily obtain emergency, safety, navigation, weather and business information.

Equipped with all ITU channels, USA, USCG, Canadian and private channels. Continuous scanning watch on channel 16.

Specifications for Reference		
Frequency Range	Transmit Receive	155.50 - 159.50 MHz 155.50 - 159.50 MHz (Simplex) 160.60 - 163.50 MHz (Duplex)
Channel Capacity		57 ITU/USA channels, 4 Canadian channels, 9 weather channels, Up to 99 private channels
Mode of Operation		Simplex or Duplex
Power Supply		13.8V DC
Size & Weight		H290 × W240 × D145 mm, 6.5 kgs

37 25 41	VHF radio telephone 155.50 - 159.50 MHz simplex mode	Set
42	" duplex mode	"

MSI (Marine Safety Information) Receivers

(E.G.C. Receivers)

Automatic reception of shore-to-ship distress alerts including MSI (Marine Safety Information), such as navigational and weather warnings, and routine weather information and commercial communication services by the INMARSAT Enhanced Group Calling System. Consisting of EME (Externally Mounted Equipment), IME (Internally Mounted Equipment) and OPU (Operation Panel Unit) with a small built-in printer.

EME OPU IME

Specifications for Reference

Frequency	HF MSI 8 channels
Power Supply	AC 110 or 220 Volt
Size & Weight	EME : H450 × 110 mm Dia., 2.8 kgs OPU : H170 × W224 × D100 mm, 2.0 kgs IME : H50 × W210 × D280 mm, 3.0 kgs

47	" AC 220V	"

Magnetic Compasses

A compass which measures direction by a needle which continuously seeks the magnetic meridian.

SOLAS Regulation requires ships of 150 gross tons or more to be fitted with a magnetic compass.

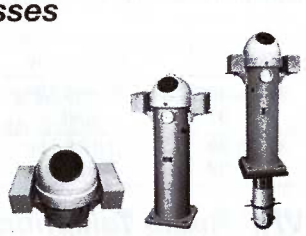

Table Type Stand Type Projector Type

Here are some types of magnetic compasses for your reference. There are several sizes of compass card diameter, according to the type of magnetic compass and the manufacturers.

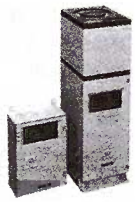
37 25 51	Magnetic compass (With further information)	Set

Azimuth Mirrors

A measuring instrument used with the magnetic compass. For obtaining the azimuth of observed objects by observing an object's reflection in a mirror or prism, pivoted in the centre of glass over a compass card.

37 25 53	Azimuth mirror (With manufacturer's name and model of Magnetic Compass)	Set

Gyro Compasses



Ships of 500 gross tons or more constructed on or after September 1st, 1984 and ships of 1,600 gross tons or more constructed before September 1st, 1984 shall be fitted with a gyro compass.

The gyroscope is mounted, ballasted and fitted so that it's north south line always remains within the meridian through the influence of the earth's diurnal revolution. Can be used as a sensor for the following types of navigation devices : Autopilots, Radar, Collision avoidance systems, Satellite navigation systems, Direction finders, etc. Here are some specifications as a reference when ordering.

Specifications for Reference		
Master Compass	Follow-up accuracy : 0.1° Follow-up speed : 360°/15 sec. Gimbal freedom angle : ±45° Range of speed error correction : 0-40 knot/0-70°	
Power Supply	Main supply voltage	AC 110V/115/220/380 440V 3P 50/60 Hz
	Emergency supply voltage	DC 24V, 2.5A

37 25 56	Gyro compass (With further information)	Set

Radars

Electronic system by which the bearing and distance of an object are found by the emission of a radio pulse.

An object's bearing and distance can be measured by observing the direction from which the pulse returns and the time elapsed from when it was sent.

Ships of 500 gross tons or more constructed on or after September 1st, 1984 and ships of 1,600 gross tons or more constructed before September 1st, 1984 shall be fitted with a radar installation.

From February 1st, 1995, the radar installation will be capable of operating on the 9 GHz frequency band. In addition, cargo ships of 300 gross tons or more, when engaged on international voyages, shall be fitted with a radar installation capable of operating on 9 GHz frequency band.

Specifications for Reference	
Peak Power	25 kW
Frequency	9,410 ± 30 MHz
Range Ring	0.25/0.05, 0.5/0.1, 0.75/0.25, 1.5/0.25, 3/0.5, 6/1, 12/2, 24/2, 48/8, 120/20 nm
CRT	21-inch Raster scan
Power Supply	100/110/115V AC, 50/60Hz, 1-P (7 ft) 200/220/230V AC, 50/60Hz, 3-P (9 ft)

(to be continued)

Size & Weight	H1,270 x W535 x D575 mm, 100 kgs

Remark: The above specifications are listed as a reference only. Please contact with a representative about which required features are available from various manufacturers.

37 25 61	Radar (With further information)	Set

Automatic Radar Plotting Aid (ARPA)
(Collision Avoidance System)

Automatic radar plotting aids are required for ships of 10,000 gross tons or more, constructed on or after September 1984, and tankers constructed before September 1st, 1984.

It is designed to be operated as a separate or integral part of marine radar equipment. It will give precise target information to avoid collision in vector and numeric form.

There are various models world-wide. Please ask a representative about detailed specifications. Listed below are some specifications for your reference.

Specifications for reference

Peak Power	25 kW
Frequency	9,410 ± 30 MHz
Scanner Length	7 feet
Target Acquisition	Automatic and/or manual
Target Tracking	Automatic up to 40 targets
CRT Display	28 inch (Effective dia.: 340 mm)
Radar Range	0.25, 0.5, 0.75, 1.5, 3, 6, 12, 24, 48, 120 mm
Range/bearing Measurement	VRM 1/2 and electronic bearing line (EBL)
Warnings	Min. CPA : 0-9.9 min. in 0.1 step Min. TCPA: 0-99 min. in 1 step
Power Supply	100/110/115/200/220V AC, 50/60 Hz
Size & Weight	H1,278 x W700 x D875 mm, 135 kgs

Note: CPA = Closest Point of Approach
TCPA = Time of Closest Point of Approach

37 25 63	Automatic radar plotting aid (With further information)	Set

Navigation Systems

Various kinds of navigation systems are available in the world. Some major navigational systems are produced here for your reference.

Major Navigational Systems

Systems	Service Area	Effective Range	Accuracy
Loran C (100 kHz)	Japan/Korea U.S.A. /Canada/North Sea Mediterranean	1,500 miles (Daytime)	30 - 500 mtr
Loran A (1.75-1.95 MHz)	Japan	700 miles (Daytime)	0.25 - 0.5 miles
Decca (70-130 kHz)	Europe/Japan/etc.	350 miles (Daytime)	20 - 100 mtr
Satellite Navigator (150, 400 MHz)	World-wide	World-wide	0.1 mile
GPS (1,575.42 MHz)	World-wide	World-wide	100 mtr

Loran C Navigators

A long range aid to navigation. Master and slave stations transmit synchronised signals which can be received by a special receiver on board the ship.

Since radio signals travel at a known speed, the difference in time at which the signals arrive at the ship can be converted into distance.

Signals from two pairs of Loran stations can thus fix the position of a ship.

Specifications for reference

Station Tracking	Master and all slave stations
Display	Fully automatic LAT/LON
Memory Capacity of Waypoints	50
Readouts	Course/Speed, Bearing/Distance and Time-to-go
Frequency	100 kHz
Power Supply	10 - 40V DC, 17W, 100/115/220V AC
Size & Weight	H142 x W271 x D314 mm, 4 kgs

Decca Navigators

A radio aid for fixing positions up to 300 miles or more from the transmitter.

A master transmitter ashore controls a chain of other transmitters. A ship provided with a receiver can receive a transmitted signal by measuring the phase-difference of the Decometers.

The numbers indicated on the Decometers refer to coloured lattice lines printed on special charts. The ship's position is symbolized by where the numbered lines cross each other on the chart.

Echo Sounding Devices

For ships constructed before May 25, 1980, weighing greater than 1,600 gross tons and for ships constructed after May 25, 1980, weighing greater than 500 gross tons. All vessels falling under this classification which sail international routes must be fitted with an echo sounding device.

Electrically operated instrument that emits a sound from vessel's submerged surface and then measures and records the time interval which passes before the echo returns.

The most popular model is shown here. Please ask for further information and brochures of various models available from local manufacturers when required.

Specification for reference

Depth Range	0 - 450 mtr, 3 ranges
Max. Sounding Depth	450 mtr
Frequency	50 kHz or 200 kHz
Recording Paper	Dry type, 150 mm width x 15 mtr
Power Supply	100/115/220V AC, 50/60 Hz
Size & Weight	H380 v W360 x D210 mm, 16 kgs

37 25 71	Echo sounding device (With further information)	Set

Direction Finding Apparatus

Ships constructed on or after May 25, 1980 exceeding 1,600 gross tons or more shall be fitted with direction finding apparatus.

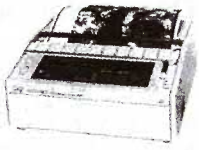
Automatically indicates ships true bearing by reading frequencies from two or more radio beacon broadcast stations or transmissions from other vessels.

Specification for reference

Operation	Automatic/Manual
Spot Frequencies	500 kHz, 2,091 kHz and 2,182 kHz
Reception Bands	Band of beacon 1: 200-340 kHz 2: 340-580 kHz Marine band 1.6-28 MHz
Mode of Reception	A1A, A2A, H2A, A3E, H3E & J3E
Power Supply	100/110/115/200/220/230V AC
Size & Weight	H298 x W489 x D428 mm, 25 kgs

37 25 76	Direction finding apparatus (With further information)	Set

Weather Facsimile Receivers



Weather facsimile service is provided world-wide, and designed to meet the WMO (World Meteorological Organization) standards.

The most popular model is shown here. Please ask for further information and brochures of various models available from local manufacturers when required.

Specification for reference

Mode of Receiving	Fully automatic, Semi automatic, Manual and Programmed
Recording	Solid-state scanning by thermal head
Effective Scanning line	296 mm (12 inches)
Scanning Speed	60, 90, 120 and 240 spm
Mode of Emission	F3C
Frequency Range	LF: 80.0 - 160.0 kHz HF: 2 - 24.9999 MHz
Frequency Display	6-digits LED
Power Supply	80-132V, 160-264V AC, 50/60 Hz
Size & Weight	H158 x W400 x D435 mm, 18 kgs

37 25 81	Weather facsimile receiver (With further information)	Set

Personal Location Beacons

Featuring a built-in GPS receiver (Global Positioning System) combined with a 406 MHz transmitter and 121.5 MHz homing signal. In the event of an emergency, an alert signal is transmitted to Cospas-Sarsat satellites and forwarded to a secure co-ordinate centre within typically 3 minutes. The built-in GPS receiver will provide latitude and longitude co-ordinates to give a position to within typically 30 meters anywhere in the world.

It comes complete with lanyard and designer carry case to enable users to keep the personal location beacon safely attached at all times.

Features
- Built-in 12 channel GPS receiver.
- Geostationary coverage > 75°N - 75°S.
- Global alert to Cospas-Sarsat polar orbiting satellites.
- 406 MHz transmitter.
- 121.5 MHz homing frequency.
- GPS cold start time to fix typically less than 3 minutes.
- Positional accuracy to typically within 30 meters.
- GPS transmitted position update rate every 20 minutes (as permitted by Cospas Sarsat).
- GPS reacquisition time, typically less than 60 seconds.
- Complete with lanyard and designer carry case.
- User replaceable battery pack.

37 28 11	Personal location beacon with built-in GPS receiver	Set

Name of Mfr.: McMurdo Limited

Wristwatch Manoverboard Beacon

The light weight, easy to wear waterproof, multi-function wristwatch has a built-in radio transmitter which when activated either manually or automatically, immediately transmits a distress tone on the international emergency search and rescue frequency (121.5 MHz). The distress signal transmitted can be detected by a surface rescue vessel or helicopter, which can accurately home in to the watch using direction-finding equipment. The unit is a working watch, fully waterproof to a depth of 50 mtr and can be set to manual or automatic activation on immersion in water, making it functional and easy-to wear manoverboard transmitter for crew members.

Features
- Automatic activation with manual on/off override.
- Chronograph 1/100 second with lap/split control.
- Alarm with chime.
- LCD backlight.
- Water resistant - tested to a depth of 50 mtrs.
- Transmission activation audible and visual LED alarms.
- Up to 8 hours transmission time.
- Range to surface vessel up to 1 nautical mile.
- Range to SAR helicopter up to 5 nautical miles.

Unit Per Set

CODE	37 28 15
RF Transmitter Frequency	121.5 MHz (121.65 MHz Training)
Class of Emission	A3X
RF Power	–25 dBm
Frequency Error	+/– 3.5 kHz
Duty Cycle	100%
Modulation Type	Sweep downward from 1.5 kHz to 650 Hz with sweep repetition of 2 Hz
Modulation Duty-Cycle	50%
Voltage	3.2 volts max. (CR2 battery)
Current Draw	20 μ Amps Quiescent 110 mAmps Transmitting
Weight including Strap	81 grm
Name of Mfr.	McMurdo Limited

Direction-Finding Equipment
for Wristwatch Manoverboard Beacon

Emergency Receiver:

High quality manoverboard surveillance system operating on the international 121.5 MHz emergency frequency. Used in conjunction with the Wristwatch Manoverboard Beacon this system will give

all crew members the confidence of knowing that no one should go overboard undetected.

Features
- 2 Reception modes.
- Dual frequency reception: 121.5 MHz emergency / 121.65 MHz training.
- 8 level signal strength indicator.
- Built-in alarm.
- Auto squelch on/off.
- Alarm reset function.
- Relay contact output (i.e. GPS or contacts).
- Continuous self-diagnostic fault indicator.
- 12/24 volt DC power input.

Unit Per Set

CODE	37 28 17
RF Receiver Frequency	121.5 MHz (121.65 MHz Training)
Modulation Type	Sweep downward from 1.6 kHz to 300 Hz
Audio Output	8V max. (Speaker > 8 ohm)
Relay Contact (NOC)	Floating, carrying cap 0.5A/10W max.
Voltage	12/24V DC (± 20%)
Current Draw	400 mAmps receiving alarm + ext. speaker
Operational Temperature Range	–20°C ± 55°C
Water Proof Rating	IP65
Weight including Strap	350 grm
Name of Mfr.	McMurdo Limited

Direction Finder:

Used together with Wristwatch Manoverboard Beacon, this direction finder is the latest state-of-the-art unit using the international 121.5 MHz emergency frequency or the 121.65 MHz training frequency. A bearing relative to the vessels head is displayed along with an incoming signal strength indicator. The visual and audible alarm provides easy-to follow information, allowing the operator to quickly search for and rescue the man overboard.

Features
- 360 degree incoming signal reception.
- 4 level incoming signal strength indicator.
- Built-in audible alarm.
- Output for external speaker.
- 2 speaker modes.
- Dual frequency reception: 121.5 MHz emergency / 121.65 MHz training.
- User adjustable squelch.
- 12/24 Volt DC power input.

ECDIS
(Electronic Chart Display and Information System)

Required by IMO Resolution A.817 (19), IEC 61174, and related IHO (International Hydrographic Office) standards. ECDIS is a real-time geographic information system and accepted as equivalent to paper chart for continuous monitoring of the ship's position using several positioning systems.

It should be type-tested and approved by an official authority and should be used only together with official data and regular updates. Useable charts are derived from an official ENCs (Electronic Navigational Charts) database. This displays electronic charts, navigation lines, ARPA data, user-defined information and offers vessel route planning and continuous monitoring. Accurate position, depth, alarm data and other warning facilities assure the vessel of reliable route monitoring and contributes greatly safer to vessel navigation and efficiency as well as reduced operator workload when compared to using traditional paper charts.

The system is composed of monitor and processor unit. Please contact your local supplier for further information.

Unit Per Set

CODE	37 28 31
Monitor	21" high-resolution colour CRT
Processor Unit	
Media	Windows NT
Useable Charts	IHO/S-57 V.3 Vector chart ARCS raster chart C-MAP Vector chart (option)
Presentation Modes	True motion North-up, Relative motion North-up
Display of Data	
Own Ship	Position, SMG, CMG, Heading
Route	Planned route, Monitored route
ARPA Targets	Range, bearing, speed, course, CPA and TCPT
Others	EBL, VRM, parallel index line, cursor position, navigation and pilot data notebook
Interface (IEC61162-1)	
Gyrocompass	1 analog or 1 serial
SDME (Speed Log)	Single-pulse type or serial
EPFS	Up to 2 serial inputs 5 max. with A-Adapter
Water Depth	Serial input
Wind Sensor	Dual axis-serial input
ARPA/Radar	Serial

Remark: Above specifications are reference purpose only.

Voyage Data Recorder

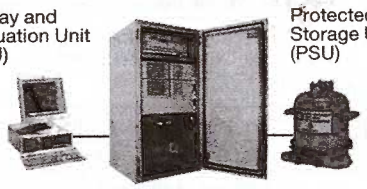
Designed to meet the requirements of IMO performance standard A. 861 (20); (1) Passenger ships constructed on or after July 1, 2002, (2) Ro-Ro passenger ships constructed before July 1, 2002 not later than the first survey on or after July 1, 2002, (3) Passenger ships other than ro-ro passenger ships constructed before July 1, 2002 not later than January 1, 2004 and (4) Ships other than passenger ships of 3,000 gross tonnage and upwards constructed on or after July 1, 2002.

Voyage Data Recorder is consist of Data Collection Unit (DCU), robust protective data storage capsule and replay and evaluation unit. It records conversations at the navigation bridge, VHF radio communication, speed , course and other information on the ship's condition for 12 hours. Records

and plays back important voyage navigation, machinery and environmental data for post-incident evaluation and crew training.

Provides the following data recording solutions;

- Conversation and communication recording,
- Radar recording,
- Vessel motion response monitoring/recording,
- Vessel performance and trends analysis,
- Stand-alone and integrated bridge configulations.
  - Data Collection Unit
    Interfaced with ship equipment and collects, processes and stores all relevant ship's data for a period of 12 hours as required by IMO A.861.
  - Protected Storage Unit
    Stores data received from the DCU on a solid state recording medium. The PSU is calamity resistant by means of a protective capsule. It is located on top of the ship's superstructure in order to provide easy access from outside.
  - Relay and Evaluation Unit
    Used to reply and evaluate previously recorded time synchronized data. The REU is in addition an excellent tool for training purposes. Data stores in the PSU can be downloaded through the DCU for replay or long-term storage of data.



Data Collection Unit (DCU)

Recording Paper
for Navigational Equipment

As a wide variety of recording paper for use with different kinds of navigational equipment are available, please specify the name of the equipment, the type, model number, manufacturers name and any other information regarding the applications of the paper.

Introduction to IMPA

International Marine Purchasing Association

Founded in 1978 by a group of senior purchasing executives, IMPA was formed with the aim of promoting co-operation and understanding between the purchaser and supplier and to improve the practise of marine purchasing in all applied forms.

Today IMPA offers a wide range of benefits to its membership and has grown in its reputation as the global association for purchasing and supply personnel.

IMPA has a wide membership base of companies and individuals from all over the world, including many of the leading ship owning and managing companies as well as major marine manufacturers and ship suppliers.

IMPA Aims and Objectives

- To increase the professional status of the associations' members.
- To support purchasing management and the efficiency of ship managing, operating and owning companies and their suppliers.
- To promote and facilitate worldwide co-operation between personnel engaged in purchasing and supply within the marine industry.
- To represent common interests of purchasing professionals, suppliers, trade and professional associations and public authorities.
- To work for better understanding of the importance of efficient supply management and of the value of purchasing expertise in reducing a vessel's operating expenses.
- To support the news systems or procedures which will benefit all organisations involved and working within the purchasing and supply function.
- To contribute to the enhancement of ethical and professional business standards in the marine industry.

"**IMPA;** building solid foundations for purchasing and supply professionals"

impa International Marine Purchasing Association

Our offering to you

IMPA membership offers a range of benefits which give access or discounts on IMPA products and services, but ultimately IMPA membership delivers value.

Within the current procurement environment, IMPA membership provides critical value in two ways. Firstly, IMPA membership offers a range of tangible benefits providing access or discounts to IMPA products and services. In addition, IMPA membership offers essential and valuable insight and knowledge that comes from being part of an industry network of experts and thought-leaders.

These two IMPA value streams exist within the IMPA Five Pillars.

IMPA'S FIVE PILLARS CONSIST OF THE FOLLOWING:

The Marine Stores Guide (MSG) Product Portfolio
IMPA Members receive exclusive discounts and offers for the MSG product portfolio, which provides a universal coding system to facilitate communication between crews, owners, operators and suppliers.

Education and Training
IMPA is committed to giving members access to training programmes developed in association with established industry organisations, and encouraging professional development.

CSR and the IMPA ACT Programme
IMPA engages in industry initiatives, such as the IMPA ACT CSR programme, which represent the best interests of the industry and those engaged within the purchasing and supply sector.

Networking and Events
IMPA Members benefit from discounts on a whole host of networking opportunities, including our premier exhibitions and year-round professional development events.

Knowledge and Insight
IMPA membership provides access to a comprehensive portfolio of papers and guides on a range of business and procurement subjects, plus exclusive access to our industry-leading publication, Marine Trader.

IMPA's **five** pillars

the foundations on which to build a bright future

List of Recommended Medicines and Equipment by International Medical Guide for Ships - Third Edition

All ships subject to the regulations established by the international Maritime Organization (IMO) and International Labour Organization (ILO) must have adequate medical supplies, that are periodically inspected, kept in good condition, and are ready for use whenever required. The quantities needed on board will depend on the duration and destination of the voyage, the number of crew members, and the nature of the cargo.

The medicine chest is designed to hold a range of medicinal products needed for the most common medical emergencies likely to occur on board ship, however distant it is from shore.

Different communities have different methods of treatment. Items specific to national requirements and customs can be added to the list of recommended medicines and medical supplies provided at the end of this chapter. The added items, however, should not be used to replace any of the recommended medicines or medical supplies on the list, but should be integrated into the list together with detailed information about their actions and unwanted effects.

The list assumes that on-board medical treatment is dispensed by an officer working under the responsibility of the master. Ships with a doctor on board may carry an expanded range of medicines and other medical equipment and supplies.

Some of the listed medicines are available only on prescription. As regulations differ from country to country, no advice is given here about obtaining these medicines.

Guidance to the International Medical Guide for Ships 3rd edition: Interim advice regarding the best use of the medical chest for ocean-going merchant vessels without a doctor onboard

Joint Statement of WHO Collaborating Centres for the Health of Seafarers and the International Maritime Health Association – 2009 Version

Background

The WHO International Medical Guide for Ships (IMGS) was first published in 1967. The IMGS has widely been used in the maritime world. The second edition, written in 1988 was recently replaced by the third edition in 2007. Immediately after the publication of the current IMGS a discussion on the best use of the tool and on further needs developed among experts from the WHO Collaborating Centres for the Health of Seafarers and the International Maritime Health Association.

During a workshop of the INTERNATIONAL MARITIME HEALTH ASSOCIATION (IMHA) in Athens, Greece, November 14th – 15th 2008 the concerns were summarized as follows: "Flag states that do not have national requirements for the contents of the medical chest have in the past relied on a list that has been provided by WHO in the International Medical Guide for Ships (2nd Edition, 1988). This list provided information on the quantities to be carried on board. It is not a formal international instrument but the Guide is noted as a source of information in the non-statutory part of the relevant ILO Convention. Port State Control Inspectors use the IMGS list as the minimum requirement for medical supplies. The medication list is now very out of date and when WHO recently published a new edition of the Guide it included updated lists of recommended medications that were derived from the WHO Essential Medications List and of medical equipment taken from The Inter-agency Emergency Health Kit 2006. While this was a rational approach for the WHO to ensure that well validated treatments were available it did not take into account the need for remedies for minor ailments at sea – the sort that can impair ability to work without being dangerous, nor did it cover all the medical equipment that was needed in maritime situations. More significantly WHO did not consider that they could specify quantities of medications to be carried as there was a lack of information on use and effectiveness of medications at sea. In the absence of such data WHO considered that quantities should be related to voyage pattern and to political / managerial decisions rather than being stated by WHO. This lack of specification is not causing immediate problems where the flag state of the ship has its own national regulations or guidelines but it has led to great difficulties for maritime pharmacists called on to check and restock medical chests on ships from countries, including many of those with major open ship registries, that have no national lists. Pharmacists cannot continue to work to the outdated list and quantities in the old International Medical Guide, while they have no benchmarks for quantities required from the new one, nor the authority to make consistent decisions on the quantities to supply".

WHO Collaborating Centres for the Health of Seafarers and IMHA (the International Maritime Health Association) agreed that there are a number of topics where improvements are needed. The aim is to produce a knowledge-base to specify the contents of medical chests and the medical textbook. While this is a long-term approach requiring research efforts it was also agreed upon the need to produce an interim guidance on the medical chest to the current users of the IMGS even in the absence of further evidence. Symptom-oriented algorithms for diagnosis and treatment as a supplement to the current IMGS 3rd edition will follow soon.

In this paper the authors, who are experts from the International Medical Health Association and the WHO Collaborating Centres for the Health of Seafarers publish recommendations to the medical chest as given in the IMGS 3rd edition. This is an interim advice to be available to ship-owners, -masters and maritime authorities and pharmacists for use on merchant ships not carrying a medical doctor of those flags that do not follow the EU Directive 92/29[5] and do not have national requirements. The readers and users of the interim advice need to be aware that the expert group does not judge on the content of the current list as published by the World Health Organization in the 3rd edition of the IMGS.

[5] Council Directive 92/29/ eec of 31 March 1992 on the minimum safety and health requirements for improved medical treatment on board vessels.

The aim of the Interim Advice as given below **is**

- to provide an aid for decision making for quantities required for seagoing and coastal vessels.
- to add items named in the textbook of the IMGS 3rd edition but missing in the list of medicines or equipment.
- to add page numbers from the medical textbook to the list of medicines for easier use.

The Interim Advice as given below **is not**

- mandatory for ship-owners, suppliers or port health authorities. It is to the flag states responsibility to specify national requirements in a legally binding way.
- meant to substitute a qualified medical consulting. Owners and operators carry the final responsibility for the content of the medical chests on board of the ship. Owners and operators will need to seek qualified medical consulting for the content and quantities carried on board. The particularities of the voyage will need to be considered by the consultant, like travel to malaria risk areas.

The authors of the Interim Advice are solely responsible for the content of all additions made to The List of Recommended Medicines and Equipment of the International Medical Guide for ships 3rd edition, pages 430-461. We appreciate the comments of the maritime community to this publication which will be continuously revised. All comments and suggestions need to be directed to the corresponding author. Please mail to Clara.Schlaich@jhu.edu

How to use the proposed list of recommended medicines and equipment of the International Medical Guide for Ships 3rd edition, pages 430-461

- The Interim Advice is **only** to be used in conjunction with the International Medical Guide for Ships 3rd edition[2] as published by WHO in 2007.

  [2] International Medical Guide for Ships (3rd Edition), World Health Organization, Geneva. 2007.

- All items suggested from WHO in the original list on pages 430 to 461 are included.
- Any additions to the original list (items and comments) are made visible by the use of italic letters. Reference pages from the medical textbook to the list of items which justify the additions are given.
- Running numbers have been given to the list of medicines and equipment including added items.
- Drugs, forms, books and equipment which are mentioned in the textbook but have not been displayed in the list of medicines are added to the list in alphabetical order.
- Reference pages to the medical textbook are given for all items to ease the use of the list.
- If an item may be omitted under special circumstances this is mentioned in italic letters in the last column.
- Suggestions for quantities have been included. Quantities are calculated on the basis of the following assumptions: Ocean-going merchant vessels without a doctor onboard. Maximum duration of travel of 3 weeks. Crew sizes of 10, 20, 30 or 40 persons.
- For merchant vessels without a doctor onboard engaged in coastal trade or going to nearby foreign ports, and not more than 24 hours away from a port of call, for fishing boats and private craft: Quantities may be adapted or omitted on the advice of a qualified medical practitioner or pharmacist with regards to the destination, medical facilities ashore, number of crew members and cargo.
- **For dosage, contra-indications, unwanted effects, radiomedical advice and further remarks the users needs to refer to original text of the IMGS 3rd edition.**
- Recommended quantities will not always reflect the standard packs in a given country. In this case the recommendation is for the nearest available dispensing sales pack above the minimum required quantity.
- Owners and operators may substitute exact equivalents on the advice of a qualified medical practitioner or pharmacist, provided they are satisfied that an equivalent level of treatment is assured.
- Specific items will not be available in certain countries, for example Chlorpyrifos was banned in the European Communion (Directive 98/8 eec of March 16th 1998). The pharmacist will have to supply an analogous drug in corresponding quantities. The same is true for items which have transport restrictions and can not be delivered locally.
- For ships carrying dangerous goods according to the IMDG Code[6] : Medicines and equipment already available in the IMGS list may be counted toward the Medical First Aid Guide (MFAG) numerical requirement, if appropriate.

  [6] Medical First Aid Guide (MFAG) for use in accidents involving dangerous goods. International Maritime Organization, London, 2004.

Ocean-going merchant vessels without a doctor onboard.
Maximum duration of travel of 3 weeks.
Crew sizes of 10, 20, 30 or 40 persons.
Only to be used in conjunction with the International Medical Guide for Ships 3rd edition

Running numbers are given to the alphabetical list of medicines and equipment. Items which have been added by authors appear in alphabetical order and are written in italic letters.	Quantities for the recommended minimum number of items for ocean-going vessels are based on an estimated 3 weeks inventory for a crew complement of 10 to 40 persons.	Comments in italic letters refer to added items which are mentioned in the textbook but have not been displayed in the list of medicines. Remarks on items which may be omitted under special circumstance are given. For dosage, contra-indications, doctor consulting, unwanted effects and remarks refer to IMGS 3rd ed. p.430-461 and textbook.

List of Recommended Medicines

Item No.	CODE	Recommended Item, Dosage form, Strength	*Per 10*	*Per 20*	*Per 30*	*Per 40*	Indications (on board ships) *Added comments*
1	**39 17 01**	Acetylsalicylic acid, 300 mg tablet	*100*	*200*	*300*	*400*	- High dose (600-900 mg); to reduce pain, fever, inflammation. - Low dose (100-150 mg); to inhibit formation of blood clots in angina pectoris, myocardial infarction stroke. *See pages 17-25 and 113-116, 133-135, 137, 138.*
2	**39 17 02**	Aciclovir 400 mg tbl.	*35*	*35*	*70*	*70*	- Treatment of primary or recurrent herpes simplex virus infection; - May be useful for severe varicella and herpes zoster infection (doctor should be consulted). *See pages 125-126, 198-199, 256.*
3	**39 17 03**	Adrenaline 1:1000 ampoule 1 ml = 1 mg	*10*	*10*	*10*	*10*	- To raise blood pressure in anaphylaxis. - To dilate airways in severe asthma or anaphylaxis. *See pages 145-147.*
4	**39 17 04**	Amethocaine *(Tetracaine hydrochloride)* 0.5% eye drops, single-use vial 1 ml	*20*	*20*	*20*	*20*	For eye examination and procedures. *See pages 33-34.*
5	**39 17 05**	Amoxicillin + clavulanate tablets 875 mg/125 mg	*15*	*30*	*30*	*45*	- To treat infections responsive to this antibiotic. *See pages 7-776, 140-144, 181-183, 204, 216-217, 221-223, 262 and 288.*
6	**39 17 16**	*Antimalarial prophylaxis (Prevention) tablets*	*Quantity dependent of crew number, risk of acquiring malaria in a given port and duration of dwell in risk area. Seek medical advice.*				*Prophylaxis and treatment of Malaria.* *See pages 265-269.*

(to be continued)

Item No.	CODE	Recommended Item, Dosage form, Strength	*Per 10*	*Per 20*	*Per 30*	*Per 40*	Indications (on board ships) *Added comments*
7	**39 17 06**	Artemether ampoule 1 ml = (80 mg)	*5*	*5*	*5*	*5*	Treatment of severe malaria. *See pages 265-269.* Required only for voyages to areas where malaria transmission is a risk.

List of Recommended Equipment

Item No.	CODE	Recommended Item	Per 10	Per 20	Per 30	Per 40	Category Added Comments
1. RESUSCITATION EQUIPMENT							
1.1	**39 18 01**	Portable oxygen set, complete, containing;	*1*	*1*	*1*	*1*	Appliance for the administration of oxygen. *See pages 4-5.*
1.1a	**39 18 02**	1 oxygen cylinder, 2 ltr/200 bar	*1*	*1*	*1*	*1*	*Ready to use. See pages 4-5.*
1.1b	**39 18 03**	1 spare oxygen cylinder, 2 ltr/200 bar	*1*	*1*	*1*	*1*	*See pages 4-5. If no additional equipment from the MFAG on board consider to increase amount of oxygen to 4 x 10 ltr.*
1.1c	**39 18 04**	Pressure regulating unit and flow meter with tubes such that ship's industrial oxygen can also be used	*1*	*1*	*1*	*1*	*See pages 4-5.*
1.1d	**39 18 05**	3 disposable face masks of choice: including simple face mask and non-rebreathing mask	*1*	*2*	*3*	*4*	*See pages 4-5.*
1.2a	**39 18 06**	Guedel airway (Mayo-tube): size medium	*1*	*1*	*1*	*1*	Oropharyngeal airway, *See pages 4-5, 315.*
1.2b	**39 18 34**	Guedel airway (Mayo-tube): size large	*1*	*1*	*1*	*1*	Oropharyngeal airway, *See pages 4-5, 315.*
1.3a	**39 18 07**	Manual aspirator to clear upper airways	*1*	*1*	*1*	*1*	Mechanical aspirator, *See pages 4-5.*
1.3b	**39 18 35**	Catheters for aspirator	*2*	*2*	*2*	*2*	Mechanical aspirator, *different sizes; See pages 4-5.*
1.4	**39 18 08**	Ambubag or equivalent: supplied with small, medium and large masks	*1*	*1*	*1*	*1*	Bag and mask resuscitator *including oxygen reservoir bag and oxygen tubing, See pages 4-5.*
1.5	**39 18 09**	Brook Airway, Lifeway, pocket face mask or equivalent	*1*	*1*	*1*	*1*	Cannula for mouth-to-mouth resuscitation, *See pages 4-5.*
2. DRESSING MATERIAL AND SUTURING EQUIPMENT							
2.1	**39 18 10**	Assorted wound-plaster or plaster strips, water resistant – *slim and broad*	*200*	*200*	*200*	*200*	Adhesive dressings.
2.2a	**39 18 11**	Sterile gauze compresses, 5 cm × 5 cm, sterile	*50*	*50*	*100*	*100*	Sterile gauze compresses.
2.2b	**39 18 12**	Sterile gauze compresses, 10 cm × 10 cm	*50*	*50*	*100*	*100*	Sterile gauze compresses.
2.3	**39 18 13**	Gauze roll, 5 cm and 60 or 90 cm×100 m, non-sterile	*1*	*1*	*1*	*1*	Gauze roll. *60 cm / 90 cm may be substituted by gauze roll of smaller size.*
2.4	**39 18 14**	Non-adherent gauze dressing, square, 10 cm	*10*	*20*	*30*	*40*	Gauze dressing with non-adherent surface.
2.5	**39 18 15**	Paraffin gauze dressing, 10 × 10 cm, sterile	*40*	*40*	*40*	*40*	Vaseline gauze.

Medical First Aid Guide Dangerous Good List

Appendix 14
LIST OF MEDICINES AND EQUIPMENT

Preamble

1 Medicines and equipment already available in the ship's medicine chest may be counted towards the MFAG numerical requirements outlined below.
2 In some cases, alternatives are given. This means that one of the given alternatives should be chosen.
3 Not all drugs and antidotes on the list may be licensed as pharmaceutical specialities in all Member States and thus available for general purchase. In such cases, the national authorities may issue a modified list, also in English, where drugs on the below list not available are substituted with analogous drugs in corresponding quantities.
4 In countries with official lists on contents of ship's medicine chests, the national authorities can decide to substitute some of the drugs on the below list with analogous drugs available in the ordinary ship's medicine chest.
5 The recommended minimum quantities are based on an estimate of risk to persons on board and the time within which full treatment on shore can be given.
6 National authorities can decide on exemption from carrying these medicines for vessels making short regular voyages of ten minutes or less.

Labelling, storage and dispensing should, in general, conform to the relevant specifications in the IMGS. Contents and storage conditions should be checked at least once a year, taking account of manufacturers expiry date and instructions. Medicines used should be replaced as soon as possible.

Column A of the following table shows the recommended minimum requirements for ships when casualties **cannot** be hospitalized on shore within 24 hours.
Column B shows the recommended minimum requirements for ships when casualties can be hospitalized on shore within 24 hours.
Column C shows the recommended minimum requirements for ships when casualties can be hospitalized on shore within 2 hours.

	syringes				
39 19 43	2 ml	100	50	10	
44	5 ml	10	10	none	

- A minimum of 44 litres/200 bar oxygen of which there should be at least:
  - one complete portable set with 2 ltr/200 bar oxygen ready for use with a spare cylinder of 2 ltr/200 bar and
  - one oxygen cylinder of 40 ltr/200 bar (at ship's hospital, assembled for direct use) with one flowmeter unit (two ports) for supplying of oxygen for two persons at the same time. If more than one non-portable oxygen cylinder is used, there must be two flowmeter units for supplying of oxygen for two persons at the same time.

List of Recommended Medicines and Equipment by International Medical Guide for Ships - Second Edition

The following table was devised in accordance with the "List of Medicines" recommended for the ship's medicine chest in accordance with the regulations of the World Health Organization. The table is set up in the same way as the International Medical Guide For Ships (2nd edition) with a code number assigned to each medicine to make it quick and easy to determine what medicines are required on board, compare the ship's current inventory of medical supplies, and submit orders for the medications required. We have also provided some helpful information about prescribing the medication as well as notes of caution in the use of the medication.

"List of Medicines"

WHO Number	Medicine with the corresponding IMPA code number	Required inventory	Conditions for which the medication is prescribed with notes of caution for use
1.	Acetylsalicylic acid, 300 mg tablets, 100's (Common aspirin) **39 01 86**	6 btl.	For relief of aches and pains caused by illnesses such as influenza, a cold, and sinusitis. Also to relieve headaches, neuralgia, muscular aches, joint pains, and fever.
2.	Alcohol, rubbing (70% ethyl alcohol), 500 ml **39 01 30**	6 btl.	Used as an antiseptic to sterilize and disinfect the skin prior to injections or other surgical procedures.
3.	Aluminium acetate, ear drops, 13% solution in 20 ml bottle **39 06 03**	6 btl.	Used for treating a boil in the ear.
4.	Aluminium acetate powder, 2 grm packet, 12's **39 06 04**	2 box	For external use only. A solution/mixture used as a soothing, astringent wet dressing for inflamed or exposed areas of the skin. Effective remedy for insect bites, poison ivy, or fungal infections such as athlete's foot. CAUTION : Keep away from eyes. Do not give internally.
5.	Aluminium hydroxide gel with magnesium hydroxide, 360 ml **39 06 05**	6 btl.	Used in treating gastric hyperactivity and peptic ulcer, acid ingestion, or sour stomach.
6.	Aluminium hydroxide w/magnesium hydroxide, 1 grm tablets, 100's **39 06 06**	10 btl.	Used in the same way as the oral suspension.
7.	Aminophylline suppository, rectal 500 mg, 12's **39 06 07**	2 box	To facilitate breathing in patients who have bronchial asthma, asthmatic bronchitis, pulmonary emphysema, and certain types of heat failure. Give only on radio medical advice. (Refrigerate)
8.	Amitriptyline tablets, 25 mg, 100's **39 06 08**	1 btl.	A psychotherapuetic drug used in the treatment of depression and anxiety. To be prescribed only after obtaining radio medical advice. Not to be given to people with a history of seizure, urinary retention, glaucoma, liver disease, or to patients with cardiovascular complications.
9.	Ampicillin capsules, 250 mg, 100's **39 01 38**	3 btl.	For chest infections, urinary and gastrointestinal infections, and infections of the tonsils and throat. Give only upon radio medical advice from a physician. Persons allergic to penicillin should be assumed to be allergic to ampicillin and should not receive this medication.

(to be continued)

WHO Number	Medicine with the corresponding IMPA code number	Required inventory	Conditions for which the medication is prescribed with notes of caution for use
10.	Antihaemorrhoidal suppositories, 12's **39 06 10**	6 box	For temporary relief of itching, burning, and soreness from haemorrhoids.
11.	Ascorbic acid tablets (vitamin C), 50 mg, 100's **39 05 44**	3 btl.	For the treatment and prevention of colds.
12.	Atropine sulfate injection, 0.5 mg/ml, 1 ml ampoules, 10's **39 06 12**	6 box	Used as an antidote in the treatment of poisoning by insecticides. Do not administer this drug before obtaining radio medical advice.
13.	Benzathine benzylpenicillin injection, 2.4 million unit/5ml vial **39 06 13**	20 pcs.	Used as an antibiotic, particularly for the treatment of syphilis. Before administering any penicillin preparation, determine if the patient is allergic to penicillin.
14.	Benzoic and salicylic acid ointment, 30 grm tube **39 01 96**	2 pcs.	Used in treating fungal infections of the skin. For external use only.
15.	Calamine lotion, plain, 120 ml. **39 02 20**	8 btl.	For the relief of itching or irritated skin, heat rashes, and hives. Do not use on open or seething sores.
16.	Calcium gluconate, effervescent tablets, 1 grm, 30's **39 06 16**	1 box	Used primarily in cases of poisoning by oxalic acid or sodium fluoride.
17.	Cetrimide, 40% solution, 500 ml (disinfectant) **39 02 26**	3 btl.	Disinfectant for external use only. This stock solution should be diluted before use.
18.	Charcoal, activated, powder, 120 grm **39 06 18**	1 btl.	Used in the initial treatment of most poisoning. Should not be used on unconscious patients because of the danger of the aspiration of the powder.
19.	Chloroquine phosphate tablets, 250 mg, 100's **39 06 19**	1 btl.	To prevent and treat malaria.
20.	Chlorphenamine maleate tablets, 4 mg, 20's **39 06 20**	3 btl.	For treating allergic reactions such as hay fever, urticaria, and anaphylactic shock. Do not give to patients with a history of glaucoma.
21.	Chlorphenamine maleate injection, 10 mg, 1 ml ampoules, 10's **39 06 21**	2 box	See previous item.
22.	Chlorpromazine hydrochloride tablets, 25 mg, 20's **39 06 22**	4 btl.	For treating anxiety, tension, and agitation.
23.	Chlorpromazine hydrochloride injection, 25 mg in 1 ml ampoules, 10's **39 06 23**	2 box	Same as for chlorpromazine tablets.
24.	Clove oil, 20 ml **39 05 14**	2 btl.	For the relief of toothaches caused by cavities.
25.	Codeine sulfate tablet 30 mg, 100's Controlled substance **39 02 34**	1 btl.	Used to relieve coughing or diarrhoea. WARNING: A controlled substance. An exact record of its use must be kept.

(to be continued)

WHO Number	Medicine with the corresponding IMPA code number	Required inventory	Conditions for which the medication is prescribed with notes of caution for use
26.	Cyclizine hydrochloride tablet, 50 mg, 100's **39 06 26**	4 btl.	For relief of nausea, vomiting and dizziness associated with motion sickness.
27.	Dextran injection, 6% and sodium chloride, 0.9% 500 ml **39 06 27**	6 btl.	To expand plasma volume and maintain blood pressure in the emergency treatment of shock due to loss of blood. Give only on the radio medical advice from a physician. Only trained people can administer this drug intravenously.
28.	Diazepam injection, 5 mg/ml, 2 ml ampoule Controlled substance **39 06 28**	20 pcs.	For treatment of severe agitation, including acute alcohol withdrawal states and convulsions. CAUTION : The injection should be given only on medical advice. This is a controlled substance. Keep an exact record of its use and keep stored in a locked cabinet.
29.	Diazepam tablets, 5 mg, 100's Controlled substance **39 04 62**	2 btl.	For the treatment of common anxiety and tension, and the management of agitation during alcohol withdrawal. Same precautions must be taken with the use of the tablets as the injections above.
30.	Dimercaprol injection, 100 mg in 2 ml ampoules, 10's **39 06 30**	6 box	Used as an antidote in poisoning from arsenic (pesticides), gold, and mercury. Always obtain radio medical advice in the event of such poisoning.
31.	Doxycycline hydrochloride tablets, 100 mg, 100's **39 06 31**	2 btl.	Antibacterial agent used in the treatment urinary infections.
32.	Ephedrine sulfate tablets, 25 mg, 100's **39 03 06**	1 btl.	To regulate breathing in asthma attacks, prevent asthma attacks for chronic asthma cases, and to relieve nasal congestion in hay fever and severe head colds. Obtain radio medical advice before using this drug. This drug should not be given to patients with chronic heart disease, high blood pressure, glaucoma, diabetes, or hyperthyroidism.
33.	Epinephrine hydrochloride injection, 1:1000, 1 ml ampoules 10's **39 06 33**	2 box	1. For acute asthma attacks and severe allergic reactions to penicillin and other drugs, and insect bites. 2. For cardiac or circulatory failure.
34.	Ergometrine maleate injection, 0.2 mg, in 1 ml ampoules, 10's **39 06 34**	1 box	Medicine administered to the mother after delivery of an infant, contracts the womb and reduces the risk of haemorrhaging.
35.	Erythromycin tablets, 250 mg, 100's **39 06 35**	3 btl.	Used for the treatment of a variety of infections of the upper and lower respiratory tract; infections of the mouth, gums, and teeth, ears, nose and sinuses.
36.	Eye anaesthetic drops, 0.5% solution of tetracaine hydrochloride, 10 ml **39 03 12**	2 btl.	For local anaesthetic of the eye before foreign particles are removed. For external use.
37.	Eye antiinfective drop, 1% solution of chloramphenicol, 10 ml **39 06 37**	3 btl.	For treating infectious eye diseases (blepharitis, conjunctivitis).
38.	Eye ointment, 1% tetracycline hydrochloride, 4 grm. tube **39 06 38**	6 pcs.	For superficial eye infections, trachoma, inflammation of the eyelids and tear sacs, and prevention of eye infection in injured eyes.
39.	Eyewash, isotonic, sterile, 120 ml **39 03 16/17**	6 btl	For irrigating or flushing the eye to wash away foreign particles, mucous secretions, and fluorescein die used in diagnosis.

(to be continued)

WHO Number	Medicine with the corresponding IMPA code number	Required inventory	Conditions for which the medication is prescribed with notes of caution for use
40.	Fluorescein sodium ophthalmic strip, sterile, 200's **39 06 40**	1 pkt	Used for the detection of lesions or small foreign bodies embedded in the cornea of the eyeball.
41.	Furosemide tablets, 40 mg, 100's **39 06 41**	1 btl.	A potent, short acting diuretic which causes the production of urine by affecting the kidneys. This drug is to be used only after getting radio medical advice.
42.	Glyceryl trinitrate tablets, 0.5 mg, 20's **39 03 30**	2 btl.	For an acute attack of angina pectoris.
43.	Hydrocortisone sodium succinate for injection 100 mg. **39 06 43**	5 vials	For use on medical advice only. 1. For severe shock. 2. For acute allergic reactions. 3. For the control of life threatening inflammation of the lungs after a patient has inhaled vomit.
44.	Hydrocortisone ointment, 1%, 30 grm tube **39 06 44**	6 pcs.	For temporary relief of certain skin disorders, common rashes, inflamed skin, and disorders causing itching and discomfort. WARNING : Do not apply to the eyes. Do not use for extended periods of time without a physicians order.
45.	Ichthyol & glycerine ointment, in 100 grm container **39 06 45**	3 pcs.	For treatment of boils, fishermen's hand infections, salt water boils, etc.
46.	Insect repellent, 50 ml **39 03 52**	12 btl.	External use only. Repels mosquitos, chiggers, flies, and other biting insects. Do not apply near the eyes, nose, or mouth.
47.	Iodine, 2.5% solution in 100 ml bottle **39 05 10**	4 btl.	For external use only. For disinfecting the skin against round worms and for the treatment of small cuts and skin bruises to prevent infection.
48.	Lidocaine hydrochloride injection 1%, 2 ml ampoule **39 06 48**	12 pcs.	For use as a local anaesthetic in minor surgical procedures.
49.	Lindane cream, 1%, 6 grm tube **39 06 49**	12 pcs.	For infestations of scabies and lice. For external use only.
50.	Magnesium hydroxide suspension, 550 mg/10ml, 500 ml **39 06 50**	8 btl.	For use as a laxative. Never give magnesium hydroxide suspension to a patient with abdominal pain without first consulting a doctor.
51.	Metronidazole tablets, 200 mg, 100's **39 06 51**	5 btl.	For the treatment of salpingitis and other diseases of women and the treatment of amoebic dysentery.
52.	Miconazole nitrate, 2%, vaginal cream, in 80 grm container **39 06 52**	5 pcs.	For the treatment of external vaginal itching.
53.	Miconazole nitrate, 100 mg, pessary and inserter **39 06 53**	20 pcs.	Like miconazole vaginal cream, in genital itching.
54.	Mineral oil (liquid petrolatum) 500 ml **39 06 54**	1 btl.	Used as a skin emollient or protective agent. Also used to help remove ointments or creams from treated skin areas.

(to be continued)

WHO Number	Medicine with the corresponding IMPA code number	Required inventory	Conditions for which the medication is prescribed with notes of caution for use
55.	Morphine sulfate injection, 10 mg/ml, 1 ml ampoules, 10's Controlled substance **39 03 90**	2 box	For severe pain which cannot be relieved by analgesics. Obtain medical advice prior to use. Caution : An addiction producing drug. Do not give morphine unless the radio medical doctor has instructed you to do so.
56.	Naloxone hydrochloride injection, 0.4 mg/ml, 1 ml ampoules **39 06 56**	6 pcs.	For the emergency treatment of respiratory depression resulting from the administration of narcotics, such as morphine.
57.	Neomycin and bacitracin ointment, 30 grm tube **39 06 57**	20 pcs.	Used in the treatment and prevention of infection in second and third degree burns.
58.	Oral rehydration salts in water-proof bags **39 06 58**	50 pcs.	For the treatment of diarrhoea and other diseases causing dehydration.
59.	Oxygen, size E tank **33 04 01/03** 7222 D. F	2 pcs.	To make up for the lack of oxygen in the blood and tissues, the symptoms for which are cyanosis (bluish colour to the skin and nail beds), dyspnoea (rapid shallow breathing), rapid thready pulse, and restlessness. Only trained personnel should administer oxygen. The use of oxygen presents an explosion hazard.
60.	Paracetamol, 500 mg tablet **39 06 60**	300 pcs.	To relieve pain and fever.
61.	Petrolatum, white, 60 grm tube **39 04 72**	6 pcs.	Used as a bland and neutral protective dressing for minor burns, abrasion, and dry skin.
62.	Phenobarbital tablets, 30 mg, 100's Controlled substance **39 04 42**	3 btl.	1. For insomnia. 2. For relatively prolonged sedation, as in some anxiety and tension states and in hypertension. 3. For the treatment of epilepsy. Patients using this drug should not drink alcohol.
63.	Phenoxymethylpenicillin potassium tablets, 250 mg, 100's **39 04 38**	3 btl.	Used for susceptible infections. Give on radio medical advice only. Before administering any penicillin preparation, determine, if possible, whether the patient is allergic to penicillin.
64.	Pilocarpine hydrochloride eye drops, 2%, 15 ml **39 06 64**	2 btl.	Used for the management of glaucoma.
65.	Potassium permanganate, 100 grm. **39 06 65**	2 btl.	Diluted in water, this substance is used for the disinfection of the skin and mucous membranes and for the treatment of some skin diseases. For external use.
66.	Probenecid tablets, 500 mg, 100's **39 06 66**	2 btl.	Used along with intensive therapy with benzylpenicillin, with ampicillin, and a number of other penicillins for prolonging the effective blood concentration of these drugs.
67.	Procaine benzylpenicillin, sterile suspension injection, 600,000 units/ml, 1 ml vials, 10's **39 06 67**	2 box	To be given only upon the radio medical advice of a physician. Used for susceptible infections. Before administering any penicillin preparation, determine, if possible, whether the patient is allergic to penicillin.
68.	Proguanil tablets, 100 mg, 100's **39 06 68**	1 btl.	For the prevention of malaria. Given either alone or in association with chloroquine.

(to be continued)

WHO Number	Medicine with the corresponding IMPA code number	Required inventory	Conditions for which the medication is prescribed with notes of caution for use
69.	Pyrantel tablets, 250 mg, 50's **39 06 69**	1 btl.	For the treatment of ringworm and roundworm infections.
70.	Quinine sulfate tablet, 300 mg, 100's **39 06 70**	2 btl.	Used for the treatment of acute attacks of malaria contracted in certain areas. Quinine sulfate may produce toxic symptoms such as ringing in the ears or sensation of fullness in the head.
71.	Quinine dihydrochloride, injection, 300 mg/ml, 2 ml ampoule, 10's **39 06 71**	2 box	For use in the treatment of acute attacks of malaria when the patient is unable to tolerate oral medication because of repeated vomiting or impairment of consciousness.
72.	Salbutamol, aerosol inhaler unit **39 06 72**	2 pcs.	An inhaled spray used for the relief of bronchial asthma.
73.	Sodium chloride injection, 0.9%, 1,000 ml **39 06 73**	6 btl.	Used intravenously to replace water, chloride, and sodium lost in excessive vomiting or diarrhoea, in dehydration due to excessive sweating, and in mild haemorrhage. Obtain radio medical advice before administering.
74.	Sodium chloride tablet, 1 grm, 1,000's **39 04 58**	2 btl.	Used to help avoid heat exhaustion, heat stroke, or heat cramps by replenishing body salts lost through excessive perspiration.
75.	Spectinomycin hydrochloride injection, 2 grm per 5 ml vial. **39 06 75**	20 pcs.	Used for the treatment of gonorrhoeal urethritis and proctitis in men and gonorrhoeal cervicitis and proctitis in women.
76.	Sulfamethoxazole & trimethoprim (400 + 80 mg) tablets, 20's **39 06 76**	10 btl.	For the treatment of urinary infections.
77.	Talc (talcum powder) 120 grm **39 06 77**	6 cans	Used as a skin lubricant and protector, and as a dusting powder for such skin irritations as chafing and heat rash.
78.	Tetanus immune human globulin, 250 units, vial **39 06 78**	5 pcs.	To provide immunity to tetanus in a patient who has not received vaccination and has a potentially contaminated wound. This drug should be carried only on ships transporting horses, cattle, and hides.
79.	Tetanus toxoid adsorbed, single dose, ampoule **39 06 79**	10 pcs.	For active immunization against tetanus.
80.	Tetracycline ear drops, 1% tetracycline solution, 10 ml **39 06 80**	10 btl.	For use in the treatment of ear infections.
81.	Tetracycline hydrochloride capsules, 250 mg, 100's **39 06 81**	3 btl.	For use in treatment of susceptible infections. To be given only after receiving radio medical advice.
82.	Water, sterile, 5 ml ampoules, 10's **39 06 82**	3 box	To dissolve penicillin in powder form.
83.	Zinc oxide paste, 30 grm tube **39 06 83**	12 pcs.	A non-toxic, protective, water insoluble, mildly astringent, and antiseptic paste employed in a large variety of diseases and irritations of the skin.

The following list comprises the required inventory of surgical equipment, instruments, and supplies for ocean going vessels in accordance with the provisions of the WHO International Medical Guide for Ships (2nd edition). All required equipment is listed with the standard inventory and a code number for easy stocking of the items.

Equipment

WHO Number	CODE	Description	Quantity required
1.	**39 13 16**	Basin, emesis, kidney shape	1 pc.
2.	**39 12 06**	Basin, wash, with rim	1 pc.
3.	**39 12 08**	Bedpan	1 pc.
4.	**39 12 33**	Cane, with rubber tip	1 pc.
5.	**39 12 32**	Crutches, adjustable, wood, with rubber tip	1 pr.
6.	**39 12 46**	Eye cup	2 sets

Medical Stores required for United Kingdom Merchant Ships and Fishing Vessels

The Merchant Shipping and Fishing Vessels (Medical Stores) Regulations 1995 SI No.1802 (as amended 1996 SI No.2821)

Medical Stores Categories

The categories of vessels and the consequent requirements for medical stores and equipment are set out in the directive and the implementing legislation. The vessel categories are ;

Category A : Sea going or sea-fishing vessels with no limitation on length of trips.

Category B : Sea going or sea-fishing vessels making trips of less than 150 nautical miles from the nearest port with adequate medical equipment. This category is extended to seagoing or sea-fishing vessels which make trips of less than 175 nautical miles from the nearest port with adequate medical equipment and which remain continuously within range of helicopter rescue services.

The requirements and recommended stores are set out in the following schedules.
Schedule 1 : Requirements for Categories A and B vessels.
Notes on schedule 1 : Requirements for categories A and B.
in the attached schedule the columns are as follows :

* Column 1 is the reference number in the EC Directive 92/29. This is included for identification of treatments when seeking or receiving radio medical advice from any European Community Member State.

* Column 2 is the treatment which must be available to comply with the Regulations.

* Column 3 is the medicine and dosage strength which MSA considers best complies with the statutorily required treatment. Owners and operators may substitute exact equivalents on the advice of a qualified medical practitioner or pharmacist, provided they are satisfied that an equivalent level of treatment is assured.

* Column 4 is the quantity of medicine/equipment considered sufficient to provide treatment for a crew of 10 persons or 10 persons in a lifeboat or life-raft.

* Drug supplies should be replenished wherever possible at the same strengths as specified in the British Pharmacopoeia. If drugs are obtained elsewhere, e.g. in the U.S.A., they may be of different strength, and this must be taken into account when administering them.

* The medicines have been chosen to ensure that they can be purchased at minimum cost. However if, for operational reasons, an alternative packaging is preferred this is acceptable. e.g. the use of the word "ampoule" should not exclude the use of a pre-filled syringe where available and preferred.

MEDICAL SUPPLIES

For any items marked * the specified quantity is considered sufficient regardless of crew size.

5	**Equipment for injection, perfusion, puncture and catheterization**				
	Bladder drainage instruments	**39 20 41**	Bladder drainage set(including bag, spigots and tube)	1	-
	Rectal drip set	**39 20 42**		1	-
	Disposable filter infuser	**39 20 43**	Integral in UK equipment. Foreign produced items may require a separate filter	if Reqd	if Reqd
	Urine drainage bag		Use bladder drainage set	Use 5 (1)	Use 5 (1)
	Disposable syringes and needle	**39 20 44**	2ml, 5ml, 10ml, quantities of each size	6	3
	Catheter	**39 20 45** **46** **47**	1) Foley type 16, Charriere guage, 5ml balloon(Short/medium term use in adults) 2) Nelaton size 16 Charrire guage (with no balloon) 3) Penile sheath set	1 1 1	- - -
6	**General Medical Equipment**				
	Bedpan	**39 20 48**	(stainless steel or sterilisable plastic)	1	-
	Hot water bottle	**39 20 49**	with fabric cover	1	-
	Urine container	**39 20 50**		1	-
	Icebag	**39 20 51**		1	-
7	**Immobilization and setting equipment**				
	Malleable finger splint	**39 20 52**		1	1
	Malleable forearm and hand splint	**39 20 53**		1	1
	Inflatable splints	**39 20 54**	Set of four(half-leg, full leg, half arm, and full arm)	1	1
	Thigh splint	**39 20 55**		1	1
	Collar for neck immobilisation	**39 20 56**	(Adult size set of 3, small, medium and large)	1	1
	Thomas splint	**39 20 57**		1	-
8	**Disinfection, Disinsectization and Prophylaxis**				
	Water-disinfection compound	**39 20 58**	In liquid form - litres	5	-
	Liquid insecticide	**39 20 59**	In liquid form - litres	5	-

REQUIRED ADDITIONAL EQUIPMENT

	Required Equipment	CODE	A	B
	First Aid Kits - Vessels with a crew of more than 10 should carry first aid kits to be distributed in appropriate locations on the ship e.g. in the galley and engine room.(For passenger vessels see Schedule 3) The kit should include the following items to be kept in a portable waterproof container. (1) 4 x triangular bandages (90cms × 127cms base) (2) 6 x standard dressings no.8 or 13 BPC (3) 2 x standard dressings no.9 or 14 BPC (4) 2 x extra large unmedicated dressings, 28 cms ×17.5 cms (5) 6 medium safety pins, rustless (6) 20 assorted elastic adhesive dressings medicated BPC (7) 2 x sterile eye pads with attacthment (8) 2 x packeges containing 15 grammes sterile cotton wool (9) 5 pairs large size disposable polythene gloves	**39 20 60**	3 max	3 max
	Recommended additional equipment			
	Face masks disposable	**39 20 61**	6	6
	Plastic measuring jug 1/2 litre size	**39 20 62**	1	1
	Disposable paper towels	**39 20 63**	100	100
	Latex gloves surgical quality - sterile(large)	**39 20 64**	5 prs	5 prs

(to be continued)

	Required Equipment	CODE	A	B
	Waterproof plastic sheeting, size 1 m x 2 m	**39 20 65**	2	2
	"Sharps" disposal box	**39 20 66**	1	1
	Lotion bowl (Size at least 200 mm x 90 mm, stainless steel or sterilisable plastic, to be marked "medical"	**39 20 67**	1	-
	Kidney dish (Size 250 mm stainless steel or sterilisable plastic)	**39 20 68**	1	-
	Safety pins, rustless medium	**39 20 69**	6	6
	Magnifying glass 7.5 cm diameter on handle	**39 20 70**	1	1
	Nail brush	**39 20 71**	1	1
	Stretcher equipment (A system for trauma management, i.e. immobilisation and stretcher equipment most suited for treatment on the vessel concerned).	**39 20 72**	1	-
	Baby bag - Large size	**39 20 73**	1	1
	Vessels in malarial areas only Microscope slides in individual transit containers	**39 20 74**	5	5
	1) Excavator double ended Guys' pattern G2 2) Filling paste inserter (for inserting filling paste into the tooth) 3) Dental mirror size 4 on handle 4) Cavit (temporary dental filling) tube	**39 20 75**	1 set all items	-
	Kit for protection against blood transmitted diseases (to be carried in all vessels trading in known malarial areas and in areas where medical facilities are limited and emergency shore based treatment is necessary). To be kept in a heavy gauge polythene bag, and labelled "to be used only for the treatment of ..." (insert the name of the seafarer going ashore for emergency treatment) Each kit to contain the following: (1) 10 x 2 ml syringes (2) 10 x10 ml syringes (3) 20 xx 21 swg 0.8 mm needles (4) 1 blood giving set (5) 1 blood taking set (6) pack of pre-injection site swabs (7) Disposable plastic gloves 2 prs. (large size)	**39 20 76**	1	-

Medicines

The medicines and medical equipment required on board ocean going commercial and passenger vessels are available below as outlined by the World Health Organization and the Merchant Shipping Notice for United Kingdom merchant ships and fishing vessels on medical precautions. The medications and equipment are available in a complete medical chest set or individually where they may be required. In addition, some more commonly used medications have also been provided for everyday minor ailments.

Whenever using or prescribing medications always be sure to follow the respective instructions carefully.

WHO Medical Chests

Medicines and medical equipment in accordance with WHO (World Health Organization). International Medical Requirements for ocean going vessels without a doctor aboard. The quantities of medicaments are based on an estimated 6-month inventory for a crew complement of 25-40 persons.

39 01 11	WHO Medical Chest, capacity for 25 - 40 persons	Set

Medical Stores required for United Kingdom Merchant Ships and Fishing Vessels

The Merchant Shipping and Fishing Vessels (Medical Stores) Regulations 1995 SI No.1802 (as amended 1996 SI No.2821)

The United Kingdom implemented the requirements of Council Directive 92/29/EEC which sets out minimum standards for ships' medical stores by introducing the Merchant Shipping and Fishing Vessel (Medical Stores) Regulation 1995, as amended by the Merchant Shipping and Fishing Vessel(Medical Stores) Amendment Regulations 1996.

The requirements for medical stores set out in M1607 and M1608 have been reviewed and are replaced by this Notice.

39 01 06	Medical stores required for U.K. merchant ships and fishing vessels, Regulation 1995 SI No. 1802 Category A	Set
39 01 07	Medical stores required for U.K. merchant ships and fishing vessels, regulation 1995 SI No. 1802 Category B	"

The following list of medical supplies and medications are those which may not be included in the World Health Organization or DTI medical lists for ocean going vessels but which are used commonly on ships for mild illnesses and injuries. A variety of the more popular over the counter medicines are listed with their uses and code numbers for easy referencing.
